# Table of Contents

Web Intelligence, Business Intelligence and Decision Support Systems: A Challenge for Fuzzy Logic and Soft Computing .................................................. 1  
Janusz Kacprzyk

Fuzzy Methods for Intelligent Behavior Modeling ........................................................................... 2  
Ronald R Yager

A New Frontier in Computations - Computation with Information Described in Natural Language ........................................ 3  
L. Zadeh

T-detectors Maturation Algorithm with min-Match Range Model ............................................. 5  
Jungan Chen

Density maximisation classification in the lattice machine ......................................................... 9  
Hui Wang, Chang Liu

LVOT: The Design of an Intelligent System for Building and Using Learning Virtual Objects .................. 14  
Ana M. Gonzalez de Miguel

Detecting Single and Multiple Faults Using Intelligent DSP and Agents .................................. 20  
Osama Zaki, Keith Brown, John Fletcher, David Lane

Automating the Identification of Mechanical Systems' Technical State Using Case-Based Reasoning ......................................................... 27  
Olga A. Nikolaychuk, Alexander Y. Yurin

Applying Ant-based Multi-Agent Systems to Query Routing in Distributed Environments ........... 33  
Elke Michlmayr, Arno Pany, Sabine Graf

The Fusion Process of Goal Ontologies using Intelligent Agents in Distributed Systems ............... 39  
Nacima Mellal, Richard Dapoingy, Laurent Fouloy

Differential Equations Systems versus Scale Free Networks in Sepsis Modeling ............................ 45  
Radu N. Dobrescu, Daniela A. Andone, Matei R. Dobrescu, Stefan Mocanu

Multitasking Driver Cognitive Behavior Modeling ........................................................................ 49  
Yanfei Liu, Zhaohui Wu

Fast Kernel for Calculating Structural......................................................................................... 55  
Jin-Mao Wei

Multivariate Microaggregation Based Genetic Algorithms ......................................................... 61  
Agusti Solanas, Antoni Martinez-Balleste, Josep M. Mateo-Sanz, Josep Domingo-Ferrer

Towards the Practical Use of Qualitative Spatial Reasoning in Geographic Information Retrieval ................................................................. 67  
Alia I. Abdelmoty, Philip Smart, Baher A. El-Geresy

KNOWLEDGE ENGINEERING APPROACH TO CONCURRENTLY COMPETING CYCLIC PROCESSES CONTROL ......................................................... 73  
R. Wójcik, G. Bocewicz, Z. Banaszak

Relative Qualification in Database Flexible .................................................................................. 79  
Cornelia Tudorie

A Query Model with Relevance Feedback for ............................................................................. 85  
Sahudy Montenegro Gonzalez

Extending the Resource-Constrained Project .............................................................................. 91  
Jurgen Kuster

Inductive Learning of Dispute Scenarios for .............................................................................. 99  
Boris A. Galitsky

Reasoning about Situation Similarity .......................................................................................... 105  
Christos B. Anagnostopoulos

# Table of Contents

Approximation of Derivatives by Fuzzy Systems ................................................................. 233  
Paulo Salgado

Multivariable Self-organizing fuzzy logic control (SOFLC) using a switching mode linguistic compensator ................................. 239  
Q. Lu, M. Mahfouf

Bandwidth Allocation For Wireless Multimedia Traffic By Using Fuzzy Logic.......................... 246  
J.D. Mallapur, S.S. Manvi, D.H. Rao

Using Markov Models to Manage High Occupancy Hospital Care ........................................ 251  
Sally McClean, Peter Millard

An OLAP-Enabled Software Environment for Modeling Patient Flow .................................. 256  
Christos Vasilakis, Elia El-Darzi, Panagiotis Chountas

IGUANA: Individuation of Global Unsafe Anomalies and Alarm activation .............................. 262  
Daniele Apiletti, Elena Baralis, Giulia Bruno, Tania Cerquitelli

Architecting an Event-based Pervasive Sensing Environment in the Hospital ................. 268  
Bin Wu, Roy George, Khalil Shujaee

Agent-based Models for Community Care Systems Analysis and Design ................................ 273  
Wei Huang, Elia El-Darzi, Panagiotis Chountas, Peng Liu

Mining A Primary Biliary Cirrhosis Dataset Using Rough Sets and a Probabilistic Neural Network ........................................ 279  
Kenneth Revett, Florin Gorunescu, Marina Gorunescu, Marius Ene

Data Mining a Prostate Cancer Dataset Using Rough Sets ................................................. 285  
Kenneth Revett, Sérgio Tenreiro de Magalhães, Henrique M.D. Santos

Input Selection for TSK Fuzzy Model based on Modified Mountain Clustering ......................... 289  
Ahmad Banakar

A Robust Scheme for Tuning of Fuzzy PI Type Controller .................................................. 294  
Seema Chopra, R. Mitra, Vijay Kumar

Switched Fuzzy Systems: Representation Modelling, Stability Analysis, and Control Design ......................................................................... 300  
Hong Tang, Georgi M. Dimirovski, Jun Zhao

Intelligent Switching Surface for Variable Structure Adaptive Model Following Control ........ 306  
Susy Thomas, Harish Reddy

A Systematic Methodology for Measuring and Designing C2 Organization ................................ 311  
Xiaohong Peng, Dongsheng Yang, Zhong Liu, Jincai Huang

Load Balancing among Photolithography Machines in Semiconductor Manufacturing ................ 314  
Arthur M. D. Shr, Alan Liu, Peter P. Chen

Control-Oriented Fuzzy Multi-Model Identification of a Highly Nonlinear Missile .................... 320  
S. Vahid Hashemi

Controlling Nonlinear Dynamic Systems with Projection Pursuit Learning ............................ 326  
Clodoaldo A. M. Lima, Pablo A. D. Castro, André L. V. Coelho, Cynthia Junqueira, Fernando J. Von Zuben

Advanced Control of a Steam Generator ............................................................................. 332  
Daniela G. Andone, Ioana I. Fagarasan, Matei R. Dobrescu

Self-refreshing SOM for dynamic process state monitoring in a circulating fluidized bed energy plant .............................................................................. 338  
Teemu Räsänen, Ari Kettunen, Eero Niemitalo, Yrjö Hiltunen

Automatic Tuning of Decentralized ...................................................................................... 344  
Ali Reza Mehrabian

Finding Preferred Query Relaxations in Content-based Recommenders ................................ 348  
Dietmar Jannach
# Table of Contents

The SAD System: Deductive Assistance in an Intelligent Linguistic Environment ........................................................................... 354
   Alexander Lyaletski, Andrei Paskevich, Konstantin Verchinine

An Incremental Learning Structure using Granular

Computing and Model Fusion With Application to Materials Processing ................................................. 360
   George Panoutsos, Mahdi Mahfouf

On some types of linguistic summaries of time series ............................................................... 366
   Jaszcz Kacprzyk, Anna Wilbik, Slawomir Zadrozny

Improving Business Processes Using Enterprise Modelling and Temporal Information ......................... 372
   Dorothy Nan Wang, Ittas Petroutias

Intelligent Agents that Span the Process Management Spectrum ...................................................... 378
   John Debenham, Simeon Simoff

Agent based Connectivity Detection and Routing in Mobile Ad-hoc Networks .................................. 382
   J.M. Hurakadli, S.S. Manvi, J.D. Mallapur

Using agent-based of driver behavior in the context of car park optimization ................................... 387
   J.M. Boussier, P. Estraillier, D. Sarramia, M. Augeraud

Agent Learning to Manage Costs for Event Detection ....................................................................... 393
   Kareem S. Aggour, John Interrante, Christina LaComb

Multi-Agent Reinforcement Learning for Strategic Bidding in Power Markets .................................. 400
   Athina C. Tellidou

Intelligent Agents Based Non - Square Plants Control .......................................................................... 406
   Mincho B. Hadjiski, Vassil S. Sgurev, Venelina G. Boishina

Towards an Agent-Based Framework for Online After-Sale Services .............................................. 412
   Lu Zhang, Frans Coenen, Wei Huang, Paul Leng

An InfoStation-Based Multi-Agent System for the Provision of Intelligent Mobile Services in a University Campus Area ......................................................................................... 418
   I. Ganchev

A Bayesian Solution to Track Multiple and Dynamic Objects Robustly from Visual Data .................. 424
   Marta Marrón

Calculating Likelihoods in Bayesian Networks ....................................................................................... 430
   David H. Glass

A New Type of Covering Rough Set ........................................................................................................ 436
   William Zhu, Fei-Yue Wang

Specification and Verification of Reconfiguration Protocols in Grid Component Systems ............... 442
   Alessandro Basso, Alexander Bolotov, Artie Basukoski, Vladimir Getov, Ludovic Henrio, Mariusz Urbanski

An Approach for Environmental Impacts Assessment using Belief Theory .................................. 448
   H. Omrani, L. Ion-Boussier, P. Trigano

Tracking of Multiple Target Types with a Single Neural Extended Kalman Filter .............................. 454
   Kathleen A. Kramer

Integrative Data Mining for Assessing International Conflict Events ................................................ 460
   Francisco Azuaje, Haiying Wang, Huiru Zheng, Chang Liu, Hui Wang, Ruth Rios-Morales

An Clustering Algorithm Based on Rough Set ....................................................................................... 466
   EXu, Gao Xuedong, Wu Sen, Yu Bin

Workflow Quality of Service Management using Data Mining Techniques ......................................... 470
   Jorge Cardoso
