Table of Contents

Digital Library Framework for Arabic Manuscripts .................................................. 458
Wasfi G. Al-Khatib, S.A. Shahab, Sabri A. Mahmoud

Floating-Point Matrix Product on FPGA ................................................................. 466
Faycal Bensaali, Abbes Amira, Reza Sotudeh

A New Design for 7:2 Compressors ..................................................................... 474
Mahmoush Rouholamini, Omid Kavehie, Amir-Pasha Mirbaha, Somaye Jafaralí Jasbi, Keivan Naviy

Reversible Barrel Shifters ...................................................................................... 479
Saeid Gorgin, Amir Kaivani

Simulation of a Secure CPU with SecureTag Technique to Defend Embedded Systems Against Buffer Overflow Attacks ........................................................................ 484
Michael Georg Grassner, Johannes Priebsch, Georg Hofer, Thomas Hodanek

A Methodology for the Formal Verification of RISC Microprocessors A Functional Approach ...................................................................................... 492
S. Merniz, M. Benmohammed

System Level Voltage Scheduling Technique Using UML-RT Model ............... 500
M.H. Neishaburi, Masoud Daneshtalab, Majid Nabi, Simak Mohammadi

Automated Software Power Optimization for Smart Card Systems with Focus on Peak Reduction ................................................................. 506

Mapping and Performance Analysis of Lookup Table Implementations on Reconfigurable Platform ................................................................. 513
Sohaib Majzoub, Hassan Diab

Towards an Extension of Real-Time Java Supporting Several Multimedia Applications .............................................................................. 521
M. Teresa Higuera-Toledano

Improving Robustness of Real-Time Operating Systems (RTOS) Services Related to Soft-Errors ................................................................. 528
M. H. Neishaburi, Masoud Daneshtalab, Mohammad Reza Kakoe, Saeed Safari

Speech Unit Selection Based on Matching Pursuit ................................................. 535
M. Hosseinpour, M. N. Ranjbar, M. Mousavinejad

Software/Configware Implementation of Combinatorial Algorithms .............. 539
Iouliia Skliarova, Valery Sklyarov

Improving Inter-processor Data Transfer Rates over Industrial Networks ...................................................................................... 547
Syed Misbahuddin, Nizar Al-Holou

An Exact Resource Constrained-Scheduler using Graph Coloring technique ......................... 554
Hadda Cherroun, Paul Feautrier

Software Defined Radios: A Software GPS Receiver Example ......................... 562
Mohammad S. Sharawi, Oleksiy V. Korniyenko

3D GIS Modeling of BAU: Planning Prospective and Implementation Aspects ...................................................................................... 566
Nedal Al-Hanbali, Balqies Sadoun

Three Dimensional (3D) GIS Modeling for High Buildings and Applications ...................................................................................... 572
Balqies Sadoun, Nedal Al-Hanbali

LBS and GIS Technology Combination and Applications ..................................... 578
Balqies Sadoun, Omar Al-Bayari

ARTIFICIAL NEURAL NETWORKS vs LINEAR REGRESSION IN A FLUID MECHANICS AND CHEMICAL MODELLING PROBLEM: ELIMINATION OF HYDROGEN SULPHIDE IN A LAB-SCALE BIOFILTER ...................................................................................... 584
G. Ibarra-Berastegi, A. Elias, R. Arias, A. Barona

AR Model Identification Using Higher Order Statistics ..................................... 588
Adnan M. Al-Smadi
# Table of Contents

**MODELING THE COMMUNICATION PROBLEM IN WIRELESS SENSOR NETWORKS AS A VERTEX COVER** ....................................................... 592  
Maytham Safar, Mohammad Taha, Sami Habib

**Robust Control Design for a Wind Turbine-Induction Generator Unit** .............................................................. 599  
Ali Reza Khosravi, Ali Akbar Jalali, Hamed Mejallali

**Removing the GSC Noise Reduction deficiencies in Reverberant Environments by Proposing Joint AEC-GSC algorithm** .............................................................. 603  
Pejman Mowlaee, Mahdi Orooji, Mohammad Hossein Kahaei

**SiMBCN: An Interactive Simulation Tool for Multihop Based Cellular Networks** ......................................................... 611  
Sami Arayssi, Morc Aki, Sami Abou Saab, Zaheer Dawy

**Modeling and Evaluation of Call Centers with GSPN Models** .................................................................................. 619  
Maryam Fanaeepour, Leila Naghavian, Mohammad Abdollahi Azgomi

**Loss rates bounds in IP buffers by Markov chains aggregations** ........................................................................ 623  
Hind Castel, Lynda Mokdad, Nihal Pekergin

**Performance Evaluation and Analytical Modeling of Novel Dynamic Call Admission Control Scheme for 3G and Beyond Cellular Wireless Networks** .............................................................. 631  
Salman A. AlQuhtani, Ashraf S. Hassan Mahmoud, A. Alshamyour

**Mahak: A Test Collection for Evaluation of Farsi Information Retrieval Systems** ...................................................... 639  
Kyamars Sheyk Esmailli, Hassan Abolhassani, Mahmood Neshati, Ehsan Behrangti, Asreen Rostami, Mojtaba Mohammadi Nasiri

**A Controlled Experiment to Investigate the Effect of 'Process Patterns' on the Quality of Requirement Analysis** ............................................................................ 645  
Ahmad Estabraghy, Darren Dalcher

**Performance Evaluation of an Ultra-Fast Pipeline Scheduler for Next-Generation Networks** ......................................... 650  
M. T. Anan, G. M. Chaudhry, J. Qaddour

**The Effect of Routing-Update Time on Network’s Performability** ........................................................................ 655  
M. Shaad Zolpirani, M. M. Bidmeshki, S. G. Miremadi

**A QoS Adaptive Multi-path Reinforcement Learning Routing Algorithm for MANET** ............................................. 659  
Saïda Ziane, Abdelhamid Mellouk

**MRI Fuzzy Segmentation of Brain Tissue Using IFCM Algorithm with Genetic Algorithm Optimization** .......................... 665  
Youness Aliyari Ghassabeh, Nosratollah Forghani, Mohammad Forouzanfar, Mohammad Teshnehlab

**A Hierarchical Face Identification System Based on Facial Components** ................................................................ 669  
Mehrtash T. Harandi, Majid Nili Ahmadabadi, Babak N. Araabi

**Robustness-Conserved Partially Host-Adaptive Watermarking Using a Baseband-Spread Spectrum Coding Technique** .............................................................. 676  
Ali E. Hameed, Majid A. Alwan

**A novel algorithm to fast mode decision with consideration about video texture in H.264** .............................................. 684  
Liquan Shen, Zhi Liu, Zhao Yang Zhang, Guozhong Wang

**A Novel Approach for Fingerprint Singular Points Detection Using 2D-Wavelet** .................................................. 688  
Ali Reza Ahmad Zayed, Masoud S. Nosrati

**OCCLUSION HANDLING FOR OBJECT TRACKING IN CROWDED VIDEO SCENES BASED ON THE UNDECIMATED WAVELET FEATURES** .................................................. 692  
M. Khansari, H. R. Rabisee, M. Asadi, M. Ghanbari

**An effective model of stressing in an Arabic Text To Speech System** .............................................................. 700  
Zouhir ZEMIRLI, Salima KHABET, M’hamed MOSTEGHANEM

**Video nature considerations for multi-frame selection algorithm in H.264** ...................................................... 708  
Liquan Shen, Zhi Liu, Zhao Yang Zhang, Guozhong Wang
