Table of Contents

Accounting Information Systems
Computer Reservation Systems Auditing Headaches in the Airline Industry
Evon Abu-Taieh ................................................................. 833
Activity-Based Costing: An Analysis of Indian Scenario
Parvinder Arora, K.C. Singhal and A.S. Chawla ............................. 973
Comparing Different Methods in Analytical Procedures Using Real World Data
Eija Koskivaara ................................................................ 661
An Investigation into Balanced Scorecard Implementation in Australian Companies
Monir Zaman .................................................................. 694

Business Process Management Tools and Technology
Realignment Public Administrations with the Concept of Electronic Government—How to Prepare Process Oriented Reorganization Projects
Lars Algermissen ................................................................ 93
Managing the Information System Evolution: The Microelectronics Case Study
Julie Chapron, Xavier Boucher, Pierre Lebrun .............................. 1275
Extreme Modeling—Less is More
Marie-Therese Christiansson and Benneth Christiansson .................. 1050
Business Specific Interaction at Run-time
D. Faure, O. Grisvard, S. Praud and C. Sedogbo ............................. 1432
Towards Business Event-Driven Information Systems Integration
Sonia Lippe, Wasim Sadiq and Karsten Schultz .............................. 1147
Configurative Process Modeling—Outlining an Approach to Increased Business Process Model Usability
Jörg Becker, Patrick Delfmann, Alexander Dreiling, Ralf Knackstedt and Dominik Kuroptka .................. 615
VERBUS: A Formal Model for Business Process Verification Jesús Arias Fisteus, Andrés Marín López and Carlos Delgado
Kloos ............................................................................... 238
Modeling of Knowledge Intensive Business Processes with the Declaration Language KMDL
Norbert Gronau and Edzard Weber ........................................... 284
Framework of Strategy and Business Process Driven IT-Infrastructure
Oener Guengoz, Christian Seel and Santosh Misra ................................ 1326
A Generic Approach for Modelling Business Processes in BPR (Business Process Reengineering) Projects
Leila Jamel Menzli, Sonia Ayachi Ghannouchi and Henda Hadjami Ben
Ghezala ............................................................................. 1372
Business Process Modeling for Developing Process Oriented IT Systems
Selmin Nurcan .................................................................. 607
Business Process-Driven Information Requirements Engineering
Joerg Becker, Christian Brelage, Alexander Dreiling and Michael Ribbert ...................................................... 352

Modeling the Relationship Between Business Models and System Functionality with Maps
Rim Kaabi and Anne Etien .................................................... 453
Can Business Process Changes be Cheaper Implemented with Workflow Management Systems?
Niko Kleiner ...................................................................... 529
Enterprise Modeling and Organizational Learning: An Interpretive Study
Joo Eng Lee-Partridge and David Y.F. Law (Deceased) ...................... 119
An Enterprise System for Managing the Support of Organizational Performance
Scott P. Schaffer and Ian Douglas ............................................. 513
Business Process Management: Attempted Concepticide?
Hajo A. Reijers and Stefan Heusinkveld .................................... 128
Exploiting the Goal Concept for Agent’s Intervention Reasoning
German Urrego-Giraldo ......................................................... 705
Addressing Agent Autonomy in Business Process Management—with Case Studies in the Patient Discharge Process
Luiz Marcio Cyneiros and Eric Yu .......................................... 436
Engineering the Fitness Relationship Between ERP and the Supply Chain Process at SNCF
Tyad Zoukar and Camille Salinesi ............................................. 357
Business Process Modeling: A New Corporate DNA Based Approach
Roberto Palano, Andrea Pandurino and Mario Valvo ...................... 1360

Computer Aided Software Engineering
Computer Simulation with Enhanced Three-Phase Modeling
Using the Activity Cycle Diagram
Evon Abu-Taieh .................................................................. 1314
Towards the Fused Bayesian-Regularization Method for Computer-Aided Enhancement of the Remotely Sensed Imagery
Yuriy V. Shkvarko and José Luis Leyva-Motiel ............................ 815
Aggregated Maximum Entropy Variational Analysis Method for Magnetic Resonance Imagery
L.J. Morales-Mendoza, Y.V. Shkvarko, R.F. Vázquez-Bautista and J.L. Ponce-Dávalos ................................. 818
Applications Development with Web Services
Vincent C. Yen .................................................................. 875
One Method for Design of Lowpass Narrowband FIR Filters Using Sharpened RRS Filter
Gordana Jovanovic-Dolecek, Vlatko Dolecek and Isak Karabegovic .............................................................. 1231
One Simple Method for Design of Multiplierless FIR Filters
Gordana Jovanovic-Dolecek, Maria M. Alvarez and Marcos A. Martinez ...................................................................... 593

Data Warehousing and Mining
LSC-Mine: Algorithm for Mining Local Outliers
Malik Agymang and Christie I. Ezeife ....................................... 5
Comparing CRM-based Data Mining and Collaborative Filtering as E-Commerce Strategic Tools
Nikhilesh Dholakia, Jounghae Bang, Lutz Hamel and Ruby Roy .............................................................. 1064

Copyright © 2004, Idea Group Inc. Copying or distributing in print or electronic forms without written permission of Idea Group Inc. is prohibited.
Data Mining: A Retrospective Analysis
Eric Kyper, Scott J. Lloyd and Susan Chinn .......................... 1143

Data Mining: Descriptive Model for Intrusion Detection Systems
Mariana Hentea .................................................................. 118

Discovering Behavioral Traversal Patterns of Users of Streaming Information Systems
Ajumobi Udechukwu, Ken Barker and Reda Alhaji .................. 167

Knowledge Discovery in Data Warehouse Environment
M. Mehdi Owrang ................................................................ 159

The Role of Data Warehouses in Support of Organisational Requirements of Strategic Marketing Information
Neil F. Doherty and Graham Doig ......................................... 487

Data Mining and its Applications
Srinivas Rao Madhisetty ....................................................... 1120

Personal Data Warehouse: Can It Yield a Return?
Sree Nilakanta and Dhananjay Shrikhande .............................. 1233

Distributed Data Mining and its Applications to Intelligent Textual Information Processing
Shibin Qiu and Mei Qiu ....................................................... 366

Financial Instrument Bus Architecture for Data Warehousing
Shahriar Movafaghi and Hassan Pournaghshband ................. 1075

Database Management Technologies
Individualized Student Database Projects and How to Assess Them
Jeanne Baugh ................................................................. 1220

Constructing Signature Graphs for Signature Files
Yangjun Chen and Yibin Chen ........................................... 690

The Impact of Call Level Interface Concepts in the Web Environment – Investigating Core Procedures and Similarities inside SQL/CLI92/99 Specification with the Focus on Database Performance Optimization
Juergen Seitz and Tino Jahnke ............................................. 1225

A Native XML Databases Framework For SMEs
Ric Jentzsch and Deane Larkan .......................................... 138

Decision Support Technologies
Predictive Investor Relations as an Innovative Research Area for Technology Based Decision Support
Bernard Gehra, Peter Gentsch and Thomas Hess ..................... 1025

Taking Advantage of the Integration of Data Warehouses and Knowledge Management Systems
Liane Haak ........................................................................ 1069

Relevance Judgment: An Integrated Framework for Understanding of Multidimensional Constructs
Jinwon Ho ......................................................................... 83

A Decision Support System for Technology R&D Planning: Connecting the Dots from Information to Innovation
Jeffrey H. Smith, Julie Wertz and Charles Weissin ................. 603

A Framework for Real Time Decision Support
Chiu-Che Tseng .................................................................. 225

DMSS in Support of E-business Strategies
Fen Wang, Guiseppe Forgione and Lidan Ha ......................... 1040

Testing and Evaluation of a Military Medical Decision Support System
James Rodger and Parag C. Pendharkar ................................ 385

Distance Learning Technologies
The Effects of Live Problem Solving in an Internet Based Mathematics Tutorial System
Eshaa Alkhalifa ................................................................. 871

Digital Video Instruction: Strategies and Examples for Large Scale Delivery
Kemal Cakici and Katia Passerini ......................................... 1097

Automated Evaluation of Students’ Performance by Analyzing Online Messages
Xin Chen and Yi-fang Brook Wu ........................................... 61

Student Perceptions of Asynchronous Versus Synchronous Communication in a Technology-Enhanced Learning Environment
Jay M. Lightfoot ............................................................... 87

A Helpdesk-System for the Processing of Students’ Requests in a Distance Learning Environment
Conny Kühne, Daniel Pauer and Claus Rautenstrauch ............. 498

Web Based Teaching and Learning: Two Swiss Examples
Nicoletta Sala ..................................................................... 808

Distance Learning at Grambling State University, LA, USA Problems and Prospects: a Case Study
Sunil G. Samanta .............................................................. 1324

Diversity in Information Technology
Understanding the ‘Mommy Tracks’: A Framework for Analyzing Work-Family Issues in the IT Workforce
Jeria L. Quesenberry, Allison J. Morgan and Eileen Trauth .......... 135

The Demand and Supply of Minority Information Systems Doctorates: The Ph. D. Project Model
John Warren, Victor W. Mbarika, Sonja Wiley-Patton and Alisha D. Malloy ............................................. 1080

Building a Community of Information Technology Women On-Line
Mara Washburn and Julie R. Mariga ..................................... 1357

E-Collaboration
Jurisdiction in B2C E-Commerce Redress
Ong Chin Eang ................................................................. 743

Facilitating Collaboration for the Construction Industry: Designing an Appropriate Interface
Michael Er and Robert Kay ............................................... 432

Enhancing Presence Awareness in Instant Messaging
David Del Vecchio and Dedric Carter .................................. 242

Cultural Diversity, Leadership, and Collaborative Learning Systems: An Experimental Study
John Lim and Yingqin Zhong .............................................. 882

Classification of IS Functionalities for Workplace E-Collaboration
David Mayrhofer and Andrea Back ..................................... 208

Leveraging Collaborative Technologies for Informal Learning: An Integrative Model to Assess Potential
Vikas Sahasrabudhe and Subhasish Dasgupta ......................... 1028

Adopting Web Services for B2B e-Collaboration: Research Directions
Susy S. Chan, Vince Kellen and Chitra Nair ......................... 1191

Youngjin Kim ................................................................. 108

Electronic Commerce Technologies Management
Trust in Electronic Commerce: From Social, Personal, and Technical Perspectives
Fahim Akhter ..................................................................... 1415

The Impact of Trust on the Technology Acceptance Model in Business to Consumer E-Commerce
Mary McCord and Pauline Ratnasingam .............................. 921

Copyright © 2004, Idea Group Inc. Copying or distributing in print or electronic forms without written permission of Idea Group Inc. is prohibited.
An Extended Model of E-Business Change Management
C.G. Ash and J.M. Burn .................................................. 580

Analyzing WTP (Willingness to Pay) for Online Contents
Seung Back, Hwasun Choi, Jungwoo Lee and Jinhwa Kim .................................................. 1300

Trust Factors in Consumer-To-Consumer Electronic Commerce
Chia-an Chao and Ayman Abuhamdieh .......................................... 1163

Platform for Privacy Preferences: An Innovative Technology and Standard in E-Commerce
Noushin Ashrafi and Jean-Pierre Kupilboer .......................... 448

A Dynamic Planning Model for E-Business Implementation
James Burn and Colin Ash .................................................. 557

Commitment and Trust on B2C E-Commerce
Edward T. Chen .......................................................... 394

Trends and Solutions in Virtual Enterprise Integration
Maria Manuela Cunha and Goran D. Putnik ........... 1423

Developing a Design Methodology for Control Procedures in E-Commerce: A Value Chains Perspective
Jorge Marx Gomez and Amir Safari .......................... 651

E-Commerce Security and Privacy: Managerial vs. Technical Perspectives
Timothy H. Greer and Mirza B. Murtaza ......................... 1399

A Critique: Factors Contributing to the Dotcom Failures
Kwang-Hoon Oh, Suttisak Jantavongso and Raymond Koon-Ying Li ........................................ 179

Trust Building in Internet Vendors: Comparison of New and Repeat Customers
Hee-woong Kim, Yunjie Xu and Joon Koh ................. 115

Sources of International Variation in E-Business Pattern and Potential: Insights from Technology Transfer Literature
Nir Kshetri .......................................................... 1289

Three Dimensions of the Current Digital Platform
Ping Lan .......................................................... 1283

Critical Factors Classification for Firm Adoption of E-Commerce
Hassan M. Selim and Moh'd A. Radaideh .............................. 698

Strengthening Customer Relations by Integrating E-Commerce Applications and Tools with an Existing Business
Alexander O. Rodriguez, Robert Mockler, Marc E. Gartenfeld and Dorothy Dologite ........................................ 1394

Research Project for E-Commerce Adoption, Acceptance, and Prototyping in Abu Dhabi
Moh'd A. Radaideh and Mohamed A. Al Neaimi ................ 378

Principles for Creating Web Sites: A Design Perspective
Manuela Aparicio, Lusocredito and Carlos J. Costa ....... 772

Innovation Through Service Oriented Computing and Web Services
Elisabetta Solidoro .................................................. 1141

Inducing Consumer Trust Online: An Empirical Approach to Testing E-Commerce Interface Design Features
Ye Diana Wang and Henry H. Emurian .................. 41

Semi-Automated Derivation of Personal Privacy Policies
George Yee and Larry Korba ........................................ 455

The Nature of Consumer Trust in B2C Electronic Commerce:
A Multi-dimensional Conceptualisation
Paul Sutherland and Felix B. Tan .................................. 611

End User Computing
The Use of End-User Preferences for Online Evaluation: Advanced Traveler Information System Assessment Tool
Tarun Abhichandani, Brian Hilton and Thomas Horan .................................................. 1183

An End-User Training Software Tool For Statistical Process Control:
An Information Systems Design Theory
Juan Manuel Gomez Reynoso and Lorne Olmsted ................. 459

ERP Training Effectiveness: A Filed Experience from a Higher Education Institution
Timothy Shea and Omar Khalil .................................. 1179

A Replication of the Post-Acceptance Model in the Context of E-Learning
Anne Mathisrud Sgrebs ........................................... 213

An Empirical Study Into the Effect of an Individual’s Learning Style on End-User Computer Satisfaction (EUCS): Taiwan
Sonya Hsu, Ramendra Thakur, J. Michael Pearson and Leon Cosby ........................................ 569

Enterprise Resource Planning
Enrichment of a Utility Ranking Methods Using Data Envelopment Analysis - A Case Study of an ERP Selection Problem
Edward W.N. Bernroider and Volker Stix .................................. 292

A Comparative Study of Factors Influencing ERP Systems Implementation Between a Developing Country and a Developed Country: Case Studies from Thailand and the USA
Penjira Kanthawongs and Fiona Fui-Hoon Nah .................. 1132

Aligning ERP and Business Strategy After Going Live
Pernille Krammergaard and Christian Koch .................. 1084

Employee Self Service: A Public Sector Implementation
Paul Hawking and Andrew Stein .................................. 1363

ERP Systems Training at a University: A Case Study
C. Christopher Lee and Joseph Bradley .................. 1061

ERP Systems Maturity and Competitive Advantage
Donaldo de Souza Dias and Renato Santos de Souza ........ 165

An ERP System Based on Peer-to-Peer-Networks and Web Services
Jorge Marx Gómez, Oliver Krüger and Claus Rautenstrauch .................................................. 713

A Conceptual Framework of ES Implementation: Towards a Social Capital-based Knowledge Integration Perspective
Say Yen Teoh and Shan L. Pan .................................. 731

Change Management: The Real Struggle for ERP Systems Practices
Paul Hawking and Andrew Stein .................................. 877

Global IT Management
Email Overload: Tolerance Levels of Employees within the Workplace
Anthony Burgess, Thomas Jackson and Janet Edwards .................................................. 205

Capturing and Managing Electronic Knowledge: The Development of the Email Knowledge Extraction System
Thomas Jackson and Sara Tedmori .................................. 463

A Transition Framework for the Enterprise Globalisation Process
Yi-chen Lan .......................................................... 821

Reliability in Automated Evaluation Tools for Web Accessibility
Ashil M. Molinero .................................................. 1379

Marketing of Electronic Journals in Swedish Academic Libraries
Nasrine Olson, Katarina Engvert and Staffan Knutson .................. 1387

IT-Supported International Outsourcing of Software Production:
An Exploratory Case Study
Anicet Yalaho, Chunling Wu, Nazmun Nahar and Timo Käkölä .................................. 844
Dynamics of National IT Innovation and the Role of Institutions: The Case of Korean Broadband
Heejin Lee and G. Harindranath .............................................. 1293

Human Computer Interaction
An Empirical Investigation of Personal Innovativeness and Social Influence in the Technology Adoption Decision of Individual Professionals
Joyce Jackson, Mun Yi and Jae S. Park .................................. 1329

A Controlled Experiment to Evaluate the Reactivity and Usefulness of the Think-Aloud Tool
Amela Karahasanovic, Dag I. K. Sjöberg, Annita Fjuk, Richard Thomas ................................................................. 1033

The Behavioral Dimension of Technological Change: The Case of Client/Server
Eitel Lauria ............................................................................... 981

The Credibility of Online Messages: An Experimental Investigation of the Influence of Web-Design Factors
Celene Navarrete, Terry Ryan and Esperanza Huerta ................................................................. 1038

Evolving Usability Concept for Adaptive Web Site Design
Pen Wang ............................................................................... 1043

Evaluating the Evaluator: Modeling Systematic Data Analysis Strategies for Software Selection
Joanna Lumsden ..................................................................... 97

An Empirical Approach to Evaluate the Effects of Comparison Shopping Agents on Customer Satisfaction
Kamla Al-Busaidi, Juan Manuel Gomez Reynoso and Bengisu Tulu ................................................................. 1086

Human Side of IT
Multi-modal and Presence-Based Dialogs: Dramatic Improvement, or Sensory and Privacy Overload?
Jeff Ackerson and Kate Walser .............................................. 1066
Towards an Understanding of User Needs in Organising and Retrieving Photos from Personal Digital Collections
N. A. Ismail and A. O’Brien ...................................................... 1045

Styles of Cognition: Girls Learning Mathematics Women Choosing IT
Sue E. Kase ........................................................................... 1100

Impacts of IT on Human Behavior in Library Settings
Donna Evans and Jeffrey W. Merhout ...................................... 112

Enhancing ERP Usability
Wendy Lucas, Heikki Topi and Tamara Babaian ....................... 1211

A Research Design and a Methodological Approach to an Explanatory User Behavior Testing: Lessons Learnt
George Ditsa ........................................................................... 762

Creating Skill Catalogues for Competency Management Systems with KMDL
Norbert Gronau and Mathias Uslar ......................................... 288

Societal Transformation: Its Impact on Computer Usage in the Workplace
Michael B. Knight and J. Michael Pearson ............................ 332

End-Users Cognitive and Physical Moves in a Thesaurus-Enhanced Search Environment: The Effect of Subject Knowledge
Ali Shiri and Crawford Revie .................................................. 1344

A Portfolio Framework for IT Skills Management and Best IT Skills Sourcing Options
Makoto Nakayama and Norma Sutcliffe .................................. 1155

The Political Side of the Internet
Andrew Targowski ................................................................ 1335

Cross-Cultural Comparison of Web Searching Behavior
Anita Komlodi, Weimin Hou, Ronda Kessel, Tammy Riggs, Tracy Haidar, Hajnalka Jofoldi and Chris Liang ................................................................. 1169

Medical Information Systems Use In China: Organizational and Social Impact Factors
Yin Yang, Daniel Lorence and Amanda Spink ......................... 633

How to Find a Pragmatic Personality Model on Members in Software Engineering Teams
Thomas Grechenig and Wolfgang Zuser ................................ 1246

Proposed Study of End-User Perceptions Regarding Tablet PCs
Merrill Warkentin, Ernst Bekkering, Mark B. Schmidt and Allen C. Johnston ................................................................. 430

Information Ethics Issues
Online Privacy Statements: Are They Worth Reading?
Irene Pollach ........................................................................... 217

Is the Electronic Democracy to Blame for the Widening of the Digital Divide?
Braam van der Vyver ............................................................. 935

Information Security Management
Conceptual Model for Database Security Management Control
Kuan Chen and Cheng-chih Wang ........................................... 1297

Information Security in Electronic Medical Records: A Case Study with the User in Focus
Rose-Mhari dhifldt and Leena Ask ......................................... 345

The Secure and Authentic Recordkeeping in the MINERVA Student Information System of McGill University
Eun Park ............................................................................... 1216

SMs and Knowledge Requirements for Operating Hacker and Security Tools
Murray E. Jennex and Theophilus B.A. Addo ................. 276

Designing a Controlled Environment for the Simulation of an Enterprise Security Infrastructure
Jean-Philippe Labruyere and Linda V. Knight ...................... 29

Intrusion Tracking: A Challenge for Information and Security Management
Mahbubur R. Syed, Mohammad M. Nur and Robert J. Bignall ................................................................. 1321

IS Security Management Framework: A Comprehensive Life Cycle Perspective
Merrill Warkentin, Mark B. Schmidt, Allen C. Johnston and Matthew Boren ................................................................. 471

Computer Information Systems Threat Analysis on Security
Yi Li and June Wei ................................................................. 951

A Policy Translation Algorithm – Enabling any Hierarchical Key Assignment Scheme to Enforce Non – Hierarchical Access Policies
Jyh-haw Yeh ........................................................................... 171

Database Security: An Overview
Ali Selehnia ........................................................................... 467

Towards Better Key Exchange Performance in IPSec-Based VPns
Yongqing Han, Dorina C. Petriu and George Yee ............... 599

Multilevel Fusion-Based Intrusion Detection
Remco de Boer, Jan van den Berg and Wilco van Ginkel ................................................................. 375

An Energy Approach to Information System Stability Analysis
Randal Vaughn .................................................................... 977

A System for Computing Human Deception
Najib Saylani ........................................................................... 680
Information Security Governance: A Challenge for Senior Management
Rossouw von Solms .................................................. 1130

University Training in Information Security
Lech J. Janczewski ..................................................... 1003

Information Technology Education
Using Multimedia Instructional Materials to Assess the Validity of Imposing GPA Entrance Requirements in Colleges of Business: An Empirical Examination
Randy V. Bradley, Chetan S. Sankar, Howard R. Clayton and P.K. Raju .................................................. 1332

Field Experiences and Internship for the Novice
David D. Carbonara .................................................. 1150

Critical Theory and the Education of Information Technology Students
Donald Falconer ......................................................... 186

E-Learning and Quality University Environment: A Better Mix of Technology Based Learning and Administration with Traditional University Setting
MSD Fernando and ANW Dahanayake .............................. 1426

Teaching Business Students About the Management of IT: Matching Theory to Practice
Stephen Burgess and Gina Reyes .................................... 676

Post Graduate Electronic Commerce Specialisations: An Australian University Case Study
Stephen Burgess and Arthur Tatnall .................................. 791

Identifying the Critical Information Technology Skills, Functions and Business Intelligence Parameters Assessed by a Regional Corporate Community
Donald Caputo and Paul Kovacs .................................. 280

Research Methodology for a Professional Doctorate
Nick Lethbridge .......................................................... 1267

Web-Based Tutoring for Java™: Evidence of Rule-Governed Learning
Henry H. Emurian ..................................................... 20

Use of Open Source Software for Information Technology Education
Sudeep Mallick and S.V. Subrahmanya .......................... 1000

E-Recruiting Technology Investment for Fixed Recruiting Cost Reduction
In Lee ........................................................................ 717

Integrating Writing requirements into MIS Courses
Jeffrey W. Merhout ..................................................... 299

Technology and Student Achievement: A Study of Student to Computer Ratios and Student Achievement on the Pennsylvania System of School Assessment in the Pittsburgh Public School District
Lawrence A. Tomei ......................................................... 1111

Information Technology Certification: A Student Perspective
Tanya McGill and Michael Dixon ..................................... 302

Student Perceptions of Their Preparation to Take an Introductory Business School Computer Course and Its Effect on Structuring the Course
Karen S. Nantz .............................................................. 1254

Teaching Database Modeling Within the Constructs of an Undergraduate Research Grant
Barbara J. Nicolai, Chris Brinker and Brett Stauner ............. 1008

Embedding an Ethics Component in an Undergraduate Senior Project Class
Theresa A. Steinbach and Linda V. Knight ......................... 234

The Pending IT Management Void
