Correction of Bound and Free Fluid Volumes in the Timur-Coates Permeability Equation for the Presence of Heavy Oil—A Case Study From the Golfo San Jorge Basin, Argentina

Hugo Gómez, Luis Sinco, Alejandro Nawratil, Javier Lopetrone, Pedro Romero, Benito Saavedra

1066

Management of Steam Flooding in Nine Spot with Fiber Optic in Observation Wells

M F Silva, R G Izetti

1078

Generation of a Compositional Model to Simulate EOR Processes for the Complex Fluids System of the Carito-Mulata Field, Venezuela

F. Rodríguez, L. López G., J. Bello

1084

Visualization of New Production Opportunities From Reservoir Characterization of Muri Field, Venezuela

A. Malavé, G. Carpio, M. Bolívar, K. Khan, J. Bello

1098

Optimal Process for Design of Fracturing Treatments in a Naturally-Fractured Volcaniclastic Reservoir: A Case History in the Cupén Mahuida Field, Neuquén, Argentina

E. d'Huteau, R. Ceccarelli, M. Pereira

1106

Defining and Implementing Functional Requirements of an Intelligent-Well Completion System

Arashi Ajayi, Michael Konopczynski, Victoria Jackson Nielsen, Corrado Giuliani

1112

Streamline-Based Integral Modeling for Waterflooding Design Optimization, Surveillance, and Monitoring

Mirta Galacho, Pablo Vázquez, Gerardo Laíz, Andrés Krittian, Fabián Gutiérrez, Víctor Pací

1119

Heavy-Crude-Oil Upgrading With Transition Metals

H. R. Nares, P. Schacht-Hernández, M. A. Ramírez-Gamica, M. C. Cabrera-Reyes

1133

Filtration Effect on Water in Oil Emulsions Stabilization in Slop Crude Treatment

M. Ricaurte, H. Pérozo

1143

Assessment of CO2 Corrosion Damage: Likelihood of Failure in Deviated Wells by Deterministic and Stochastical Modelling

R. Case, M. Carpio

1149

Volume 3

Study of Sweep Efficiency of Water Injection Under Fracturing-Conditions Process

Edén O. Muñoz Mazo, Juan M. Montoya Moreno, Denis J. Schiozer

1167

An Efficient Response Surface Approach for the Optimization of ASP Flooding Processes: ASP Pilot Project LL-03 Reservoir

Luis E. Zerpa, Nestor V. Queipo, Salvador Pintos

1176

Applications of Organic Geochemistry in Rayoso Formation Characterization: Chihuido De La Sierra Negra, Lomita Field, Neuquina Basin, Argentina

E. Lovrincevich, M. Fasola, I. Labayen

1185

Analysis of Condensate Buildup and Flow Impairment of Retrograde Gases in Fissured Reservoirs

H. Ayala, F. Luis, Eduardo Radespiel

1192

Evolutionary Optimization of Smart- Wells Control Under Technical Uncertainties

Luciana Faletti Almeida, Yvan J. Túpac, Juan G. Lazo-Lazo, Marco Aurélio Pacheco

1199

New Method To Squeeze Perforations and Reduce Sand Production

F. Ramón, N. Galacho, M. A. Crotti

1206
Characterisation of Sulphate Scale Damage System From Pressure Measurements ................................................................. 1209
  P. Bedrikovetsky, M. Marotti, L.A. Lima Neto, T. Carageorgos

Integrated Reservoir Management Enhances the Recovery in a Mature Field .................................................. 1221
  L. E. Pérez, J. G. Gonzalez, V. Gómez, M. E. Lozano, J. A. Vargas

Miscible EOR Processes: Existence of Elliptic Regions in Gasflood Modeling .................................. 1226
  T. A. Dutra, A. P. Pires, P. G. Bedrikovetsky

Integrated Analysis for PCP Systems ......................................................................................................................... 1234
  Oscar Becerra Moreno, María Eugenia Mena Romero

Pressure and PVT Uncertainty in Material Balance Calculations .......................................................... N/A
  Carlos A. García, Jose R. Villa

Estimation of Permeability From Porosity, Specific Surface Area, and Irreducible Water Saturation Using an Artificial Neural Network .......................................................... 1244
  B. Basbug, Z. Karpy

Design and Surveillance of Development Projects Through Specific Software Tools: Importance of Data Management in Mature and Complex Fields in the Golfo San Jorge Basin, Argentina ........................................................................................................... 1254
  Ricardo Mazzola, Isabel Cano Frers, Dario R. Baldassa, Jorge Valle Alejandro Laciviola,
  Carlos A. Ponce, Alfredo F. Viola, Miguel A. Laffitte

Modeling of Facies and Net-to-Gross Ratio Conditioned by Seismic Attribute Maps .................................................. 1261
  Carlos Conforti Ferreira Guedes, Darci Jose Sarzenski, Renato Luiz Almeida dos-Santos,
  Flaviana de Almeida Costa

Pressure Evidence of Communication Through a Canyon: Sedimentary, Structural, and Reservoir Management Aspects, Campos Basin, Brazil .................................................................................. 1265
  Adriana O. Gangá, Mário Sérgio S. Braga, Edilon R. Silva, Glaucia H. Bragança, Walter B.
  Maciel

New Attempt in Improving Sweep Efficiency at the Mature Koluel Kaike and Piedra Clavada Waterflooding Projects of the S. Jorge Basin in Argentina .................................................. 1273
  Pablo Adrian Paez Yanez, Jorge Luis Mustoni, Maximo F. Relling, Kin-Tai Chang, Paul
  Hopkinson, Harry Frampton

Offshore Exploration in the Golfo San Jorge Basin: A Technological Challenge 100 Years After the Discovery of Oil in Well 2 .................................................................................. 1283
  Ricardo Clavijo, Yudistira Effendi, Anna Ortin

Hydrocarbon Generation, Migration, and Accumulation Related to Igneous Intrusions: An Atypical Petroleum System From the Neuquen Basin of Argentina .................................. 1288
  Felipe Rodríguez, Héctor J. Villar, Roger Baudino

Experimental and Numerical Investigation of Proppant Placement in Hydraulic Fractures .......................................................... 1293
  Eissa M. El-M. Shokir, Abdulrahman A. Al-Quraishi

Optimizing Producing Wells With Solid Expandable Tubular Technology .................................................. 1304
  Eduardo Perez-Roca

Using Seismic Attributes in Petrophysical Reservoir Characterization .................................................. 1311
  Flaviana Costa

Hybridizing Genetic Algorithms and Real Options to Approach of the Optimal Decision Rule for Oilfield Development Under Uncertainties .................................................. 1316
  Juan G. Lazo-Lazo, Marco Aurélio C. Pacheco
Look Ahead VSP, Inversion, and Imaging From ZVSP and OVSP in a Surface Basalt Environment: Neuquen Basin, Argentina .......................................................... 1321
Leonardo Rodríguez Arias, Mario Galaguza, Adrian Sanchez

Increase Heavy-Oil Production in Combustion Tube Experiments Through the Use of Catalyst .......................................................... 1325

Fluid Distribution Model for Structurally Complex Reservoirs in El Carito-Mulata and Santa Bárbara Fields, Venezuela ........................................ 1335
G. Carplo, F. Rodríguez, K. Khan, A. Contreras, L. Campos, C. Idrogo, E. Labastida

Rubiales Oil Field: A Heavy-Oil Colombian Example of Excellent Operative PCP Systems Development ................................................ 1345
C.A. Rubio, J.M. Doval

Forecasting Oil Production in Waterflooded Reservoirs .......................................................... 1358
Antonio Cláudio de França Corrêa

Evaluating Reservoir Production Strategies in Miscible and Immiscible Gas-Injection Projects .......................................................... 1365
Iman Farzad, Mahmood Amini

Analytical Evaluation of Gas/Condensate Skin in Hydraulically Fractured Wells .......................................................... 1381
Reza Rostami Ravari, Robert A. Wattenbarger, Alireza Rezaei Doust, Mahmood Amani

Bayesian Characterization of Subsurface Lithofacies and Saturation Fluid .......................................................... 1393
Raquel Teixeira, Igor Braga, Luiz Loures

Material Balance of Fractured Fields—Double Reservoir Method .......................................................... 1405
José Renato da Costa Peron

Water-Alternating-Gas Pilot in the Largest Oil Field in Argentina: Chihuido de la Sierra Negra, Neuquen Basin .......................................................... 1411
Esteban Fernandez Righi, Mario Pascual

Structural Styles and Tectonic Framework of the Fold and Thrust Belt in Tierra del Fuego and Offshore Austral-Malvinas Basins, Argentina ........ 1420
P. Bonillo Martínez, D. Figueroa, M.C. Ghiglione

Water Control in Heavy-Oil Mature Field, Block 1AB .......................................................... 1425
Pedro Zegarra Sánchez, Marco Augusto Delgado, Víctor Huerta Quiñones

Challenges and Solutions in Hydraulic Fracture Jobs in Land Fields in Alagoas, Brazil .......................................................... 1437
Edson Payão, Luiz Gomes

Produced Water Reinjection in Mature Field With High Water Cut .......................................................... 1443
William Navarro Leytzer Muro

Use of Discrete Fracture Network “DFN” to Characterise and Model a Naturally Fractured Sandstone Reservoir: A Case Study of Orocual Field, San Juan Formation, Venezuela .......................................................... 1450
L. Guaquirian, P. Gonzalez, A. Gonzalez, M. Manuela Hernandez, T. Le Maux, L. Mattoni, P. Rouvroy

Artificial-Lift Systems Overview and Evolution in a Mature Basin: Case Study of Golfo San Jorge .......................................................... 1458
Marcelo Hirshfeldt, Paulino Martinez, Fernando Distel

Evaluation of Different Models for Injectivity Decline Prediction .......................................................... 1471
C.J.A. Furtado, A.L.S. Souza, C.H.V. Araújo
Contrastive Analysis of the Conventional and Unidimensional Dynamic Modeling
Applied in an Oil Field of Eastern Venezuela Basin .......................................................... 1477
Sonia Lopez, Renato Peron, Carlos Selva, Gustavo Becerra

Speeding Up Oil Recovery by Infill Drilling Prior to Considering Implementation of
a Full-Field WAG Process—El Furrial Field, Venezuela ....................................................... 1483
Leonardo Lopez G., Analissé Rivas, Joaquin Bello

A Field Development Strategy: When a Simple Stochastic Model Surpasses
Numerical Simulation ........................................................................................................... 1490
V. Sancho, V. Berrios, F. Gulino

Marlim Field: Incorporating 4D Seismic in the Geological Model and Application
in Reservoir Management Decisions ..................................................................................... 1497
Rildo M. Oliveira, Dirceu Bampi, Rui C. Sansonowski, Nier M. S. Ribeiro Júnior, Paulo R.
Schroeder Johann, Marcos S. dos-Santos, Delse M. Ferreira

Porosity Variations by Diagenesis in Reservoirs of the Bajo Barreal Formation,
San Jorge Basin: Methodology of Evaluation With Logs ..................................................... 1504
