# Table of Contents

Adaptive Beamforming by Constrained Parallel Projection in the Presence of Spatially-Correlated Interferences............................. 4679
Masahiro YUKAWA, Isao YAMADA

Application of the Global Matched Filter to STAP Data: an Efficient Algorithmic Approach............................................. 4683
Sebastien MARIA, Jean-Jacques FUCHS

IDMR beamforming under direction-independent steering vector mismatch ................................................................. 4687
Ernesto L. Santos, Michael D. Zoltowski

Generalized Broadband Beamforming Using a Modal Decomposition........................................................................ 4691
Michael I. Y. Williams, Thushara D. Abhayapala, Rodney A. Kennedy

An Adaptive Beamforming Scheme for Enhanced Cochannel Interference Mitigation on Short Array Signal Intervals............ 4695
Thomas Hunziker, Makoto Taromaru

A Robust Capon Beamformer With New Uncertainty Constraint on Steering Vector......................................................... 4699
Zhu Liang Yu, Meng Hw Er

STAP FOR CLUTTER AND INTERFERENCE CANCELLATION IN A HF RADAR SYSTEM ............................................. 4703
Giuseppe A. Fabrizio, Gordon J. Frazer, Mike D. Turley

An Improved Partial Adaptive Narrow-Band Beamformer Using Concentric Ring Array..................................................... 4707
L. M. Vicenie, K. C. Ho, C. Kwan

ROBUSTNESS AND DISTANCE DISCRIMINATION OF ADAPTIVE NEAR FIELD BEAMFORMERS ................................. 4711
Yahong R. Zheng, Peng Xie, Steve Grant

Positioning for NLOS Propagation: Algorithm Derivations and Cramer-Rao Bounds....................................................... 4715
Honglei Miao, Kegen Yu, Markku J. Juntti

WARD: A Weighted Array Data Scheme for Subspace Processing in Impulsive Noise...................................................... 4719
Jin He, Zhong Liu

Array processing using time reversal: experiments and performance ........................................................................... 4723
Jose M.F. Moura, Yuanwei Jin, Dan Stancil, Jian-Gang Zhu, Ahmet Cepni, Yi Jiang, Ben Henty

Theory and Design of Uniform Concentric Spherical Arrays with Frequency Invariant Characteristics......................... 4727
S. C. Chan, H. H. Chen

OPTIMAL ARRAY RECEIVER FOR SYNCHRONIZATION OF A BPSK SIGNAL CORRUPTED BY NON CIRCULAR INTERFERENCES.......................................................... 4731
Pascal Chevalier, Francois Pipon

Calibration of a Polarization Diverse Array ......................................................................................................................... 4735
Hasan S. Mir, John D. Sahr

Direction Dependent Self Calibration of Large Distributed Sensor Arrays................................................................. 4739
Brian D. Jeffs., Sebastiaan van der Tol., Alle-Jan van der Veen

An Improved Subspace-based Algorithm in the Small Sample Size Regime............................................................... 4743
Xavier Mestre, Francisco Rubio

High Resolution Vector-sensor Array Processing Based on Biquaternions ................................................................. 4747
Sebastian Miron, Nicolas Le Bihan, Jerome I. Mars

COMPARISON OF A DIFFRACTING AND A NON-DIFFRACTING CIRCULAR ACOUSTIC ARRAY .......................... 4751
James Carneal, Marty Johnson, Philip Gillett

Underwater Noise Modeling and Direction-Finding Based on Conditional Heteroscedasticity Time Series ................... 4755
Hadi Amiri, Hamidreza Amindavar, Mahmoud Kamarei

SPATIAL-VECTOR SMOOTHING FOR COHERENT SOURCES IN PRESENCE OF A REFLECTING BOUNDARY .................. 4759
Jianwu TAO
# Table of Contents

**Source Detection Using Repetitive Structure**  
R. Mitchell Parry, Irfan Essa

**A LARGE DEVIATION ANALYSIS OF DETECTION OVER MULTI-ACCESS CHANNELS WITH RANDOM NUMBER OF SENSORS**  
Animashree Anandkumar, Lang Tong

**Multichannel Parametric Rao Detector**  
Kwang June Sohn, Hongbin Li, Braham Himed

**A Modified Likelihood Ratio Test for Detection-Estimation in Under-Sampled Training Conditions**  
Yuri I. Abramovich, Ben A. Johnson

**Signal Independent Wideband Activity Detection Features for Microphone Arrays**  
Tuomo W. Pirinen, Ari Visa

**SOURCE SEPARATION USING SPARSE DISCRETE PRIOR MODELS**  
Radu Balan, Justinian Rosca

**Cramer-Rao Bound Analysis on Multiple Scattering in Multistatic Point Scatterer Estimation**  
Gang Shi, Arye Nehorai

**A Fast Adaptive Method for Subspace Based Blind Channel Estimation**  
A. Jon Altuna, B. Bernie Mulgrew, C. Roland Badeau, D. Vicente Atxa

**On a Stochastic Version of the Plenacoustic Function**  
Thibaut Ajdler, Luciano Sbaiz, Andrea Ridolfi, Martin Vetterli

**Particle Filtering Approach to Adaptive Time-Delay Estimation**  
Eric A. Lehmann

**Closed Form Parameters Estimation for 3-D Near Field Sources**  
Ke Deng, Qinye Yin

**Simultaneous Diagonalization with Similarity Transformation for Non-defective Matrices**  
Tuo Fu, Xiqi Gao

**Acoustic Tomography Method for Measuring Temperature and Wind Velocity**  
Ivana Jovanovic, Luciano Sbaiz, Martin Vetterli

**OPTIMAL EXPERIMENTS WITH SEISMIC SENSORS**  
Mubashir Alam, Volkan Cevher, James H. McClellan

**MULTICHANNEL SPEECH ENHANCEMENT BASED ON SPEECH SPECTRAL MAGNITUDE ESTIMATION USING GENERALIZED GAMMA PRIOR DISTRIBUTION**  
Tran Huy Dat, Kazuya Takeda, Fumitada Itakura

**A Hardware Based Implementation of a Tactile Sensory System for Neuromorphic Signal Processing Applications**  
M. Pearson, M. Nibouche, I. Gilhespy, K. Gurney, C. Melhuish, B. Mitchinson, A.G. Pipe

**A QUARTIC ALGORITHM FOR SQUINT SAR IMAGING**  
Kaizhi Wang, Xingzhao Liu

**Echo-Robust and Real-Time 3D Tracking of Marine-Mammals using their Transient Calls recorded by Hydrophones Array**  
Pascale Giraudet, Hervé Glotin

**Spatial Separation of Speech Signals Using Continuously-Variable Masks Estimated from Comparisons of Zero Crossings**  
Hyung-Min Park, Richard M. Stern

**A NON-SEARCH OPTIMAL CONTROL SOLUTION FOR A TEAM OF MUAVS IN A RECONNAISSANCE MISSION**  
David W. Casbeer, Pengcheng Zhan, A. Lee Swindlehurst
Table of Contents

dWFS: Distributed Wave Field Synthesis ................................................................. 4843
Georgios N. Lilis, Sergio D. Servetto

Investigation of Computational Compound-eye Imaging System with Super-resolution Reconstruction ................................................................. 4847
Wai-San Chan, Edmund Y. Lam, Michael K. Ng

Seismic Velocity/Polarization Estimation and Polarized Wavefield Separation ................................................................. 4851
D. Donno, A. Nehorai, U. Spagnolini

Rostom Aoudada, Said Aoudada, Guy d’Urso, Abdelhak M. Zoubir

Generative Process Tracking for Audio Analysis ................................................................. 4859
Regunathan Radhakrishnan, Ajay Divakaran

THE IMPORTANCE OF SEQUENCES IN MUSICAL SIMILARITY ................................................................. 4863
Michael Casey, Malcolm Slaney

Enhancing Similarity Matrices for Music Audio Analysis ................................................................. 4867
Meinard Muller, Frank Kurth

Extraction of High-Level Musical Structure from Audio Data and its Application to Thumbnail Generation ................................................................. 4871
Mark Levy, Mark Sandler, Michael Casey

AUDIO ELEMENTS BASED AUDITORY SCENE SEGMENTATION ................................................................. 4875
Lie Lu, Rui Cai, Alan Hanjalic

Comparing Audio and Video Segmentations for Music Videos Indexing ................................................................. 4879
Olivier Gillet, Gael Richard

Speech Acquisition and Enhancement in a Reverberant, Cocktail-Party-Like Environment ................................................................. 4883
Yiteng (Arden) Huang, Jacob Benesty, Jingdong Chen

PROPORTIONATE FREQUENCY DOMAIN ADAPTIVE ALGORITHMS FOR BLIND CHANNEL IDENTIFICATION ................................................................. 4887
Rehan Ahmad, Andy W. H. Khong, Patrick A. Naylor

DOA Estimation for Multiple Sparse Sources with Normalized Observation Vector Clustering ................................................................. 4891
Shoko Araki, Hiroshi Sawada, Ryo Mukai, Shoji Makino

Post-Processing for Convolutive Blind Source Separation ................................................................. 4895
Robert Aichner, Meray Zourub, Herbert Buchner, Walter Kellermann

Superdirective Beamforming Robust Against Microphone Mismatch ................................................................. 4899
Simon Doclo, Marc Moonen

Frequency Independent Flexible Spherical Beamforming via RBF Fitting ................................................................. 4903
Arkady Yerukhimovich, Ramani Duraiswami, Nail A. Gumerov, Dmitry N. Zotkin

Acoustic Scene Analysis based on Power Decomposition ................................................................. 4907
Alain de Cheveigne, Michael Slama

Music Pitch Representation by Periodicity Measures Based on Combined Temporal and Spectral Representations ................................................................. 4911
Geoffroy Peeters

Multi-Scale Frame-Based Analysis of Audio Signals for Musical Transcription Using a Dictionary of Chromatic Waveforms ................................................................. 4915
Olivier DERRIEN

Computationally Efficient Amplitude Modulated Sinusoidal Audio Coding using Frequency-Domain Linear Prediction ................................................................. 4919
Mads Grasbøll Christensen, Søren Holdt Jensen

High-Resolution Spherical Quantization of Sinusoids With Harmonically Related Frequencies ................................................................. 4923
Pim Korten, Jesper Jensen, Richard Heusdens

Howling Suppression in Hearing Aids using Least-Squares Estimation and Perceptually Motivated Gain Control

Ashutosh Pandey, V. John Mathews

Wave Digital Simulation of a Vacuum-Tube Amplifier

Matti Karjalainen, Jyri Pakarinen

Parametric Excitation Model for Waveguide Piano Synthesis

Jukka Rauhala, Vesa Välimäki

ON THE ADAPTATION OF THE LINEAR BICHARACTERISTIC SCHEME TO BLOCK-BASED PHYSICAL MODELING FOR DIGITAL SOUND SYNTHESIS OF STRING INSTRUMENTS

Jose Escolano, Jose-Javier Lopez

A Physical Model for Plate Reverberation

Stefan Bilbao, Kevin Arcas, Antoine Chaigne

Encoder Assisted Frame Loss Concealment for MPEG-AAC Decoder

Sang-Uk Ryu, Eddie Choy, Kenneth Rose

ITU-T G.722.1 ANNEX C: A NEW LOW-COMPLEXITY 14 KHZ AUDIO CODING STANDARD

Minjie Xie, Dave Lindbergh, Peter Chu

A TWO-STAGE MLP+NLMS LOSSLESS CODER FOR STEREO AUDIO

Emmanuel Ravelli, Philippe Gournay, Roch Lefebvre

Cascaded RLS-LMS Prediction in MPEG-4 Lossless Audio Coding

H. Huang, S. Rahardja, X. Lin, R. Yu, P. Franti

Different Quantisation Noise Shaping Methods for Predictive Audio Coding

Stefan Wabnik, Gerald Schuller, Jens Hirschfeld, Ulrich Kraemer

RD OPTIMAL TEMPORAL NOISE SHAPING FOR TRANSFORM AUDIO CODING

O.A. Niamut, R. Heusdens

Vectorial Spectral Quantization for Audio Coding

Adriana Vasilache, Henri Toukomaa

Perceptual Audio Coding using N-Channel Lattice Vector Quantization

Johan Östergaard, Omar Niamut, Jesper Jensen, Richard Heusdens

Wireless Digital Audio Delivery Analysis and Evaluation

Nicolas-Alexander Talias, Andreas Floros, John Mourjopoulos

Audio Data Hiding with High Data Rates Based on IntMDCT

Ralf Geiger, Yoshikazu Yokotani, Gerald Schuller

A Robust Perceptual Audio Hashing Using Balanced Multiwavelets

Lahouari Ghouti, Ahmed Bouridane

A Noise-Robust FFT-Based Spectrum for Audio Classification

Wei Chu, Benoit Champagne

MUSICAL GENRE CLASSIFICATION VIA GENERALIZED GAUSSIAN AND ALPHA-STABLE MODELING

C. Tzagkarakis, A. Mouchtaris, P. Tsakalides

Musical instrument classification using non-negative matrix factorization algorithms and subset feature selection

Emmanouil Benetos, Margarita Kotti, Constantine Kotropoulos

Linear Predictive Models for Musical Instrument Identification

Nicolas Chetry, Mark Sandler

Instrogram: A New Musical Instrument Recognition Technique Without Using Onset Detection Nor F0 Estimation

Tetsuro Kitahara, Masataka Goto, Kazunori Komatani, Tetsuya Ogata, Hiroshi G. Okuno

# Table of Contents

Drum Sound Analysis for the Manipulation of Rhythm in Drum Loops .................................................. 5091
Juan P. Bello, Emmanuel Ravelli, Mark B. Sandler

AN ERROR CORRECTION FRAMEWORK BASED ON DRUM PATTERN PERIODICITY FOR IMPROVING DRUM SOUND DETECTION ................................................................. 5095
Kazuyoshi Yoshii, Masataka Goto, Kazunori Komatani, Tetsuya Ogata, Hiroshi G. Okuno

Acoustic Modelling of Drum Sounds With Hidden Markov Models for Music Transcription .......................... 5099
Jouni Paulus

REALTIME AUDIO TO SCORE ALIGNMENT FOR POLYPHONIC MUSIC INSTRUMENTS USING SPARSE NON-NEGATIVE CONSTRAINTS AND HIERARCHICAL HMMS ...................................... 5103
Arshia Cont

Globally Optimal Short-Time Dynamic Time Warping Application to Score to Audio Alignment .......................... 5107
Hagen Kaprykowsky, Xavier Rodet

F0 ESTIMATION METHOD FOR SINGING VOICE IN POLYPHONIC AUDIO SIGNAL BASED ON STATISTICAL VOCAL MODEL AND VITERBI SEARCH ......................................................... 5111
Hiromasa Fujihara, Tetsuro Kitahara, Masataka Goto, Kazunori Komatani, Tetsuya Ogaia, Hiroshi G. Okuno

Frequency Component Restoration for Music Sounds Using a Markov Random Field and Maximum Entropy Learning .......................................................................................................................... 5115
Tomonori Izumitani, Kunio Kashino

Frequency Reassignment for Coherent Modulation Filtering ........................................................................ 5119
Steven M. Schimmel, Kelly R. Fitz, Les E. Atlas

EFFECT OF INTERCHANNEL COHERENCE ON CONDITIONING AND MISALIGNMENT PERFORMANCE FOR STEREO ACOUSTIC ECHO CANCELLATION ......................................................... 5123
Andy W. H. Khong, Jacob Benesty, Patrick A. Naylor

An Acoustic Echo Suppressor Based on a Frequency-Domain Model of Highly Nonlinear Residual Echo .............. 5127
Osamu Hoshuyama, Akihiko Sugiyama

NONLINEAR ACOUSTIC ECHO CANCELLATION USING ORTHOGONAL POLYNOMIAL ........................................... 5131
Guan-Yu Jiang, Shih-Fu Hsieh

Efficient Adaptive Nonlinear Echo Cancellation Using Sub-band Implementation of the Adaptive Volterra Filter ................................................................................................................................................. 5135
Dayong Zhou, Victor DeBrunner, Yan Zhai, Mark Yeary

Robust Acoustic Echo Control Using a Simple Echo Path Model ................................................................. 5139
Christof Faller, Christophe Tournery

Fast Filtered-x Affine Projection Algorithm with Efficient Computation of Coefficient Update .......................... 5143
Alberto Gonzalez, Miguel Ferrer, Maria de Diego, Gema Pinero

Development of Frequency Domain Block Filtered-s LMS (FBFSLMS) Algorithm for Active Noise Control System ........................................................................................................................................ 5147
Debi Prasad Das, Ganapati Panda, Dilip Kumar Nayak

Convergence Analysis of Narrowband Active Noise Control ...................................................................... 5151
Sen M. Kuo, Ajay B. Puvvala, Woon S. Gan

IMPROVEMENT OF CANCELLATION PERFORMANCE FOR ANC SYSTEM USING THE SIMULTANEOUS PERTURBATION METHOD ................................................................. 5155
Yukinobu Tokoro, Yoshiobu Kajikawa, Yasuo Nomura

Stability Control in a Two-Channel Speech Reinforcement System for Vehicles .............................................. 5159
Alfonso Ortega, Eduardo Lleida, Enrique Masgrau, Luis Buera, Antonio Miguel

Application of Active Noise Control for Reducing Snore .............................................................................. 5163
Sreeram R. Chakravarthy, Sen M. Kuo

Optimal Loop-Shaping in the Cepstral Domain for Active Noise Canceling Headsets ........................................ 5167
Jean Laroche

# Table of Contents

Simulation of Room Acoustics Using 2-D Digital Waveguide Meshes .......................................................... 5171  
Antti Kelloniemi, Vesa Valimaki, Lauri Savioja

Wave Field Simulation with the Functional Transformation Method .......................................................... 5175  
Stefan Petrasch, Rudolf Rabenstein

Sound Field Analysis with a Two-dimensional Microphone Array .......................................................... 5179  
M. Guillaume, Y. Grenier

Distance Variation Function For Simulation Of Near-Field Virtual Auditory Space .................................. 5183  
Alan Kan, Craig Jin, André van Schaik

DEVELOPMENT OF MICRO-DODECAHEDRAL LOUDSPEAKER FOR MEASURING HEAD-RELATED TRANSFER FUNCTIONS IN THE PROXIMAL REGION ........................................... 5187  
Seiichiro Hosoe, Takanori Nishino, Katsunobu Ito, Kazuya Takeda

LISTENING THROUGH DIFFERENT EARS IN THE SYDNEY OPERA HOUSE ............................................... 5191  
Angela Qian Li, Craig Jin, André van Schaik

HEADPHONE-BASED REPRODUCTION OF 3D AUDITORY SCENES CAPTURED BY SPHERICAL/HEMISPHERICAL MICROPHONE ARRAYS ................................................................. 5195  
Zhiyun Li, Ramani Duraiswami

A NEW METHOD FOR BINAURAL 3-D LOCALIZATION BASED ON HRTFs ......................................................... 5199  
Fakheredine Keyrouz, Youssef Naous, Klaus Diepold

Immersive Rendering Of Coded Audio Streams Using Reduced Rank Models Of Subband-Domain Head-Related Transfer Functions ................................................................. 5203  
Pinaki Shankar Chanda, Sungjin Park

Automated Design of Digital Filters for 3-D Sound Localization in Embedded Applications ............................ 5207  
Kosuke Tsujino, Wataru Kobayashi, Takao Onoie, Yukihiro Nakamura

Inverse Filter Design Using Minimax Approximation Techniques for 3-D Audio ........................................ 5211  
Harsha J.K Rao, V. John Mathews, Young-Cheol Park

Separation of Audio Signals into Direct and Diffuse Soundfields for Surround Sound .................................. 5215  
Benjamin S. Olswang, Zoran Cvetkovic

Scalable Resource Management for Video Streaming over IEEE802.11a/e .................................................. 5219  
Y. Andreopoulos, M. van der Schaar, Z. Hu, S. Heo, S. Suh

Improving the Robustness of the G.722 Wideband Speech Codec to Packet Losses for Voice over WLANs ........ 5223  
Niranjan Shetty, Jerry D. Gibson

Latency-Minimized Delivery for Multi-Resolution Mesh Geometry ........................................................... 5227  
Ghassan AlRegib, Dihong Tian

Constructing dependency trees for rate-distortion optimized media streaming ....................................... 5231  
Martin Roder, Jean Cardinal, Raouf Hamzaoui

Unequal Error Protection for H.263+ bitstreams over a wireless IP network ............................................. 5235  
Catherine Lamy-Bergot, Nicolas Chautru, Cyril Bergeron

PRICING BASED COLLABORATIVE MULTI-USER VIDEO STREAMMING OVER POWER CONstrained WIRELESS DOWN LINK ................................................................. 5239  
Zhu Li, Jianwei Huang, Aggelos K. Katsaggelos

Informed Authentication Watermarking via Stego Data Reconstruction .................................................... 5243  
Chao-Yong Hsu, Chun-Shien Lu,

ESTIMATION OF QUANTIZATION STEP SIZE AGAINST AMPLITUDE MODIFICATION ATTACK IN SCALAR QUANTIZATION-BASED AUDIO WATERMARKING .................................. 5247  
Siho Kim, Keunsung Bae

MAC Aware Coding Strategy for Multiple User Information Embedding .................................................... 5251  
Abdellatif Zaidi, Pablo Piantanida
