# Table of Contents

**COMPSAC 2006**

**Volume I: Regular Papers/Panels**

- Message from the General Chair .......................................................... xii
- Message from the Program Co-chairs .................................................... xliii
- Committees ............................................................................................... xv
- Reviewers ................................................................................................. xviii

## Keynote

Practical Autonomic Computing ................................................................. 3  
*George Cybenko, Vincent H. Berk, Ian D. Gregorio-De Souza, and Chad Behre*

## Panels

### Future Trends of Software Technology and Applications

- **Panel Chair: Stephen Yau**
  - Panelists: Stephen Yau, Paul C. Clements, Warren Harrison, and John C. Knight

  1. Future Trends of Software Technology and Applications ........................................... 15  
     *Stephen Yau*

  2. Future Trends of Software Technology and Applications: Software Architecture ................ 16  
     *Paul C. Clements*

  3. Future Trends of Software Technology and Applications The Phone is the Computer ........ 17  
     *Warren Harrison*

  4. Future Trends of Software Technology and Applications Model-Based Development .......... 18  
     *John C. Knight*

### E-Security, Granular Computing, and Web Intelligence

- **Panel Chair: T. Y. Lin**
  - Panelists: T. Y. Lin, Ning Zhong, and Shusaku Tsumoto

  1. Introduction to Panels on E-Security, Granular Computing and Web Intelligence ........ 21  
     *Tsau Young (T. Y.) Lin*

  2. Granular Computing, Computer Security and Web Intelligence ................................ 22  
     *Tsau Young (T. Y.) Lin*

  3. How to Make Web Intelligence (WI) meets Brain Informatics (BI) Successfully? ........ 24  
     *Ning Zhong*

  4. Data Structure and Algorithm in Data Mining: Granular Computing View .................. 26  
     *Shusaku Tsumoto*
Panel Session

COMPSAC Panel Session on Trustworthy Computing

Panel Chair: Ann Miller
Panelists: John McLean, Ann Miller, O. Sami Saydjari, and Jeffrey Voas

Trustworthy Software: Why we need it, Why we don't have it, How we can get it
John McLean

Trustworthy Computing Needs
Ann Miller

Reliability and Fault Tolerance in Trust
Jeffrey Voas

Risk: A Good System Security Measure
O. Sami Saydjari

Panel Session

Just Enough Requirements Traceability

Panel Chair: Jane Cleland-Huang
Panelists: Brad Appleton, Jane Cleeland-Huang, Theresa Dennis, and Mikio Aoyama

Just Enough Requirements Traceability
Jane Cleland-Huang

Panel Session

Software Engineering from Perspective of USA, Europe, India, Asia, and the Research Community

Panel Chair: Dick B. Simmons
Panelists: Dick B. Simmons, Carl K. Chang, Bhavani Thuraisingham, Barrie Thompson, and Krishna Kavi

Software Engineering Education in the New Millennium – A View from Asia Position Statement
Carl K. Chang

Software Engineering Education in the New Millennium
Dick B. Simmons

Panel Session

Global Software Engineering and How to Prepare our Students

Panel Chair: Sheikh Iqbal
Panelists: Monica P. Adya, Umesh Bellur, Venu Vasudevan, Rajiv Ramnath, and Sheikh I. Ahamed

Imparting Global Software Development Experience via an IT Project Management Course: Critical Success Factors
Monica P. Adya

An Academic Perspective on Globalization in the Software Industry
Umesh Bellur

Global Software Entrepreneurship
Venu Vasudevan

Global Software Development for the Enterprise
Rajiv Ramnath
Model for Global Software Engineering Project Life Cycle and How to Use it in Classroom for Preparing Our Students for the Globalization

Sheikh I. Ahamed

Regular Papers

Applications

A Performance Engineering Tool for Tiered Software System

Vibhu Saujanya Sharma, Pankaj Jalote, and Kishor S. Trivedi

Accomplishments and Challenges of Protein Ontology

Amandeep S. Sidhu, Tharam S. Dillon, Farookh K. Hussain, and Elizabeth Chang

Alert Based Monitoring of Stock Trading Systems

Edward W.Y. Ho, Dickson K.W. Chiu, and Patrick C.K. Hung

Architecture 1

An Aspect-Oriented Approach to Resource Composition in Petri Net-Based Software Architectural Models

Tae-hyung Kim and Carl K. Chang

Engineering Reconfigurable Product Families - Architecting the Variability Infrastructure of a Product Family On-Chip

Michel Jaring

A Biologically-Inspired Autonomic Architecture for Self-Healing Data Centers

Paskorn Champrasert and Junichi Suzuki

Architecture 2

Detecting Data Races in Framework-Based Applications

Federico Balaguer, Thuc S. M. Ho, and Ralph Johnson

Tool Support to Model-Based Quality Analysis of Software Architectures

Qian Zhang, Jian Wu, and Hong Zhu

Generating Domain Specific Graphical Modeling Editors from Meta Models

Rabih Zbib, Ashish Jain, Devasis Bassu, and Hiralal Agrawal

Formal Methods/Models 1

Verifying Java Programs by Theorem Prover HOL

Anduo Wang, He.Fei, Ming Gu, and Xiaoyu Song

Model Checking with Induction

Kuangnan Chang and David Kung

On the Distribution of Property Violations in Formal Models: An Initial Study

Jimin Gao, Mats Heimdahl, David Owen, and Tim Menzies
Formal Methods/Models 2

Efficient Modeling of Hierarchical Dialog Flows for Multi-channel Web Applications.............................................................................. 161
  Matthias Book and Volker Gruhn

A Formal Approach to Pre-Market Review for Medical Device Software ......................................................................................... 169
  Raoul Jetley, S. Purushothaman Iyer, Paul L. Jones, and William Spees

Modeling the Symptomatic Fixes Archetype in Enterprise Computer Security ......................................................................................... 178
  Shalom N. Rosenfeld, Ioana Rus, and Michel Cukier

Maintenance

An Experimental Study on Software Aging and Rejuvenation in Web Servers .......................................................................................... 189
  Rivalino Matias Jr. and Paulo J. F. Filho

A Novel Structure-oriented Difference Approach for Software Artifacts ................................................................................................. 197
  Tien N. Nguyen

A Formal Model Driven Approach to Dependable Software Evolution ................................................................................................. 205
  Feng Chen, Hongji Yang, Bing Qiao, and William Cheng-Chung Chu

Metrics

Do Structural Design Patterns Promote Design Stability? ......................................................................................................................... 215
  Mahmoud Elish

Software Effort Estimation Based on Use Cases ................................................................................................................................. 221
  Marcio Rodrigo Braz and Silvia Regina Vergilio

Scale Free in Software Metrics ............................................................................................................................................... 229
  Liu Jing, He Keqing, Ma Yutao, and Peng Rong

An Agent-Based Metric for Quality of Services over Wireless Networks ............................................................................................... 236
  Yaw-Chung Chen and Wen-Yen Chen

Pervasive Computing

Highly Reliable Mobile Desktop Computing in Your Pocket .................................................................................................................... 247
  Shaya Potter, Jason Nieh

Proxy-Based Pervasive Multimedia Content Delivery ....................................................................................................................... 255
  Henry N. Palit, Chi-Hung Chi, and Lin Liu

REQUIREMENTS/DESIGN 1

Phrasing in Dynamic Requirements Trace Retrieval ......................................................................................................................... 265
  Xuchang Zou, Raffaella Settimi, and Jane Cleland-Huang

An Instance-Based Structured Object Oriented Method for Co-analysis/Co-design of Concurrent Embedded Systems ................................................................ 273
  Matthew Ryan, Sule Simsek, Xiaoying Liu, Bruce McMillin, and Ying Cheng
A Methodology for Structured Object-Oriented Elicitation and Analysis of Temporal
Constraints in Hardware/Software Co-analysis and Co-design of Real-Time Systems ............ 281
Yan Sun, Xiaoqing Liu, and Bruce McMillin

REQUIREMENTS/DESIGN 2

A Coordination Framework for Software Component Based Development .................................. 291
Jiang Guo

An Approach for Developing Adaptive, Mobile Applications with Separation of Concerns .................. 299
Nearchos Paspallis and George A. Papadopoulos

CAPIS Model Based Software Design Method for Sharing Experts' Thought Processes .................. 307
Katsunori Oyama, Atsushi Takeuchi, and Hiroshi Fujimoto

SECURITY 1

A Pattern-Based Technique for Developing UML Models of Access Control Systems ..................... 317
Dae-Kyoo Kim and Priya Gokhale

Efficacy of Hidden Markov Models over Neural Networks in Anomaly Intrusion Detection ............... 325
Mohammad Al-Subaie and Mohammad Zulkernine

An Ontology Based Approach to Software Comprehension- Reasoning about Security Concerns ........... 333
Yonggang Zhang, Juergen Rilling, and Volker Haarslev

SECURITY 2

Integrating Static and Dynamic Analysis for Detecting Vulnerabilities ......................................... 343
Ashish Aggarwal and Pankaj Jalote

Security Consistency in UML Designs ......................................................................................... 351
Orest Pilskalns, Daniel Williams, Damir Aracic, and Anneliese Andrews

A Service-Oriented Design Framework for Secure Network Applications ..................................... 359
Hiroshi Wada, Junichi Suzuki, and Katsuya Oba

Testing 1

Proportional Intensity-Based Software Reliability Modeling with Time-Dependent Metrics ................ 369
Koichiro Rinsaka, Kazuya Shibata, and Tadashi Dohi

Automatic Identification of Change Points for the System Testing Process .................................... 377
João W. Cangussu and Michael Baron

Backtracking Algorithms and Search Heuristics to Generate Test Suites for Combinatorial Testing ...... 385
Jun Yan and Jian Zhang
Testing 2

Testing Scenario Implementation with Behavior Contracts ........................................... 395
  Donglin Liang and Kai Xu

On Detection Conditions of Double Faults Related to Terms in Boolean Expressions ........... 403
  M. F. Lau, Y. Liu, and Y. T. Yu

Test Case Prioritization Using Relevant Slices ............................................................. 411
  Dennis Jeffrey and Neelam Gupta

Testing 3

A Network-Level Distributed Fault Injector for Experimental Validation
  of Dependable Distributed Systems .............................................................................. 421
  Gabriela Jacques-Silva, Roberto Jung Drebes, Julio Gerchman, Joana M. F. Trindade,
  Taisy Silva Weber, and Ingrid Jansch-Porto

Reference Models and Automatic Oracles for the Testing of Mesh
  Simplification Software for Graphics Rendering ....................................................... 429
  W.K. Chan, S.C. Cheung, Jeffrey C. F. Ho, and T.H. Tse

Testing 4

Automatic Validation of Java Page Flows Using Model-Based Coverage Criteria .............. 439
  Jonatan Alava, Tariq M. King, and Peter J. Clarke

A Case Study for Invalidating the Markovian Property of GUI Software Structural Profile .......... 447
  Bei-Bei Yin, Yan Shi, Cheng-Gang Bai, and Kai-Yuan Cai

A Systematic Regression Testing Method and Tool for Software Components ..................... 455
  Jerry Gao, Deepa Gopinathan, Quan Mai, and Jingsha He

Testing 6

Architecting a Testing Framework for Publish/Subscribe Applications ........................ 467
  Anton Michlmayr, Pascal Fenkam, and Schahram Dustdar

An Empirical Study on the Selection of Good Metamorphic Relations .......................... 475
  Johannes Mayer and Ralph Guderlei

Forgetting Test Cases ....................................................................................................... 485
  Kwok Ping Chan, T. Y. Chen, and Dave Towey

Web Service 1

Performance and Availability Analysis of an E-commerce Site .................................. 495
  Swapna S. Gokhale and Jijun Lu

Automated Agent Synthesis for Situation Awareness in Service-Based Systems ............... 503
  Stephen S. Yau, Haishan Gong, Dazhi Huang, Wei Gao, and Luping Zhu
Web Service 2

Web Service Retrieval: An Approach Based on Context Ontology ............................................................ 513
Zhi Jin and Lin Liu

A Communication Virtual Machine ............................................................................................................. 521
Yi Deng, S. Masoud Sadjadi, Peter J. Clarke, Chi Zhang, Vagelis Hristidis,
Raju Rangaswami, and Nagarajan Prabakar

Quantitative Analysis on the Cacheability Factor of Web Objects .............................................................. 531
Chi-Hung Chi, Lin Liu, and LuWei Zhang

Author Index .................................................................................................................................................. 539
