# Table of Contents

Strategic Games on Defense Trees ................................................. 1  
*Stefano Bistarelli, Marco Dall’Aglio, and Pamela Peretti*

Timed Calculus of Cryptographic Communication .......................... 16  
*Johannes Borgström, Olga Grinchtsein, and Simon Kramer*

A Semantic Paradigm for Component-Based Specification Integrating a Notion of Security Risk ................................................. 31  
*Gyrd Brændeland and Ketil Stølen*

Game-Based Criterion Partition Applied to Computational Soundness of Adaptive Security ...................................................... 47  
*M. Daubignard, R. Janvier, Y. Lakhnech, and L. Mazaré*

Measuring Anonymity with Relative Entropy .................................. 65  
*Yuxin Deng, Jun Pang, and Peng Wu*

Formalizing and Analyzing Sender Invariance ............................... 80  
*Paul Hankes Drielsma, Sebastian Mödersheim, Luca Viganò, and David Basin*

From Simulations to Theorems: A Position Paper on Research in the Field of Computational Trust ............................................. 96  
*Karl Krukow and Mogens Nielsen*

A Tool for the Synthesis of Controller Programs ............................ 112  
*Ilaria Matteucci*

Where Can an Insider Attack? ..................................................... 127  
*Christian W. Probst, René Rydhoft Hansen, and Flemming Nielson*

Maintaining Information Flow Security Under Refinement and Transformation ................................................................. 143  
*Fredrik Seehusen and Ketil Stølen*

A Classification of Delegation Schemes for Attribute Authority ...... 158  
*Ludwig Seitz, Erik Rissanen, and Babak Sadighi*

Program Partitioning Using Dynamic Trust Models ........................ 170  
*Dan Søndergaard, Christian W. Probst, Christian Damsgaard Jensen, and René Rydhoft Hansen*

Locality-Based Security Policies .................................................. 185  
*Terkel K. Tolstrup, Flemming Nielson, and René Rydhoft Hansen*
A Theorem-Proving Approach to Verification of Fair Non-repudiation
Kun Wei and James Heather

A Formal Specification of the MIDP 2.0 Security Model
Santiago Zanella Béguelin, Gustavo Betarte, and Carlos Luna

A Comparison of Semantic Models for Noninterference
Ron van der Meyden and Chenyi Zhang

Hiding Information in Multi Level Security Systems
Danièle Beauquier and Ruggero Lanotte

A New Trust Model Based on Advanced D-S Evidence Theory for P2P Networks
Chunqi Tian, Shihong Zou, Wendong Wang, and Shiduan Cheng

Author Index
