CONTENTS

Preface xi
Executive Committee xii
Session Chairs xiii
International Committee xiv

1 Design and Planning of Underground Projects I

Challenges and Solutions to Designing Deep Excavations for Urban Transit Stations • Andrew H. Liu, Ching-Liu Wu, John Hawley, James Chai .................................................................................................................. 2

Cracking the Code—Assessing Implementation in the United States of the Codes of Practice for Risk Management of Tunnel Works • Robert J. F. Goodfellow, Terry W. Mellors .......................................................... 12

NATM Design for Stanford LINAC Coherent Light Source Tunnels • Irwan Halim, Frederick (Rick) Vincent, Jonathan Taylor ..................... 21

New York Subway Stations and Crossover Cavem—Update on Initial Support Design • Dru Desai, Hannes Lagger, Charles Stone .......... 32

Risk Management in Action—Controlling Difficult Ground by Innovation • A. Moergeli .................................................................................................................. 44

Tunneling Alternatives for Subway Connection in Downtown Chicago • V. Nasri, A. Ayoubian ...................................................................................... 56

2 Design and Planning of Underground Projects II

Designing to Protect Adjacent Structures During Tunneling in an Urban Environment • Marco D. Boscardin, Paul A. Roy, Andy J. Miller, Kevin J. DiRocco .............................................................................................................. 70

Groundwater Control for Two-Pass Soft Ground Tunneling • Cary Hirner, David Stacey, William A. Rochford .................................................. 80

New Crystal Springs Bypass (Polhemus) Tunnel—Design Challenges • Roy C. Fedotoff, Gregg Sherry, Jon Hurt, Gilbert Tang ................... 91

Outline Design and Construction of the 10 km (6.25 mile) Croydon Cable (High Voltage) Tunnel Through Groundwater Source Protection Zones, United Kingdom • Colin Rawlings, David Keeble, John Mathews, Christopher Darton, Peter Townsend, Maria Karakitsiou, Russell Bowler, Scott Sadler, Simon Pepper ................................................................. 117
Tunnel Interaction: Hydraulic, Mechanical, and Hydromechanical Approach • Sungmoon Choi, Kyle R. Ott, Arne Fareth, John Kinneen, Edward S. Barboe .......................................................... 137

3 Difficult Ground Conditions I

Excavation and Support of a Water Tunnel Through the Hayward Fault Zone • Sarah Holtz Wilson, David F. Tsztoo, Carl R. Handford, Kenneth Rossi .......................................................... 148

Forensics of Difficult Ground Conditions Leading to Advanced Solutions for Recovery of an Abandoned Tunnel Project • Faruk Oksuz, Phillip L. Covell, Martin Doll ......................................... 160

Gas Mitigation in the Mill Creek Tunnel • M. Schafer, R. Pintabona, B. Lukajic, M. Kritzer, S. Janosko, R. Switalski .......................................................... 168

Inner City Slurry Tunneling—Project ASDAM, Antwerp, Belgium • Klaus Rieker .......................................................... 176

The Sir Adam Beck II Intake Tunnels—Homage to the Builders • David Heath, Clair Murdock .......................................................... 185

Support of the Leipzig City—Tunnel Extension Using a Tie-Back Supported Freeze Wall • Helmut Hass, Michael B. Gilbert .......................................................... 197

4 Difficult Ground Conditions II

Design and Construction Service Tunnels on Palm Jumeirah Island • Michael Ryjevski, Ben Hayes .......................................................... 208

EPB Tunnel Boring Machine Design for Boulder Conditions • Michael A. DiPonio, David Chapman, Craig Bournes .......................................................... 215

Piercing the Mountain and Overcoming Difficult Ground and Water Conditions with Two Hybrid Hard Rock TBMs • Brian Fulcher, John Bednarski, Michael Bell, Shimi Tzobery, Werner Burger .......................................................... 229

Practical Consequences of the Time-Dependency of Ground Behavior for Tunneling • George Anagnostou .......................................................... 255

Tunneling Through Faults in Volcanic Rocks for the Construction of the La Joya Project (Costa Rica) • R. Grandori, L. Pellegrini .......................................................... 266

Tunneling Through Mountain Faults • Don W. Deere .......................................................... 280

5 Focus on Canada

Design/Build Agreement for the Niagara Tunnel Project • John Tail, Russel Delmar, Harry Charalambu, Rick Everdell .......................................................... 288

Environmental Assessment Study for Extension of Spadina Subway in Toronto • Veya Nasri, Scott Thorburn .......................................................... 300

Niagara Tunnel Project • Doug Harding .......................................................... 312
6 Geotechnical and Ground Improvements

Beacon Hill Station Dewatering Wells and Jet Grouting Program • Zephaniah Varley, Richard Martin, Red Robinson, Paul Schmall, Dominic Parmantier .......................................................... 346

Ground Freezing Under the Most Adverse Conditions: Moving Groundwater • Paul C. Schmall, Arthur B. Corwin, Lucian P. Spiteri .......... 360

Innovative Retaining Wall with Jet Grout for New Metro Tunnel Underneath Amsterdam Central Station • B.J. Schat, A.W.O. Bots, O.S. Langhorst .......................................................... 369

Monitoring Used as an Alarm System in Tunneling • G. Borgonovo, A. Contini, L. Locatelli, M. Perolo, E. Ramelli ................................................. 381

Pre-Excavation Grouting Through Water-Bearing Zone Under High Pressure Under Extreme Flow Conditions • Robert Fu, Adam Shang, Alex Naudts ................................................................. 396

7 Innovations in Underground Construction

Alternative Contracting Methods • John Reilly ........................................... 418

Evaluating Ground Conditions Ahead of a TBM Using Probe Drill Data • Steven K. Duke, Jay Arabshahi .................................................................. 430

Evaluation of Geological Conditions Ahead of TBM Using Seismic Reflector Tracing and TBM Driving Data • Takuji Yamamoto, Suguru Shirasagi, Koji Murakami, Jozef Descour ........................................ 442

Guidance for Partial Face Excavation Machines • Nod Clarke-Hackston, Jochen Belz, Allan Henneker ................................................................. 457

Innovations in Underground Communication Infrastructures • Darrell Gillis .................................................................................................. 466

Los Angeles Metro Gold Line Eastside Extension—Tunnel Construction Case History • Brett Robinson, Christophe Bragard .................................. 472

8 Mega Projects

Designing the Alaskan Way Tunnel to Withstand a 2,500-Year Earthquake • Celal Kirandag, James R. Struthers, Gordon T. Clark .............. 496
Kárahnjúkar Hydroelectric Project, Iceland Extreme Underground Construction • Johann Kröyer, Bernhard Leist, Holger Evers, William D. Leech .......................................................... 507

The Kensico-City Tunnel Will Add Reliability to New York City's Water Supply System • Kevin Clarke, Eric Cole, Heather M. Ivory, Verya Nasri, 520

Tunneling for the Eastlink Project, Melbourne, Australia • Harry R. Asche, Edmund G. Taylor, P. Scott Smith, Peter Campi, Ian P. Callow .................................................. 534

Water Tunnel in Liaoning Province, Northeast China • I. Michael Gowring, Zhong Gang, Chen Yong Zhang, Li Jiuping ............ 551

9 New and Future Projects I

The Dulles Corridor Metrorail Project—Extension to Dulles International Airport and Its Tunneling Aspects • J. Rudolf, V. Gall .................................................. 564

Durban Harbour Tunnel—First Use of a Slurry Tunnel Boring Machine in South Africa • J. Andrew Hindmarch, A.L. Griffiths, Andrew K. Officer, Gert Wittneben ............................................................................. 579

Joint Water Pollution Control Plant Tunnel and Ocean Outfall Project • Steve Dubnewych, Jon Kaneshiro, Calvin Jin .................................................. 594

New York City's Harbor Siphons Water Tunnel • Michael S. Schultz, Colin Lawrence ........................................................................................................ 605

Preliminary Design of the Caldecott Fourth Bore • Bhaskar B. Thapa, Michael T. McRae, Johannes V. Greunen .................................................. 616

Upper Rouge Tunnel CSO Control • Wern-ping Chen, Mirza M. Rabaig, Robert Barbour, Jean Habimana, Jinyuan Liu .................................................. 627

10 New and Future Projects II

The DC WASA Anacostia River CSO Control Tunnel Project • Larry Williamson, Leonard R. Benson, David C. Girard, Ronald E. Bizzarri ............................................................................. 638

The Lake Mead Intake 3 Water Tunnel and Pumping Station, Las Vegas, Nevada, USA • Michael Feroz, Marcus Jensen, James E. Lindell .................................................. 647

Moving Forward on New York's Second Avenue Subway • Anil Parikh, Geoffrey Fosbrook, Donald Phillips, David Caiden, Jon Hurt, Jaidev Sankar ............................................................................. 663

Planning and Design of the A3 Hindhead Tunnel, Surrey, United Kingdom • Tom Ireland, Tony Rock ............................................................................. 673

Planning and Design of the Bay Tunnel • R. John Caulfield, Victor S. Romero, Johanna I. Wong .................................................. 685
Rock Engineering Aspects of Designing Large-Span Caverns at Depth in the Deep Underground Science and Engineering Laboratory • C. Laughton ........................................... 694

11 Pressurized Face Tunneling I

The Big Walnut—A Planned Approach • Steve Skelhorn, Tom Szaraz ...... 704

Construction of the Big Walnut Augmentation/Rickenbacker Interceptor Tunnel (BWARI, Part 1) —Columbus, Ohio • Jeremy P. Theys, Mina M. Shinouda, Gary W. Gilbert, Glen D. Frank ......... 712

Construction of the Sacramento River Tunnels on the Lower Northwest Interceptor Sewer, Sacramento, California • Tolga Togan, Dan Martz, Wally Chen, Matthew Crow, David Young, Bill Moler, Steve Norris ............... 741

Factors in the Variability of Measured Surface Settlements over EPB Driven Tunnels in Soft Clay • J.N. Shirlaw, S. Boone ......................... 757

The Madrid Renewal Inner Ring Calle 30 with the Largest EPB Machines—Planning and Results • Enrique Fernandez ......................... 769

12 Pressurized Face Tunneling II

Design Principles for Soft Ground Cutterheads • Werner Burger .......... 784

Driving the Twin Bore Running Tunnels by Earth Pressure Balance Machine on the Sound Transit C-710 Beacon Hill Station and Tunnels Project • Steve Redmond, Chris Tattersall, Nestor Garavelli, Tomyuki Kudo, Peter Raleigh, Michael J. Lehnen ......................... 793

Planning and Construction of the Metro Gold Line Eastside Extension Tunnels, Los Angeles, California • Eli Choueiry, Amanda Elioff, Jim Richards, Brett Robinson ........................................ 808

Slurry Shield Tunneling in Portland—West Side CSO Tunnel Project • James A. McDonald, James J. Kabat ........................................ 830

Soft Ground Tunneling Issues Handled by Partnering—A Win-Win Project in Rancho Cordova, California • Tom Martin, Lysa Voight, John Forero, Jack Magloto ........................................ 843

Soil Deformation Analysis During TBM Excavation: Comparing Three Different TBM Technologies Used During the Construction of the Toulouse Metro Line B • Jacques Robert, Emillie Vanoudheusden, Fabrice Emeriault, Richard Kastner ................................. 852

13 Rock Tunneling Project Case Histories

Construction of the Powerhouse Cavern for the Pumped Storage Scheme Kops II in Austria • Helmut Westermayr, Michael Tergl ............ 870

Design-Build of the Lake Hodges to Olivenhain Pipeline Tunnel and Shaft • M. Luis Piek, Jon Y. Kaneshiro, Sean A. Menge, Brian Barker ....... 882
Elm Road Generating Station Water Intake Tunnel • Jon Isaacson, Brendan Reilly, Paul McDermott ................................................................. 889

An Innovative Approach to Tunneling in the Swelling Queenston Formation of Southern Ontario • Michael Hughes, Paul Bonapace, Stephen Rigbey, Harry Charalambu ................................................................. 901

Urban Blasting Essential to Schedule-Driven West Area CSO Tunnel and Pumping Station Project • John MacGregor, James McNally, Adam Stremcha ........................................................................................................ 913

14 Sequential Excavation Methods

Construction of a Mixed Face Reach Through Granitic Rocks and Conglomerate • Michael A. Krulc, John J. Murray, Michael T. McRae, Kathy L. Schuler ........................................................................................................ 928

Construction of the C710 Beacon Hill Station Using SEM in Seattle—“Every Chapter in the Book...” • Satoshi Akai, Mike Murray, Steve Redmond, Richard Sage, Rohit Shetty, Gerald Skalla, Zephaniah Varley ........................................................................................................ 943

Evaluation of Large Tunnels in Poor Ground—Alternative Tunnel Concepts for the Transbay Downtown Rail Extension Project • Steve Klein, David Hopkins, Bradford Townsend, Derek Penrice, Ed Sum ........................................................................................................ 964

Monitoring Successful NATM in Singapore • K. Zeidler, T. Schwind ........ 976

NATM Through Clean Sands—The Michigan Street Experience • Paul H. Madsen, Mohamed A. Younis, Vojtech Gall, Paul J. Headland .... 988

Overcoming Challenges in the Construction of the Dublin Port Tunnel • Peter Jewell, Tim Brick, Stephen Thompson, Simon Morgan ................................................................. 998

15 Shafts and Outfalls—Design and Construction

Construction of Nine Shafts for the Manhattan Section of the New York City Water Tunnel No. 3 • Shemek Oginski, Patrick Finn, Yifan Ding ........................................................................................................ 1012

Development of Slurry Wall Technique and Equipment and CSM Cutter Soil Mixing for Open-Cut Tunnels • W.G. Brunner ........................................................................................................ 1031

Drop Shafts for Narragansett Bay Commission CSO Abatement Program, Providence, Rhode Island • Rafael C. Castro, Geoffrey Hughes, Fredrick (Rick) Vincent, Philip H. Albert ........................................................................................................ 1047

Shaft Construction in Toronto Using Slurry Walls • Vince Luongo .......... 1058
16 TBM Case Studies

Construction of the West Area CSO Tunnels and Pumping Station • Ray Hutton, Darrell Liebno, Taro Nonaka ................................................................. 1064

Guadarrama Tunnel Construction with Double Shield TBMs • F. Mendaña .............................................................................................................. 1079

The Relationship Between Tunnel Convergence and Machine Operational Parameters and Chip Size for Double Shield TBMs—A Case History of Ghomroud Water Conveyance Tunnel • Ebrahim Farrokh, Jamal Rostami ........................................................................... 1094

Successful Tunneling for Water Tunnel No. 3, New York City, New York • Thomas P. Kwiatkowski, Joginder S. Bhore, Jose Velez, Christopher D. Orlandi ........................................................................... 1109

TBM Excavability: Prediction and Machine–Rock Interaction • Z.T. Bieniawski, Benjamín Celada, José Miguel Galera .......................................................... 1118

Use of Tunnel Boring Machines at Depth: Extending the Limits • Bruce Downing, Trevor Carter, Richard Beddoes, Allan Moss, Peter Dowden ...................................................................................... 1131

17 Tunnel and Shaft Rehabilitation

Emergency Repairs to Beach Interceptor Tunnel • David Jurich, Joseph N. McDivitt .......................................................................................... 1144

Heartland Corridor Tunnels • Frank P. Frandina, Michael J. Loehr, Paul E. Gabryszak ......................................................................................... 1152

Inspection of a Brick-Lined Aqueduct • Julie Frietas, Fidel L. Mallonga, Arne Fareth, Francis Lo, Paul S. Fisk ........................................................................... 1162

Middle Rouge Parkway Interceptor Extension—A Case History • Harry R. Price, Charles J. Roarty, Jr., Behrooz Tahmasbi ........................................................................... 1172

Rehabilitation of a Brick-Lined Aqueduct • Nikolas Sokol, Taehong Kim, Carl Pannuti, Walter Herrick .................................................................................. 1181

18 Tunnel Lining Technology

Design, Testing, and Production of Steel-Fiber Reinforced Concrete Segmental Tunnel Lining for the East Side Combined Sewer Overflow Tunnel • R.F. Cook, K. Wongaew, J.E. Carlson, C.R. Smith, T. Cleys ................................................................. 1192

Development of Steel-Fiber Reinforced High Fluidity Concrete Segment and Application to Construction • Hiroshi Dobashi, Mitsuro Matsuda, Yoshinari Kondo, Aki Fujii ......................................................................................... 1205

Seismic Response of Precast Tunnel Linings • Gary J.E. Kramer, H. Sedarat, A. Kozak, A. Liu, J. Chai ......................................................................................... 1225

Steel-Fiber Reinforced Self-Compacting Concrete on the San Vicente Aqueduct Tunnel • M.R. King, C.D. Hebert ........................................................................... 1243
Waterproofing of a Subsea Tunnel with a Unique Sprayable Membrane—The Nordøy Road Tunnel, Faroe Islands • Sigurd L. Lamhauge, Karl Gunnar Holter, Svein E. Kristiansen .......................................................... 1252

19 Underground Project Case Studies

Breakthrough Outage at the Second Manapouri Tailrace Tunnel Project, New Zealand • Ken Smales, Ron Fleming, Charlie Watts .............. 1262

Case History of Trenchless Construction at the Lower Northwest Interceptor Program, Sacramento, California • William Moler, Debi Lewis, Matthew Crow, Patrick Doig, Michael Cole, Craig Pyle, Steven Norris .... 1274

Design and Construction of Dulles Airport Tunnels • David P. Field, Allan Sylvester, Diane R. Hirsch, Paul E. Gabryszak ......................... 1286

Portland, Oregon’s Alternative Contract Approach—A Final Summary • Paul Gribbon, Greg Colzani, Julius Strid, Jim McDonald .................. 1297

Index 1321
