CONTENTS

FLUID POWER COMPONENTS

IMECE2006-13033 ................................................................. 1
Robust Electric Load Sensing Applied to an Open Circuit Axial Piston Pump
   Michael Rygaard Hansen, Torben Ole Andersen, and Henrik Clemmensen Pedersen

IMECE2006-13223 ................................................................. 9
Deformation Effects on the Load Carrying Capacity of the Barrel Bearing in Axial Piston
   Pumps and Motors
   Peter A. J. Achten and Marc P. A. Schellekens

IMECE2006-13453 ............................................................... 23
Research on the Principle and Characteristic of Compounded Switch-Mode Hydraulic
   Power Supply
   Jianwei Cao, Linyi Gu, Feng Wang, and Ying Chen

IMECE2006-13525 ............................................................... 31
Research on Electro-Hydraulic Control of Propellers of the Underwater Vehicles With
   Switch-Mode Hydraulic Power Supply
   Jianwei Cao, Linyi Gu, Feng Wang, and Ying Chen

IMECE2006-13681 ............................................................... 37
   Techniques to Simulations
   Andrea Vacca

IMECE2006-13735 ............................................................... 47
The Influence of Cavitation and Aeration on Gear Pumps and Motors Meshing
   Volumes Pressures
   M. Borghi, M. Milani, F. Paltrinieri, and B. Zardin

IMECE2006-14838 ............................................................... 57
Virtually Variable Displacement Hydraulic Pump Including Compressability and
   Switching Losses
   Mark A. Batdorff and John H. Lumkes, Jr.

IMECE2006-14973 ............................................................... 67
Software Enabled Variable Displacement Pumps: Experimental Studies
   Michael B. Rannow, Haink C. Tu, Perry Y. Li, and Thomas R. Chase

IMECE2006-15001 ............................................................... 77
Impact of Valve Plate Design on Noise, Volumetric Efficiency and Control Effort in an Axial
   Piston Pump
   Ganesh Kumar Seeniraj and Monika Ivantysynova

IMECE2006-15249 ............................................................... 85
Determination of Gap Surface Temperature Distribution in Axial Piston Machines
   Monika Ivantysynova, Changchun Huang, and Andreas J. Japing

</table>
Experimental Evaluation of a Hydraulically Actuated Tilt System for a Narrow Track Three-Wheeled Vehicle  
Benjamin Drew, Matt Barker, Kevin Edge, Jos Darling, and Geraint Owen

Directional Stability Enhancement of a Dual Path Front Hydrostatic Drive by Wire Off-Road Vehicle  
William van Doorn, IV and John H. Lumkes, Jr.

Energy-Based Control of a Pneumatic Oscillator With Application to Energy Efficient Hopping Robots  
Yong Zhu and Eric J. Barth

Optimizing the Efficiency of Electro-Hydraulic Powertrains  
Alexander J. Montgomery and Andrew G. Alleyne

Fabrication of Integrated Pressure-Flow-Temperature Sensor for Hydraulic Systems  
Charles W. Groepper, Tianhong Cui, Perry Y. Li, and Kim A. Stelson

Prediction of Hydraulic Inertance Using Acoustic Measurements and CFD Modeling  
Lewis J. Boyd, Andrew P. Roberts, Andrew P. S. Collett, D. Nigel Johnston, Derek G. Tilley, and Kevin A. Edge

Application of Differential Evolution in System Identification of Servo-Hydraulic System With a Flexible Load  
H. Yousefi and H. Handroos

Feasibility Study on the Use of Dynamic Neural Networks (DNN’s) for Modeling a Variable Displacement Load Sensing Pump  
Leslie Li, Richard Burton, and Greg Schoenau

Bulk Modulus of Air Content Oil in a Hydraulic Cylinder  
Jian Ruan and Richard Burton
