Robotics Collaborative Technology Alliance Program—Part II
Cochairs: Chuck Shoemaker, Barbara Lindauer

Tank-Automotive Robotics: Development and Integration of Intelligent Vehicle Technologies for Army Application
Jeff Jaczkowski

Approaches for Moving Obstacle Detection
Shima Rayej, Karl Murphy, Alberto Lacaze

Human Control of Unmanned Systems under Stressful Conditions
David Dahn, Marc Gacy

Remote Sensing Lab (RSL) Late Breaking News, Radiological Emergency Response—Part I
Cochairs: Robert Hayes, Thane Hendricks

Enhancement of Aerial Gamma Surveillance Utilizing Complementary Characteristics of NaI and HPGe Detection
Thane J. Hendricks, Robert Hayes

Missions of the Remote Sensing Laboratory
C. Riland, S. Riedhauser, R. Hopkins

The National Nuclear Security Agency’s (NNSA’S) Geographic Information Systems Capability for Nuclear Emergency Response
A. Guber, J. Essex

Accelerating the Data Collection Process Through Digital Forms and Telemetry
J. J. Essex, C. M. Marianno

A Specialized Radiation Detection Portal for Domesticated Animals
C. M. Marianno

Tuesday, February 14, 2006 • 3:30 p.m.
Remote/Robotics Lessons Learned from the Field
Cochairs: Barry Burks, Dave Weber

Tele-operated Robotic Systems for Nuclear Power Plants in South Korea and Lessons Learned
Kyungmin Jeong et al.

Real Time Kinematics GPS Surveying at the Rocky Flats Environmental Technology Site (RFETS)
Brian Blaser, Robb Kapple, Chad McFadden, Jason Jung

Reaching the Unreachable: Snake-Arm Robots for SCRAM Pipe Repair, Sweden
Rob Buckingham, Andrew Graham, Geoff Ferguson, Rosalind Anscombe

CHAVIR: A Virtual Reality Simulation Environment for Hazardous Nuclear Working Sites
Laurent Chodorge, Arnauld Leservot, Philippe Desbouts

Advanced Telerobotic Systems
Cochairs: Mark Noakes, Tom Burgess

Recent Telerobotics Systems Developments at the University of Tennessee
W. R. Hamel, M. W. Noakes

Robot Task Space Analyzer System Calibration
Andrzej Nycz, Prem S. Chidambaram, Renbin Zhou, William R. Hamel

Using the WAM as a Master Controller
Renbin Zhou, William R. Hamel, A. S. Haritharan, Mark W. Noakes

Spallation Neutron Source Remote Handling Implementation
M. J. Rennich, E. C. Bradley, T. W. Burgess, V. B. Graves

Rare Isotope Accelerator Remote Maintenance Concepts
D. L. Conner, T. W. Burgess, T. A. Gabirol, M. J. Rennich
Security Issues and Analysis

Cochairs: Tom Kiess, Lawrence Ruth

Video and Biohazard Monitoring of Sites During Incidents
W. D. Armitage, D. Kaiyadin, M. Labrador, R. Murphy .................................................. 561

Using Multi-Attribute Decision Making Methods to Respond to a Nuclear Accident
Wayne L. Andrews, Jr., Steven L. Krahn, John Harrald, Jill Marie Andrews .......................... 569

Patricia Milligan ..................................................................................................................... 577

Nuclear Weapon Accidents and Environmental Law—Help or Hindrance?
Raymond Takashi Swenson .................................................................................................... 580

RSI Late Breaking News, Radiological Emergency Response—Part II
Cochairs: Robert Hayes, Thane Hendricks

Aerial Radiological Mapping
D. Colton, T. Hendricks, C. Lyons, S. Riedhauser, P. Wasiolek ........................................... 585

Ground-Based Radiological Mapping
D. Colton, T. Hendricks, C. Lyons, S. Riedhauser, P. Wasiolek ........................................... 586

Recent Advances in Aerial Radiological Emergency Response
D. Colton, T. Hendricks, C. Lyons, S. Riedhauser, P. Wasiolek ........................................... 587

Wednesday, February 15, 2006 • 8:20 a.m.

Hazardous Assessment and Risk Management
Cochairs: James Fairobent, Carl Mazzola

Disaster Risk Management in South-East Asia
Alex Dali .................................................................................................................................. 588

Firm: A Game Theory Based Multi-Crisis Management System for Urban Environments
Upvan Gupta, Nagarajan Ranganathan ..................................................................................... 595

Emergency Preparedness, Business Continuity, and the New Normal
Robert B. Wester .................................................................................................................... 603

Emergency Field Monitoring Considerations for TRU Alpha Plume
Richard Rodriguez .................................................................................................................. 610

Micromanipulation
Cochairs: Elizabeth Wales, Dan Popa

Robotic Workstation for the Assembly of Heterogeneous MEMS Devices
James F. (Red) Jones, Brian A. Kast, James M. Bailor ............................................................ 615

Probe-Based Micro-Scale Manipulation and Assembly Using Force Feedback
Jason J. Gorman, Nicholas G. Dagalakis .................................................................................. 621

Modular Microassembly System for MEMS Packaging
Dan Popa, Jeongsk SIn, Manoj Mittal, Rakesh Murthy, Harry Stephanou ............................... 629

Compliant Microassembly of MEMS
Woo Ho Lee, Dan Popa, Jeongsk Sin, Varkey George, Harry E. Stephanou ............................. 635

Remote/Robotic Activities at Hanford
Cochairs: Michael Rinker, Brian Hatchell

Hydrolasing of Contaminated Underwater Basin Surfaces at the Hanford K Area
G. B. Chronister, A. M. Umek .................................................................................................. 641

Remote Handling Equipment at the Hanford Waste Treatment Plant
Michael Bardal, Joseph Roach .................................................................................................. 649

Design of a Mobile Radiation Detection System for Seaports
Carl Baker .................................................................................................................................. 657
Lessons Learned in the Development of Gamma-Rover (GRover) Inspection Device
Patrick L. J. Valdez, James M. Alzheimer, Michael A. Catalan .................................................. 663

Wireless Technologies for Emergency Response—Part I
Cochairs: Kevin Young, Scott Bauer

Operational Requirements for Digital Wireless Communications in WMD/CST Operations
James Hardcastle .................................................................................................................................. 668

BreadCrumb® Wireless LAN Networks White Paper for First Responders and Military Personnel
Peter E. Lenard ...................................................................................................................................... 671

Mobile Remote Radiation Detection and Display System
Gary Wright ............................................................................................................................................ 676

Direct Mobile Videocasting for First Responders
Kamil Agl ................................................................................................................................................ 683

Wednesday, February 15, 2006 • 10:20 a.m.

Emergency Planning and Response
Cochairs: James Fairobent, Carl Mazzola

Mitigation of Explosive Radiological Dispersal Devices Using Aqueous Foams
W. B. Wente, P. N. Johnson .................................................................................................................. 688

Remote Chemical Detection using Quantum Cascade Lasers

Siting Design for Liquid Hydrogen Supply Tanks to Minimize Emergency Impacts of Adverse Events
Jila Banaee .............................................................................................................................................. 702

Anomaly Detection in Gamma-Ray Vehicle Spectra with Principal Components Analysis and Mahalanobis Distances
Mark F. Tardiff, Robert C. Runkle, Kevin K. Anderson, L. Eric Smith .............................................. 710

Planning for National Energy Sustainability During Abrupt Climate Change Emergencies
Eric P. Loewen ....................................................................................................................................... 718

National Emergency Response
Cochairs: Robert Addis, Jim Fairobent

ENSEMBLE Atmospheric Modeling for Emergency Response in Support of Federal Consequence Assessments
Robert P. Addis, John L. Merrick, Jr. .................................................................................................... 726

Coordination of the Federal Atmospheric Transport and Diffusion (ATD) Modeling Capability
Samuel P. Williamson, James A. McNitt, Robert J. Dumont ................................................................ 731

National Multi-agency Support for Airborne Hazard Prediction
John S. Naststrom et al. ........................................................................................................................ 737

A Synergistic Consequence Assessment Modeling Strategy for Emergency Operations Centers
Clifford Glantz, Larry Campbell ........................................................................................................... 744

Wireless Technologies for Emergency Response—Part II
Cochairs: Kevin Young, Scott Bauer

Hazmat Cam Wireless Video System
Kevin L. Young ........................................................................................................................................ 750

Unmanned Aerial Vehicle (UAV)—Dynamic-Tracking Directional Wireless Antennas for Low Powered Applications that Require Reliable Extended Range Operations in Time Critical Scenarios
Matthew O. Anderson, Scott G. Bauer, James R. Hanneman .............................................................. 755

Wireless, Hazardous Material Detection Training Systems and Their Future
Kevin E. Hungate, Yvette M. Leppert, Kevin L. Young ...................................................................... 760

Smart Antenna Systems is a Wireless Local Area Network
Lynda Brighton ......................................................................................................................................... 764
An Improved Integrated Rad-Hard Wireless Communication/Control System with Dual Use Applications

D. W. Schoenfeld, J. L. Kurtz, P. Carlson, J. S. Tulenko
