TABLE OF CONTENTS

AMTA 2004 Co-Host Welcome
The AMTA
AMTA 2004 Officers
Exhibitors and Future Symposia Hosts
2004 Distinguished Technical Achievement Award – IVAN J. LaHAIE, Ph.D.
2004 Distinguished Service Award – MICHAEL H. FRANCIS

SESSION 1: RCS Measurement Topics I - Chair: Jeffery A. Berrie, Ph.D., ATK-Mission Research

Eric Walton (The Ohio State University) and Edward Urbanik (BAE Systems) ........................................... 2

PID-204 – “Analysis of Ground-Bounce Illumination Errors on Ground-to-Ground Diagnostic Measurements of Aircraft”, Ivan LaHaie and Scott Rice (GD Advanced Information Systems) .......................................................... 17

PID-169 – “RCS Measurements with a High Resolution Hardgating System”,
Jürgen Hartmann (EADS Astrium GmbH) and D. Fasold (Munich University of Applied Sciences) .......................................................... 28

SESSION 2 - Advances in Indoor and Outdoor Test Ranges -
Chair: Daniël Janse van Rensburg, Ph.D., Nearfield Systems, Inc. .......................................................... 34

PID-193 – “Introduction to the New MIT Lincoln Laboratory Suite of Ranges”,
Alan Fenn, Mike Shields and Gary Somers (MIT Lincoln Laboratory) .......................................................... 35
PID-158 – “Compact Range Rolled Edge Reflector Design, Fabrication, Installation and Mechanical Qualification”, John Proctor and David Smith (MIT Technologies), Paul Martin, Gary Somers, Michael Shields, and Alan Fenn (MIT Lincoln Laboratory) ........................................... 40

PID-130 – “RaPID- Spherical Near-Field Antenna Test System for Vehicle Mounted Antennas”, Janalee Graham (General Motors) and Per Iversen (Satimo) .............. 51

PID-135 – “A Portable Automated Time-domain Antenna Range: The PATARTM System”, Everett Farr, Lanney Atchley, Leland Bowen and Scott Bigelow (Farr Research, Inc.) and Tyrone Tran (AFRL) ........................................................ 57

SESSION 3 – Near-Field Topics I - Chair: Ronald C. Wittmann, NIST
Dedicated to David M. Kerns .............................................................................. 69

PID-051 – “Spherical-Scanning Measurements: Propagating Errors through the Near- to Far-Field Transformation”, Ronald Wittmann and Michael Francis (NIST) 71

PID-048 – “Estimating Multiple-Reflection Uncertainties in Spherical Near-Field Measurements”, Michael Francis, Jeff Guerrieri, Katie MacReynolds and Ronald Wittmann (NIST) .................................................................. 82

PID-123 – “Ground Reflection Effects for Hemispherical Near Field Scanning”, Eric Walton and Teh Hong Lee (The Ohio State University), Carey Buxton (FBI Academy) and Jeff Snow (NSWC, Crane) ........................................... 86

PID-149 – “Aspects of Probe Correction for Odd-Order Probes in Spherical Near-Field Antenna Measurements”, Tommi Laitinen, Sergey Pivnenko, Olav Breinbjerg (Technical University of Denmark) ........................................... 95

SESSION 4 - Multiple Input Multiple Output / Smart Antennas - Application and Measurement - Chair: Inder J. Gupta, Ph.D. The Ohio State University ............. 101
PID-001 “Radiation Efficiency of Dielectric Resonator Antenna Based on Foster-Type Equivalent Circuit”, D. Kajfez and A. A. Kishk (The University of Mississippi) .......................................................... 102

PID-118 – “Antenna Miniaturization using Artificial Transmission Line”, Ming Lee, Chi-Chih Chen, John Volakis (The Ohio State University) .......................................................... 108

PID-156 – “A Novel MIMO Antenna for Laptop Type Device”, Pasi Suvikunnas, Ilkka Salonen, Jarmo Kivinen, Perti Vainikainen (Helsinki University of Technology) ............. 114

PID-148 – “MIMO Channel Capacity versus Mutual Coupling in Multi-Element Antenna Systems”, Jesper Thaysen and Kaj B. Jakobsen (Technical University of Denmark) .......................................................... 120

SESSION 5: Satellite Measurement Topics - Chair: Jerzy “George” Lemanczyk, European Space Agency .......................................................... 131

PID-206 – “AMC12 C-Band Tx/Rx Antennas Radiated Measurements Process from Antenna Sub-System Level to Spacecraft System Level”, Laurent Roux, Nicolas Girad, A. Guerrache, Christophe Bouvin, Hérald Garcia (ALCATEL SPACE) ......... 132

PID-127 – “High Accuracy Horizontal Scanner Operating in X-band for the Measurement of a Spaceborne Synthetic Aperture Radar (SAR) Antenna”, Shai Dreizin (Orbit/FR) and Yuri Sharay (ELTA Systems Ltd.) .......................................................... 137

PID-119 – “Comparison of Instrumentation for (Sub) mm-Wave Frequencies”, Maurice Paquay (ESA-ESTEC), M. Crowley and D.R. Vizard (Farran Technology Ltd) .................. 143

PID-058 – “Antenna Measurement Techniques for SDARS Antennas”, Argy Petros (Think Wireless, Inc.), Imitiaz Zafar (Delphi), Raul Pla (Antenna World, Inc.) .................. 149

PID-132 – “High Accuracy Heavy Load Positioning System for Compact Range”, Moshe Pinkasy, Yossi Bitton, Roni Braun (Orbit/FR) .......................................................... 160

SESSION 6 – Antenna Design Topics - Chair: Donald Bodnar, Ph.D., MI Technologies ............. 166

PID-198 – “Update on a Novel Dual-Polarized Tapered Chamber Feed Design”, Kwan-Ho Lee, Chi-Chih Chen, Robert Lee (The Ohio State University) .......................................................... 167

PID-186 – “The Development of a Mini-UWB Antenna”, Brad Kramer, Chi-Chih Chen, John Volakis (The Ohio State University) .......................................................... 172

PID-134 – “Recent Advances in Impulse Radiating Antennas”, Everett Farr and Leland Bowen (Farr Research, Inc.) .................................................. 187

PID-146 – “Measured Characteristics of Zone Plate Antennas”, James Wiltse (Georgia Tech Research Institute) .................................................. 192

SESSION 7 – Compact Range Measurement - Chair: Gary Somers, Ph.D., MIT Lincoln Laboratory .................................................. 198

PID-145 – “Blended Rolled Edge Reflector Design for the New Compact Range at MIT Lincoln Laboratory”, Teh-Hong Lee, Walter Burnside, and Inder Gupta (The Ohio State University), Alan Fenn and Gary Somers (MIT Lincoln Laboratory) .................................................. 199

PID-094 – “Multi-Purpose RCS/Antenna Test Facility at Nurad Technologies, Inc.”, John Aubin and Christopher Kelly (Orbit/FR), and Andy Humen, Randy Engle, Curtis Hodnefield, and Jeff Platt (Nurad Technologies, Inc.) .................................................. 204

PID-175 – “Identification and Modeling of Error Sources in the Antenna Measurement Range Quiet Zone”, Anders Jemberg (Ericsson Microwave Systems AB) .................................................. 208

PID-216 – “Influence of Range Geometry and Feed Characteristics on Compact Range System Level Performance”, Marcel Boumans (Orbit/FR –Europe) .................................................. 214

PID-202 – “A Feed Scanning Based APC-Technique for Improving the Measurement Accuracy in a Sub-MM CATR”, Ville Viikari, Janne Häkli, Juha Ala-Laurinaho, Juha Mallat, Antti Räisänen (Radio Laboratory / HUT) .................................................. 220

PID-111 – “Feasibility Study of a Hologram Based Compact Antenna Test Range for 650 GHz”, Tomi Koskinen, Juha Ala-Laurinaho, Antti Räisänen (Helsinki University of Technology/Radio Laboratory) .................................................. 225

PID-201 – “Sub-mm Antenna Tests in a Hologram Based CATR”, Janne Häkli, Juha Ala-Laurinaho and Tomi Koskinen (Radio Laboratory), Jerzy Lemanczyk (ESA/ESTEC), Anne Lonqviist, Juha Mallat, Antti V. Räisänen, Jussi Säily, Jussi Tuovinen and Ville Viikari (Radio Laboratory) .................................................. 231

SESSION 8 – Imaging, Algorithms and Processing - Chair: Brian Fischer, General Dynamics Advanced Information Systems .................................................. 236
PID-203 – “Effects of Positioning Errors on the Circular Image-Based Near Field-to-Far Field RCS Transformation”, Scott Rice and Ivan LaHaie (GD Advanced Information Systems) ................................................................. 237

PID-112 – “Time-Frequency Analysis of Time Varying Spectra with Application to Rotocraft Testing”, Timothy Conn and James Hamilton (EG&G Special Projects) ......................... 243

PID-207 – “RCS Time Domain Near Field Measurement and 3D ISAR”, George Cheng, Yong Zhu, Sean Huynh, F.C. Chang (Antcom Corp) ................................................................. 249

PID-100 – “RCS Measurements on Arrays of Weak Scatterers Enhanced by Diffraction”, Sam Wei and Joe Rupp (The Boeing Company) ................................................................. 255

PID-129 – “A New Detection - Estimation Scheme for High Resolution Radar Cross Section Imaging”, N. Marty (ENSEIRB), Guy Poulalion and Sylvain Morvan (CEA-CESTA) ................................................................. 261

PID-184 – “New Network Analyzer Methodologies In Antenna/RCS Measurements”, Loren Betts (Agilent Technologies) ................................................................. 267

SESSION 9: RCS Measurement Topics II - Chair: Edward Urbanik, BAE SYSTEMS ................................. 272

PID-120 – “Novel RCS Measurements of Small Features using a Free-Space Focused Beam System”, Lee Ford (BAE Systems) ................................................................. 279

PID-099 – “Uncertainty Analysis and Inter-Range Comparison on RCS Measurements from Spheres”, Sam Wei, Anthony Reed, Craig Ericksen, Joe Rupp (Boeing Corp.) ................................................................. 285

PID-187 – “A Sphere String Reel Calibration Technique for Improved RCS Measurements”, George Szatkowski (NASA Langley) and Brett Cooper (Marietta Scientific, Inc) ................................................................. 295

PID-182 – “RATSCAT Advanced Measurement System (RAMS) Central Measurement System (RCMS) Range Book Review”, Travis Hestilow (Syracuse Research Corp) and Bryan Kurner (Air Force Information Warfare Center) ................................................................. 300

SESSION 10 – Phased Array Measurement Topics - Chair: Dan Janning, Ph.D., AFRL ................................................................. 304
PID-141 – “Techniques for Measuring Advaptively Cohered Distributed Antenna Apertures”, Jeff Kemp, Greg Hampton, Jeff Holder, Clayton Kerce (GTRI) ......................... 305

PID-050 – “Determination of Element Locations in a Wideband Phased Array”, Herbert Aumann, Kistan Tuttle, Francis Willwerth (MIT Lincoln Laboratory) ......................... 311

PID-147 – “Active Antenna Measurement System with High Speed Time Synchronization”, Lior Shmidov (Orbit/FR Engineering Ltd.) and Shali Hizkiahou (Gaus Software & Systems) ........................................................................... 315

PID-194 – “Single Fault Detection of an Array using Neural Networks”, N. Sarma (National Institute of Technology, India) and D. Vakula (Kakatiya Institute of Technology and Science, India) ............................................................... 327

PID-190 – “Implementation of Phase Retrieval Techniques for Phased Array Antenna Measurements”, Vasyl Markov and Alexander Filonenko (UKRSPETSTECHNIKA) ................................................................. 333

SESSION 11 – Near-Field Topics II - Chair: Per O. Iversen, SATIMO ......................... 338

PID-122 – “Practical Implementation of Probe-Position Correction in Near-field Planar Scanning Measurements”, Jeff Guerrieri, Katie MacReynolds, Mike Francis, Ron Wittmann, Doug Tamura (NIST) ................................................................. 345

PID-211 – “Varied Windows for Time Domain Antenna Near Field Measurement”, Yong Zhu, George Cheng, Sean Huynh, F.C. Chang (Antcom Corp.) ................................................................. 349

PID-024 – “Modernization of CMM Based Near-field Antenna Test Ranges”, Jeff Way, David Sirag, Mark DeSmidt (Northrop Grumman Space Technology) ......................... 353

PID-054 – “High Power Antenna Measurements in a Near-Field Facility: A Practical Approach”, Arnold Boomstra, Tim Lyes (Royal Netherlands Navy) ................................................................. 359

PID-138 – “Planar Near-Field Antenna Test Facility at KRISS”, Jin-Seob Kang, Jeong-Hwan Kim, Hong-Ki Choi, No-Won Kang (KRISS) ................................................................. 364

PID-103 – “A Strategy to Avoid the Truncation Error in Measurements using Planar or Cylindrical Near-Field Scanning Systems”, Ovidio Mario Bucci (Università di Napoli "Federico II") and Marco Donald Migliore (Università di Cassino) ................................................................. 367
SESSION 12 - Material Design, Measurement and Instrumentation - Chair: Ass. Prof. Michael Havrilla, Ph.D., Air Force Institute of Technology ... 373

PID-056 – “Planar Passive Microwave Devices on Magneto-Dielectric Substrates”, Daniel Killips, Steve Cossman and Leo Kempel (Michigan State University) .......... 374

PID-197 – “Automated Method for Characterizing Temperature Dependent Dielectric Materials”, Liming Zong, Gregory Charvat, Leo Kempel, Martin Hawley (Michigan State University) .................................................. 386

PID-162 – “Absorber Foam Characterization for Predicting Overall Anechoic Chamber Performance”, Christopher Brito (Lockheed-Martin), Aloysius Lubiano (Raytheon Systems Company), Newlyn Hui (L-3 Communications) and Dean Arakaki (Cal Poly State University) ................................................... 391

PID-205 – “Techniques in Scaling the Performance of Dielectric Microwave Absorber for use in Scale Model Anechoic Chambers”, Leland Hemming (Electromagnetic Test Facility Design) and Gabriel Sanchez (Advanced Electromagnetics Inc./OrbitFR) .................................................................................. 397

PID-144 – “Numerical Analysis of the Focused-Beam Measurement System”, Tri Van and Jeffery Berrie (ATK-Mission Research), Kueichien Hill and George Simpson (AFRL) .................................................................................. 401

PID-113 – “Electromagnetic Material Characterization Using a Partially Filled Rectangular Waveguide”, Andrew Bogle (Michigan State University), Michael Havrilla (AFIT), Leo Kempel, Ed Rothwell, Dennis Nyquist (Michigan State University) .................................................................................. 407

SESSION 13: Range Design and Evaluation - Chair: Dr. Antti V. Räsänen, Helsinki University of Technology .................................................................................. 413

PID-185 – “Evaluation of Hard Gating in the ESA/ESTEC CPTR”, Jerzy Lemanczyk (ESA/ESTEC), Juergen Hartmann (EADS Astrium GmbH) and Dietmar Fasold (Munich Univ. of App. Sciences) .................................................................................. 414

PID-163 – “Reflectivity Characterization and Identification of Primary Reflection Path in Anechoic Chamber Analysis”, Aloysius Lubiano (Raytheon Systems Company), Christopher Brito (Lockheed-Martin), Newlyn Hui (L-3 Communications), Dean Arakaki (Cal Poly State University) .................................................................................. 420

PID-125 – “Design and Construction of a Production Antenna Test Cell”, Mike Sharkey, Ben Wilmhoff, Brian Huang (Ball Aerospace Corp) .................................................................................. 424

PID-114 – “Portable Mini-Compact Range Based Antenna Measurement System”, John Aubin (Orbit/FR Inc.) and Seong Kim (Lockheed Martin, Orlando) .................................................................................. 430

PID-196 – "Shielded Closed HIRF/EMC and Antenna Measurement Facility at Alenia Aeronautica", Ilario Bertino, Marco Bozzetti, Monica D'Urso (Alenia Aeronautica S.p.A.).......................... 441

SESSION 14 – General Antenna Measurements - Chair: Jeff Kemp, GTRI ...................... 447

PID-152 – "Scan Plane Reduction Techniques for Planar Near-Field Antenna Measurements", Daniel Janse van Rensburg (NSI) ...................... 448

PID-140 – “General Technique of Antenna Phase Center Determination by NF or FF Measurements", David Asatryan (Institute for Informatics and Automation Problems) ..... 454

PID-210 – “A Laboratory Course on Antenna Measurement", Samel Parker (Raytheon) and Dean Arakaki (California Polytechnic State University) ...................... 460

PID-176 – “Compact Multi-Probe Antenna Test Station for RaPID- Testing of Antennas and Wireless Terminals”, L. Duchesne, Ph. Garreau, N. Robic, A. Gandois, P.O. Iversen, G. Barone (SATIMO) ...................... 466

PID-200 – “Methodology for Measuring Electrically Small Antennas”, Rainer Wansch (Fraunhofer IIS) .......................................................... 471

PID-105 – “On the Number of Modes in Spherical Expansions”, Frank Jensen (TICRA)..... 475

SESSION 15 – Data Acquisition and Processing Methods - Chair: Doren W. Hess, Ph.D., Ml Technologies .......................................................... 481

PID-107 – “Data Comparison of Two Reflectivity Arches", Brett Smith (Boeing Commercial Airplane Group) and Jonas Lodge (Boeing Helicopters) .......................................................... 498

PID-153 – “A Reflectometer for Antenna Measurements”, John McKenna and David Kokotoff (Ml Technologies) and Bjorn Widenberg (Chelton Applied Composites AB) .... 504

PID-157 – “Ground Plane Simulation and Spherical Near-Field Scanning for Telematic Antenna Testing”, Doren Hess and Donald Bodnar (Ml Technologies) .......................................................... 507
