</table>
# Table of Contents

Design of Positive Linear Observers for Linear Compartmental Systems ........................................... 3377
Juhoon Back, Alessandro Astolfi, Hansung Cho

Analysis of Treatment for HIV-infected Patients Considering CD4 T Cell Count in STI .......................... 3382
Ki Yeon Park, Han Byul Chung, Chung Choo Chung

Improving LaSalle's Invariance Principle using Geometric Clues ....................................................... 3388
Hyungbo Shim, Jin Heon Seo

Rotation Angle Measurement of High-speed Flying Object .................................................................. 3391
Tomohiko Kadowaki, Kazuyuki Kobayashi, Kajiro Watanabe

Development of a Compact, High Precision Turbidimeter .................................................................. 3395
Kiyoyuki Kitakura, Masashi Takeishi, Hidehiko Saitou, Takeshi Kuwagata, Hisashi Kitamoto

High-frequency Active Probe for Oscilloscope with Optimum Design for the SICE-ICASE International Joint Conference 2006 (SICE-ICCAS 2006) .................................................. 3399
Kenichiro Haga, Koichi Chujo

A Precise Optical Interferometric Technique Using PDA and an Application to a Coherent Optical Network Analyzer ........................................................................................................ 3403
Tetsuo Yano,Minoru Maeda, Hiroki Saitou, Hironori Takai, Takaaki Hirata

8-Electrode Data Collection System For Electrical Capacitance Tomography .................................. 3408
Apinai Rerkratn, Thanakorn Lertrathdee, Kitiphol Chitsakul, Manas Sangworasil, Wandee Petchmaneelumka

Non-contact Temperature Measurement of Semitransparent Silicon Wafer ..................................... 3412
Yoshikazu Ikeda,Tohru Iuchi

Proportional Control for Trajectory Tracking of A Wheeled Mobile Robot ........................................... 3418
D. Hazry, M. Sugisaka

Generating target path for tracing a line before missing the traced line of dead angle of camera .......... 3421
T. Kawano, M. Harai, M. Sugisaka

Computer Simulator For Training Operators of Infrared Camera ....................................................... 3425
M. Sugisaka,1 Erma Rahayu Binti Mohd, Faisal Abdullah

Visual tracking in real-time processing ................................................................................................. 3431
Eiji Goubaru, Masanori Sugisaka

A control method of accelerator of an electric vehicle ........................................................................ 3435
Masanori Sugisaka, Hiroaki Tanaka, Masayoshi Hara

Trackability Based Motion Control in Mobile Hand-Eye System ......................................................... 3439
Tomoyuki Shiozaki, Toshiyuki Murakami

A Sensor Fusion Method for Mobile Robot Navigation ........................................................................ 3445
Song Xingyong, Hyun-Ki Lee, Hyungsuck Cho

Visual Servo of Active Cameras and Manipulators by Time Delay Compensation of Image Features with Simple On-line Calibration ........................................................................ 3452
Itsumi Kinbara, Satoshi Komada, Junji Hirai

Vision Based Control for Power Assist Motion of Wheelchair Robots .............................................. 3458
Naoki Oda, Hiroayuki Shimizu

Image-based visual tracking for moving targets with active stereo vision robot .............................. 3464
Masaaki Shibata, Nobuaki Kobayashi

Obstacle Avoidance Control for Mobile Robots based on Vision ....................................................... 3470
Shunsuke Nara, Satoru Takahashi

Evaluation of Human Skill in Teleoperation System ........................................................................... 3474
Yorito Maeda, Satoshi Suzuki, Hiroshi Igarashi, Koichi Hidaka
Table of Contents

Hybrid Control of Remote Controlled Bilateral Manipulation System .......................................................... 3480
Yuki Kakizoe, Hisakazu Nakamurai, Hirokazu Nishitani

Clinical Evaluation of the KAIST-Ewha Colonoscopy Simulator II ................................................................. 3485
Sun Young Yi, Hyun Seok Kim, Woojin Ahn, Woo Seok Kim, Doo Yong Lee

Human-machine Collaboration System for Fine Assembly Process ................................................................. 3490
Yutaka Harada, Napoleon Nazir, Yoshinori Shiote, Tomotaka Ito

Exploring Unknown Environment using Position Correction based on Explored Information in Multi-robot Teleoperation .......................................................................................................................... 3496
Futoshi Kobayashi, Yuki Minami, Fumio Kojima

A Linear Affective Space Model based on the Facial Expressions for Mascot-Type Robots ..................................... 3502
Hui Sung Lee, Jeong Woo Park, Myung Jin Chung

Localization and Error Correction for Mobile Robot with an Image Sensor ......................................................... 3508
Isaku Nagai, Yutaka Tanaka

Thinning-based Topological Exploration in Dynamic Environments ....................................................................... 3513
Tae-Bum Kwon, Yong-Ju Lee, Jae-Bok Song, Woojin Chung

Vision-Based Motion Capture for Human Support Robot in Action ........................................................................ 3519
Akira Ohta, Noaki Amano

Using State-Space Database to Control Vehicles .................................................................................................. 3523
Hiromi NakatsuKasa, Kakui Ogawara, Takehiro Higuchi

Iterative Segmentation Scheme from Motion Estimated as Optical Flow ............................................................. 3529
Tetsuo Yamaguchi, Yuichiro Tanaka

Development and Control of an Autonomously Obstacle-Navigation Inspection Robot for Extra-High Voltage Power Transmission Lines ....................................................................................... 3535
Ludan Wang, Lijin Fang, Hongguang Wang, Mingyang Zhao

Development of Active Walker by using Hart Walker ............................................................................................ 3541
M. Ogata, T. Karato, T. Tsuji, H. Kobayashi, K. Irie

Integration of Tactile Information and Visual Information Using A Glass Substrate Surface Acoustic Wave Tactile Display .................................................................................................................... 3546
Hiroyuki Koi, Mataya Takasaki, Takeshi Mizuno, Takaaki Nara

Chaos Information Criteria to Detect High-pressure Gas Leak in Petroleum Refining Plant ................................ 3550
Tetsuji Tani, Toru Nagashima, Yasunari Fujimoto, Tadashi Iokibe, Toru Yamaguchi

Controller Design for Robot with Pneumatic Artificial Muscles ............................................................................. 3554
Toshiaki Tsuji, Shunsuke Miyata, Takaya Hashimoto, Hiroshi Kobayashi

Development of the Face Robot SAYA for Rich Facial Expressions .................................................................... 3558
Takaya Hashimoto, Sachio Hiramatsu, Toshiaki Tsuji, Hiroshi Kobayashi

Suspicious Behavior Detection based on Case-Based Reasoning using Face Direction ......................................... 3564
Yasuyuki Miyazokoshi, Eri Sato, Toru Yamaguchi

Tradition of craftsmanship through computer augmented tools ............................................................................ 3568
Takahiro Muta, Yuka Jimbo, Hirohiko Mori

An experimental study for work environment design for the personal information handling in public space ............ 3573
Shigeo Ishida, Katsuhiko Ogawa

Supporting foOmoiArt: A Design issue in Post-Ubiquitous Society ...................................................................... 3579
Kentaro Go, Naotake Hiratani, Hideaki Kasai, Masaaki Kurosu

Unconscious transmission of human feelings ......................................................................................................... 3585
Mitsuhiko Karashima, Yuko Ishibashi
Table of Contents

User interface concepts for post ubiquitous computing ................................................................. 3589
Naotake Hirasawa, Naoto Aizawa, Hideaki Kasai

Predicting the Mackey Glass Chaotic Time Series Using Genetic Algorithm .................................. 3595
Mohammad Parzad, Hamid Taherstina, Hamid Khaloozadeh

An Integrated Fuzzy Ants and Artificial Immune Recognition System for Anomaly Detection ......... 3599
Surat Srinoy, Werasak Kurutach

Foundation-Applied Skin Color Prediction Via SVD-Based Neural Network .................................... 3605
Kazuyuki Kobayashi, Kajiro Watanabe, Naruhito Toyoda, Hiro nobu Yoshikawa

Fire detection using neural network ................................................................................................. 3609
V. Tipsuwanporn, V. Krongratana, S. Gulpanich, K. Thongnopakun

An Approach to Plant Identification Technology: Development of Lignin Pyrolysis Gas Chromatography and Pattern Recognition ........................................................ 3613
Tomoo Aoyama, Ryo Akashi, Hidenori Umeno, Unpei Nagashima

Stock Price Forecasting using Back Propagation Neural Networks with Time and Profit Based Adjusted Weight Factors ................................................................................................. 3619
Nguyen Lu Dang Khoa, Kazuhiro Sakakibara, Ikuko Nishikawa

Elevator Group Supervisory Control System with Destination Floor Guidance System using Genetic Network Programming ........................................................................................................... 3624
Hoon Heo, Shingo Mabu, Kataro Hirasawa, Jinglu Hu

Optimal PWM for Minimization of Total Harmonic Current Distortion in High-Power Induction Motors Using Genetic Algorithms ................................................................. 3629
Arash Sayyah, Mitra Aflaki, Ali Resa Rezazade

Multiobjective Fitness Functions for Stable Marriage Problem using Genetic Algorithm .................. 3635
Ngo Anh Vien, Tae Choong Chung

Genetic Network Programming Considering the Evolution of Breadth and Depth ......................... 3639
Shinji Eto, Shingo Mabu, Kataro Hirasawa, Jinglu Hu

Constrained Global Optimization Problems by RasID-GA .................................................................. 3644
Dongkyu Sohn, Shingo Mabu, Kataro Hirasawa, Jinglu Hu

Adaptive Genetic Algorithm Observer and its Application to a Trailer Truck Control System ........... 3650
Hiroshi Kinjo, Moriyashi Maeshiro, Eiho Uezato, Tetsuhiko Yamamoto

An Emergence Support System with Variable Structure based on Discrete Event Models ............... 3655
Makoto Katoh

The energy navigation system and its application example ............................................................... 3660
Mitsunori Fukuzawa, Ken-Ichi Ohara, Tetsuya Ohtani

A New Topology of Fault-current Limiter and its control strategy .................................................. 3665
Mehrzad Tarafdar Hagh, Mehdi Abapour

Adaptive nonlinear backstepping control of SEDCM under velocity constraint .............................. 3670
Sun Im, Byeong-Soek Lee

On a support system for finding icons by estimating user’s recognition on structure of folders .......... 3676
Kohei Matsuda, Tomoyuki Watanabe, Norikazu Ikoma, Hideaki Kawano, Hiroshi Maeda

Development of a Controller Area Network Interface Unit and Its Application to a Fuel Cell Hybrid Electric Vehicle ............................................................................................................ 3680
Bong-Ju Ahn, Byung-Ryuel Park, Young-Hoon Ki, Gu-Min Jeong, Hyun-Sik Ahn, Do-Hyun Kim

A Multiresolution Mesh Processing System for Efficient CAE ....................................................... 3685
Hiroaki Date, Satoshi Kanai, Takeshi Kishinami, Ichiro Nishigaki

xxxviii
# Table of Contents

A Survey and Analysis of Wireless Fieldbus for Industrial Environments ................................................. 3690
Pulat Matkarbanov, Seungki Lee, Dong-Sung Kim

Parametric Deformation of Mesh Models for Efficient CAE ........................................................................ 3697
Gaku Mizuno, Hiroaki Date, Satoshi Kanai, Takeshi Kishinami, Masahiko Onosato

A Petri Net based approach for the Synthesis of Parts' Controllers for Reconfigurable Manufacturing Systems ............................................. 3702
Eun-Joo Lee, Armand Toguyeni, Nathalie Dangoumau

A study on design review of the control performance of the air conditioning to prevent room pressure change troubles ............................................................................. 3708
Daiki Tanaka, Takamitsu Koike, Nobuhiro Tanaka, Takayuki Miyake, Shigeyuki Tateno, Hisayoshi Matsuyama

Object Recognition using Simultaneous Pattern-Matching in Virtual Environment ..................................... 3714
Yusuke Takahashi, Yuta Miharamatu, Kiyotaka Kato

Camera Vision System for Automation of Sub-assembly Line in Shipbuilding ........................................... 3719
Young Chil Doh, Jae Chang Lee, Seung Hwan Moon,Gl Beom Park, Mi Hee Nam, Hyeon Cheol Lee, Do Hyung Jeon, Dae Kyung Kim, Se Hwan Kim

Spatial Merging for Face Detection .............................................................................................................. 3722
Hiromasa Takatsuka, Masayuki Tanaka, Masatoshi Okutomi

Face Tracking System using Embedded Computer for Robot System ......................................................... 3728
Jong-Il Yoon, Kyoung-Kwan Ahn

Color-based Face Detection using Combination of Modified Local Binary Patterns and embedded Hidden Markov Models .............................................................................................................. 3733
Phuong-Trinh Pham-Ngoc, Kang-Hyun Jo

Exact Discrete-Time Models for Some Second-Order Nonlinear Systems .................................................... 3739
Yasuyuki Tomita, Noriyuki Hori

Approximate Discrete-Time Feedback Linearization of a Constant-Parameter Riccati System ........................ 3745
Hidefumi Takahashi, Noriyuki Hori

The Entire Set of First Order Controllers Guaranteed Stability and Gain/Phase Margins for a LTI Plant with Time Delay ...................................................................................................................... 3749
Keunsik Kim, Young Chol Kim

Nonlinear Phenomena and Stability of Discretized Control Systems .......................................................... 3755
Yoshifumi Okuyama

Fundamental Equivalence between Delay Independent Stabilization and Quadratic Stabilization .................... 3761
Tomoki Hashimoto, Takashi Amemiya, Hironori A. Fujii

The tracking control of uni-axial servo-hydraulic shaking table system using time delay control .............. 3767
Dong-Jae Lee, Chae-Wook Lim, Youngjin Park, Yoonsik Park,Hyoun-Eui Kim, Jong-Won Park

Driving on the tail of catastrophe; Towards an understanding of the risk managing interaction between driver, vehicle, automation, traffic, and infrastructure ..................................................... 3771
Erwin R. Boer

Discussion about Information Presentation from the Standpoint of A Sense of Security ................................ 3779
Mie Nakatani, Ryuichi Tabata, Shogo Nishida

Autonomous Distributed System Paradigm to Secure Safety Critical ......................................................... 3785
Sadatoshi Kumagai, Toshiyuki Miyamoto, Yusuke Morihito

Proactive Information Provision for Reducing Social Construct Risk of Nuclear Facility .............................. 3789
Daisuke Karikawa, Eikou Yagi, Makoto Tokashiki, Masaharu Kitamura
Table of Contents

Human-Machine System Simulation for Supporting the Design and Evaluation of Reliable Aircraft Cockpit Interface .................................................................................................................. 3793 Daïsuke Karikawa, Makoto Takahashi, Akira Ishibashi, Toshio Wakabayashi, Masaharu Kitamura

Open Loop Vibrational Control for Cantilevered Electromagnetic Actuators .......................................................................................................................... 3799 Kenichiro Nonakay, Kensuke Tamuray, John Baillielulz

Vibration Control of Axially Moving System with Variable Speed, Tension and Length ...................................................................................... 3805 Hahn Park, Keum-Shik Hong
