Introduction

Evolving Self-Adaptive Services Using Planning-Based Reflective Middleware .................................................... 1
Frank Eliassen, Eli Gjørven, Viktor S. Wold Eide, and Jørgen Andreas Michaelsen

Runtime Metrics Collection for Middleware Supported Adaptation of Mobile Applications .......... 7
Hendrik Gani, Caspar Ryan, Pablo Rossi

A Distributed Architecture Meta-Model for Self-Managed Middleware ............................................................... 13
Paul Grace, Geoff Coulson, Gordon S. Blair, Barry Porter

An Underlay Aware, Adaptive Overlay for Event Broker Networks................................................................. 19
Madhu Kumar S.D, Umesh Bellur

Using Roles to Design Dynamic Adaptations of CCM Component-based Applications .................. 25
Renato Maiat, Renato Cerqueira
Angela C. Sodan, Garima Gupta

Time vs. Space Adaptation with ATOP-Grid ......................................................................................................... 31
Wei Dai, Jonathan J. Liu

Dynamic Adaptive Services in e-Business Environments ............................................................................... 37
Wei Dai, Jonathan J. Liu

A Reflective Middleware Architecture for Distributed Sensor Applications .............................................. 39
Qi Han

Enabling Adaptation of J2EE Applications Using Components, Web Services and Aspects ...... 41
Yan Liu

Adapta: A Framework for Dynamic Reconfiguration of Distributed Applications ........................................ 43
Marcio Augusto Sekeff Sallem, Francisco Jose da Silva e Silva
