Depositional Modelling of Champion Field, Brunei: Assessing the Impact of Reservoir Architecture on Secondary Recovery ......................................................... 459

Research on Remaining Oil Distribution and Further Development Methods for Different Kinds of Oil Layers in Daqing Oilfield at High Water-Cut Stage ........................................................................................................ 489
Shi Chengfang, Du Qinglong, Zhu Lihong, Zhang Shanyan, Zhang Lei, and Jian Xiaowei, Daqing Oilfield Co. Ltd. PetroChina

An Experimental Study and Genetic Algorithm (GA) Correlation to Explore the Effect of nC5 on Impure CO2 Minimum Miscibility Pressure (MMP) ........................................................................... 493
J. Bon, M.K. Emera, and H.K. Sarma, U. of Adelaide

Reservoir Fluid Sampling Revisited—A Practical Perspective ................................................................. 503

A High Success Rate Acid Stimulation Campaign—A Case History ........................................................ 512

Remote Sensing, Fuzzy Logic and GIS in Petroleum Exploration ................................................................ 520
S.R. Taheri, Curtin U. of Technology Western Australia

Near a Kilometer of Perforating Guns, in a 7½ Kilometer, Extended Reach Well - Coiled Tubing Shows its Mettle in New Zealand .............................................................................................................. 529
P. Bartholomew, Shell Todd Oil Services Ltd.; L. Portman, BJ Services; R. Frost, BJ Services; P. Nunn and P. Vause, Vause Wireline; D. Edmondson, L. Andrich, and T. LaGrange, Owen Oil Tools

Recapturing the Value of Fractional Flow Analysis in a Modern Day Water Flood ........................................ 536

A Novel Cased Hole Density-Neutron Log – Characteristics and Interpretation ........................................... 546
P.A.S. Elkington, C.A. Pereira, and J.R. Samworth, Weatherford

A New Real-Time Monitoring Method for Sandstone Reservoirs’ Acidizing ................................................ 553
Jianbo Zou., Min Li., Liqiang Zhao., and Qiang Wang., Southwest Petro Ins and State Key Lab of Oil/Gas Reservoir Geology and Exploitation

Volume 2

Optimized Perforation—From Black Art to Engineering Software Tool ...................................................... 560

Focused Sampling of Reservoir Fluids Achieves Undetectable Levels of Contamination ................................ 566
M. O’Keefe, Schlumberger; K.O. Eriksen, Statoil; S. Williams, Hydro; D. Stensland, ENI Norge; and R. Vasques, Schlumberger

One-Trip Sand-Control / Liner Hanger / Big-Bore Completion System ....................................................... 586
C.R. Hoffman, Baker Oil Tools

An Integrated Wellbore Stability and Sand Production Prediction Study for a Multi-Field Gas Development ................................................................................................................................. 596

Development of Moomba North Gas Field: Lessons Learned From Integrated Study Followed by an Infill Drilling Campaign ........................................................................................................ 610
J.C. Herweljer, ReservoirTeam Ltd., and M. Barley, P. Bainbrigge, and T. Herries, Santos Ltd.

Development of an Integrated Production Network Model for the Heera Field ................................................ 617
M.S. Nadar, R. Kulkarni, and Z.R. Lemanczyk, Edinburgh Petroleum Services Ltd., and P. Aggarwal, Oil and Natural Gas Corp. Ltd.
Reducing Uncertainty Through Downhole Fluid Analysis: A Field Case Study ........................................ 828
J.M. Muraus, Schlumberger, and A.A. Young, Anzou Australia Ltd.

Portfolio Optimization: Systems vs. Sequential Approach .................................................. 837

Water Frac Application in Injectors Improves Waterflooding—An Innovative Approach ............ 847

Drill-in Fluids for Multi-Lateral MRC Wells in Carbonate Reservoir-PSD Optimization and Best
Practices Lead to High Productivity: A Case Study .................................................. 857
M.A. Siddiqui, A.A. Al-Ansari, N.I. Al-Afaleg, H.A. Al-Anazi, D.E. Hembling, and M.A. Bataweel, Saudi
Aramco

Fracture Model for General Offshore Applications .................................................. 867
E. Kaarstad and B.S. Aadnoy, U. of Stavanger

New Gun-Hanger Design Provides Safety and Flexibility for High-Rate Gas Wells in North China
Kela Field .................................................................................................................. 874
J. Hales, T. Smith, and Kee Yong Wah, Halliburton Energy Services Inc., and Liu Jian Xun, Li Ru Yong, and
Liu Ming Qiu, Tarin Oil Co.

Design and Implementation of a Sand-Control Completion for a Troublesome Shallow Laminated
Gas Pay—A Case Study .................................................................................. 885
J.H. Terwogt, N.S. Hadfield, and A.A. Van Karamenburg, Sarawak Shell Berhad, and S. Salahudin and K.
King, Halliburton Energy Services Inc.

Data Acquisition With Advanced Acoustic Telemetry Improves Operational Efficiency in Deep-
water and Land-Well Testing?Case Histories ................................................................ 900
M. Azari, A. Salguero, E. Almanza, and H. Kool, Halliburton Energy Services Inc.

Innovative Use of Expandable Sand Screens Combined With Propped Hydraulic Fracturing
Technology in Two Wells With Intelligent Completions in the Egret Field, Brunei: Challenges,
Successes, and Best Practices Learned ........................................................................ 916
Sakamrin Abdul-Rahman, Brunei Shell Petroleum Co. Sdn. Bhd., and D Circ Lim, Jit Juan Lim, and Kuo
Chuan Ong, Halliburton Energy Services Inc.

The Feasibility Studies of Polymer Foam Flooding in Gudao Oilfield ......................................... 924
Zhenquan Li, Guohua Zhou, and Zongming Zhou, Shengli Oilfield Co., SINOPEC Ltd.

Results of Proactively Managing a Heavy-Oil Waterflood in South Oman Using Streamline-Based
Simulation ........................................................................................................ 932
M. Naguib, S. Sikaiti, H. Balushi, C. Barrio, and S. Mahrooqi, PDO, and R. Batycky, StreamSim
Technologies

Assisted History Matching for Surface Coupled Gas Reservoir Simulation ................................ 942
D. Biswas, SiteLark LLC

A New Strategy of Brownfield Development in New PT PERTAMINA EP Indonesia ....................... 952
K. Kurnely, S. Aprilian, and P. Suarsana, Pertamina

Research Study for Microbial Restoration of Methane Deposit with Subsurface CO2
Sequestration into Depleted Gas/Oil Fields ........................................................................ 964
K. Fujitowara, T. Mukaidani, S. Kano, and Y. Hattori, Chugai Technos Corp.; H. Maeda, Y. Miyagawa, and
K. Takabayashi, Teikoku Oil Co. Ltd.; and K. Okatsu, Japan Oil, Gas and Metals Natl.Corp.

The Dangers of Volumetric and Financial Data Silos in E&P .................................................. 976
R. Hull, Halliburton Digital and Consulting Solutions

Petrophysical Evaluation of the Igneous Gas-Bearing Reservoir Fractured—A Case Study at
Xujiaweizi Area Outside Daqing Oilfield, China ...................................................................... 980
Wei Huang, Daqing Research Inst. of Petroleum Exploration and Development; Yujin Zhang, Tianjin Favors
Hi-Tech Co.; Yingjie Hu, Liaohe Research Inst. of Petroleum Exploration and Development; Chuanping Liu
and Changhui Yin, Daqing Research Inst. of

The Hydrogen Economy: Economics of Hydrogen Production From Natural Gas ...................... 990
D. Seddon, Duncan Seddon & Assoc.s. Pty. Ltd.
Well-Collision Risk in Congested Environments ................................................................. 995

Reliable and Effective Downhole Cleaning System for Debris and Junk Removal ................. 1007
  D.B. Haughton and P. Connell, Baker Oil Tools

Technologies ...................................................................................................................... 1016

Wellsite Permit to Work System for Onshore Australia ...................................................... 1027
  T. Gouldie, Santos Ltd.

Application of Critical Technologies Enabling Low Cost Development of Thin-Bedded
Heterogeneous Gas Reservoirs in the North Malay Basin .................................................. 1033

Improved Window Cutting Efficiency Cuts Casing Exits Costs ......................................... 1046
  J.E. Toulouse, Baker Oil Tools Inc.

Case Study: Subsea Intervention With a Jack-up Drilling Rig ............................................ 1050
  B. Hargreaves, J.W. Mohr, T.M. Snow, and B.O. Mamuko, ExxonMobil Australia Pty. Ltd.

Well Testing by Design: Transient Modelling for Predicting Behaviour in Extreme Wells .......... 1058
  D. Teng and B. Maloney, Woodside Energy Ltd., and J.C. Mantecon, Scandpower Petroleum Technology

Development Well and Execution Planning in a Complex Subsurface Environment—The Impact
of Large and Small Scale Modelling on Well Deliverability ............................................ 1072

Quality Control of Static Reservoir Models ........................................................................ 1081
  J.A. Spilsbury-Schakel, Woodside Energy Ltd.

History Matching Considerations of an Analogue Reservoir Model (ARM) .......................... 1087
