Managed-Pressure Drilling Reduces China Hard-Rock Drilling by Half .......... 472
Chen Shen and Xinming Niu, Sinopec Corp., and Steve Nas and Calvin Holt, Weatherford Intl. Ltd.

Unique Pivot Stabilizer Geometry Advances Directional Efficiency and Borehole Quality With a Specific Rotary-Steerable System ................................................. 485
Steve Barton, Alan Clarke, and Daniel G. Perez, ReedHycalog, and Simon Peach, Weatherford Intl. Ltd.

Design, Construction, and Optimisation of Big-Bore Gas Wells in a Giant Offshore Field ................................................................. 503

Implementation of ROP Management Process in Qatar North Field .................. 512
Stephen M. Remmert and Joseph W. Witt, RasGas Co. Ltd., and Fred E. Dupriest, ExxonMobil Development Co.

Drilling Without WOB: Dream or Reality? An Effective Field Test by Total Angola 522
Christophe Simon, DrillScan; David Goyallon, Total E&P Angola; Jean-Paul Poloco, Total S.A.; Hedi Sellami and Laurent Gerbaud, École des Mines de Paris; and Alfazazi Dourfaye, Varel Europe

The Evolution of a TAML L-4 Multilateral System To Meet the Challenges of a BP Deepwater Subsea Well ................................................................. 533
Ken Home and Robbie Allam, BP; Mark Glaser and Peter Chandler, Weatherford Intl. Ltd.; and Thilo Scharf, Schlumberger

Magnolia Deepwater Experience—Frac-Packing Long Perforated Intervals in Unconsolidated Silt Reservoirs ................................................................. 547

VOLUME 2

Lessons Learned on Sand-Control Failure and Subsequent Workover at Magnolia Deepwater Development ................................................................. 561

Qualifying a New Expandable Reservoir Completion System .................................. 578
Pierre-Charles Wood and Don Duhrkopf, BP, and Annabel Green, Weatherford

High-Integrity Wellbore Surveys: Methods for Eliminating Gross Errors .............. 585
Roger Ekseth, Gyrodata; Torgeir Torkildsden, Statoil ASA; Andrew Brooks, Baker Hughes Inteq; John Weston, Gyrodata; Erik Nynes, Statoil ASA; Harry Wilson, Baker Hughes Inteq; and Kazimir Kovalenko, Gyrodata

Aggressive Drilling Parameters Capitalize on Cutter Technology and PDC Frame Advancement in Mature Field ................................................................. 602
Peter Langille, Marathon Oil Co., and Jason Hildebrand and Kyle Massie, Hughes Christensen

Detailed Post-Event Analysis of Drilling Problems Significantly Alters the Root Cause Reality for Technical Sidetracks ......................................................... 616
Marit Blaasmo, Arne V. Singelstad, and Kjetil Bekkeheien, Statoil

Improved Method for Use of Chelation to Free Stuck Pipe and Enhance Treatment of Lost Returns ................................................................. 624
John K. Montgomery, Stuart R. Keller, SPE, Nancy Krahel, ExxonMobil Upstream Research Company and Martini V. Smith, SPE, ExxonMobil Development Company

Achieving Shoe-to-Shoe Drilling Performance in Hole-Opening Application With Rotary-Steerable Systems ................................................................. 631
Heisig, G., Hood, J., Okewunmi, S., and Robnett, E., Baker Hughes Inteq
Hydraulic Predictions for Polymer- Thickened Foam Flow in Horizontal and Directional Wells

Effects of RPM and ROP on PDC Bit Steerability

Stephen Ernst, Paul Pastusek, and Paul Lutes, Hughes Christensen

PDC Casing Drilling Improves HS& E, Cuts Drilling Costs—West Africa

Klaas Hartsema, Shell Gabon, Enis Aliko, Jaime Campos, Lester Clark, Franck Delgado, Peter Folling, and John Wingate, Hughes Christensen

Demonstrating Managed-Pressure Drilling With the ECD Reduction Tool

Effect of Length: Diameter Ratio on Collapse Test Results and Frame Design

P.D. Pattillo, BP America

Hydraulic Blowout Control Requirements for Big-Bore and HP/HT Developments: Validation With Field Experience

P. Oudeman, Shell Intl. E&P

Encountering an Unexpected Tar Formation in a Deepwater Gulf of Mexico Exploration Well

M.H. Weather, Chevron North America E&P Co.

Premature Yielding Identified in First Comprehensive 2-million-lbm Deepwater Landing String Test Program

Dale W. Bradford, BHP Billiton; Michael L. Payne, BP; Donald E. Schultz, Nexen; Burt A. Adams, Oil & Gas Rental Services; and Kurt D. Vandervort, Mohr Engineering Div.

Application of Purpose-Built Rig Technology Results in Step Change of Drilling Time, Cost, and Opportunities

Application of Enhanced Ultrasonic Measurements for Cement and Casing Evaluation

C. Morris and L. Sabbagh, Schlumberger; R. Wydfinski and J. Hupp, BP; and R. van Kuijk and B. Froelich, Schlumberger

CIDS to Orlan: Transformation and Startup of Sakhalin’s Ice-Resistant Drilling Platform

Anthony M. Higgins, Boris Zuskov, and Paul Vande Zande, ExxonMobil Development Co.

Development of a Subsea TTRD Capability West of Shetland

Robert Johansen, BP Exploration Operating Co. Ltd., and Angus MacLeod, Leading Edge Advantage

Applying Risk Analysis to Casing While Drilling

Houtchens, B., Foster, J., and Tessari, R., Tesco Corp.

Drilling and Completing Intelligent Multilateral MRC Wells in Haradh Inc-3

Fahad Al-Bani and Ahmad Shah Balm, Saudi Aramco, and Suresh Jacob, WellDynamics Inc.

Strain-Based Design of Tubulars for Extreme Service Wells

J. Nowinka and T. Kaiser, Noetic Engineering Inc., and B. Lepper, Shell Canada Ltd.

Lubricants Enabled Completion of ERD Well

Jonny Holand, Svein Arne Kvamme, Tor Henry Omland, Arild Saasen, and Knut Taugbol, Statoil, and John Jamth, Intertek West Lab
Drilling, Completion, and Openhole Formation Evaluation of High-Angle Wells in High-Density Cesium Formate Brine: The Kvitebjørn Experience, 2004–2006 .................................................. 808
Per Cato Berg, Erik Sandtorv Pedersen, ?shild Lauritsen, Nader Behjat, and Siri Hagerup-Jenssen, Statoil, and Sil Howand, Gunnar Olsvik, John D. Downs, Mike Harris, and Jim Turner, Cabot Specialty Fluids

Overcoming the Loss of a Primary Barrier in an HP/HT Well—Investigation and Solution ................................................................. 825
Alan Humphreys, Total France, and Robert Ross, Baker Oil Tools

Predrill Estimation of Subsalt Fracture Gradient: Analysis of the Spa Prospect to Validate Nonlinear Finite Element Stress Analyses ......................................................... 835
J.T. Fredrich, BP America; B.P. Engler and J.A. Smith, Sandia Natl. Laboratories; and E.C. Onyia and D.N. Tolman, ConocoPhillips

How Much Is Left of Your Centralizer After Exiting a Casing Window in an Extended-Reach Horizontal Multilateral? Modeling, Yard Tests, and Field Results From Alaska's West Sak Development .................................. 843

Two Salt-Dome Wells Successfully Drilled With Casing-While-Drilling Technology .............................................................. 850
David Veltri, Yuma, and Tommy Warren and Robert Tessari, Tesco Corp.

Self-Healing Cement—Novel Technology To Achieve Leak-Free Wells ................................................................. 856

Beryl Alpha—Reaching Out To Recover: An Extended-Reach Drilling Upgrade Project on a 30-Year-Old Rig ................................. 869
Richard N. Cutt, ExxonMobil Development Co.

More Ultradeepwater Drilling Problems ....................................................... 888
John Shaughnessy and William Daugherty, BP America; Rick Graff, Chevron North American E&P Co.; and Todd Durkee, Anadarko Petroleum Corp.

Deepwater Drillship Operations and Upgrade ............................................. 896
O. De Bonnafos, Pride Foramer, and G.H. Zijderveld, GustoMSC

Wellbore Stress Indicators While Drilling: A Comparison of Induced Features From Wireline and LWD High-Resolution Electrical Images ................................................................................................................. 919
G. Lindsay, Inteq; S. Ong, Baker Atlas; and S. Morris and J. Lofts, Inteq

Further Development, Field Testing, and Application of the Wellbore Strengthening Technique for Drilling Operations .................................................. 930
Giin-Fa Fuh and Dave Beardmore, ConocoPhillips Co., and Nobuo Morita, Waseda U.

Improved Well Construction Enabled by Next-Generation Top-Drive Casing Running and Drilling Tools .................................................. 942
Egill Abrahamsen and Doug Reid, Weatherford Intl. Inc.

Floatation of 10¾-in. Liner—A Method Used To Reach Beyond 10 km ............................................................... 947
Johan Eck-Olsen, Rune Haugom, Geir Laklingholm, and Håkon Sletten, Statoil ASA

A New Drillstring Fatigue Supervision System ........................................ 956
O. Vinké and D. Averbuch, Inst. Français du Pétrole; S. Toilet, Cybernetix; B. Lefevre, Vam Drilling; and D. Dupuis, Pride Intl.

Dope-Free Tubular Connections, Through Research and Development to Field Trial and Implementation: A North Sea Case History .................................................. 964
Henrik B. Andersen, Marcus P. Hummer, and Rasmus C. Engell, Maersk Oil, and Lionel Verdillon and Arnaud Pardé, Vallourec & Mannesmann Tubes

Coiled Tubing Re-Entry Whipstocks: The Next Evolutionary Step in Drilling Practices for Mature-Field Development ......................................................... 968
Garry Garfield and Gordon Mackenzie, Baker Oil Tools
Recent Metal-to-Metal Sealing Technology for Zonal Isolation Applications
Demonstrates Potential for Use in Hostile HP/HT Environments ........................................... 973
Garry Garfield and Gordon Mackenzie, Baker Oil Tools

First Gas Field Developed Using Exclusively Dope-Free Casing and Tubing
Connections—Statoil Snøhvit .................................................................................................................. 977
Gabriel Carcagno and Tomás Castilheiras, Tenaris, and Dag Johan Eiane, Statoil

Drill Faster, Deeper, and Further With Ultrahigh-Torque Third-Generation Double-Shoulder Connections ................................................................. 985
R. Brett Chandler, Andrei Muradov, and Michael J. Jellison, Grant Prideco, and Manuel E. Gonzalez and Jiang Wu, Chevron

Drilling for Coalbed Methane in the San Juan Basin With Coiled Tubing: Results, Learnings, and a World First ................................................................. 999
Sam Noynaert and Dale Pumphrey, BP America; Tony Pink, Schlumberger; and Tug Eiden, Fred Hartensteiner, and Chip Nelson, BP America

Study on Gelation and Freezing Phenomena of Synthetic Drilling Fluids in Ultradeepwater Environments ........................................................................ 1013

Improvements in Operations Using a High Efficiency Jackup .................................................................. 1021
Gordon Hart and Allan Ramsing, Maersk Contractors

Optimization of Deep Drilling Performance: Benchmark Testing Drives ROP Improvements for Bits and Drilling Fluids ............................................................. 1027
Arnis Judzis, TerraTek; Ronald G. Bland, Baker Hughes; David A. Curry, Hughes Christensen; Alan D. Black and Homer A. Robertson, TerraTek; Matthew J. Meiners, Hughes Christensen; and Timothy C. Grant, U.S. DOE

Recovery of a Damaged Jackup Following Hurricane Rita ..................................................................... 1039

A 200 C, 35,000-psi HP/HT MWD Tool: Development Program, Architecture, Mission Profile, and Prototype Testing Results to Date ......................................................................... 1052
J.C. Mayes, B.E. Boling, D.M. Mootoo, and Meghan O’Keefe, Schlumberger, and W.J. Gwilliam, U.S. DOE

Application of Small Vibration Logging Tool Yields Improved Dynamic Drilling Performance ................. 1063
Daniel Perez, Russ Lockley, Alan J. Clarke, and Chris M. Hanley, ReedHycalog

Are Preflushes Really Contributing to Mud Displacement During Primary Cementing? .............................. 1076
D.J. Guillot and J. Desroches, Schlumberger, and I. Frigaard, U. of British Columbia

Extreme Drilling Environment Forces Evolution of Rotary Steerable Systems and Rotary Steerable Bit Technology ........................................................................ 1084
Bronwyn Cox and Louis Romo, BP America Production Co.; Brett Champion and Osman Maung, Schlumberger D&M; and Kirk Card and Steve Barton, ReedHycalog

Deepwater Blowout—A Case History: Shallow Gas Hazards Hide in the Weeds ........................................ 1109
William Flores Jr., John B. Garner, and Chris Scarborough, Boots & Coots

Special Issues in the Stress Analysis of Casing Strings in Steam-Injection Wells: Mathematical Development and Design ........................................................................ 1112
R. Garside, TNK-BP; P.D. Pattillo, and P.D. Pattillo II, BP America; U.B. Sathuvalli, Blade Energy Partners

Integrating Safety Leadership and Cultural Change .................................................................................. 1120
George Siokos, Enterprise Development Network, and John Karish, Ensco Intl. Inc.
