# TECHNICAL PAPER INDEX

## IMAGE PROCESSING

1. **Evaluation Methodology for Virtual Reality Software Tools**
   Edwardo Islas, Miguel Perez, Benjamin Zayas, Carlos Espinosa, Rita Beltran and Evelyn Vega (Instituto de Investigaciones Eléctricas, Mexico) .......................... 1

2. **Image Compression of Facial Photographs based on BTC/TSVQ Local Processing**
   Mohy Mahmoud, Amr Goneid and Suhair Amer (The American University in Cairo, Egypt) .................... 8

3. **A Novel Method for Person Identification by Comparing Retinal Patterns**
   Rezwanur Rahman (United International University, Bangladesh), Morshed U. Chowdhury (Deakin University, Australia), S M Raiyan Kabir and M Rezwan Khan (United International University, Bangladesh) .......................... 14

4. **Achieving Near-Optimal Distortion Reduction with Invisible Watermarking RSSI Algorithms**
   Stephen Krebsbach (Dakota State University, USA) and George Hamer (South Dakota State University, USA) .................... 18

5. **ModVis: an Information Visualization Tool for Gene Module Discovery**
   Justin Molineaux (Catholic University of America, USA), Jianhua Xuan, Ting Gong, Yitan Zhu (Virginia Polytechnic Institute and State University, USA), Eric Hoffman (Children's National Medical Center, USA), Robert Clarke (Georgetown University, USA) and Yue Wang (Virginia Polytechnic Institute and State University, USA) ............................................. 24

6. **Research of the Novel Fast Dynamic Target Detection Method**
   Lingjia Gu, Shuxu Guo (JiLin University, China), Jin Duan, Wenbo Jing (ChangChun University of Science and Technology, China) and Ruizhi Ren (JiLin University, China) .......................... 32

## SENSOR APPLICATIONS

7. **Adaptive Coverage in Heterogeneous Sensor Network**
   Mahmuda Naznin and Kendall E. Nygard (North Dakota State University, USA) ............................................. 37

8. **A COTS Framework for Sensor Fusion Using Dynamic Bayesian Networks in Livestock Production**
   Jens A. Hansen, Thomas D. Nielsen and Henrik Schiøler (Aalborg University, Denmark) .................... 41

9. **Computer-Aided Item Selection for the Cycle Counting Procedure**
   Kemal Taljanovic (Archway Marketing Services, USA) and Mehmed Kantardzic (University of Louisville, USA) .......................................................... 48
## HIGH PERFORMANCE COMPUTING

<table>

</table>
A Telephone Communication Agent for Agent/User Interaction
Ahmed Kamel (Concordia College, USA) .............................................................................. 145

Material Processing for ADI Data using Neuro Fuzzy System
Deok H. Nam (Wilberforce University, USA), Harpreet Singh and Susil Putatunda (Wayne State University, USA) .............................................................................................................................................. 151

Efficiently Evolving Multiple Robots Using Distributed Genetic Algorithms
Ekkasit Tiamkaew (Naresuan University, Thailand) and Jirakhom Ruttanavakul (University of Nevada, Reno, USA) .............................................................................................................................................. 157

SOFTWARE ENGINEERING

A Three Poled Model for Web Applications
Hamzeh K. Al Shaar and Ramzi A. Haraty (Lebanese American University, Lebanon) .................................................. 162

Complexity Issues in Control Software Design: A Practical Perspective
Vic Grout and Stuart Cunningham (University of Wales, NEWI, UK) .................................................. 167

A Multiobjective Evolutionary Approach for Constrained Joint Source Code Optimization
N. Z. Azeemi (University of Technology Vienna, Austria) .................................................. 175

An Empirical Study of the Boundary Values of the Object-Oriented Metrics
Raed Shatnawi and Wei Li (The University of Alabama in Huntsville, USA) .................................................. 181

Simple Factory Design Pattern by Auto-registration and Applications
Ji Cao and Shashi S. Marikunte (Southern Illinois University, USA) .................................................. 187

Measuring Class Cohesion: An Empirical Approach
P. K. Mahanti (University of New Brunswick, Canada), K. Rajnish and V. Bhattacherjee (Birla Institute of Technology, India) .................................................. 193

MODELING

ZoneLib: A Simulink Library for Modeling Zone Divided Climate Dynamics
Jan Jakob Jessen and Henrik Schiøler (Aalborg University, Denmark) .................................................. 199

Analysis of Fused Deposition Modeling Parts
Arumaiikkannu G., Sreeramulu M., and Gowri S. (Anna University, India) .................................................. 205

Computer Virus Signature Model for Detection Engine
Kongkiat Hirankerd and Pattarasinee Bhattarakosol (Chulalongkorn University, Thailand) .................................................. 211

COMPUTERS IN EDUCATION

Usability of AgentSheets for Creating Educational Simulation
Kyu Han Koh, Sundeep Gopalaswamy, Ananth Srinagarajan, Jingren Jin and Cheryl D. Seals (Auburn University, USA) .................................................. 218

Teaching Programming with Animated 3D Scenes
Barrett M Shiff (Nova Southeastern University, USA) .................................................. 224

A Virtual Reality System for Hydroelectric Generating Unit Maintenance Training and Understanding
Alcides P. Junior, Manoel R. Filho, Fábio V. Bezerra, Marcos A. Souza, Pefertli A. Barata, Messias A. Nascimento (Federal University of Pará, Brazil) and Marcelo S. Hounsell (State University of Santa Catarina, Brazil) .................................................. 230
COMPUTER NETWORKS

Introducing Synchronisation in Deterministic Network Models
Henrik Schioler, Jan Jessen, Jens Dalsgaard and Kim G. Larsen (Aalborg University, Denmark) ............. 236

Security Enhancement for SCADA Communication Protocols Using Augmented Vulnerability Trees
Sandip C. Patel, James H. Graham and Patricia A. S. Ralston (University of Louisville, USA) ..................... 244

A Constrained Version of a Clustering Algorithm for Switch Placement and Interconnection in Large Networks
Vic Grout and Stuart Cunningham (University of Wales, NEWI, UK) ................................................. 252

Congestion Detection and Control with Real-Time Streaming Media
Teck-Kuen Chua and David C. Pheanis (Arizona State University, USA) ............................................. 258

A Simulation of Power Management Algorithm in Wireless Transmission to Guarantee QoS
Ahmed H. Salem (Hood College, USA), Anup Kumar and Adel S. Elmaghraby (University of Louisville, USA) ........................................................................................................... 264

Security-Enhanced Remote Terminal Units for SCADA Networks
Jeffrey L. Hieb and James H. Graham (University of Louisville, USA) ................................................. 271

SPECIAL SESSION on SOFTWARE ENGINEERING

A Process Modeling System Aimed at Large-scale Collaborative Design over Networks
Thomas Wisniewski and Wenying Feng (Trent University, Canada) ..................................................... 277

Design and Description of a Tool towards a Software Engineering Experiment
Narayan Debnath, Nripendra Rai (Winona State University, USA), Haesun K. Lee and Ilhyun Lee (University of Texas of the Permian Basin, USA) .......................................................... 283

An Autotester for the Modified Commission Function
Narayan Debnath, Joyati Debnath (Winona State University, USA), Mark Burgin (University of California, Los Angeles, USA) Joshua Wilson and Joseph Cropper (Winona State University, USA) ........ 289

OQL-based Data Mining Query Language
Rekha Bhowmik (Winston-Salem State University, USA) ........................................................................ 295

A New Modeling Notation for System Design and Workflow Patterns
Thomas Wisniewski and Wenying Feng (Trent University, Canada) .................................................. 301

Integration of Multidisciplinary Specialized Applications using Components
Alfredo Sánchez, Dionisio Suárez and Agustín Quintero (Instituto de Investigaciones Electrículas, Mexico) .. 307

COMPUTER APPLICATIONS

A Case Study of Monitoring Construction Operations using Automated Position Tracking System
Y. Y. Su and L. Y. Liu (University of Illinois at Urbana-Champaign, USA) ........................................... 312

Designing of Building Black-Boxes to Support Disaster Rescue & Recovery
Min-Hsuan Tsai, Liang Y. Liu and Fenlosky Peña-Mora (University of Illinois at Urbana-Champaign, USA) ......................................................................................................................... 318

Transistor-Mapped Binary Decision Diagram for CMOS Circuits
Chia-Pin R. Liu (Jackson State University, USA) ..................................................................................... 324
NEURO NETWORKS APPLICATIONS

Co-evolutionary Robotics using Two Kinds of Neural Networks
Masaya Yoshikawa and Hidekazu Terai (Ritsumeikan University, Japan) ........................................... 330

Fault Detection and Isolation Using Artificial Neural Networks
In Soo Lee (Sangju National University, Korea) and Gordon K. Lee (San Diego State University, USA) ... 335

Humidity Estimation Using Neural Network from Sensor Data
Kirthi L. Sreenivasan (Naval Sea Logistics Center Detachment, USA), Thomas Philip (Mississippi State University, USA), Sunil K. Khijwania (Indian Institute of Technology-Guwahati, India) and Jagdish P. Singh (Mississippi State University, USA) ................................................................. 341

COMPUTER SECURITY

Security Concerns with Mobile IPv6
Y. Chen, R. Vaughn and R. Ramkumar (Mississippi State University, USA) ........................................... 346

A Security Engineering Process for Vulnerability Assessment
Wei Li (Nova Southeastern University, USA) ............................................................................................ 352

Securing Wireless Networks with Enhanced WEP
Ramzi A. Haraty and Walid El Horr (Lebanese American University, Lebanon) .................................... 358

Advanced Remote Password Authentication and Key Agreement using Smart Card
Rui Jiang, Aiqun Hu, Xiaohui Yang (Southeast University, P.R. China) .................................................. 364
