# Table of Contents

Chairs' Welcome Message........................................................................................................ ix
Organization................................................................................................................................... x
Program Committee...................................................................................................................... xii
Reviewers..................................................................................................................................... xvii

Robust PCA with Projection Pursuit and Mean Shift Analysis ......................................................... 3  
   Haiyong Chen, Suyun Wang, and Ying Ji

Feedback Linearization Control of a Wire-Driven Parallel Support System in Wind Tunnels ....................... 9  
   Ya-Qing Zheng

Enabling the Web-Based Intelligent Product Design ........................................................................... 14  
   Wei Tann and Heiu-Jou Shaw

A Bankruptcy Liquidation Model ..................................................................................................... 20  
   Ling Li and Feiqi Deng

Neural Network Approach for Multiple Fault Test of Digital Circuit ................................................... 24  
   Pan Zhongliang, Chen Ling, Liu Shouqiang, and Zhang Guangzhao

Decentralized Stabilization of Interconnected Stochastic Nonlinear Systems under a Risk-Sensitive Cost Criterion .................................................................................................................. 30  
   Yunjian Peng and Feiqi Deng

An Optimized Method for Path Planning Based on Artificial Potential Field ........................................ 35  
   Bing Zhang, Wanmi Chen, and Minrui Fei

Anti-Dumping Early-Warning System Based on Neuro-FDT ................................................................ 40  
   Jian-Na Zhao and Zhi-peng Chang

The Relative Grey Relation Closeness Multicriteria Decision Making Method ......................................... 46  
   Feng Kong and Hongyan Liu

An Algorithm of Signal Denoising by Using Wavelet Analysis ............................................................ 51  
   Dongming Chen, Zhiliang Zhu, and Guiran Chang

</table>
Robust Stabilization of Wheeled Mobile Robots Moving on Uncertain Uneven Surface .................................................. 126
Xiaocai Zhu, Guohua Dong, Dewen Hu, and Zixing Cai

Interactive Genetic Algorithms Based on Estimation of the User's Most Satisfactory Individuals .................................................. 132
Guo-Sheng Hao, Dun-wei Gong, and Yong-Qing Huang

Real-time Truckload Fleet Assignment and Scheduling Problem .................................................. 138
Changfeng Zhou, Yuejin Tan, Liangcai Liao, and Yan Liu

JADE-Based A-Team as a Tool for Implementing Population-Based Algorithms .................................................. 144
Dariusz Barbucha, Ireneusz Czarnowski, Piotr Jedrzejowicz, Ewa Ratajczak and Iza Wierzbowska

Enhancing 3D Face Recognition by Mimics Segmentation .................................................. 150
Boulbaba Ben Amor, Mohsen Ardabilian, and Liming Chen

On Multivariable Neural Network Decoupling Control System .................................................. 156
Weimin Yang and Dongmei Lv

Adaptive Synchronization of Coupled FitzHugh-Nagumo Systems .................................................. 161
Shukai Duan and Xiaofeng Liao

Robust Scheduling with Recourse for Batch Processes under Uncertainty .................................................. 166
Ran Ding, Qiqiang Li, Qingqiang Guo, and Yongchao Gao

Framework of Multi-agent Based Intelligent Control System for Ethylene Rectifier .................................................. 172
Huai-zhong Chen

Reinforcement Learning with Hierarchical Decision-Making .................................................. 177
Shahar Cohen, Oded Maimon and Evgeni Khmelnitsky

Development of a Novel Optical Fiber Coupler .................................................. 183
Shuai Ci-jun, Duan Ji-an, and Zhong Jue

A New Intelligence Dynamic Heat Meter .................................................. 187
Fang Lide, Zhang Wanling, Li Jinhai, and Zhu Aimin

Study on Dynamic Heat Measurement Method after Step Change of System’s Flux .................................................. 192
Li Xiaoting and Fang Lide
Experimental Study of Vehicle Modelling and Ride Comfort Simulation
Based on the Topology Structure Analyzing ............................................................. 197
   Cang-su Xu, Hong-hui Yi, and Cheng-xiu Huang

A Self-Coordination Multimode Control System Based on On-Line
Genetic Optimization ............................................................................................... 202
   Qingwu Fan, Pu Wang, Huiqing Zhang, and Junqian Liu

A Multicast Routing Algorithm Based on Improved Annealing Mechanics
in Transiently Chaotic Neural Network .................................................................. 207
   Guangbin Bao, Zhanting Yuan, Jian Song, Yong Yu, and Xinming Xie

Apply Single-Band Brightness Variance Ratio to the Interference Dissociation
of Cloud from Satellite Date .................................................................................. 211
   Qu Wei-ping, Liu Wen-qing, Liu Jian-guo, Lu Yi-huai, Zhu Jun,
   Qin Min, and Liu Cheng

Research of the Path Planning Complexity for Autonomous Mobile
Robot under Dynamic Environments ........................................................................ 216
   Hongyan Shi, Xiaoming Sun, Changzhi Sun, Dongyang Chen, and Yuejun An

The Research on Optimal Green Time Control Scheme for Intersection Groups ........ 220
   Wei Cheng, Xiaolan Liu, and Yueming Chen

Age Classification Using Fuzzy Lattice Neural Network ........................................ 225
   D. Kalamani and P. Balasubramanie

A RBF Neural Network Algorithm for Blind Source Separation of Linear
Mixing Signals ........................................................................................................ 231
   Yongman Lin and Tusheng Lin

Author Index ............................................................................................................. 236
