# Table of Contents

- **Output Feedback Sliding Mode Control for Time Delay Systems**
  Hirofumi Ohtsuka, Yuichi Nakshima, Ryuchi Kouzawa, Ikuro Mizumoto, Zenta Iwai

- **Variable Structure Controller with Finite Time Convergence**
  Miran Kim, Dong Jun Kim, Kang-Bak Park

- **The state presumption using the error presumptive observer loosen the restriction range by the sliding mode observer**
  Ryoko Shiraki, Yasuchika Mori

- **Sliding-Mode Observer Design with Extra-Robustness and Its Application for an Aircraft Example**
  Alireza Esna Ashari, Hamid Khaloozadeh

- **Some Remarks on Optimal Sensor Selection Problem**
  Masanori Kawahara, Shigeyasu Kawaji

- **Convergence property on algorithmic control for real-time optimization**
  Joe Imae, Mordikho Nagata, Tomoaki Kobayashi, Guisheng Zhai

- **Minimum Energy Bang-Bang Control for Vertical Launching Missiles**
  Sungjin Cho, Young-In Lee, Ickho Whang

- **Robust Controller Design for Plant Uncertainty**
  A. Numsomran, K. Witheephanich, V. Tipsuwcmporn, N. Kilinsmith

- **Twin Rotors System Modeling and Bumpless Transfer Implementation Algorithm for LQ Control**
  Tae-Shin Kim, Ji-Hyuck Yang, Young-Sam Lee, Oh-Kyu Kwon

- **An Optimal Signal Control along Two-Way Traffic Arterials**
  Haruko Fujii, Hikaru Shimizu

- **Extracting Technology and Detecting Outliers from Process Time Series Data Reflecting Expert Operator Skills**
  Setsuya Kurahashi, Fumitatsu Inagaki

- **Self-Organizing Neural Networks using Discontinuous Teacher Data for Incremental Category Learning**
  Masao Sakai, Noriyasu Homma, Kenichi Abe

- **Pattern Classification via Multi-objective Evolutionary RBF Networks Ensemble**
  Nobuhiko Kondo, Toshiharu Hatanaka, Katsuji Uosaki

- **Fuzzy Decision-making SVM with An Offset for Real-world Lopsided Data Classification**
  Boyang Li, Jinglu Hu, Kotaro Hirashaw

- **Rock Classification by Types and Degrees of Weathering**
  Eiichiro Momma, Takashi Ono, Hiromitsu Ishii

- **The Improved Fast Recursive Method and Its Application in Group Method of Data Handling**
  Peng Con, Jinlong Li, Xiafa Wang

- **Trend of Process Automation and Factory Automation**
  Seiichi Shin

- **Latest Trend of Industrial Network Security Standards and Vendor Activities**
  Shinji Oda
# Table of Contents

Latest Trend of Industrial Real-Time Ethernet for the SICE-ICASE International Joint Conference 2006 *(SICE-ICCAS 2006)*.................................................. 3903  
Yoichi Takayanagi, Toshifumi Akima

A Mathematical Programming for Supply Chain Network Design .................................................. 3908  
Jaein Choi, Hokyung Lee, Soon-Ki Heo, Jongku Lee

Wafer-level Hermetic Packaged Dual-axis Digital Microaccelerometer ........................................ 3913  
Sangmin Lee, Sungwook Kim, Sang Chul Lee, Hyoungho Ko, Yonghwa Park

Broadband Air-Core Brooks-Coil Induction Magnetometer .................................................. 3917  
Kunihiwa Tashiro

Modeling of Magnetic Anisotropy of 3 SrRuO Thin Films Using Tensors ........................................ 3921  
M. Haji-Sheikh, Y. Z. Yoo, O. Chmaissem, S. Kolesnik, A. Ullah

Position Sensing System for Magnet Based Autonomous Vehicle and Robot Using 1-Dimensional Magnetic Field Sensor Array .................................................. 3925  
Young-Yoon Jung, Dae-Young Lim, Young-Jae Ryou, Young-Hak Chang, Jin Lee

Microwave Scattering at Malignant Tissue Boundaries: A New Method for Breast Screening .................. 3931  
G. G. Senaratne, Richard B. Keam, Winston L. Sweatman, Graeme C. Wake

Design of a Haptic Stability Observer in Frequency Domain for Stable Haptic Interaction ................... 3936  
Dongseok Ryu, Jae-Bok Song, Junho Choi, Sungchul Kang, Munsang Kim

Development of a Slim Haptic Glove Using McKibben Artificial Muscles ......................................... 3942  
Kyung-won Moon, Dongseok Ryu, Changmook Chan, Yongkwan Lee, Sungchul Kang, Mignon Park

Multirate-Output-Estimator-Based Control for Virtual Environment with Computational Time Delay .......... 3947  
Kyungno Lee, Doo Yong Lee

A Multirate Energy Bounding Algorithm for High Fidelity Stable Haptic Interaction Control ............... 3953  
Jong-Phil Kim, Changhoon Seo, Jeha Ryu

Quantitative Comparison of Bilateral Teleoperation Systems with Various Drive Mechanisms and Sensory Configurations .................................................. 3959  
Keehoon Kim, M. Cenk Cavusoglu, Wan Kwon Chung, Jongwon Lee

Development of Meal Assistance Orthosis for Disabled Persons with Human Intention Extraction through EOG Signals .................................................. 3965  
Satoru Goto, Takenao Sugi, Masatoshi Nakamura

Design of a Dexterous and Compact Laparoscopic Assistant Robot ................................................ 3971  
Won-Ho Shin, Seong-Young Ko, Dong-Soo Kwon

Hierarchical Systems Technology in the Computer Coordination of Biomechanical Motion ..................... 3982  
K. Matliuk, Yoon Hyuk Kim

A Graphical Representation of the Multi-Domain Signal Processing ................................................ 3992  
Andriyan Bayu Sukmono

PAGE SEGMENTATION OF PERSIAN/ARABIC PRINTED TEXT ................................................ 3997  
Sajad Shirali-Shahreza, M. T. Manzuri-Shalmani, M. Hassan Shirali-Shahreza

An Optimal Receding Horizon FIR Filter for Continuous-Time Linear Systems .................................. 4001  
Du Yong Kim, Vladimir Shin

A Blind Separation Algorithm with a Linear Constraint ................................................ 4004  
Tsubasa Yosihara, Kiyotoshi Matsuoka
# Table of Contents

Enhanced Discrimination for Boundary and Material of Buried Objects in Concrete Structure using Microwave Subsurface Radar ......................................................... 4010
Jun-ya Takayama, Takayuki Tanaka, Akira Hayakawa, Shinji Ohyama, Akira Kobayashi

Estimation of the engine revolution for statistical analysis of R.M.S value by using Prony method to detect misfiring cylinder of the diesel engine......................................................... 4016
Makoto Nagayama, Youhei Kawamura

The Development of The Robot Manipulator for an Intelligent Service Robot .......................................................................................................................... 4020
Jeong-Min Lee, Bum-Seok Park, Yong-Seok Lee, Jeong-Seok Ahn, Sang-Ho Lee, Seong-Jin Lim, Chang-Soo Han

Robust Catching Control of robot manipulators without Impact .......................................................................................................................... 4026
Yoshihisa Tamase, Hisakazu Nakamura, Hirokazu Nishitani

Model Following Control with A Sliding Mode Adjustment for A Positioning System ......................................................................................................................... 4030
Miki Shichijo, Ryuichi Oguro

Characteristic of 2 DOF Cooperative Task by Two Humans .......................................................................................................................... 4034
Shahriman Bin Abu Bakar, Hando Yuichiro, Ryojun Ikeura, Kazuki Miezuti

Construction of Robotic Body Schema by Extracting Temporal Information from Sensory Inputs .......................................................................................................................... 4040
Komei Sugihara, Daisuke Matsubara, Osamu Katai

An Executable Service Process Generation System using Web Service and OWL-S .......................................................................................................................... 4046
Cheonshu Park, Joochan Sohn

Calling Motion and Natural Hand Detection for Gesture Recognition .......................................................................................................................... 4051
Hye-Jin Kim, Jaeyeon Lee, Do-Hyung Kim, Ho-Sub Yoon, Soyoung Chi

The impulse sound source tracking using Kalman filter and the cross-correlation ......................................................................................................................... 4055
Yun Woo-han, Oh Cheon-in, Ban Kyu-Dae, Ji Su-young

Appearance-based Face Recognition from robot camera images with Illumination and Distance Variations .......................................................................................................................... 4059
Kyu-Dae Ban, Keun-Chang Kwak, Su-Young Chi, Yun-Koo Chung

Visual Processing of Rock, Scissors, Paper Game for Human Robot Interaction .......................................................................................................................... 4064
Ho-Sub Yoon, Su-Young Chi

The Robot Software Communications Architecture (RSCA): QoS-Aware Middleware for Networked Service Robots .......................................................................................................................... 4068
Jonghun Yoo, Saehwa Kim, Seongssoo Hong

Autonomous Tracking Control and Inverse Kinematics of Unmanned Electric Bicycle System .......................................................................................................................... 4074
Woonchul Ham, Hyunseok Choi

Steering-by-Tether and Modular Architecture for Human-Following Robot .......................................................................................................................... 4078
Kwan-Hoon Kim, Jun-Uk Chu, Yun-Jung Lee

Design of new quadruped robot with SMA actuators for dynamic walking .......................................................................................................................... 4082
Hyung-Min Son, Jun-Bum Gu, Se-Hoon Park, Yun-Jung Lee, Tae-Hyun Nam

Design of Fuzzy Set-based Polynomial Neural Networks involving Information Granules with the aid of multi-population Genetic Algorithms .......................................................................................................................... 4087
Seok-Beom Roh, Sung-Kwon Oh, Tae-Chon Ahn

Improvement of the Ability to Recognize Sweet Peppers for Picking Robot in Greenhouse Horticulture .......................................................................................................................... 4091
Shinsuke Kitamura, Koichi Oka

Force Control of an Intelligent Armwrestling System .......................................................................................................................... 4095
Chul-Goo Kang, Ik-Xu Son, Han-Sung Lee, Ho-Yeon Kim

UPnP SDK for Robot Development .......................................................................................................................................................................................... 4101
Song Chul Ahn, Jung-Woo Lee, Ki-Woong Lim, Heedong Ko, Yong-Moo Kwon, Hyoung-Gen Kim

Tracking Control of the Mobile Terminal in an Active Free-Space Optical Communication System .......................................................................................................................... 4107
Koichi Yoshida, Takeshi Tashimura
# Table of Contents

Design and Simulation of a Conceptual Automated Yard using New Combination System .................................................. 4113
Hong-Fa Ho, Rong-Jyh Chen

Development of a Bending Actuator using a Rubber Artificial Muscle and its Application to a Robot Hand .................. 4119
Feifei Zhao, Shujiro Dohta, Tetsuya Akagi, Hisashi Matsushita

$H_\infty$ Filtering for Uncertain Systems with Limited Communication Capacity .......................................................... 4123
Huijun Gao, Tongwen Chen

Stabilization Of Teleoperated Systems With Stochastic Time Delays Using Time Domain Passivity Control .............. 4131
Asif Iqbal, Hubert Roth

Speed Control of a DC Motor System through Delay Time Variant Network ............................................................... 4137
Kenshi Matsuo, Takeshi Miura, Toshiyuki Taniguchi

Robust stability condition of an uncertain networked system with delayed data dropout in both forward and feedback channels .................................................................................................................... 4143
Hyo-Sung Ahn, YangQuan Chen, Wonpil Yu

Platform Independent Integrated Environment for Simulation and Real-Time Control Experiment ...................... 4149
Kentaro Yano, Masanobu Kog

PDA based user interface management system for remote control robots ................................................................. 4155
Ji Hwan Park, Ki Oh Kim, Jae Wook Jeon

An Application of Campro-R (Mobile Robot with Camera and Projector) at home - A speculation about structuring information indoors .................................................................................................................. 4159
Hiroaki Kawata, Tamotsu Machino, Satoshi Iwaki, Yoshito Nanjo, Ken-ichiro Shimokura

Method of tangible programming for applications in ubiquitous computing environment ........................................ 4163
Narimune Matsumura, Naoyoshi Kanamaru

Trade-off between reliability and energy-efficiency in Transport Protocol for Wireless Sensor Networks .............. 4167
D. Q. Bui, In-Yeup Kong, Won-Joo Hwang

Koon-Seok Lee, Seung-Myun Baek, Yong-Tae Kim, Kyung Chang Lee, Kyoung Nam Ha, Suk Lee

A Cascaded Feedback Control Method for Trajectory Tracking of Pneumatic Drive Systems .......................... 4179
Jinwoo Jun, Katsuya Kanaoka, Sadao Kawamura

Development of Wearable Pneumatic Pressure Control Valve Using On/off Valve Considered with Less Air Consumption ........................................................................................................................................... 4185
Tetsuya Akagi, Shujiro Dohta

Development of Flexible Robot Arm Using Rod-less Type Flexible Pneumatic Cylinders ................................... 4189
Toshihide Nango, Tetsuya Akagi, Shujiro Dohta, Hisashi Matsushita

Feedback Linearization Control of a Hydraulic Servo System .................................................................................... 4193
Jung-ho Kwon, Tae-yeong Kim, Ji-Seong Jang, Il-yeong Le

Dynamic Modeling and Controller Design for Air Motor ......................................................................................... 4199
Yu-Da Shen, Yeon-Ren Hwang

Case Study of Protecting Gas Turbine Trip from Damper Closing Failure and HRSG Trip from Solenoid 
Coil of Hydraulic Damper Burned ............................................................................................................................... 4205
Pongsak Binsompanong, Surachart Leeragreephol, Phiphat Laos personalised, Jakkit Jansiri

Building of Fast Map Building Algorithm for Merchandise Location Guiding Mobile Robot .......................... 4210
Jin-Pyo Hong, You-Jun Choi, Kyi-Hwan Park

Clothoidal Curve-based Path Generation for an Autonomous Mobile Robot .............................................................. 4216
Manabu Shimizu, Kazuyuki Kabayashi, Kajiro Watanabe

A GPS/INS Integration System for Land Vehicle Application .................................................................................. 4220
Nguyen Ho Quoc Phuong, Hee-Jun Kang, Young-Soo Suh, Young-Shick Ro, Kyu-Chan Lee
# Table of Contents

**Optimal Path Planning Simulator for Garbage Trucks** .......................................................... 4226  
Tomohiro Kobayashi, Hideki Murakoshi, Yasuhiaka Mori, Shintaro Ishijima

**Topological Map Generation based on Delaunay Triangulation for Mobile Robot** ......................... 4230  
Yuki Tarutoko, Kazuyuki Kobayashi, Kajiro Watanabe

**Fault Tree Analysis and Failure Mode Effects Analysis Based on Multi-level Flow Modeling and Causality Estimation** ................................................................. 4235  
Akio Gofuku, Seiji Koide, Norikazu Shimada

**Robust Solutions by using Evolutionary Computations on Dynamic Max-Sat Problems** ................. 4239  
Hisashi Handa

**GMDH-Based Monitoring in an Atmospheric Distillation Process** .............................................. 4243  
Akihiro Sakaguchi, Kenso Fujii, Toru Yamamoto

**Experimental Results of an Aluminum Plate Temperature Control by Stable Continuous-Time Generalized Predictive Control** ................................................................. 4249  
Akira Inoue, Mingcong Deng, Akira Yamaguchi

**Safety Design of Ore Transfer Facilities in Steel Works** ........................................................... 4254  
Junji Kikuchi, Masami Konishi, Jun Imai

**Intelligent power assistant manipulator usable for disaster** ..................................................... 4260  
Yingda Dai, Masami Konishi, Jun Imai

**Bilateral Control for Steer-by-Wire Vehicles** ........................................................................... 4266  
Jae-Sung Im, Fuminori Ozaki, Nobutomo Matsunaga, Shigeyasu Kawaji

**Direct Yaw-moment Control Adapted to Driver Behavior Recognition** ........................................ 4272  
Takuya Mizushima, Pongsathorn Raksincharoensak, Masao Nagai

**A Torque Control Scheme of Induction Motor in Hybrid Electric Vehicle** ................................. 4278  
Yan Liu, Cheng Shao

**Analysis of Task Switching Time of ECU Embedded System ported to OSEK(RTOS)** ................... 4283  
Suk-Hyun Seo, Sang-won Lee, Sung-Ho Hwang, Jae Wook Jeon

**3-D Car Simulator for Testing ECU Embedded Systems** ............................................................. 4288  
Suk-Hyun Seo, Ji-Hwan Park, Sung-Ho Hwang, Jae Wook Jeon

**Control Strategy for Hybrid Electric Vehicles Based on Driver Vehicle Following Model** .............. 4293  
Dan Hoang Phuc, Pongsathorn Raksincharoensak, Masao Nagai, Masahiro Suzuki
