Formalizing and Compiling Background Knowledge and Its Applications to Knowledge Representation and Question Answering

Papers from the AAAI Spring Symposium

Chitta Baral, Chair

Technical Report SS-06-05

AAAI Press
Menlo Park, California
Contents

Regular Papers

Macros, Macro Calls and Use of Ensembles in Modular Answer Set Programming / 1
Saadat Anwar, Chitta Baral, and Juraj Dzifcak

From WordNet to a Knowledge Base / 10
Peter Clark, Phil Harrison, Tom Jenkins, John Thompson, and Rick Wojcik

A Tool for Knowledge Base Integration and Querying / 16
Omar Elkhatib, Enrico Pontelli, and Tran Cao Son

Building a Repository of Background Knowledge Using Semantic Skeletons / 22
Boris Galitsky

A Knowledge Module: Buying and Selling / 28
Joohyung Lee and Vladimir Lifschitz

Towards a Modular Action Description Language / 33
Vladimir Lifschitz and Wanwan Ren

An Introduction to the Syntax and Content of Cyc / 44
Cynthia Matuszek, John Cabral, Michael Witbrock, and John DeOliveira

Combining Logical and Probabilistic Reasoning / 50
Michael Gelfond, Nelson Rushton, and Weijun Zhu

Going Places: Notes on a Modular Development of Knowledge about Travel / 56
Michael Gelfond

Short Papers

Hierarchical Task Libraries in (Con) Golog / 67
Alfredo Gabaldon

Development of a Background Knowledge-Base about Shipping and Smuggling / 72
Richard Scherl
Other Presentations
(no paper included)

Specifying A Web Service Ontology in First-Order Logic
Michael Grunigner and Sheila McIlraith
(www.cs.toronto.edu/~sheila/papers/gru-mc-aaai06.html)

Approximate Objects are Precise in Some Contexts
John McCarthy
