2nd International Conference on ESAR
„Expert Symposium on Accident Research“

Reports on the ESAR-Conference on 1st/2nd September 2006 at Hannover Medical School

organized by

Accident Research Unit at Hannover Medical School (MHH)
Federal Highway Research Institute, Bergisch Gladbach (BAST)
Research Association of German Car Manufacturers, Frankfurt/M., (FAT)
University of Technology, Dresden
Contents

Welcome Addresses for the 2nd International Conference on ESAR “Expert Symposium on Accident Research”

E. Brühning ........................................... 8
D. Bitter-Suermann ................................. 10
W. Hahn ............................................... 11

Keynote Lectures for the 2nd International Conference on EASR “Expert Symposium on Accident Research”

J. Hennerkes ......................................... 16
C.E. Nash ............................................ 19

Session: Methodologies of In-Depth Investigations

In-Depth on-the-Spot Road Accident Investigation in Finland
I. Salo, K. Parkkari, P. Sulander, E. Keskinen ................................. 28

In-Depth Investigation of Vehicle Traffic Injuries in Changsha of China
C.Y. Kong, J.K. Yang, L. Li, W.Q. Li, Z. Zhao, D. Otte ....................... 38

In-Depth Study in JiaDing District Shanghai Considered as an Example for Accident Research in the Peoples Republic of China
A. Tenzer, W. Hongyan .................................. 47

Concept and First Results of the ADAC Accident Research Based on the Data of ADAC Air Rescue Stations
W. Klanner, T. Unger .................................... 53

PENDANT: A European Crash Injury Database
J. Lenard, A. Morris, J. Barnes, E. Tomasch, J. Nehmzow, D. Otte,
L. Cant, M. Haddak, G. Vallet, H. Ebinger, Y. de Vries, B. van Kampen,
J. Paez ................................................... 60

Multi-Level Statistical Models for Vehicle Crashworthiness Assessment – An Overview
H. Hautzinger ......................................... 68

Statistical and Methodological Foundations of the GIDAS Accident Survey System
M. Pfeiffer, J. Schmidt .................................. 81

Active Vehicle Safety Studies based on In-Depth Accident Investigations – Possible or not?
J. Gail, U. Ellmers ...................................... 88

Fatal Traffic Accidents in Lower Saxony – A New Approach to Accident Sampling and Analysis of Accident Causes and Configurations
M. Jänsch, D. Otte, C. Krettek ................................. 96

Method for In-Depth Traffic Accident Case-Control Studies
Y.W.R. de Vries, N.A. Jongerius ................................ 110

Session: Special Topics for Vulnerable Road Users

Powered Two-Wheeler Accidents – First Results of APROSYS SP 4 Implying GIDAS 2002 Data
J. König, F.A. Berg ...................................... 120

Analysis of Car-Pedestrian Impact Scenarios for the Evaluation of a Pedestrian Sensor System Based on the Accident Data from Sweden
S.N. Huang, J.K. Yang, F. Eklund .............................. 136

A Medical and Technical Analysis of Knee Injuries Focusing Vulnerable Road Users and Restrained Car Drivers in Road Traffic
C. Haasper, D. Otte, K. Knobloch, C. Probst, C. Krettek, M. Richter .... 144

Session: Regulations and Consumer Aspects

Paired-Comparison Study: Correlation between Euro NCAP Star Ratings and Accident Data from the National German Police Road Accident Statistics
C. Pastor ............................................. 156

Crash Tests to Assess the Secondary Safety of Cars in the so-called „8,000-Euro Class”
F.A. Berg, P. Rücker, M. Gärtner, M. Groer ................................. 162

Restraint Use Patterns for Injured Children in Japan
K. Okamura, K. Mori, Y. Nishida ................................ 172
Poster Session: Short Presentations

Accident Research in Germany – Experiences of an Interdisciplinary Project
L. Hannawald .................................................. 180

The TRACE Project: An Initiative to Update Accident Causation Issues and Evaluate the Safety Benefits of Technologies
Y. Page, T. Hermitt ............................................ 182

ZEDATU (Zentrale Datenbank tödlicher Unfälle in Österreich) – A Central Database of Fatalities in Austria
E. Tomasch, H. Steffan ........................................ 183

Validation of Human Pedestrian Models
Using Laboratory Data as well as Accident Reconstruction
R. de Lange, L. van Rooij
R. Happee, X.J. Liu ............................................ 186

Sensitivity of Car with Guardrail Impacts with a Multibody Simulation Tool
C.W. Klotwijk, R.H. Hoogvelt ................................ 194

How the 64.4 km/h (40mi/h) Frontal Offset Deformable Barrier Crash Test Relates to Real-World Crash Severity
D.A. Aylor, J.M. Nolan, D.S. Zuby,
B.C. Baker .......................................................... 197

Safety Criteria System: An Opportunity of Focusing Different Dummy Loading Values to a Single Expression
F. Kramer, W. Werner, J. Reimer ................................ 200

Session: Accident Prevention and Causation

Systematic of Analysis of Human Accident Causation – Seven Steps Methodology
Abbreviated System for the Assessment of Accident Causation in In-Depth Accident Studies
B. Pund, D. Otte, M. Jänsch .................................... 204

Comparison of Single Vehicle Accidents with Cars not Equipped with ESP (Electronic Stability Programme) and the Assumption the Cars are Equipped with ESP
E. Tomasz, H. Steffan, H. Hoschopf,
A. Moser ............................................................. 212

Intrusion and the Aggressivity of Light Duty Trucks in Side Impact Crashes
D. Patel, M. Ross, C. Compton,
T. Wenzel .......................................................... 222

The Effectiveness of Side Airbags in Preventing Thoracic Injuries in Europe
Y. Page, P. Thomas, V. Hervé, A. Kirk ....................... 228

Comparative Accident Rates of Vehicles Equipped with Stability Control – Field Experience
P. Thomas ............................................................ 238

Ideas and Expectations of Intersection Assistance
M. Hoppe, M. Junge, M. Jungmichel,
K. Seifert ........................................................... 244

Session: Injury Prevention and Mechanism

Injuries of Foot and Ankle of Front Seat Passengers
H. Zwipp, R. Schubert, W. Schneiders .................... 254

The Current Injury Situation of Bicyclists – A Medical and Technical Accident Analysis
M. Richter, D. Otte, C. Haasper, K. Sommer,
K. Knobloch, C. Probst, J. Westhoff,
C. Krettek .......................................................... 256

Sternal Fractures Occur most often in Old Cars to Seat-Belted Drivers without any Airbag often with Concomitant Spinal Injuries – Clinical Findings and Technical Collision Parameters among 42,055 Crash Victims
K. Knobloch, S. Wagner, C. Haasper,
C. Probst, C. Krettek, D. Otte,
M. Richter ........................................................... 263

Mortality of Occupants in Real Crash Scenarios – A Multivariate Analysis of Influences Regarding Mortality
S. Rohrer, L. Hannawald, R. Koch,
H. Zwipp ............................................................ 271

Influence of Vehicle Properties on Neck Injuries in Rear-End Collisions
Y. Watanabe ....................................................... 282

Injuries to Child Pedestrians Admitted to an Urban Pediatric Trauma Center
J.S. Jermakian ...................................................... 291

Evaluation of Risk Factors for Accidental Injuries in Children and Adolescents
W. Schneiders, A. Rollow, S. Rammelt,
A. Biewener, M. Holch, A. Serra, S. Richter,
B. Schlag, D. Roesner, H. Zwipp ......................... 296
