*Paper not available for publication.*
Mission Impossible: the Psychological Paradox for ICU-CCU Nursing, M.A. Gaudinski ............... 33

Any Nurse Can Prevent the Dehumanization of the CCU Experience, M.K. Cox ....................... 35

FAA AVIATION MEDICAL EXAMINER SEMINAR II

FAA Medical Certification Policy and Standards, A.W. Davisi ........................................ ........................... *

Ophthalmic Problems Affecting Pilot Ability to Fly, W.C. Blount ......................... ...................................... *

Examination of the Ear, Nose, and Throat, R.H. Wehr .................................................. *

Evaluation of Problem Medical Cases, A.W. Davis .................................................. *

TOXICOLOGY

Vestibular Function and Alcohol-Alcohol Determination in Blood and Endolymph, A.J. Greven, W.J. Oosterveld .................................................. 252

Effects of Congener and Noncongenor Alcoholic Beverages on a Clinical Ataxia Test Battery, D.J. Schroeder, W.E. Collins ......................... .......................... 39

Odor Threshold of Chlorine in 100% Oxygen, G.A. Dixon .................................................. *

Continuous Monitoring of Hydrazine Fuel Vapors, L.J. Luskus .................................................. 41

ALL-DAY TUTORIAL SESSION:
CANCER UPDATE: CAUSES, TREATMENT, “CURES,” AND PREVENTION

Etiology—the Tangled Roles of Heredity, Environment, and Culture, Dr. Jackson, Dr. Painter .................................................. *

Detection—Recent Technical Advances and Controversy Over Mass Screening Programs, Dr. Painter .................................................. *

Treatment—Current Methods and the Outlook for “Cures”, Dr. Jackson ................................. *

Prevention—Regulation vs. Public Education, Dr. Painter .................................................. *

*Paper not available for publication.

POSTER SESSION I

Self-Regulation of Mean Hand Skin Temperature in the Cold, E. Hendler, W. Miller, P. York .... 48

Thermal Conditions in the A-10 Cockpit During Desert and Tropical Flights, R.F. Stribley, S.A. Nunneley, B.F. Hiott ................................. 50

The Influence of Head Cooling on Fluid-Electrolyte Shifts and Erythrocyte Volume During Rest and Exercise in Hot Environments, W. van Beaumont, J.E. Greenleaf, B.A. Williams, P. Brock, E. Schwartz, S. Kravik .................................................. 52

VISION I

Monocular Vision as a Factor in Flight Safety, D.S. Kochhar, T.M. Fraser ................................. 53

Analysis of Complex Eye Movement Patterns Employing Phase Plane and Time Series Analysis Techniques, E.J. Hartzell .................................................. 55

Post-Alcohol Effect on Human Peripheral Vision, J.A. Winship, Y.S. Ho, T.M. Fraser .................................................. 57

The Electro-Physiological Basis of Eyesight Unreliability, H.J. Landry .................................................. 59

Dynamic Visual Acuity as a Function of Stimulus Orientation and Response Bias, L.H. Frank .................................................. *

INFLIGHT STRESS

Stress, Responsibility and Workload, A.H. Roscoe ................................. 63
Inflight Stress in General Aviation Cockpits, H. Wichman, W. Faustman, J. Rugh
Continuous ECG Monitoring on Civil Pilots During Flight, C. Sekiguchi, O. Yamaguchi, T. Kitajima, Y. Ueda

ACCELERATION/EJECTION I
The Domestic Fowl as a Pathophysiological Model for HSG, W.L. Spangler, E.A. Rhode
Transfer Functions for Eye-Level Blood Pressure During + Gz Stress, K.K. Gillingham
Temporary Stenosis of the Ascending Aorta: A Model for Coronary Vasomotor Studies During Gravitational Stress, W. von Restorff, E. Bassenge

FAA AVIATION MEDICAL EXAMINER SEMINAR III
Medical-Legal Problems and Appeal Procedures in FAA Certification of Airmen, J.E. Marsh, Jr.

POSTER SESSION II
Long Term Effects of the Naval Jet Aircraft Environment on Pulmonary Function, N. MacIntyre, R. Bason, D. Vick
Pulmonary Compliance Change Due to Increased FIO2’s and Acceleration Stress, L.T. Bush, W.P. Fife, F.W. Baumgardner, S.D. Leverett
The Effect of Positive Pressure Breathing on + Gz Tolerance, R.M. Shaffstall, T.R. Morgan, R.R. Burton

Body Fluid Responses to Physical Training and Their Effects on + Gz Tolerance, L.G. Myhre, W.L. Epperson, R.R. Burton
The Effect of Physical Conditioning on + Gz Tolerance, W.L. Epperson, R.R. Burton, E.M. Bernauer
Physiologic Response to Repeated High-G Simulated Aerial Combat Maneuvers, R.R. Burton

UNDERSEA MEDICINE II
The Role of Vasopressin Suppression in Mediating the Diuresis of Water Immersion, M. Epstein, D.S. Pins
Gas Induced Alterations of Serum Lipids, C. Chryssanthou, C. Vorderer, L. Rubin
Diving Problems and Diving Accidents in the North Sea, C.W. Sem-Jacobsen

PANEL: INFLIGHT MEASUREMENT OF PILOT WORKLOAD
Improving Cockpit Design Through Flight Crew Workload Measurements, E.L. Brown
Inflight Acquisition of Task Sequences and Task Times, J.E. Burke
Aviator Workload Measurements in Rotary-Wing Aircraft, K.A. Kimball
System Evaluation Measurements, S.P. Stackhouse
Visual Workload Measurements in the Helicopter Pilot During Low Altitude, VFR Flight, D.D. Strother

ACCIDENT INVESTIGATION I
An Epidemiologic Investigation of Occupation, Age, and Exposure in General Aviation Accidents, C.F. Booze, Jr.
Crew Behavior in Accident Causation, R.E. Yano-witch
Perceived Orientation of a Runway Model During Simulated Landing Approaches, H.W. Mertens

*Paper not available for publication.
Human Factors in an Approach and Landing Accident: Seven Steps to Disorientation, R.B. Maclaren 95

POSTER SESSION III

Ten-Year Survey of Altitude Chamber Reactions Using the FAA Training Chamber Flight Profiles, C.D. Valdez 101

The 1975 Accident Experience of Civilian Pilots with Static Physical Defects, J.R. Dille, C.F. Booze 103

Human Factors Engineering Design for Women: A Qualitative and Quantitative Analysis, M. Ketcham-Wiedl, A.C. Bittner, Jr 255

Serum Erythropoietin Levels During Bedrest, C.D.R. Dunn, J. Preston, R.D. Lange, S.L. Kimzey 107

VISION II

USAFAviators' Spectacles HGU-4/P (Historical Development, Present Status and Future Considerations), T.J. Tredici 109

Eye Protection Devices Utilizing PLZT, B.J. Pfoff, J.O. Harris, J.T. Cutchen 111

Ophthalmologic Problems and Diseases in Aviators (A Ten-Year Study in Cause for Referral to USAFSAM), W.D. Heinrich, T.J. Tredici, J.W. Klein 111

The Aeromedical Disposition of the Aphakic Flyer, P.G. Paglen, J.W. Klein, T.J. Tredici 113

BIOE GINEERING I

Towards a Semi-Objective Method for the Measurement of the Acoustic Attenuation of Flying Helmets, G.M. Rood 116

An Inexpensive Respiration Recording System for Evaluating Stress in Pilots of Light Aircraft, J.D. Rugh, H. Wichman, W.O. Faustman 118

Reduction of Leg Ischemia During Flight, F. Formel- ler, J. Hagan 120

Comparison Between Predicted and Actual Effects of Commanded and Disturbance Motion Cues on Performance, A.M. Junker, J.S. Ater, M. Roark 122

Biostereometric Measurement of Subjects Undergoing 28 Days of Bedrest, R.E. Herron, C.W. Keys 124

PANEL: AIRCRAFT ACCIDENT LITIGATION

FAA AVIATION MEDICAL EXAMINER SEMINAR IV

Altitude Decompression Sickness: Current Concepts in Management, J.C. Davis 126

Environmental Noise Hazards Confronting Pilots in General and Business Aviation, R.L. Wick, Jr 126

Pulmonary Considerations in Flying Personnel, M. Flux 128

POSTER SESSION IV

Comparative Pathology of Several Stress Cardiomyopathies, W.F. MacKenzie, M. H. Laughlin 130

Myocardial Pathophysiology in the Miniature Swine Resulting From +Gz Stress, J.W. Burns 132

Intermediate Visual Acuity through the Near and Distant Portion of Bifocal Spectacle Lenses, K. W. Welsh, P.G. Rasmussen, J.A. Vaughan 130
Motion Sickness Susceptibility: a Comparison of Laboratory Tests, J.M. Lentz, F.E. Guedry, Jr.  132

BIOENGINEERING II

Human Response to Multi-Axis Accelerations during Military Parachuting, D.W. Call, R.W. Moyhan, C.L. Ewing .......................... *

Proposed Human Tolerance Limits for Parachute Opening Shock in Parachutists, C.L. Ewing ....... *

Comparative Techniques of Analysis for Electromyographic Data, J.C. Johnson ......................... 134

Subjective Stress Assessment—a New, Simple Method to Determine Pilot Workload, Hans-Peter Goerres 136

The Effects of Long Hose Breathing, J.P. Cooke, R.M. Olson, T.M. Maloney ......................... 138

ANTHROPOMETRY

Practical Considerations in the Application of Anthropometric Data to Crew Station Design or What to Do Until the Anthropologist Arrives, W.T. Richardson ........................................ 140

The AMRL Anthropometric Data Bank: a Resource for Designers, J.T. McConville, E. Churchill .142

The Use and Abuse of Height/Weight Tables for Personnel Selection Criteria, H.M. Reynolds, D.H. Golomb ........................................ 144

Selected Engineering Anthropometric Design Criteria for Reclining Seats, S. Deivanayagam, M.M. Ayoub, K.W. Kennedy ......................... 144

How Strong are You? A New Look at Methods and Techniques to Assess Muscular Strength, K.H.E. Kroemer ........................................ 247

NOISE & VIBRATION I

Intensity Judgments of Non-Sinusoidal Vibrations: Support for the ISO Weighting Method, R.W. Shoenberger ........................................ 150

Vibratory Effects on Protensity, H.H. Galarneau, Jr. .................................................. *

Human Factors in Helicopters—a Practical Solution to the Vibration Problem?, A.P. Steele-Perkins ................................. 152

PHYSIOLOGY I

Cardiovascular Responses of Canines to Sinusoidal Acceleration at Frequencies Below 1.5 Hz, C.F. Knapp, J. Marquis, J. Evans, D.I. Randall 156

Comparison of an Impedance Device to a Capacitance Plethysmograph for Study of Lower Body Pooling in Man, R.J. Gowen, L.D. Montgomery, E.P. McCutcheon, H. Sandler ......... 158

Instable Peripheral Vascular Resistance, H.E. Krause, Dr.-Ing, E.L. Stanley ......................... 160

Cardiovascular Responses of Men and Women to Lower Body Negative Pressure, L.D. Montgomery, R.L. Gerber, B.A. Williams ......................... 162

CLINICAL AEROSPACE NURSING III

A Current Approach: Treatment of Heart Failure; Preservation of the Myocardium, M.L. Havens .... *

Cardiogenic Shock: Pathophysiology Related to Clinical Manifestations, M.J. Rheinscheld 164

Acute Pulmonary Edema, J.L. Flagg ......................... 166

Mitral Valve Prolapse and the Nurse, M.K. Teffner 167

FAA AVIATION MEDICAL EXAMINER SEMINAR V

Evaluating the Cardiovascular System, E.E. Westura .......................... *

Sedativism, L.H. Wharton ........................................ ........................... *

Pre-Infarction Diagnosis of Coronary Disease, E.E. Westura .......................... *

HEAD INJURY

Head Injuries and Fitness to Fly, P.J. O'Connor 169

Head Injury, Endemic or Epidemic, S.C. Knapp, T. M. Erhardt .......................... 171

*Paper not available for publication.
Helmet Damage and Head Injury Correlation, B.A. Slobodnik *

Service Life Analysis of the SPH-4 Aviator Helmet, B.A. Slobodnik, W.R. Nelson .......................... 173

PERFORMANCE II

A Comparison of Anxiety Patterns in Flight Service Station Specialists and Air Traffic Controllers, R.C. Smith, C.E. Melton .......................... 177

Sleep Patterns in Air Traffic Control Personnel on Different Shift Rotation Patterns, C.E. Melton, M. Hoffman, J.T. Saldivar .......................... 179

Effect of Low Light Intensity on the Maintenance of Circadian Synchrony in Human Subjects, C.M. Winget, C.W. DeRoshia, P. Haro, J.R. Beljan 181

Correlation of Biorhythm with Accident Occurrence and Choice-Reaction Time Performance, J.H. Wolcott, W. Foster, R.R. McMeekin, R.E. Yqnowitch .......................... 183

PHYSIOLOGY II

An Assessment of Protective Breathing Devices for Use by Flight Attendants, D. deSteiguer, M.S. Pinski, E.B. McFadden .......................... 185

Molecular Sieve Oxygen Generating Systems: the Argon Problem, K.G. Ikels .......................... 189

Effect of Arterial Oxygen Saturation on Tracking Performance at High Gz Acceleration, J.S. Kirkland, J.E. Yoder .......................... 187

THE HARRY G. ARMSTRONG LECTURE

CARDIO-PULMONARY RESUSCITATION WORKSHOP III

WEIGHTLESSNESS

The Influences of Bedrest and Space-Flight on the Lymphocytic Response of Man, B.S. Criswell, S.L. Kimzey .......................... 191

Some Peculiar Characteristics of Metabolism in the Crewmembers of the Salyut-4 Second Expedition, R.A. Tigranyan, A.S. Ushakov .......... 193

Physiological and Hygienical Problems of Life Support of Mammals in Space Flights, E.A. Ilyin ........ 194

ACCIDENT INVESTIGATION II

Special Characteristics and Survivor Injury Patterns of On-Airport Jet Airliner Accidents, B. Lambiotte 195

Carbon Monoxide and Cyanide Levels Found in Victims of Recent Aircraft Accidents, D.J. Lacefield, P.A. Roberts, C.W. Blossom .......................... *

Aviation Life Support Equipment Retrieval Program (ALSERP), J.J. Treanor, S.C. Knapp .......................... *

Crashworthiness Versus Costs: A Study of Severe Army Rotary-Wing Aircraft Accidents in Period Jan. 70 through Dec. 71, J. L. Heley .......................... 197

FAA AVIATION MEDICAL EXAMINER SEMINAR VI

ALL-DAY TUTORIAL SESSION:
DIAGNOSIS AND TREATMENT OF DIABETES MELLITUS

Pitfalls in the Diagnosis of Diabetes Mellitus, Dr. Siperstein .......................... *

Insulin Treatment of Diabetes Mellitus, Dr. Lecocq .......................... *

Oral Hypoglycemic Agents—Current Status and Controversies, Dr. Siperstein .......................... *

Diabetic Ketoacidosis and Hyperosmolar Coma, Dr. Siperstein .......................... *

Vascular Complications of Diabetes Mellitus, Dr. Lecocq .......................... *

Relationships of Carbohydrate Abnormality to Microangiopathy of Diabetes Mellitus, Dr. Siperstein .......................... *

CLINICAL AVIATION MEDICINE II

Naval Aviators Admitted to a Naval Hospital, W. Morioka, R. Fassett .......................... 199

Spirometric Assessment of Potential Respiratory Impairment in General Aviation Airmen, M.T. Lategola, M. Flux, P.J. Lyne .......................... 201

*Paper not available for publication.
Prophylactic Use of Lithium Carbonate, E.A. Higginson, A.W. Davis, Jr., G.E. Funkhouser, S.R. Mullin ........................................... 203

Large Group Treatment of Air Travel Phobia, A.G. Forgione, A. Blanchard-Remond ..................... *

Hearing Loss in General Aviation Pilots, J.J. Greenman, R.L. Wick, Jr. ............................. *

PHYSIOLOGY III

Space Colonization—Some Physiological Perspectives, L.H. Winkler .................................................. 205

Advanced Eva Technology Systems for Space Industrialization, W.L. Smith, T.W. Herrala ............. 207

Regional Changes in Volume of the Skylab Astronauts, M.W. Whittle ................................. 209

Alterations in Erythrocyte Survival Parameters in Rats After 19.5 Days of Space Flight Aboard Kosmos 782, H.A. Leon, L.V. Serova, J. Cummins, S.A. Landaw .......................................................... 211

The Histology of Chronic Cardiac Instrumentation, M. N. Golarz, L. Stone, G. H. Bourne, H. Sandler, H. McClure ...................................... 213

NOISE & VIBRATION II

Effects of Infrasound on Cognitive Performance, C. S. Harris, D. L. Johnson .......................... 214

The Derivation of the Attenuation Efficiency Score, R. T. Camp, Jr. .............................................. 216

The Effects of Ear Protectors and Hearing Losses on Sentence Intelligibility in Aircraft Noise, G.H. Fröhlich ............................................... 217

FAA AVIATION MEDICAL EXAMINER SEMINAR VII

Medical Aspects of Accident Investigation, R.L. Wick, Jr. ......................................................... *

Accident Prevention: How the AME Can Assist, B.A. Geier .................................................. *

Combustion Products and Other Toxicity Problems in Civil Aviation, W. R. Kirkham ............... *

Physiological Training for Civilian Flight Personnel, J.S. Mann ........................................ *

ALTITUDE PROTECTION

Review of Royal Air Force High Altitude Partial Pressure Assemblies, J. Ernsting .......................... *

Protection Against the Physiological Effects of Positive Pressure Breathing, K.N. Ackles, J.A.G. Portier, D.E. Holness, G.R. Wright, W.J. McArthur 219

Options in High Altitude Life Support Equipment for the 50-100,000 Ft. Range, W.J. McArthur, K.N. Ackles .................................................. 220

Medical Evaluation of Explosive Decompressions up to 20,000 M Altitude Using a Two-Pressure Flying Suit System, U.I. Balldin ..................... 222

VESTIBULAR FUNCTION

Pituitary Response to Motion Sickness, T. Eversmann, M. Gottsmann, E. Uhlich, K.v. Werder, G. Ulbrecht ..................................................... 224

Some Psychological Correlates of Motion Sickness Susceptibility, W.E. Collins, J. M. Lentz ...... 226

Experiments on the Detection of Roll Motion, A.J. Gundry ..................................................... 228

PANEL: IMPACT OF TOBACCO SMOKE ON COCKPIT CREW OPERATIONS

Why the Concern, and By Whom Operational Factors Influenced by Smoking in the Cockpit

Environmental and Toxicological Effects of Sidestream Smoke

Acute Physiologic Effects of Second-Hand Smoke

An Aeromedical Perspective of Tobacco Use in the Cockpit

Regulating Smoking Habits in the Cockpit

ACCELERATION/EJECTION II

The High Technology Ejection Seat. A New Ejection System for the U.S. Air Force, L. E. Williams, R.A. Weekley .......................................... 230

*Paper not available for publication.
Ejection-Related Hyperextension Spinal Injuries,  
K.N. Beers, L.E. Kazarian .......................... 232

An Investigation of the Strain-Rate Dependent Compression Strength of Isolated Human Vertebral Centra, L.E. Kazarian, M.P. Marcou ....... 234

Biodynamic Effects of Canopy Loss, W.F. Kendall 236

Analysis of Aerodynamic Deceleration Injuries During Emergency Escape, C.F. Acevedo .............. 238

BEDREST

Cardiovascular Deconditioning and EEG Patterns During Bedrest/Shuttle Simulation, D. Goldwater, H. Sandler, S. Rositano, E. McCutcheon, L. Chapman, C. Winget ........................................ 240

Echocardiographic Studies of Bedrest-Induced Changes During LBNP, H. Sandler, R. Popp, E.P. McCutcheon, D. Goldwater ...................... 242

Exercise Stress Testing During and Following 28 Days of Bedrest, C.F. Sawin, M.C. Buderer, A.P. Schachter, J.A. Rummel ...................... 244

Radionuclide Volume Measurements During a 28-Day Bedrest Study, P.C. Johnson, T.B. Driscoll ... *

Biochemical Responses to Induced Body Fluid and Electrolyte Shifts, C.S. Leach, P.C. Johnson .246

FAA AVIATION MEDICAL EXAMINER SEMINAR VIII

Natural Course of the Disease of Alcoholism, J.A. Pursch .............................................. *

Rehabilitation Methods in Alcoholism, F.R. Schwartz ...................................................... *

Impact of Alcoholism on Aviation, D.E. Busby ... *

Federal Aviation Regulations and Alcoholism, B. Pakull .................................................... *

An Alcoholism Program for Airline Pilots, R.L. Masters .................................................... *

*Paper not available for publication.
