Proceedings

30th Annual International
Computer Software and Applications Conference

COMPSAC 2006

17-21 September 2006
Chicago, Illinois

Volume II
Short Papers/Workshops/Fast Abstracts/Doctoral Symposium

Sponsored by

IEEE Computer Society

Los Alamitos, California
Washington • Tokyo
# Table of Contents

**COMPSAC 2006**  
Volume II: Short Papers/Workshops/Fast Abstracts/Doctoral Symposium

- Message from the General Chair ......................................................... xi
- Message from the Program Co-chairs .................................................... xii
- Message from the Workshop Chair....................................................... xiv
- Message from the Doctoral Symposium and Fast Abstracts Chair ............... xv
- Committees ............................................................................................... xvi
- Reviewers ................................................................................................. xix

## Short Papers

### PERVASIVE/performance

- Location Updates in Cellular Networks Using Bloom Filters .......................... 3  
  Kamala Subramaniam, Alan L. Tharp, and Arne A. Nilsson
- Distributed Processes on Tree Hash ........................................................... 10  
  Kyosuke Yasuda, Takao Miura, and Isamu Shioya
- Trading Integrity for Availability by Means of Explicit Runtime Constraints .......... 14  
  Lorenz Froihofer, Johannes Osrael, and Karl M. Goeschka
- A Run-time Adaptive and Code-Size Efficient XML Parser ........................... 18  
  Zhou Yanming and Qu Mingbin
- Performance Analysis of an Asynchronous Web Server .................................. 22  
  U. Praphamontripong, S. Gokhale, Aniruddha Gokhale, and Jeff Gray

### REQUIREMENTS/DESIGN

- Choosing the Right Time to Compose Aspectual Scenarios .............................. 29  
  João Aráujo, Jon Whittle, and Ana Moreira
- Self-Management of COTS Component-Based Systems Using Wrappers .............. 33  
  Michael E. Shin and Fernando Paniagua
- Intelligent Classification and Retrieval of Software Components ..................... 37  
  Andreas S. Andreou, Dimitrios G. Vogiatzis, and George A. Papadopoulos
- Traceability between Software Architecture Models ....................................... 41  
  Yaodong Feng, Gang Huang, Jie Yang, and Hong Mei
- Achieving Dependable Component-Based Systems through Generative  
  Aspect Oriented Component Adaptation ..................................................... 45  
  Xiaodong Liu, Yankui Feng, and Jon Kerridge
MODELING WEB ACCESSIBILITY: A CASE STUDY ON TEXAS A&M UNIVERSITY PEOPLE WEBSITE

Yong Wang and Dick Simmons

TOOL FOR ANALYSIS AND SIMULATION OF TTCN Communication in Distributed Systems

José Antonio de Frutos, Esther Cadiñanos, Juan Ignacio Pérez, Sara García

MOVING SOFTWARE FROM EXPENSE TO ASSET

R. Krishnan and Margaret Nadworny

AUTOMATED NEGOTIATION FOR SERVICE CONTRACTS

Russell Lock

ARIMAmmse: An Improved ARIMA-based Software Productivity Prediction Method

Li Ruan, Yongji Wang, Fengdi Shu, Haitao Zeng, and Shen Zhang

AN INTERFACE THEORY BASED APPROACH TO VERIFICATION OF WEB SERVICES

Zhenbang Chen, Ji Wang, Wei Dong, and Zhichang Qi

THE THIRD INTERNATIONAL WORKSHOP ON QUALITY ASSURANCE AND TESTING WEB-BASED APPLICATIONS (QATWBA’06)

A Framework for Service-Oriented Testing of Web Services

Hong Zhu

A Multi-agent Framework for Testing Distributed Systems

Hany F. EL Yamany, Miriam A. M. Capretz, and Luiz F. Capretz

A Framework of Model-Driven Web Application Testing

Nuo Li, Qin-qin Ma, Ji Wu, Mao-zhong Jin, and Chao Liu

TESTABILITY OF SOFTWARE IN SERVICE-ORIENTED ARCHITECTURE

W. T. Tsai, Jerry Gao, Xiao Wei, and Yinong Chen

SECOND INTERNATIONAL WORKSHOP ON TESTING AND QUALITY ASSURANCE FOR COMPONENT-BASED SYSTEMS (TQACBS 2006)

The MORABIT Approach to Runtime Component Testing

Dima Suliman, Barbara Paech, Lars Borner, Colin Atkinson, Daniel Brenner, Matthias Merdes, and Rainer Malaka

Automated Health-Assessment of Software Components using Management Instrumentation

Fariaz Karim and Harish Thanneer

A Practical Approach for Automated Test Case Generation Using Statecharts

Valdivino Santiago, Ana Silvia Martins de Amaral, N. L. Vijaykumar, Maria de Fátima Mattiello-Francisco, Eliane Martins, and Odnei Cuesta Lopes

Quality Assurance of Open Source Components: Integrator Point of View

Pekka Mäki-Asiala and Mari Matinlasisi
Security, Privacy, and Trust for Pervasive Applications (SPTPA 2006)

Security Analysis of RFID Authentication for Pervasive Systems Using Model Checking

Hyun-Seok Kim, Jeong-Hyun Oh, and Jin-Young Choi

Intrusion Detection in Pervasive Networks Based on a Chi-Square Statistic Test

Bo Zhou, Qi Shi, and Madjid Merabti

Property-Based Peer Trust in the Sleeper Service Discovery Protocol

J. Buford, E. Celebi, and P. Frankl

Application of Fuzzy Logic in Federated Trust Management for Pervasive Computing

Zhengping Wu and Alfred C. Weaver

The Third International Workshop on Software Cybernetics (IWSC’06)

A Dynamic Partitioning Approach for GUI Testing

Kai-Yuan Cai, Lei Zhao, and Feng Wang

Automatic Stress and Load Testing for Embedded Systems

Mohamad S. Bayan and Joao W. Cangussu

Early Software Reliability Prediction with Extended ANN Model

Q.P. Hu, Y. S. Dai M. Xie, and S.H. Ng

A New Generalized Particle Dynamics Model For Software Cybernetics

Dianxun Shuai, Bin Zhang, and Cunpai Lu

Self-Organizing Software Processes Based on Particle Dynamics Model

Dianxun Shuai, Bin Zhang, and Cunpai Lu

A Visual Constraint Specifying Approach for Adaptive Software

Qianxiang Wang, Min Li, and Na Meng

A Theory of Software-Mediated Governance

Jay S. Bayne

Self-Metamorphic-Testing Components

Sami Beydeda

Discovery and Scoring of Semantic Web Services Based on Client Requirement(s) Through a Semantic Search Agent

Duygu Çelik and Atilla Elçi

Consensus Ontology Generation in a Socially Interacting Multi Agent System

Ergun Biçici

Entanglement Partitioning of Quantum Particles for Data Clustering

Dianxun Shuai, Bin Zhang, and Cunpai Lu

MSC: A Semantic Ranking for Hitting Results of Matchmaking of Services

Xian Shen, Xin Jin, Rongfang Bie, and Yunchuan Sun
Model-Driven Agile Development of Reactive Multi-agent Systems .......................................................... 297
James Kirby Jr.

Understanding Requirements: Aspect Oriented Software Development ......................................................... 303
Deepak Dahiya and Rajinder K. Sachdeva

An Improved Free-Roaming Mobile Agent Security Protocol against Colluded Truncation Attacks ................................................................. 309
Darren Xu, Lein Ham, Mayur Narasimhan, and Junzhou Luo

Secure e-Payment Using Multi-agent Architecture ......................................................................................... 315
Mihamed M. Kouta, Mohammed M. Abou Riszka, and Ahmed M. Elmisery

An Agent-Oriented Logic for Belief and Trust ............................................................................................... 321
Stanislav Ustymenko and Daniel G. Schwartz

Mine Detection and Route Planning in Military Warfare Using Multi Agent Based System .......................... 327
Kashif Zafar, Shahzad Badar Qazi, and A. Rauf Baig

Agent-Based Offline Electronic Voting .......................................................................................................... 333
Mehmet Tahir Sandikkaya and Bulent Orencik

PH-D Papers

A Control-Theoretic Aid to Managing the Construction Phase in Incremental Software Development (Extended Abstract) ................................................. 341
Scott D. Miller

Information Privacy Management in Smart Home Environments: Modeling, Verification and Implementation ................................................................. 344
Ryan Babbitt

Intrusion Detection Techniques in Wireless Ad hoc Networks ........................................................................ 347
Xia Wang

Paskom Champrasert and Junichi Suzuki

A Domain Specific Modeling Framework for Secure Network Applications .................................................. 353
Hiroshi Wada and Junichi Suzuki

A General Purpose Framework for Wireless Sensor Network Applications ....................................................... 356
Ayman Z. Faza and Sahra Sedigh-Ali

QoS-Based Service Composition ...................................................................................................................... 359
Jinchun Xia

Can the Genetic Algorithm Be a Good Tool for Software Engineering Searching Problems? ......................... 362
Hsinyi Jiang
Technical Solution to Automate Smoke Test Using Rational Functional Tester and Virtualization Technology .................................................. 367
Nai Yan Zhao and Mi Wan Shum

Identifying and Testing for Insecure Paths in Cryptographic Protocol Implementations ................................................................. 368
K. R. Jayaram

A Continuous Improvement Model in ImPProS .................................. 370
Sandro Ronaldo Bezerra Oliveira and Alexandre Marcos Lins de Vasconcelos

Building a UML Profile for On-Chip Distributed Platforms .................. 372
Tuomas Lindroth, Raicea Lavinia, Tiberiu Seceleanu, Nastooh Avessta, and Jukka Teuhola

Dynamic Object Viewers for Java ................................................... 374
James H. Cross II, T. Dean Hendrix, Larry A. Barowski, and Jhilmil Jain

Autonomous Real-Time Monitoring of Hydrological Environments .......... 376
John R. Koch and Thomas V. Freiberger

An Autonomous and Adaptable Wireless Device for Flood Monitoring .......... 378
Valerio Plessi, Filippo Bastianini, and Sahra Sedigh-Ali

Author Index ............................................................................. 380
