CONTENTS

PART A

TRIBOMATERIALS

IJTC2006-12005........................................................................................................ 1
A Deterministic-Chaos Study of Electron Triboemission Outputs
  G. J. Molina, M. J. Furey, and C. Kajdas

IJTC2006-12052........................................................................................................ 9
Preparation and Characterization of Oil-Dosed Phases Created by Supercritical Fluid on
Polymer Materials
  K. Hachiya, T. Kichikawa, and T. Takajo

IJTC2006-12064........................................................................................................ 17
Tribological Investigation of Cast Iron Air-Conditioning Compressor Surfaces in CO₂ Refrigerant
Nicholaos G. Demas and Andreas A. Polycarpou

IJTC2006-12156........................................................................................................ 25
A Comparison of the Tribo-Mechanical Properties of a Wear Resistant Cobalt-Based Alloy
Produced by Different Manufacturing Processes
  H. Yu, R. Ahmed, and H. de Villiers Lovelock

IJTC2006-12196........................................................................................................ 35
Effects of Temperature and Sliding Distance on the Wear Behavior of Austenitic Fe-Cr-C-Si
Hardfacing Alloy
  Kwon-Yeong Lee, Kang Hee Ko, Ji Hui Kim, Gyung Guk Kim, and Seon-Jin Kim

IJTC2006-12241........................................................................................................ 41
A Two-Parameter Function for Nanoscale Indentation Measurement of Near Surface Properties
  K. Farhang, L. E. Seitzman, and B. Feng

IJTC2006-12242........................................................................................................ 49
Assessment and Verification of a Novel Method for Near Surface Measurement of
Mechanical Properties
  S. Ozcan, K. Farhang, and P. Filip

IJTC2006-12326........................................................................................................ 59
Sliding Friction and Wear Characteristics of Al₂O₃-Al Nanocomposites
  Jun Qu, Linan An, and Peter J. Blau

IJTC2006-12345........................................................................................................ 61
Archard Wear Coefficients for Ruby and Silicon Nitride Scanning CMM Probe Tips
  J. David Cogdell

LUBRICANTS AND ADDITIVES

IJTC2006-12021........................................................................................................ 63
Study on Synergistic Antioxidance Properties of Organic Molybdenum Complex With Arylamine
Antioxidant
  Jian-Qiang Hu, Xian-Yong Wei, Yan Fu, and Jun-Bing Yao
Framework for Lubricant Chemistry-Sensitive Wear Modeling

B. C. Thomas and V. W. Wong

ELASTOHYDRODYNAMIC LUBRICATION

The Pressure-Viscosity Coefficient for Newtonian EHL Film Thickness With General Piezoviscous Response

Scott Bair, Yuchuan Liu, and Q. Jane Wang

Soft Elastohydrodynamic Analysis of Radial Lip Seals With Deterministic Microasperities on the Shaft

Philip C. Hadinata and Lyndon Scott Stephens

Simulations and Measurements of Sliding Friction Between Rough Surfaces in Point Contacts: From EHL to Boundary Lubrication

Shun Wang, Wenzhong Wang, Fanghui Shi, Yucong Wang, Haibo Chen, Hui Wang, and Yuanzhong Hu

Elastohydrodynamic Lubrication Analysis of the Two Surfaces Under Oscillatory Contact With Non-Newtonian Fluids

K. Wongseedakaew and M. Mongkolwongrojn

Application of the Amplitude Reduction Technique Within Probabilistic Rough EHL Models

Laurentiu Moraru and Theo G. Keith, Jr.

EHL Experimental Techniques and Experimental-Numerical Result Comparisons

Yuchuan Liu, Y. Zhang, D. Zhu, and Q. Jane Wang

Amplitude Reduction in Starved EHL Contacts With Varying Lubricant Supply

G. Popovici, C. H. Venner, P. M. Lugt, and M. Organisciak

Piston Secondary Dynamics Considering Elastohydrodynamic Lubrication and Skirt Friction

Paras Shah, Zissimos P. Mourelatos, and Prashantkumar Patel

Effects of Oblique Roughness on TEHL Point Contacts

J. Wang, T. Inumaru, and M. Kaneta

Ultrasonic Measurement of EHL Oil Films in a Mixed Regime Contact

R. S. Dwyer-Joyce and T. Reddyhoff

</table>
| Study on Effect of Surface Roughness Wavelength in Viscoelastic Fluid Lubrication Using Correspondence Theory  
Haosheng Chen, Haoqun Li, Jiang Li, and Darong Chen |
| IJTC2006-12024      | 271  |
| Axial Wedge Effect in Tilted Hydrodynamic Journal Bearings  
Demetrio C. Zachariadis |
| IJTC2006-12029      | 281  |
| The Influence of Groove Size on the Static and Rotordynamic Characteristics of Short, Laminar-Flow Annular Seals  
Dara W. Childs, Matthew Graviss, and Luis E. Rodriguez |
| IJTC2006-12033      | 295  |
| Finite Element Solution of Inertia-Influenced Flow in Thin Fluid Films  
Noël Brunetière and Bernard Tournerie |
| IJTC2006-12041      | 309  |
| Identification of Force Coefficients in a Squeeze Film Damper With a Mechanical End Seal: Centered Circular Orbit Tests  
Luis San Andrés and Adolfo Delgado |
| IJTC2006-12042      | 319  |
F. P. Brito, A. S. Miranda, J. Bouyer, and M. Fillon |
| IJTC2006-12045      | 329  |
| The Modular Principle of Forming of Adaptive Film Lubrication Bearings  
Vladas Vekteris and Vadim Mokshin |
| IJTC2006-12049      | 335  |
| Numerical Modeling of Rotordynamic Coefficients for Deliberately Roughened Stator Gas Annular Seals  
Gocha Chochua and Thomas A. Souls |
| IJTC2006-12060      | 343  |
| Theoretical Analysis of Textured “Damper” Annular Seals  
Mihai Arghir, Fred Billy, Gérard Pineau, Jean Frêne, and Alain Texier |
| IJTC2006-12082      | 355  |
| Optimization of Groove Dimensions in Spiral-Grooved Journal Bearings for RRO or NRRO Characteristics  
T. Hirayama, N. Yamaguchi, S. Sakai, S. Toma, N. Hishida, T. Matsuoka, and H. Yabe |
Numerical Model of a Reciprocating Hydraulic Rod Seal
Richard F. Salant, Nicholas Maser, and Bo Yang

Determination of the Fretting Regimes Under Stick-Slip Condition Using the Phase Difference Between Friction and Relative Displacement of Two Fretting Surfaces
Sung-Hoon Jeong and Young-Ze Lee

Effect of Lubrication on Friction and Torque-Tension Relationship in Threaded Fasteners
Q. Zou, T. S. Sun, S. A. Nassar, G. C. Barber, and A. K. Gumul

Experimental and Numerical Investigation of a Gas Compressor Windback Seal
Adnan Al-Ghasem, G. L. Morrison, and Jr., John P. Platt

Development of Micro Traction Drive Modified From Tapered Roller Bearings
Isamu Shiotsu, Akihiko Umeda, Yasuyoshi Tozaki, Takeshi Yoshimi, Shuichi Isayama, and Susumu Matsumoto

Thermal Assessment of Dynamic Rotor/Auxiliary Bearing Contact Events
P. S. Keogh and W. Y. Yong

Continuous-Thread Model of Load Distribution and Nut Wear in Grease-Lubricated Lead Screws
T. A. Blanchet

The Scuffing Behaviour of Ground Steel Disks Running Against Superfinished Disks at a High Sliding Speed
A. K. Dhulipalla, R. W. Snidle, and H. P. Evans

Measurements of Contact and Leakage in a Pipe Flange Gasket
R. S. Dwyer-Joyce, P. Osborne, and S. B. M. Beck

Elastic-Plastic Contact Behavior Considering Asperity Interactions for Surfaces With Various Height Distributions
Yeau-Ren Jeng and Shin-Rung Peng

A Finite Element Study of the Deformations, Forces, Stress Formations, and Energy Losses in Sliding Cylindrical Contacts
Raghvendra Vijaywargiya and Itzhak Green
Determination of the Fractal Scaling Parameter From Simulated Fractal-Regular Surface Profiles Based on the Weierstrass-Mandelbrot Function

Shao Wang, Ji Shen, and Wai Kin Chan

Critical Review of Elastic Conforming Rough Surface Model With Adhesion and Its Application to Predict Thermal and Electrical Contact Resistance

M. R. Sridhar

An Incremental Adaptive Procedure for Viscoelastic Contact Problems

Fatin F. Mahmoud, Ahmed G. El-Shafei, and Mohamed A. Attia

Modeling of the Rolling and Sliding Contact Between Two Asperities: Part I — Numerical Methodology

V. Boucly, D. Nélías, and I. Green

Influence of Microstructure in Partial-Slip Fretting Contacts Based Upon Two-Dimensional Crystal Plasticity Simulations

Chung-Hyun Goh, David L. McDowell, and Richard W. Neu

Nanoindentation of Silica Nanoparticles Attached to a Silicon Substrate

Min Zou and Dehua Yang

Analysis of Contact Characteristics of Small Rough Surfaces Taking Bulk Deformation and Meniscus Force Into Consideration

Kyosuke Ono and Masami Yamane
