Society of Plastics Engineers
SPE International Polyolefins Conference
2007

TABLE OF CONTENTS

Volume 1

Plenary Session: Globalization

Polyolefins: Globalization and Beyond ................................................................. 1
Robert J. Bauman

Polyolefin Technology Recent Past and The Future ........................................... 42
Kurt Swogger

Reactive Extrusion & PO Modification/Functionalization

Synthesis and Characterization of Long Chain Branched Isotactic Polypropylene
via Metalloocene Catalyst and T-reagent ............................................................ 76
J.A. Langston, T.C. Mike Chung

Nitroxyls for Control of Free Radical Crosslinking of Polyolefins During Reactive
Extrusion and Vulcanization ................................................................................ 93
Mohamed Esseghir, Bharat I. Chaudhary, Jeffery M. Cogen

Reactive Processing of Polypropylene-Clay Nanocomposites with Silanes .......... 105
K. Jayaraman, S. Kumar, T. Pathak

Application of Counter Rotating Non-Intermeshing Twin Screw Extruders to
Reactive Extrusion Processes ............................................................................. 115
Christopher S. Tucker

Improved Functionalized Polyolefins Via Reactive Extrusion ......................... 126
Abuzar Syed, John Wefer, William Sigworth

Interfacial Adhesion Control Between Crosslinked Polyolefin Layers in Wire and
Cable Applications .............................................................................................. 139
Timothy J. Person, Suh Joon Han

Advances in Catalyst & Processing

Organometallics - Your Choice For Advanced Polyolefin Catalysts ................. 144
Sebastian Babik, Wolfram Uzick, Ralf A. Wendt

Novel Catalysts for the Controlled Copolymerization of Olefins and Acrylates to
Linear, High Molecular Weight, Random Copolymers .................................. 169
Brian L. Goodall, Nathan T. Allen, David M. Connor, Thomas C. Kirk, Lester H.
McIntosh III, Han Shen
Novel Olefin Block Copolymers
Gary R. Marchand, Dana Gier

Experimental Measurement Techniques in Analysis of the Film Blowing Process
G.D. Smith, R. Spares, M.T. Martyn, P.D. Coates

Next Generation Polyolefins – Applications

Wood Plastic Composites - What are they? Why should the plastics industry care?
William Sigworth

Clarified Polypropylene - a New Benchmark
Estibaliz Santamaria, Liam Killough, Hieu-Dinh Phan

High Efficiency Clarifier for Polypropylene
Ralph D. Maier, David Hild, P. Magnus Kristiansen, Wiebke Wunderlich

New Peelable Seal Technology for Easy-open Packaging
Julie (Gibbons) McKenna, Jeffrey J. Wooster, Robert N. Cotton, Erin Batig

Cyclic Olefin Copolymer - A High Performance Modifier for Conventional Polyolefins
Randy D. Jester

The Use of Essential Oils in Various Commercial Packaging and Molding Applications
Rodrigo A. Garcia, Joseph Webster

Advances in Additives & Modifiers

Light Stabilization of Polypropylene: an Independent Perspective
James H. Botkin

Comparison of Hindered Amines, UV Absorbers and Their Combinations in Different Polyolefin Applications
Jiong Yu, Florian Stricker, Eric Wallis

Plastics In Automotive Interiors A Study of Odor Release, A Study of Odor Release, Fogging and VOC Fogging and VOC
V. Malatesta, T. Chang, J. Eng, T. Steele, L. Davis

New Developments in Macromolecular Antioxidants for Polyolefins: Evaluations in High Density Polyethylene
Ashok Cholli

New Developments in UV and Secondary Application Specific Attributes of Monomeric and Oligomeric Hals
Steve Goldstein, Greg Coughlin
Colour Control in Polyolefins ................................................................. 390
B. Johnson, K. Keck-Antoine, E. Lievens, C. Totelin, N.S. Allen, M. Edge, A. Reyes

Advances in PO Films

Metallocene Polypropylene Resins for Cast Film Applications .................. 391
Daniele C. Bugada

High Clarity and Gloss Polypropylene Blown Films .................................. 400
Mark Miller, Rodolfo Mier

Volume 2

Quantification and Characterization of Gels in PE Film ............................... 413
Thomas I. Butler, Chuck Mork

Enhancing Polypropylene-film Wettability Using Migratory Additives .......... 447
Siqliang Zhu, Douglas E. Hirt

New Developments in Ionomer Technology for Film Applications ............... 451
Barry A. Morris

Polybutene-1: Exploiting Its Unique Properties to Enhance the Performance of
Other Polyolefins ...................................................................................... 485
Omar M. Boutni, Johan De Clippeleir, Marty Doordan

New Performance Polypropylene

Polypropylene: The Challenges Ahead ...................................................... 530
Shannon Schneider

Polypropylene Development - From Catalyst to Customer .......................... 561
Wolfgang Neissl, Markus Gahleitner, Christelle Grein

Advances in Additives & Modifiers

Potential Ability of Nano-sized Nucleating Agent ...................................... 589
Naoshi Kawamoto, Tsuyoshi Urushihara, Mitsuru Fukushima

A Novel Nucleating Agent for Polyethylene ............................................... 595
Martin Horrocks, Chris Kerscher

Non-halogen Flame Retardant Polyolefin Compounds Via Synergistic Blends of
Metal Hydroxides and Mineral Fillers ...................................................... 609
Alex Isarov, Bob Baker, Tong Chen

Improved Impact properties of TPO/TPE systems Containing Scratch and Mar
Additives; Effect of the Resin Composition on the Efficacy of the Additives .......... 624
Nikolas Kaprinidis, Jiong Yu, Gregor Huber

Rio Tinto Minerals HAR® Talc promises tougher, lighter plastics for the worldwide
automotive market ...................................................................................... 633
Saied H. Kochesfahani, Frederic Jouffret, Jerome Crepin-Leblond
