# Table of contents

## Volume 1

**History of IGS**  
A short history of the origins of the IGS  
*J.P. Giroud*  

**Giroud lecture**  
Geotextile containment for hydraulic and environmental engineering  
*C.R. Lawson*  

**Keynote lectures**  
Seismic stability of reinforced soil walls  
*J. Koseki, R.J. Bathurst, E. Güler, J. Kuwano & M. Maugeri*  

Hydraulic applications of geosynthetics  
*M. Heibaum, A. Fourie, H. Girard, G.P. Karunaratne, J. Lafleur & E.M. Palmeira*  

Geosynthetic barriers for environmental protection at landfills  
*E. Kavazanjian Jr., N. Dixon, T. Katsumi, A. Kortegast, P. Legg & H. Zanzinger*  

**Waste landfills**  

**Landfill GCL**  
Laboratory measurements of GCL shrinkage under cyclic changes in temperature and hydration conditions  
*R. Thiel, J.P. Giroud, R. Erickson, K. Criley, & J. Bryk*  

Effectiveness of a geocomposite liner to diffusion of aromatic hydrocarbons at low temperature  
*T. Mukunoki & R.K. Rowe*  

Long-term hydraulic conductivity of modified GCL permeated with inorganic chemical solutions  
*T. Katsumi, H. Ishimori, R. Fukagawa & K. Hanamoto*
Validation of the use of filter paper suction measurements for the determination of GCLs water retention curves

M. Barroso, N. Touze-Foltz & F. Saidi

GBR-S geosynthetic barrier – swelling nonwoven

P. Mohr

Improving performance of containment barrier systems

K.R. Legge

Landslide stabilization using an MSE buttress at a U.S. Superfund remediation site

J.F. Beech, M.J. Monteleone & R. Bonaparte

MSW landfill lateral barrier using GCL: Case history of Catania (Italy) new MSW landfill

M. Scotto, A.S. Lo Grasso & M. Maugeri

Base liner equivalency assessment for landfill sites

F.W. Gassner

Liners on slopes

Red Hill Landfill - design considerations for a hazardous waste cell

J. Cowland, M. Sadlier & B. Jones

Deformation measurement technology of geomembrane at controlled landfills using optical fiber sensors

Modelling of lining system integrity failure in a steep sided landfill

Experimental tests for geosynthetics anchorage trenches

H. Girard, L. Briançon & E. Rey

FEM study on tensile force of geosynthetic liner with a change of side slope gradient

M. Li & S. Imaizumi

Simple convenient method to evaluate the tensile force at the shoulder of barrier sheet in landfill

S. Xu & S. Imaizumi

Improved methodology for geomembrane wind uplift design

J.P. Giroud, R.B. Wallace & C.J. Castro

Capping systems for landfills in an active seismic area: Case history of Catania (Italy) old MSW landfill

A.S. Lo Grasso, M. Maugeri & S. Costanzo

A coastal waste disposal site on permeable ground in the Inland Sea of Japan

N. Kotake, K. Tsurugasaki & T. Tezuka

Use of geosynthetics for lining and drainage systems in quarry landfills

J.W. Cowland, M.A. Sadlier & A. Bouazza

Liner interface

Numerical modeling of the mechanical behavior of geosynthetic liner systems (GLS) installed on slopes

P. He, H. Girard, D. Poulain & P. Lac

Effect of temperature on surface hardness and soil interface shear resistance of geosynthetics

Ö. Bilgin & H.E. Stewart

Effect of boundary conditions on deflection of GM wrinkles in a GM/GCL composite liner

S. Gudina & R.W.I. Brachman
Questions raised regarding interpretation of inclined plane results for geosynthetics interfaces
J.P. Gourc, H.N. Pitanga, R. Reyes-Ramirez & C. Jarousseau

Interface shear stress parameter evaluation for landfill liner using modified large scale shear box
M. Saravanan, M. Kamon, H.A. Faisal, T. Katsumi, T. Akai, T. Inui & A. Matsumoto

Large scale ramp tests on soil-geosynthetic systems
H.N.L. Viana & E.M. Palmeira

Interface resistances among soil and geosynthetic materials for final cover of a hazardous landfill in Thailand
S. Teachavorasinskun & J. Maneepairoj

Development of graphical design charts for the stability of veneer cover system
A.H.I. Sia & N. Dixon

Advantages of the secondary textured high density polyethylene geomembrane in a sanitary landfill
G. You & H. Ng

Application of geosynthetic on Tianziling landfill and correlated geotechnical problems
Y. Chen, W. Lin, H. Ke & T. Wang

Sealing and drainage of barriers

Analysis of technical criteria for clay liner in China
X.W. Tang, Y.M. Chen, X. Luo & F. Ying

Numerical analysis of transport of landfill leachate through layered system underlain by an unsaturated soil stratum considering nonlinear sorption and degradation
J. Zhang, M. Luan & Q. Yang

Experimental investigation of flow rates through composite liners at the metric scale
N. Touze-Foltz, M. Barroso & F. Cartaud

Behaviour of an upstream stack formed with geotextile wrapped dikes

An example on the construction of MSW landfill site with the leakage detection and restoring automatically
Y. Murakami, F. Kobayashi, Y. Shimomura, T. Nakao & S. Shimonishi

Use of geocomposite strips in leachate collection systems
A. Zhao & J.P. Giroud

Geosynthetic drain elements for landfill cappings: Long-term water flow capacity and long-term shear strength
W. Mueller

Portable methods of locating leaks in liners and their integration
I.D. Peggs

Evaluation of the real performance of an electrical geomembranes leak detection system: Full scale experimental study
F. Caquel, G. Villon, J.P. Florin & M. Marcotte

Drainage performance of composite geotextiles under confined loads
H-Y. Jeon & M. Jacek

A case study of the use of large-diameter high-density polyethylene geopipes
Y. Sumiyama & K. Tashiro
Geomembrane properties

Overview of geomembrane history in the mining industry 345
A.J. Breitenbach & M.E. Smith

Improvement of waste landfills using geosynthetics in Japan 351
S. Imaizumi, K. Nakamura, S. Matsuyama, Y. Konishi & H. Kanou

Implementation of HDPE geomembrane and geotextile liner: A case history from 355
Baku-Tbilisi-Ceyhan (BTC) crude oil pipeline project storage tank farm, Ceyhan marine terminal
E. Kaya & E. Guler

Ageing resistance of HDPE-geomembranes - Evaluation of long-term behavior under consideration of project experiences 359
C. Tarnowski & S. Baldauf

Durability evaluation of geomembrane liners by outdoor exposure experiments for 10 years 363
T. Harada, S. Imaizumi & I. Nishizaki

The study of the durability about the triple liner system - The loading tests about slope hydraulic barrier function in the sea area landfill sites 367
T. Satoh, T. Akai, M. Ishida, T. Nomura & M. Kamon

Non-destructive test for geomembranes by visible near-infrared spectroscopy 373
T. Komiya, H. Nakayama, T. Shimaoka & K. Inoue

Strength testing of thermal welded PVC geomembrane field seams using non-destructive air channel methods 379
F.P. Rohe & D.S. Rohe

Relationship between temperature and peel strength of double hot wedge HDPE geomembranes seams 383
G. Lopes, M. Barroso & C. Costa

Estimate of thermal stress of geomembrane using a thermal infrared imaging device 387
H. Nakayama, T. Shimaoka, T. Komiya & T. Sannou

Thermal degradation of geomembranes after exposure to heat 391
P.C. Lodi & B.S. Bueno

Bituminous geomembrane in extremely cold conditions 395
B. Breul, J. Reinson, T. Eldridge, G. Stenson & Al. Harman
