TABLE OF CONTENTS

Volume 1

WIA
Coding Theory I (Invited Papers)

An Improved Sphere-Packing Bound Targeting Short to Moderate Block Codes and Applications ............................................................... 1
Gil Wiechman, Igal Sason

Analysis of Doubly-Generalized LDPC Codes with Random Component Codes for the Binary Erasure Channel ................................................. 13
Enrico Paolini, Marc Fossorier, Marco Chiani

A Factor-Graph Approach to Universal Decoding .................................................. 23
Pascal Vontobel

Loop Calculus Helps to Improve Belief Propagation and Linear Programming Decodings of Low-Density-Parity-Check Codes ........................................ 31
Michael Chertkov, Vladimir Y. Chernyak

Generating Good Finite Length LDPC Codes Based on Lifted Graphs ..................... 41
Eran Sharon, Simon Litsyn

On the Fading Paper Achievable Region of the Fading MIMO Broadcast Channel ........ 51
Amir Bennatan, David Burshtein

WIB
Wireless Networks and Large Deviations (Invited Session)

Some Blocking Bounds for Autonomous Channel Selection in Dynamic Spectrum Access ............................................................................. 61
Murat Alanyali

Order Optimal Delay for Opportunistic Scheduling in Multi-User Wireless Uplinks and Downlinks ................................................................. 67
Michael Neely

On Characterizing the Delay Performance of Wireless Scheduling Algorithms .......... 77
Xiaojun Lin

Approximation Schemes for Information Acquisition and Exploitation in Multichannel Wireless Networks ......................................................... 85
Sudipto Guha, Kamesh Munagala, Saswati Sarkar

Large deviations with large coding buffers ......................................................... 91
Sandeep Bhadra, Sanjay Shakkottai

Large Deviations of Queues under QoS Scheduling Algorithms .......................... 96
Alexander Stolyar
WIC
Wireless Adhoc (Regular Session)

Random Matrix Analysis of Large Relay Networks ......................................................... 106
Veniamin Morgenshtern, Helmut Boelcskei

A Coding Strategy for Wireless Networks with No Channel Information ......................... 113
Frederique Oggier, Babak Hassibi

Explicit, Unified D-MG Optimal Construction for the Dynamic Decode-And-
Forward Cooperative Wireless Network ............................................................................. 118
Petros Elia, P. Vijay Kumar

Throughput and Transmission Capacity of Ad Hoc Networks with Channel State
Information ......................................................................................................................... 126
Steven Weber, Jeffrey Andrews, Nihar Jindal

Throughput-Optimal Configuration of Wireless Networks .................................................. 135
Aditya Karnik, Aravind Iyer, Catherine Rosenberg

On Broadcast Stability Region in Random Access through Network Coding ....................... 143
Yalin Evren Sagduyu, Anthony Ephremides

Rate-Distortion Bounds on Location-Based Routing Protocol Overheads in
Mobile Ad Hoc Networks .................................................................................................... 151
Nabhendra Bisnik, Alhussein Abouzeid

Reliability Bounds for Delay-Constrained Multi-Hop Networks ....................................... 153
Ozgur Oyman

WID
Communications, Control, and Optimization (Regular Session)

On Stabilizing the Double Integrator with Switched Gain Feedback and Binary
Sensing ................................................................................................................................. 160
Danielle C. Tarraf, Alexandre Megretski, Munther Dahleh

Receding Horizon Networked Control ................................................................................ 169
Vijay Gupta, Bruno Sinopoli, Sachin Adlakha, Andrea Goldsmith, Richard Murray

On the Stability of Hybrid Systems with Random Switching ............................................. 177
Chao Zhu, George Yin, Qingshuo Song

Duality in Stability Theory: Lyapunov Function and Lyapunov Measure .......................... 185
Umesh Vaidya

A Game Theoretic Model for Network Upgrade Decisions ................................................ 191
John Musacchio, Jean Walrand, Shuang Wu

LMS versus Wiener Filter for a Decision Feedback Equalizer .......................................... 201
Veeraruna Kavitha, Vinod Sharma

WIE
Learning (Invited Session)

How to Filter an "Individual Sequence with Feedback" ...................................................... 209
Tsachy Weissman
Sharp Thresholds for Sparsity Recovery in the High-Dimensional and Noisy Setting

Martin Wainwright

Upper and Lower Error Bounds for Active Learning

Rui Castro, Robert Nowak

WIF

MIMO (Regular Session)

Millimeter Wave MIMO: Wireless Links at Optical Speeds

Eric Torkildson, Bharath Ananthasubramaniam, Upamanyu Madhow, Mark Rodwell

Impact of Spatial Correlation on Statistical Precoding in MIMO Channels with Linear Receivers

Vasanthan Raghavan, Akbar Sayeed

Scaling-Law Optimal Training and Scheduling in the SIMO Uplink

Sugumar Murugesan, Elif Uysal-Biyikoglu, Philip Schniter

STORM: Optimal Constellations for Noncoherent MIMO Communications at Low SNR under PAPR Constraints

Shivratna Srinivasan, Mahesh Varanasi

Mismatched and Optimum Receivers for the Correlated Rician Fading MIMO Channel

Giorgio Taricco, Giulio Coluccia

User Selection for MIMO Broadcast Channel with Sequential Water-Filling

Jianqil Wang, David J. Love, Michael D. Zoltowski

Systematic Expansion of Space-Time Block Multiple TCM Codes for Two Transmit Antennas

Heechoon Lee, Michael P. Fitz

WIG

Broadcast (Regular Session)

Scheduling of Multi-Antenna Broadcast Systems with Heterogeneous Users

Krishna Prasanna Jagannathan, Sem Borst, Philip Whiting, Eytan Modiano

Broadcasting a Message Over Erasure Channels with Cooperating Receivers

Ramin Khalili, Samson Lasaulce, Pierre Duhamel

Discrete Memoryless Interference and Broadcast Channels with Confidential Messages

Ruoheng Liu, Ivana Maric, Predrag Spasojevic, Roy Yates

Transmitter Design with Interference Pre-Subtraction for Uncertain Broadcast Channels

Michael Botros Shenouda, Timothy N Davidson

On the Diversity-Multiplexing Region of Broadcast Channels with Partial Channel State Information

Ivana Stojanovic, Masoud Sharif, Prakash Ishwar

Achievable Rates for the Fading MIMO Broadcast Channel with Imperfect Channel Estimation

Pablo Piantanida, Pierre Duhamel
Capacity of Fading Broadcast Channels with Limited-Rate Feedback .................................................. 336
Rajiv Agarwal, John Cioffi

Precoding for Broadcasting with Linear Network Codes ................................................................. 344
Qiuye Zou, Aria Nosratinia, Ali H. Sayed

WIIA
Topics in Communication Theory (Invited Session)

How Does the Information Capacity of Ad Hoc Networks Scale? .................................................... 354
Ayfer Ozgur, Olivier Leveque, David Tse

On the Reliability of Gaussian Channels with Noisy Feedback ....................................................... 364
Young-Han Kim, Amos Lapidoth, Tsachy Weissman

Fractional Power Reuse in Cellular Networks .................................................................................... 372
Xinzhou Wu, Arnab Das, Junyi Li, Rajiv Laroia

I-Projection and the Geometry of Error Exponents ............................................................................ 382
Shashi Borade, Lizhong Zheng

Cooperative Encoding with Asymmetric State Information at the Transmitters .............................. 392
Anelia Somekh-Baruch, Shlomo Shamai (Shitz), Sergio Verdu

WIIB
Communication, Feedback, and Rate Distortion (Invited Session)

Finite-Rate Real-Time Navigation ....................................................................................................... 402
Sridevi Sarma, Munther Dahleh

On the Fixed Point Problem in the Abstract Rate Distortion Theory ............................................. 408
Farzad Rezaei, Charalambos Charalambous, Nasir Uddin Ahmed

Coding for Additive White Noise Channels with Feedback Corrupted by Quantization or Bounded Noise ......................................................................................................................... 413
Nuno Martins, Tsachy Weissman

Beating the Burnashev Bound in Delay with Noisy Feedback .......................................................... 421
Stark Draper, Anant Sahai

WIIC
Iterative LDPC (Regular Session)

Exact EXIT Functions for Convolutional Codes Over the Binary Erasure Channel .......................... 431
Jun Shi, Stephan ten Brink

Raptor Codes for Hybrid ARQ ............................................................................................................ 438
Emina Soljanin, Nedeljko Varnica, Philip Whiting

Information-Reduced Carrier Synchronization of BPSK and QPSK Using Soft Decision Feedback ................................................................................................................................. 446
Marvin Simon, Esteban Luis Valles, Christopher Jones, Richard Wesel, John Villasenor

LDPC Codes Over Ergodic and Non-Ergodic Relay Channels .......................................................... 454
Jun Hu, Tolga Duman

On the Performance of Distributed LT Codes ..................................................................................... 462
Srinath Puducheri, Joerg Kliewer, Thomas E. Fuja
Coded Random CDMA with Partitioned Spreading .......................................................... 469
Dmitri Truhachev, Christian Schlegel, Lukasz Krzymien

Improved Optimum-Degree Randomized LDPC Codes of Moderate Length by Welding .......................................................... 477
Andac Doenmez, Thorsten Hehn, Stefan Laendner, Johannes B. Huber

Methods for Efficient Network Coding ..................................................................... 482
Petar Maymounkov, Nicholas Harvey, Desmond S. Lun

WIID
Coding Theory II (Invited Session)

Enumerating RNA Motifs: A Coding-Theoretic Approach ........................................ 492
Olgica Milenkovic

Volume 2

Performance Analysis of Algebraic Soft-Decision Decoding of Reed-Solomon Codes ........................................................................... 502
Andrew Duggan, Alexander Barg

Quantum Convolutional Codes: Encoders and Structural Properties .................... 510
Markus Grassl, Martin Rotteler

Quantum Error Correcting Subsystem Codes and Fault-Tolerant Quantum Computing ........................................................................... 520
Dave Bacon, Andrea Casaccino

Subsystem Codes ....................................................................................................... 528
Salah A Aly, Andreas Klappenecker, Pradeep Kiran Sarvepalli

WIIE
Information Theory (Regular Session)

Computation Complexity and Information Theoretic Depth of Decision Trees ........ 536
Sina Sohangir, Ivan Linscott

Bounds on Distortion Bit-Cost Function for First Order Sigma-Delta Analog-to-
Digital Converter with Input Noise ........................................................................... 545
Hossein Kakavand, Abbas El Gamal

Error Exponents for Joint Source-Channel Coding with Delay-Constraints ............ 551
Cheng Chang, Anant Sahai

Lossy Source Coding for a Cascade Communication System with Side-
Informations .............................................................................................................. 561
Dinkar Vasudevan, Chao Tian, Suhas Diggavi

Coding into a Source: A Direct Inverse Rate-Distortion Theorem ............................ 569
Mukul Agarwal, Anant Sahai, Sanjoy Mitter

WIIF
Queueing Theory (Regular Session)

Scheduling with Soft Deadlines for Input Queued Switches ...................................... 579
Aditya Dua, Nicholas Bambos
