Proceedings

ICICIC 2006

Contents — Volume III

Preface ........................................................................................................................... xvii
Organizing Committee ................................................................................................... xviii

Fractional Fourier Transform and Its Applications

Interpolation of Discrete Chirp-Periodic Signals Based on Fractional Fourier Transform .................................................................................................................. 2
   Bing-zhao Li, Ran Tao, and Yue Wang

2-D DOA Estimation of Wideband LFM Signal in Fractional Fourier Domain .......................................................... 6
   Yanhong Zhang, Lin Qi, Xiaomin Mu, and Shouyi Yang

The Analysis of Resolution of the Discrete Fractional Fourier Transform ............................................................. 10
   Bing Deng and Ran Tao

The OFDM System Based on the Fractional Fourier Transform ............................................................................ 14
   Enqing Chen, Ran Tao, and Xiangyi Meng

DOA Estimation of Coherent Wideband LFM Signals Based on Fractional Fourier Transform ............................... 18
   Haitao Qu, Lin Qi, Xiaomin Mu, and Shouyi Yang

Image Encryption Based on a Novel Reality-Preserving Fractional Fourier Transform ......................................... 22
   Yi Xin, Ran Tao, and Yue Wang

Ocean Wave Simulation under Wind Change Effect ................................................................................................. 26
   Xin Zhao, Fengxia Li, Shouyi Zhan, and Zhisheng Li

Existence and Uniqueness Property of the Three-Dimensional Fast Multipole-BEM for Potential Problems ................................................................. 30
   Yiming Chen, Weiwei Wang, Hailian Gui, Lamei Tong, and Jie Chen
The Boundary Mixed Variational Inequality for Frictional Contact Problem in Elasticity ................................................................. 34
Yiming Chen, Haitian Gui, Weiwei Wang, and Weiwei Su

Researches on Properties of Generalized Normalization Coefficient in NML Distribution ............................................................ 38
Fucai Zhou, Ping Sun, and Jinying Wang

Multimedia Security and Applications

Analysis of Error Probability of Orthogonal Dirty-Paper Codes in Watermarking Applications ......................................................... 42
Xiaotian Xu, Yong Liang Guan, and Kah Chan Teh

Efficient Video Authentication for H.264/AVC .................................................. 46
Jing Zhang and Anthony T. S. Ho

On Watermarking/Fingerprinting for Copyright Protection .......................... 50
Hans Georg Schaathun

Performance Evaluation of a Steganographic Method for Digital Images Using Side Match ......................................................... 54
Suk-Ling Li, Kai-Chi Leung, L. M. Cheng, and Chi-Kwong Chan

Data Hiding in Images by Adaptive LSB Substitution Based on the Pixel-Value Differencing ......................................................... 58
Suk-Ling Li, Kai-Chi Leung, L. M. Cheng, and Chi-Kwong Chan

Image Authentication and Restoration Using Irregular Sampling for Traffic Enforcement Applications .............................................. 62
Xunzhan Zhu, Anthony T. S. Ho, and Pina Marziliano

A New Data Hiding Method in Binary Images ............................................. 66
Zongqing Li and Hongbin Zhang

A Multipurpose Wavelet-Based Image Watermarking .................................. 70
Chin-Chen Chang, Wei-Liang Tai, and Chia-Chen Lin

An Image Watermarking Scheme with Tamper Detection and Recovery .................. 74
Shinfeng D. Lin, Yu-Chan Kuo, and Yu-Hsun Huang

Copyright Protection of Web Applications through Watermarking ................. 78
Ronghui Tu, Feiyuan Wang, Jiying Zhao, and Abdulmotaleb El Saddik

Signal Processing (III)

A Speech Endpoint Detection Method Based on Wavelet Coefficient Variance and Sub-band Amplitude Variance .................................. 83
Xueying Zhang, Zhefeng Zhao, and Gaofeng Zhao

Shift-Invariant Contourlet Transform and Its Application to Stereo Matching ........ 87
Hui Ding, Mengyin Fu, and Meiling Wang
An Anamnestic Semantic Tree-Based Relevance Feedback Method in CBIR System ........................................... 91
Xiao Xia Xie, Yao Zhao, and Zhen Feng Zhu

Design and Implementation of Operational Effectiveness Evaluation Simulation System for ECM ........................................... 95
Zhisheng Li, Junshan Li, Shuai Liu, Wei Yang, and Xin Zhao

A Design Approach for 2-D Linear-Phase Filters with Quadrant Symmetry ........................................... 99
Xiao-hua Wang, Yi-gang He, Xian-zhi Meng, and Jie Xiong

A Combined Optimization Method of Finite Wordlength FIR Filters ........................................... 103
Jiaqing Qiao, Ping Fu, and Shengwei Meng

Using ICA to Remove Eye Blink and Power Line Artifacts in EEG ........................................... 107
Zhaojun Xue, Jia Li, Song Li, and Baikun Wan

Optimal Filtering for Systems with Unknown Inputs via a Parametrized Minimum-Variance Filter ........................................... 111
Chien-Shu Hsieh

Optimal Filtering for Linear Systems with Multiple State and Observation Delays ........................................... 115
Michael Basin, Rodolfo Martinez-Zuniga, and Edgar Sanchez

Fast Surface Simplification Based on Weighted Rotation of Normal ........................................... 119
Shixiang Jia, Yongsheng Zhao, Xiaofeng Zhang, and Lingyun Li

Process Monitoring and Control (II)

Analysis on Isolation Effect to Forced Vibration of a Membrane-Typed Air Spring ........................................... 124
Wanjian Yin, Shaopu Yang, and Yongjun Shen

Development of Integration Prediction Model for Alumina Raw Slurry Quality ........................................... 128
Zhifeng Qiu, Weihua Gui, Chunhua Yang, and Yalin Wang

Delay Compensation for Networked Control Systems ........................................... 132
Zhiwen Wang and Ge Guo

Optimal Design of Experiments for Identifying the Model Parameters of Gyroscope on a Centrifuge and Vibration Table Compound Test System ........................................... 136
Yuegang Wang

Weather Sensor Fault Detection with Time-Dependent Recursive Thresholds ........................................... 140
Vesa Hasu, Heikki Koivo, and Jari Pouliainen

Modelling and Simulation of Ultrasonic Phased Array in Pipe Flaw Detection ........................................... 145
Xianglin Zhan, Shili Chen, Zhoumo Zeng, Jian Li, Shijiu Jin, and Zhijun Li

Early Identification of Machine Fault Based on Kernel Principal Components Analysis ........................................... 149
Yibing Liu, Zhiyong Ma, He Qian, and Peng Lv

Optimal Design of Microgripper ........................................... 153
Shyh-Chour Huang and Chi-Ming Lee
A Backward-Traversing Method for Subcircuit Scheduling of Relaxation-Based Circuit Simulation.................................................................157
   Chun-Jung Chen, Chih-Jen Lee, Jung-Lang Yu, and Tai-Ning Yang

An Effective Simple Shepherdig Algorithm Suitable for Implementation to a Multi-mobile Robot System.........................................................161
   Tsutomu Miki and Tetsuya Nakamura

**Pattern Recognition and Classification (II)**

A Novel Skin Clustering Method for Face Detection..........................................166
   Wei-Min Zheng, Zhe-Ming Lu, and Xiu-Na Xu

A New Feature Extraction Method Based on Feature Integration..........................170
   Yi Liu and Caliming Zhang

Research on Vehicle License Plate Location Based on Neural Networks.....................174
   Gang Li, Ruili Zeng, and Ling Lin

Script Identification of Document Image Analysis.........................................178
   Juan Cheng, Xijian Ping, Guanwei Zhou, and Yang Yang

The Detection System of Oil Tube Defect Based on Multisensor Data Fusion by Classify Support Vector Machine..............................................182
   Jingwen Tian, Meijuan Gao, and Kai Li

A Fast Document Classification Algorithm Based on Improved KNN.........................186
   Ge Guo, Xijian Ping, and Gang Chen

Application of Extension Neural Network for Classification with Incomplete Survey Data.................................................................190
   Chao Lu, Xue-Wei Li, and Hong-Bo Pan

Integrated Clustering Analysis of Microorganism Classification................................194
   Kun-Lin Hsieh, Cheng-Chang Jeng, I-Ching Yang, and Chun-Nan Lin

Extraction and Application of the Signature Biostatistics Features........................200
   Shu-ren Zhu, Hui-hui Hu, and Wei-qin Li

Pattern Recognition Based on All Set Theory and SPA in Complex System...................204
   Liang Dong, Guangjun Li, and Zhongxiong He

**Database and Software Systems**

An Integrated Access Control Model of Distributed Database Systems......................209
   Xin Liu, Zhen Han, and Chang-xiang Shen

On an Evaluation of Transformation Languages in a Fully XML-Driven Framework for Video Content Adaptation......................................................213
   Davy De Schrijver, Wesley De Neve, Davy Van Deursen, Jan De Cock, and Rik Van de Walle
Study of Priority Inversion in Embedded Linux ................................................................. 217
Chun-tao Man, Peng Li, and Yan Li

Software Complexity Based Remote Attestation .............................................................. 220
Xiao-Yong Li, Zhen Han, and Chang-Xiang Shen

Towards an Engineering Change in Agent Oriented Software Engineering ................. 225
Xiao Xue, Junfang Zeng, and Liding Liu

Application-Layer Context-Aware Services for Pervasive Computing Environments ....... 229
Hsu-Yang Kung and Ching-Yu Lin

A Simulation System for Simultaneous Localization and Mapping of Mobile Robots ....... 233
Xuefeng Dai, Dan Lv, Shudong Liu, and Yan Shi

Dynamic Resource Aware Software Configuration for Pervasive Application ............... 237
Songqiao Han, Shensheng Zhang, and Yong Zhang

Classification of a Path in an ER Schema by Using the Notions of Corresponding and Representing .......................................................... 241
Qinsheng Zhuang and Junkang Feng

Model-Driven Development of Real-Time Software Based on OMG Standards ............ 246
Junli Gao, Di Li, and Shixiong Zheng

Integrated Control and Computing

Peng Jiang, Qingbo Huang, Jianzhong Wang, Xiaohua Dai, and Ruizhong Lin

An Energy-Efficient In-Network Aggregation Query Algorithm for Wireless Sensor Networks .......................................................... 255
Xiaohua Dai, Feng Xia, Zhi Wang, and Youxian Sun

Intelligent Scheduling of Failure-Prone FMS Using Neural Network ............................. 259
Yaguang Kong, Shu Guo, and Jianzhong Wang

Maximum Likelihood Localization Algorithm Using Wireless Sensor Networks .......... 263
Xinghong Kuang and Huifei Shao

Energy-Based Key Management Scheme in Wireless Sensor Networks ....................... 267
Bidi Ying, Huifang Chen, Wendao Zhao, and Peiliang Qiu

Design and Implement a Fuzzy-Smith Control Notification Service Event Channel ........ 271
Xiaoan Shi, Xingshe Zhou, and Huaxin Yao

PMSM Control with Port-Controlled Hamiltonian Theory ............................................. 275
Jun Qiu and Guangzhou Zhao

A Distributed Multi-objective Optimal Algorithm Based on MAS .............................. 279
Fujiang Jin and Lan Wang
Adaptive Distributed Compression Algorithm for Wireless Sensor Networks ........................................... 283
   Hui Dong, Jiangang Lu, and Youxian Sun

Design and Simulation of Function Block Based Networked Control Systems ........................................ 287
   Wenhong Zhao and Feng Xia

**Models and Algorithms for Optimization**

Robust Image Segmentation Using Modified Edge-Following Scheme with Automatically-Determined Thresholds .................................................................................................................. 292
   Y. B. Chen and Oscal T.-C. Chen

Implementation and Self-Tuning Adaptive Control Design of an Electromagnetic Submicro-positioner ................................................................. 296
   Sung-Yu Hsieh, Zhao-Kai Wu, and Mei-Yung Chen

One-Server Private Information Retrieval Scheme Combined with Mutual Authentication by ElGamal Signature .................................................................................................................. 300
   Chun-Hua Chen, Jinn-Ke Jan, and Chao-Hsing Hsu

Frequency Scaling of Adaptive Digital Filter Design by Poleplacement Technique ........................................ 304
   Kai-chao Yao and Der-fa Chen

Adaptive Pattern Nulling Design of Linear Array Antenna by Phase-Only Perturbations Using Memetic Algorithms .................................................................................................................. 308
   Chao-Hsing Hsu, Wen-Jye Shyr, and Chun-Hua Chen

A Game Model Based Co-evolutionary Algorithms for Multiobjective Optimization Problems ................................................................. 312
   Gaoping Wang and Yongji Wang

Task Scheduling Model Design Using Hybrid Genetic Algorithm ................................................................................ 316
   Shijue Zheng, Wanneng Shu, and Shangping Dai

Wavelets Neural Network Based on Particle Swarm Optimization Algorithm for Fault Diagnosis ................................................................. 320
   Changcheng Xiang, Xiyue Huang, Darong Huang, and Jia Hu

Timetable Scheduling Using Particle Swarm Optimization ................................................................................ 324
   Shu-Chuan Chu, Yi-Tin Chen, and Jiun-Huei Ho

Optimize Control of the Metro Bogie Test Platform Add-Load System Based on GA ................................................................................ 328
   Wei Fu and Jinwen Zhang

**Pattern Recognition and Classification (III)**

Object Decomposition Based on Superellipses ................................................................................................. 333
   Wu-Chih Hu

A New Information Combination Approach for Character Recognition with a Limited Lexicon ................................................................................ 337
   Xianmei Wang, Yang Yang, and Kang Huang
A Key Frame Selection-Based Facial Expression Recognition System .................................................. 341

Supervised Isomap with Explicit Mapping............................................................................................ 345
Chun-Guang Li and Jun Guo

Dynamic Minimum Subband Spectral Subtraction and Its Application in Robust Speech Recognition ................................................................. 349
Xin Ma and Yuhua Peng

Ear Recognition Based on Statistical Shape Model.............................................................................. 353
Lu Lu, Xiaoxun Zhang, Youdong Zhao, and Yunde Jia

Research on Symbol Recognition for Mathematical Expressions ...................................................... 357
Xue-Dong Tian, Hai-Yan Li, Xin-Fu Li, and Li-Ping Zhang

A Robust Speech Recognition Based on the Feature of Weighting Combination ZCPA ...................... 361
Xueying Zhang and Wuzhou Liang

A Novel Joint De-interleaving/Recognition System of Radar Pulse Sequence ...................................... 365
Qiang Guo, Xingzhou Zhang, and Zheng Li

Non-alignment Fingerprint Matching Based on Local and Global Information .................................. 369
Xuizing Zhao, Yangsheng Wang, Jin Qi, and Xiaolong Zheng

**Intelligent Systems**

Efficient Improvement of FT-Tree Based Frequent Itemsets Mining Algorithms .................................. 374
Yong Qiu and Yong-Jie Lan

An Agent-Based Adaptive Learning System (ABALS) ........................................................................ 378
Tianyun Chen and Jianping Zhang

Stability Analysis of Large-Scale Agent-Based Systems ....................................................................... 382
Ali A. Jamshidifar and Ahmad Afshar

Research on Multi-agent System Model of Diesel Engine Fault Diagnosis by Case-Based Reasoning ................................................................. 386
Chunhua Zhao, Xinze Zhao, Zongqi Tan, and Xinping Yan

Bayesian Networks for Intelligent Decision of Airborne Weapon System ........................................... 390
Bo Li and Xiaoguang Gao

An Innovation Filtering Multiple Model Algorithm for Integrated Navigation System .......................... 394
Rong-chun Zang and Ping-yuan Cui

An Ontology Learning Model in Grid Information Services .................................................................. 398
He Hu and Xiaoyong Du

An Affective Intelligent Tutoring System Based on Artificial Psychology ........................................... 402
Xiangjie Qiao, Zhiliang Wang, Jun Yu, and Xiuyan Meng
Distributional Similarity in the Varied Order of Syntactic Spaces ................................................................. 406
Dongqiang Yang and David M. W. Powers

Bilingual Phrase Extraction from N-Best Alignments ...................................................................................... 410
Yong-Zeng Xue, Sheng Li, Tie-Jun Zhao, Mu-Yun Yang, and Jun Li

Neural Networks/Support Vector Machines

Neural Network Based Diagnosis Method for Looper Height Controller of Hot Strip Mills .......................... 415
Yoshitiro Abe, Masami Konishi, and Jun Imai

Information Geometry Approach to the Model Selection of Neural Networks ............................................. 419
Ziang Lv, Shwei Luo, Yunhui Liu, and Yu Zheng

Neural Network Optimization for Hardware-Software Partitioning ............................................................... 423
Tianyi Ma, Xinglan Wang, and Zhigiang Li

Neural Network Ensemble Based Ant Colony Classification Rule Mining .................................................. 427
Chuan Chen, Youqing Chen, and Junbing He

Neural Network Approach to Vibration Feature Selection and Multiple Fault Detection for Mechanical Systems .................................................................................................................. 431
Keming Wang

Load Forecasting Based on Chaotic Support Vector Machine with Incorporated Intelligence Algorithm ........ 435
Jingmin Wang and Guoqiao Ren

A Support Vector Machine Training Algorithm Based on Cascade Structure .............................................. 440
Zhongwei Li

Single-Trial VEP Estimation Using Support Vector Machines in Single-Channel ........................................... 444
Jin-an Guan

The Support Vector Machine (SVM) Based Near-Infrared Spectrum Recognition of Leaves Infected by the Leafminers ........................................................................................................ 448
Dake Wu and Chengwei Ma

Research on an Algorithm of Support Vector Stepwise Regression ............................................................. 452
Shaohua Zeng, Yan Wei, Tingcai Duan, and Changxu Cao

Information Hiding and Security (II)

New Audio Embedding Technique Based on Neural Network .................................................................. 459
Huiqin Wang, Li Mao, and Keshan Xiu

Rotation, Scaling and Translation Invariant Blind Digital Watermarking for 3D Mesh Models .................. 463
Wang Liu and Sheng-he Sun

An Image Watermarking Scheme Using Pattern Coding Technique ......................................................... 467
Chin-Chen Chang, Tung-Shou Chen, and Hsien-Chu Hsia
Robustness Analysis of Watermarking Schemes Based on Two Novel Transforms

Jinwei Wang, Guangjie Liu, Yuewei Dai, Zhiquan Wang, and Shiguo Lian

Multimedia Digital Watermarking Detection System Based on Watermark Mobile Agent

Hong Yin, Zengqiang Chen, and Zhuzhi Yuan

Adaptive Watermarking Model and Detection Performance Analysis

Rongrong Ni and Qiuqi Ruan

An Improved Digital Watermarking Scheme in the Domain of Vector Quantization

Chao-Chin Chang, Chin-Shiuh Shieh, Jeng-Shyang Pan, Bin-Yih Liao, Lin Hong, and Hung-Jen Lee

Reversible Data Embedding for Tamper-Proof Watermarks

HyeRan Lee and KyungHyun Rhee

Robust Image Watermarking Algorithm Based on Predictive Vector Quantization

Yue-Nan Li, Chun-He Liu, Zhe-Ming Lu, and Jeng-Shyang Pan

A Transformed-Matrix Asymmetric Watermarking Scheme

Shuangyuan Yang, Zhengyu Liu, Shuihua Han, and Xikun Zhang

Control of Time-Delay Systems

Stability Analysis for Time-Delay Fuzzy Systems Using Augmented Lyapunov Functional Approach

Chong Lin, Yong He, Lei Guo, and Shengyuan Xu

Output Feedback Control of Discrete Systems with Time-Varying Delay

Yuanqing Xia, P. Shi, G. P. Liu, and D. Rees

Guaranteed Cost Control for Uncertain Stochastic Systems with State and Input Delays

Yamei Gong and Shengyuan Xu

Dynamics of Internet Congestion Control Algorithm with Communication Delays

Hong-yong Yang, Yong-sheng Zhao, and Fu-sheng Wang

Robust L2-L∞ Filtering for Uncertain Systems with Pole and Error Variance Constraints

Xiaohua Liu and Lina Zhou

Dual-Rate Predictive Control Systems for Time Delays

Xiaohua Liu and Jing Liu

Active Control for Structural Systems with Nonlinear Perturbations and Exogenous Disturbances

Lei Guo, Lingyao Wu, Wenzhang Li, and Haixia Wang

Observer-Based Fault Detection for Networked Control Systems with Random Time-Delays

Maiying Zhong, Yunxia Liu, and Chuanfeng Ma
The Parametrization of All Stabilizing Repetitive Controllers for Multiple-Input/Multiple-Output Time-Delay Systems ................................................................. 532
Kou Yamada, Keiji Satoh, and Yeju Mei

Stability Analysis of Cross Beam System with Two Time Delays .................................................. 536
Hongyun Yu, Huichao Zou, and Bin Xiao

Informational and Mathematical Models on Biomedical Elements and Organs

Stochastic Mechanism and Its Dynamics in Biological System .......................................................... 541
Hiroyuki Matsuura, Nobuo Noda, Kazuyuki Koide, Tetsuya Nemoto, Kadahiro Kin, Ken-ichi Makino, and Masahiro Nakano

Numerical Analysis of Blood Flow in Vessels ............................................................................. 545
Nobuo Noda, Masahiro Nakano, Hiroyuki Matsuura, Tetsuya Nemoto, and Kazuharu Koide

Design of RT-PCR Primers Based on Informational Method ............................................................. 547
Ken-ichi Makino and Hideyasu Hirano

Simulations on the Population and Disease in Japan ...................................................................... 550
Kazuharu Koide, Hiroyuki Matsuura, Nobuo Noda, and Masahiro Nakano

Cell Preservation by Application of Tardigrada’s Adaptation to Extreme Circumstances ......................... 553
Tetsuya Nemoto, Kadahiro Kin, Masahiro Nakano, Akira Shimamoto, Fumio Nogata, and Hiroyuki Matsuura

Molecular Dynamics Simulation of Complex Phase Transition of Clathrate Hydrates in Living Body ........................................................................................................ 556
Kadahiro Kin, Tetsuya Nemoto, Ken-ichi Makino, and Kazuharu Koide

Management and Control of Vibrational Motions of Muscle Elements ............................................. 560
Masahiro Nakano, Hiroyuki Matsuura, Tetsuya Nemoto, and Nobuo Noda

Rectification and Calibration for Biomedical Image Processing ............................................................. 564
Jupeng Li, Houjin Chen, Ying Wang, and Wei Wang

Speech Rate Control for the Compound Hearing Aid Processing ............................................................ 568
Dan Zhang, Tadashi Sakata, and Yuichi Ueda

A Registration Method of Fundus Images Based on Edge Detection and Phase-Correlation ..................... 572
Wei Wang, Houjin Chen, Jupeng Li, and Jiangbo Yu

Image Processing/Video Processing

Direct Minutiae Matching in Gray-Level Fingerprint Images .................................................................. 577
Chih-Jen Lee, Tai-Ning Yang, Chun-Jung Chen, and Keng-Li Lin

The Implementation of a Visual Sensing System for 3-D Control of the RTG Crane .............................. 581
Kuan-chun Huang
A Novel Shape Coding Scheme for MPEG-4 Visual Standard
Lele Zhou and Saif Zahir ........................................ 585

Cut-and-Paste Editing over 3D Meshes
Zhanguo Ma, Bo Liu, and Hongbin Zhang .......................... 589

Video Shot Detection Using Hidden Markov Models with Complementary Features
Weigang Zhang, Jianqiu Lin, Xiaopeng Chen, Qingming Huang, and Yang Liu ... 593

Design of a Scalable Computer Cluster for MPEG-4 Parallel Encoder
Po-Kai Chiu, Wen-Yu Su, and Chih-Ping Chu ..................... 597

An Efficient Implementation of CAVLC for H.264/AVC
Yi-Ming Lin and Pei-Yin Chen ...................................... 601

The System of Multi-instance Image Query with Heterogeneous Features
Jiann-Jone Chen, Che-Kang Chang, and Chia-Rong Hu .......... 605

A Programmable Bitstream Parser for Multiple Video Coding Standards
Jianying Peng, Xing Qin, Jian Yang, Xiaolang Yan, and Xie-xiong Chen ........ 609

A Novel Interactive Progressive Decoding Method for Fractal Image Compression
Huaqing Wang, Qiang Wu, Xiangjian He, and Tom Hintz .......... 613

Cross-Discipline Technology (I)

A New Method of Numerical Integration
Zhe-zhao Zeng, Ye Chen, and Wei Zhu .............................. 618

A New Program-Iteration Pattern IGMRES(m) Algorithm Based on the FM-BEM
and Its Application .................................................. 621
Chunxiao Yu, Guangxian Shen, and Yiming Chen

A New Approach to Graph Seriation ................................ 625
Jin Tang, Chunyan Zhang, and Bin Luo

New Region of Interest Image Coding Based on Multiple Bitplanes Up-Down
Shift Using Improved SPECK Algorithm ............................. 629
Li-bao Zhang, Xian-chuan Yu, and Shi-hong Wang

An Applicable Multiple-Level Classification Based on Image Semantic
Correlation from User .................................................. 633
Hongli Xu, De Xu, Fangshi Wang, and Feifei Fan

Interface Design and QoS Performance of Video Monitor System .......... 637
Rikun Liao, Yuefeng Ji, and Hui Li

Study on the Detection Algorithm of Bridge over Water in SAR Image
Based on Fuzzy Theory ................................................ 641
Weizhou Zhao, Jiannishe Song, and Jie Zhang

Product and Coproduct of CF Symmetric Group Categories ............ 645
Kaiqi Zou and Guannan Deng
New Robust Stability Criteria for Uncertain Neural Networks with Time-Varying Delays ......................................................... 648
  Jinhui Zhang, Jiqing Qiu, and Peng Shi

Hyperspectral Feature Extraction Using Selective PCA Based on Genetic Algorithm with Subgroups .............................................. 652
  Ying Liu, Yanfeng Gu, and Ye Zhang

Cross-Discipline Technology (II)

An EOQ Model for Multi-item and Multi-storehouse Based on New Hybrid Genetic Algorithm ..................................................... 657
  Peixin Zhao and Hong Wang

Symmetric Steganography Secure against Chosen Message and Original Cover Attacks ............................................................... 661
  Nan Jiang, Jian Wang, Xin-xin Niu, and Yi-xian Yang

Cryptanalytic on Generalization of Threshold Signature and Authenticated Encryption for Group Communications .......................... 665
  Honglie Zhang, Guoyin Zhang, and Jiguo Li

A New Design Scheme of Role-Based Access Control Based on PKI ..................................................................................... 669
  Yuping Deng, Xiaowei Guo, and Xiamu Niu

Robust VQ-Based Digital Image Watermarking for Noisy Channel ................................................................................... 673
  Chuang Lin and Jeng-Shyang Pan

Relational Databases Watermark Technique Based on Content Characteristic ....................................................................... 677
  Yong Zhang, Xiamu Niu, Dongning Zhao, Juncao Li, and Siming Liu

Routing Protocols for an Integrated Cellular and Ad Hoc Network with Flexible Access and Their Overhead Analysis .................. 681
  Yumin Wu, Kun Yang, Shaochun Zhong, Wenyong Wang, and Jun Shen

Author Index .................................................................................. 685
