Traffic and Transportation Studies

Proceedings of the Fifth International Conference on Traffic and Transportation Studies

August 2 - 4, 2006
Xi'an, China

CO-SPONSORED BY
Beijing Jiaotong University, Beijing (BJU), P.R.China
American Society of Civil Engineers (ASCE), USA
Systems Engineering Society of China (SESC), P.R.China
State Key Lab of Rail Traffic Control and Safety (SKLRTCS), P.R.China
Institute of Transportation Engineers (ITE), USA
Beijing Transport Research Center (BTRC), P.R.China
Japan Society of Civil Engineers (JSCE), Japan
Hong Kong Society for Transportation Studies (HKSTS), P.R.China
Institute of Highways & Transportation (IHT), UK

SUPPORTED BY
National Natural Science Foundation of China (NSFC)
K.C.Wong Education Foundation, Hong Kong

EDITED BY
Baohua Mao, Zongzhong Tian,
Ziyou Gao, and Haijun Huang

Science Press
## Contents

**Keynote Speeches**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Role of Transportation in Economic Development: Can It Be</td>
<td>1</td>
</tr>
<tr>
<td>Measured?</td>
<td></td>
</tr>
<tr>
<td>Kumares C. Sinha and Konstantina (Nadia) Gkritza</td>
<td></td>
</tr>
<tr>
<td>Rational Decision-making under Uncertainty in Transport: Minimising</td>
<td>13</td>
</tr>
<tr>
<td>Maximum Regret</td>
<td></td>
</tr>
<tr>
<td>Michael G. H. Bell</td>
<td></td>
</tr>
<tr>
<td>The New Airport and Its Urban Region: Evaluating Transport Linkages</td>
<td>22</td>
</tr>
<tr>
<td>Luis Ferreira, Nicholas Stevens and Doug Baker</td>
<td></td>
</tr>
<tr>
<td>Innovative U. S. Freight Transportation Strategies</td>
<td>30</td>
</tr>
<tr>
<td>Leigh B. Boske</td>
<td></td>
</tr>
<tr>
<td>Reducing Regional Automobile Emissions: the Price Effects of Boutique Motor Fuels</td>
<td>41</td>
</tr>
<tr>
<td>W. D. Walls and F. W. Rusco</td>
<td></td>
</tr>
</tbody>
</table>

**Group A: Transportation Policy and Management**

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Developing Comparative Congestion Measures to Improve Transportation System Performance</td>
<td>50</td>
</tr>
<tr>
<td>Robert L. Bertini</td>
<td></td>
</tr>
<tr>
<td>Mechanism Study on the Interaction between Urban Transportation and Land Use</td>
<td>61</td>
</tr>
<tr>
<td>Liya Yang, Chunfu Shao and Wei Nie</td>
<td></td>
</tr>
<tr>
<td>Congestion Pricing: Experience &amp; Lessons</td>
<td>70</td>
</tr>
<tr>
<td>Kiran Bhatt</td>
<td></td>
</tr>
<tr>
<td>On the Variation of Value of Travel Time Savings over Income</td>
<td>81</td>
</tr>
<tr>
<td>Hironori Kato and Makoto Fujiu</td>
<td></td>
</tr>
<tr>
<td>Trip Lengths and the Re-location of Metropolitan Employment</td>
<td>92</td>
</tr>
<tr>
<td>Yuzo Masuya, Thoru Tamura, Kazuo Saito and John Black</td>
<td></td>
</tr>
</tbody>
</table>
A Comparison of Transit Developments in Hiroshima and Dalian: Implications for Chinese Cities ........................................... 103
Shengchuan Zhao

Promoting Sustainable Transport Choices and Health ........................................... 114
Michael Carreno and Tom Rye

Urban Mobility and Traffic Safety Issues in Pakistan ........................................... 124
Babar Khan Muhammad, Dianye Zhang and Jiangli Zhu

Study on Finding Expected Share for Logistics Companies in a Cooperative Transport System ........................................... 134
Dong Yang and Michiyasu Odani

Model Development for Freeway Green Landscape Evaluation ................................... 146
Jian Lu, Li Yuan and Wei Xia

The Delivery of Rural Flexible Transport: Experiences from Highland Scotland ........................................... 156
James M Cooper, John D Nelson and Steve Wright

Coordination Evaluation of Transportation Infrastructure Scale and Socioeconomic Development in City ........................................... 167
Yongling Gao and Hao Yang

Approach to Assess the Social Exclusion Dimensions and Equity Impacts in the Community ........................................... 176
Ahmed Mosa, Noboru Harata and Ali Heikal

Evaluation of HOV Lanes in a Multi-modal Transport Network with Multiple User Classes ........................................... 188
Z. X. Wu and B. Quan

Modeling Transport Accessibility and Its Impacts on Shopping Trips ........................................... 196
Shucheng Hu and Wafaa Saleh

Choice of Travel Patterns: Cause-Effect Analysis ........................................... 207
Kohachi Yamane, Akimasa Fujiwara and Junyi Zhang

Modeling Park & Ride Choice Behavior Based on a SP Survey ........................................... 217
Hongzhi Guan, Huanmei Qin and Xiaoming Liu

Sustainable Transport Mode Demand and Preferences for Trip to Work in Metro Manila ........................................... 227
Michelle Parumog, Shoshi Mizokami and Ryuji Kakimoto
Reforming Bus Service Provision and Management Regime in Jakarta, Indonesia ................................................................. 236
Puspita Dirgahayani and Noboru Harata

Transit-oriented Development and Its Application in GuiYang ......................... 246
Q. Fang, Y. Sugie, Z. Z. Yang and J. Y. Zhang

Influence of Life Expectancy to Willingness to Pay for Fatal Risk Reduction ................................................................. 256
Hisashi Imanaga, Masayoshi Tanishita and Shigeru Kashima

Evaluating Efficiency of Household Vehicle Use .......................................... 268
Masashi Kuwano, Akimasa Fujiwara, Junyi Zhang and Backjin Lee

Variability of Travel Time Estimates using Probe Vehicle Data ...................... 278
Toshiyuki Yamamoto, Kai Liu and Taka Morikawa

Analysis on Waiting Area for Left-turn Vehicles at Signalization Intersections ................................................................. 288
Yongheng Chen, Zhaowei Qu, Dianhai Wang and Xing Ge

Modeling Pollutant Concentration Based on Artificial Neural Network ........... 299
Tao Feng, Zhongzhen Yang, Junyi Zhang and Akimasa Fujiwara

Some Key Issues and Sustainable Development Strategies of Urban Traffic ........................................................................... 310
Yongshen Quan, Ying Liu and Jinchuan Chen

Group B: Transportation Planning & Optimization

Calibration and Application of Risk-averse User Equilibrium Model for Hong Kong and Beijing Networks ............................................. 317
K.S. Chan, William H. K. Lam, Gang Xu and Ning Zhang

Dynamic User Optimal Assignment Problem Based on Greenshields Model ................................................................. 326
Hualing Ren, Ziyou Gao and Aiping Lian

Service Network Design for Railway Parcel Transportation ......................... 336
Rui Shen, Jun Liu and Changxu Ji

Sensitivity Analysis of Logit Formulation and Estimation ................................ 347
Ming Zhong, John Douglas Hunt and John Abraham
Estimating Link Travel Time in Dynamic Traffic Network Based on Speed Gradient Model ................................................. 357
Aiping Lian, Ziyou Gao and Hualing Ren

Modeling Transit Assignment for Congested Networks ................. 369
Huimin Niu and Bin Lv

Influence of Road Pricing on Network Reliability ......................... 379
Hao Li, Michiel C. J. Bliemer and Piet H. L. Bovy

Dynamic OD Matrix Estimation of Freeways with Platoon Dispersion and Lags ......................................................... 392
Yuntao Chang

An Asymmetric Multimodal User Equilibrium Model with Turn Delays .... 403
Gang Ren and Wei Wang

Determining Reliability Importance of Links in Road Networks ........... 415
Yafeng Yin

Integrated Method for Road Network Reliability under Stochastic Demand ................................................................. 425
Zhihua Xiong, Chunfu Shao and Zhisheng Yao

Chaos in Traffic Flow Based on Optimal Velocity Model ..................... 435
Guoguang He, Yu Lu and Yonghai Chen

Spatial-temporal Impacts of Tourism Economy ................................ 444
Tomoyuki Furutani

A New Dynamics Model for Two-lane Traffic Flow ......................... 453
Tieqiao Tang, Haijun Huang and Chaoqun Mei

Real Time Modeling Travel Time Reliability Using Cell Transmission Model .............................................................. 461
Huizhao Tu, Henk van Zuylen and Hans van Lint

Measuring and Defining Freeway Travel Time Reliability ................. 473
Huizhao Tu, Hans van Lint and Henk van Zuylen

A Model for Stochastic User Equilibrium Based on Prospect Theory ..... 482
Shouhua Cao, Zhennzhou Yuan and Hao Liu

Revised Estimation of Time-Varying Network origin-destination Flows...... 496
Pengpeng Jiao, Huapu Lu and Noboru Harata
Ant Colony Algorithm for Transit Vehicle Scheduling Problem with Route Time Constraint ....................................................... 509
Haixing Wang, Jinsheng Shen and Zhigang Liu

Study on Highway Control of Signalized Intersection Based on Genetic Algorithm .......................................................... 517
Yuanli Gu, Shanmei Li, Lei Yu and Chunfu Shao

A Vehicle-Coordinated Strategy for Large-Scale Logistics Systems ............ 525
Xing Liu, Guoguang He and Wenwei Gao

A Travel Demand Prediction Model with Feedback for Jabodetabek Metropolitan Area, Indonesia ............................................. 535
Xuesong Feng, Junyi Zhang, Akimasa Fujiwara, Metin Senbil and Backjin Lee

Fuzzy Dissimilar Shortest Paths in Urban Traffic Networks ..................... 547
Ruichun He and Yinzhen Li

Models and Properties of the Capacitated Network User Equilibrium ..... 559
Lin Cheng and Wei Wang

Study on Urban Mixed-Traffic Flow Based Fractal ..................................... 567
Yin Zhu, Junli Wang, Dalin Qian and Tingjie Han

Group C: Applications of New Technologies

Critical Elements of Video Detection System Applications at Signalized Intersections ................................................................. 576
Zong Tian

Research on Offset Optimization of Signalized Arterials .......................... 584
Dianhai Wang, Xianmin Song and Feng Li

Ramp Metering in Europe, State-of-the-Art and Beyond ............................. 595
Zlatan Muhurdarevic, Helen Condie, Elia Ben-Shabat, Oliver Ernhofer, Habib Hadj-Salem and Ioannis Papamichail

Study on a Vision-based System for Real-time Collection of Mixed Traffic Data ................................................................. 604
Chunfu Shao, Yi Zhao, Hao Yue and Xu Zhang

An Analysis of Effects of Rainfall on Travel Speed at Signalized Surface Road Network Based on Probe Vehicle Data ......................... 615
Lixiao Wang, Toshiyuki Yamamoto, Tornio Miwa and Taka Morikawa
Validating the Influence of Induced Traffic Using the Combined Travel Model and Person Trip Data ........................................... 625
Takahiro Uchiyama, Takuya Maruyama and Noboru Harata

Contrasting Analysis of Traffic Stream Characteristics between Urban Expressways and Freeways .................................................. 635
Liande Zhong, Xiaoduan Sun, Jian Rong and Yongsheng Chen

Estimating Delay Time at Signalized Intersections by Probe Vehicles ...... 644
Kai Liu, Toshiyuki Yamamoto and Taka Morikawa

Application of OED to Traffic Congestion Analysis .......................... 656
Xiaoguang Yang, Yu Lin and Yingying Ma

Integration Opportunity Analysis of UTCS and UTGS Based on the Dynamic Speed Model ......................................................... 665
Lixia Bao, Zhaosheng Yang, Xinjie Liu and Xin Chen

Unlocking the Mysteries of Freeway Sensor Data to Diagnose Detailed Bottleneck Dynamics ......................................................... 675
Robert L. Bertini

Comparison of Timing Plan Transition Algorithms .............................. 687
Hongqiang Li, Huapu Lu, Intikhab Ahmed Qureshi and Chong Liu

A Study on Public Transport Fare Payment Choice with RP/SP Survey in China ................................................................. 697
Xu Hao, Mark Wardman and Haibo Chen

Efficiency Loss of a Stochastic User Equilibrium in a Traffic Network with ATIS Market Penetration ...................................................... 709
Haijun Huang, Tianliang Liu, Xiaolei Guo and Hai Yang

Effect of Cycletime Shortening from Pedestrian Viewpoint .................. 720
Kiiichiro Hatoyama and Masao Kenzaki

Evaluating Pedestrian’s Choice of Some Specific Facilities in Dhaka .......... 730
Khan Rubayet Rahaman, Nobuaki Ohmori and Noboru Harata

Bus Way and Bus Lane in Motorcycle Dominated Traffic ..................... 739
Minh Tranhuu

Warning Devices for Reducing Speeds on Curves ............................... 752
N. Stamatiadis and A. Vest
Procedure for Assessing the Need for Raised Medians ........................ 761
Mitsuru Saito, David Cox and Thomas G. Jin

Traffic Accident Characteristics in Freeway Tunnels ........................ 771
Shengrui Zhang and Zhuanglin Ma

Locating Bus Stations Using Advanced Approach ............................ 780
Xinlian Xie, Shaocheng Wang, Charles Roberts and Jin Wang

The Feasibility Study on Bus Lane Set in Bus Rapid Transit ............... 792
Zhiyun Zou, Ying Fu and Liang Zhou

Mathematical Explanation of Effects of Lanes’ Number on Highway Capacity .............................. 803
Xiaobao Yang and Ning Zhang

Developing Port EDI and the Government Policy ............................. 812
Kenji Ono and Jun F. Saito

The Study of Stop Based on Cellular Automaton Model of Traffic Flow ... 822
Runping Zhai, Yingli Zheng and Fengchun Han

Decision Assistant System of the Preplan for Railway Accident Rescue Based on Case-Based Reasoning .............................. 827
Xiaoqing Cheng, Quanxin Sun and Limin Jia

Group D: Applications of New Technologies

Application on Fault Tree Analysis in Railway Power Supply Systems .... 836
Tinkin Ho, Shaokuan Chen and Baohua Mao

Fourier Transform Technique for Predicting Track Critical Velocity of High Speed Railway .............................. 848
Xiaoyan Lei and Quanjin Wang

Dynamic Analysis of the Maglev Train ....................................... 859
Tanghong Liu and Hongqi Tian

Modelling the Operation Time in Railway Terminals ......................... 869
Alejandro Tdela and Angela Farfaruello

Distributed Parallel Modeling for Traffic Simulation ........................ 877
Anning Ni, Zhicai Juan and Weihua Zhang
Stochastic Modeling of Delay Propagation at Railway Stations and Junctions .......................................................... 887
Ingo A. Hansen and Jianxin Yuan

Toll Roads, Intermodal Competition and the Strategic Reorganization of China’s Railway Industry ............................................. 899
W. D. Walls and Lasheng Yuan

Modelling of Transferring Route Selection on Railway Passenger Special Line ............................................................. 904
Hong Xu, Jianjun Ma and Hao Yang

Safety Effects and Traffic Maneuvers of Older Drivers ....................... 911
N. Stamatiadis and S. Chandraratna

Development of a Web GIS-Based Activity-Travel Simulator for Travel Feedback Program .................................................. 920
Morimichi Nakazato, Nobuaki Ohmori, Sadayasu Aono, Takuya Maruyama and Noboru Harata

Crew Scheduling for Shanghai Urban Rail Transit from Modeling to Implementation ......................................................... 929
Xianzhong Li and Ruihua Xu

Exploring Motorcyclist Injury Severity at T-junction in the UK Using the Ordered Probit/Logit Models ......................... 939
Chihwei Pai, Wafaa Saleh and Mike Maher

A Method for Calculating the Maximum Passenger Assembling Number of Railway Passenger Station ........................................... 949
Yuqiang He, Baohua Mao and Rong Huang

Development of a Web-GIS Based Scheduling Simulator on Holiday Non-Work Activities ............................................. 959
Sadayasu Aono, Nobuaki Ohmori and Noboru Harata

A study on Time Transfer Possibility of the Land Use and Transportation Interaction Model on 3 Time Points Data ................ 968
Hiroshi Sugita, Toshiyuki Kigure, Masayoshi Tanishita and Shigeru Kashima

Motorist Awareness and Perception of Variable Message Signs in Bangkok ................................................................. 981
Kasem Choocharukul
Evaluation of Chinese Display Format for Variable Message Signs ................................. 991
Chienjung Lai

Evaluating Location of Intermodal Freight Terminals .............................................. 1000
Ackchai Sirikijpanichkul and Luis Ferreira

Vehicle Automatic Collision Warning Algorithm Based on FuNN .......................... 1009
Jiangfeng Wang, Feng Gao, Shaoyou Shi and Jian Wang

Parameter Comparison in 3 Metropolitan Area Using Land Use-Transport Interaction Model ................................................................. 1018
Shogo Sakamoto, Hiroshi Sugita, Masayoshi Tanishita and Shigeru Kashima

A Study of Small World Phenomenon in Urban Traffic Communication System ................................................................. 1030
Xiaojing Kang, Jianming Hu, Mingchen Zhang and Jingyan Song

Comparison Study on LOS Evaluation Approaches of Signalized Intersections under Mixed Traffic Flow: Experiences in a Chinese City ................................................................. 1038
Ren Dong, Shibo Zhang, Min He and Mingwei He

Simulation of the International Container Cargo Movement in Chinese Ports by Incorporating Chinese Land Transport Network ................................................................. 1048
Liqiang Ma, Ryuichi Shibasaki and Hitoshi Ieda

Forecasting Trip Generation and Distribution in a Strip City: a Case Study of Huzhou, China ................................................................. 1059
Min Yang, Yu Xia, Wei Wang and Xuewu Chen

Analysis on Short Sea Transportation Services Bids with Combinatorial Auction ................................................................. 1068
Hualong Yang, Xiaoning Zhu and Shaqiang Yu

Indexes

Subject Index ................................................................................................................. 1075

Author Index ................................................................................................................. 1082
