5th ICEG ENVIRONMENTAL GEOTECHNICS

Opportunities, Challenges and Responsibilities for Environmental Geotechnics

Volume I

Edited by Professor H. R. Thomas

Proceedings of the ISSMGE’s fifth international congress organized by the Geoenvironmental Research Centre, Cardiff University and held at Cardiff City Hall on 26–30th June 2006
Contents

Keynote Lecture
Persistent Organic Pollution: Sustainable Solutions
M. Eisa

Feature Lecture
A survey of lethal failures in municipal solid waste dumps and landfills
G. Blight

Some Factors affecting Geosynthetics used for Geoenvironmental Applications
R. Kerry Rowe

The Use of Waste Materials in Construction – Progress Made and Challenges for the Future
M. Head

Chapter 1 – Remediation
The use of carbide lime and portland cement on the encapsulation of a soil contaminated by diesel oil
R. C. Caberlon, A. Knop, L. Festugato, K. S. Heineck and N. C. Consoli

In-situ treatment of landfill leachate using bentonite and polyurethane with soils
H. Chae, C. Park, J. W. Park, B. S. Chun and W. Shin

Bauxsol™ based barriers for the treatment of metal contaminated ground waters
M. W. Clark, L. Munro, A. J. F. Samed, D. M. McConchie and D. Best

Strength, permeability, and compatibility of slag-cement-bentonite slurry wall mixtures for constructing vertical barriers
J. C. Evans and S. M. Opdyke

Efficacy of electrolytic generation and transport of oxygen for soil remediation
H. Fadlalla and A. N. Alshawabkeh

Performance of a cement-bentonite cut-off wall in an acidic sulphate environment
E. Fratalocchi, E. Pasqualini and P. Balboni

Hydraulic, sorption and resistivity characteristics of zeolite-sand mixtures for PRBs
J. Fronczyk, K. Garbulewski and M. Lech

Ultrasonic cleaning of clogged geosynthetic drain
C. Ghosh, K. Yasuhara, H. Komine, T. Konami and Y. Kudo

Delivery of carbon substrates for in-situ bioremediation of chlorinated solvents using jet nebuliser and ultrasonic humidifier technology
N. Glew, M. Dyer and P. Sentenac

Effective design of permeable reactive barriers for contaminated groundwater remediation
H. Ishimori, T. Katsumi and R. Fukagawa

A model experiment to verify the use of freezing for collection of DNAPLs from the deep underground
Y. Ito, M. Kamon, K. Nit and K. Aramoto

An integrated in-situ remediation technology for heavy metal contaminated soils using EKG
D. Kalumba and S. Glendinning
Solidification of lead contaminated residual soil  
A. T. Abd Karim, M. R. bin Taha and A. A. Abd Latiff  

Assessment of remediation efficiency of the old landfill on modelling and monitoring research  
E. Kodo, E. Wienclaw and T. Kolanka  

Reclamation of sedimented and consolidated fly deposits  
M. R. Madhav, M. R. Sekhar, A. J. Puppala and A. Ghosh  

Remediation of mercury contaminated groundwater using a permeable reactive barrier  
M. de Melo Mata Nobre, R. Cunha Mata Nobre and A. S. Souza Galvão  

The effectiveness of quicklime-based stabilization/solidification (S/S) on lead (Pb) contaminated soils  
D. H. Moon, D. Dermatas and D. G. Grubb  

Semi-pilot scale feasibility test of sulfur-based bio-barrier system and effect of alkalinity sources on autotrophic denitrification  
H. S. Moon, K. Nam and J. Y. Kim  

In-situ capping of contaminated soft seabed sediments in a Norwegian fjord  
F. Myrvoll, K. Naes, E. Eek and J. K. Holme  

Experimental study on washing of coal fly ashes by water with carbon dioxide, washing effect of chromium(VI) and boron  
S. Nolmo, H. Komine, K. Yasuhara, S. Murakami and T. Ito  

Alternative uses of partitioning interwell tracer tests for DNAPL source zone characterisation  
J. W. E. Page and K. Soga  

pH effect on sorption of Cr (VI) onto clayey soils  
N. D. Pandey, Vibhawari, R. K. Srivastava and V. Agarwal  

Mathematics of the Transformation of Oil Pollution in the Aeration Zone  
G. N. Pavlik, E. D. Pavlik  

Integrated electrochemical remediation of mixed contaminants in subsurface  
K. R. Reddy and M. R. Karri  

Electrokinetic behaviour of two clayey soils on laboratory experiments  
C. A. B. Schmidt, M. S. S. Almeida and M. C. Barbosa  

Remediation of heavy metal contaminated soils using PVDs  
E. C. Shin, J. J. Park and B. M. Das  

Assessment and remediation of soils contaminated with gasoline  

Applicability of in-situ hybrid electrokinetic remediation technologies on lead-contaminated ‘clay’ shooting range  
K. Soo-Sam, H. Sang-Jae, K. Min-Soo and K. Ki-Nyun  

Remediation Technology Costs in the UK & Europe; Drivers and Changes from 2001 to 2005  
M. Summersgill  

Suitability of residual soil for biodegradation of cyanide  
M. R. Taha, N. N. N. Daud and W. N. Merican
Effect of biological transformation of additives on the efficiency of electrokinetic and hydraulic injection in soil
X. Wu, A. N. Alshawabkeh, D. Gent and J. Davis

Remedial alternatives for the sanitary landfill Poços de caldas city (state of Minas Gerais Brazil)
L. V. Zuquete, J. B. Palma and O. J. Pejan

Chapter 2 – Testing and monitoring
Assessment of metals sorption in the permeable reactive barrier of the leachate treatment system of Muribeca landfill, Recife, Brazil
M. C. M. Alves, K. G. Q. Beltrão and J. F. T. Jucá

Centrifuge tests to evaluate effects of pile construction on post closure landfill sites with geological barrier
B. L. Amatya, J. Takemura, M. R. A. Khan, O. Kusakabe

Displacement records in the frontal slope of a municipal solid waste landfill
J. A. Barco, J. Cañizal, A. D. Costa, C. Sagaseta, J. H. Palma

Geophysical investigations and temporal monitoring at active and disused landfill sites in South Wales
P. J. Brabham, A. George and C. Harris

Effect of poor distribution of needle punched fibres on gas permeability of GCLs
A. Bouazza and T. Vangpaisal

Effectiveness of rolling dynamic compaction on an old waste tip
A. Bouazza and T. Vangpaisal

Compressibility and microstructure of cement-based treated sediment
M. Boutoulil and B. Réékil

Durability of polypropylene geotextiles exposed to artificial weathering conditions
J. R. Carneiro, P. J. Almeida and M. L. Lopes

Geotechnical studies of soils from an evaporite environment in Israel
J. Charrach, I. Goretsky and S. Frydman

Geotechnical characterization of permeable barriers mixture of sand, loess and bentonite
B. S. Chun, J. W. Park, Y. J. Lee and B. H. Kim

A field and numeric analysis on solid waste sanitary landfill settlements.
S. M. A. Della Bianca, L. M. A. Della Bianca and P. S. N. Murrieta

An assessment of Ariake clay for its potential use as a landfill barrier
Y. J. Du, S. Y. Liu and S. Hayashi

Geoenvironmental characterization of dredged sediments as alternative materials for covers
G. di Emidio and P. O. van Impe

Experimental study on the compaction of waste
A. Fakher

Resistivity piezocone for geo-environmental site characterization: Two case histories from Brazil
H. L. Giacheti, A. S. P. Peixoto, G. Mondelli and G. de Mio
Solid waste compressibility and settlements in sanitary landfills
M. Grisolia and Q. Napoleoni

Variation in borehole gas concentrations during long-term monitoring in Cardiff, South Wales, UK
C. Harris and M. Turner

Validating 3-D numerical models of rock fracture with laboratory and field scale studies
J. R. Haycox, W. S. Pettitt, D. S. Collins and R. P. Young

Monitoring of geosynthetics long-term behaviour in landfill sealing systems
G. Heerten

Permeability considerations of the minor aquifers associated with the London Clay Formation (Palaeogene) of south Hampshire
W. G. H. Hodges, M. Woodruff and G. R. J. Browning

Centrifuge Modeling and Numerical Simulation of Soil Contamination and Remediation
L. Hu, Z. Wu and W. Xing

Application of electrical properties in monitoring the performance of containment barrier
Y. S. Kim, D. J. Yoo, M. H. Oh and J. Park

Development of an in-situ testing device for hydraulic conductivity measurement in sands
T. Kobayashi, H. Ochiai, N. Yasufuku, K. Omine, M. Kajiki and T. Katsumi

Quality acceptance testing of GCLs for landfill application
Z. B. Kovacevi, D. Kovai, L. Matei and B. Velikovi

An experimental study of cracking mechanisms in drying soils
M. R. Lakshmikantha, P. C. Prat and A. Ledesma

Assessing the Effectiveness of Landfill Remediation and Restoration at a Closed Landfill Site: Nantygwyddon Landfill Site, South Wales
S. Ling and C. Harris

The use of the ground penetrating radar, GPR, in environmental non intrusive diagnostic and monitoring tasks
S. L. Machado, M. A. B. Botelho, N. S. Amparo and T. C. Dourado

Vacuum And Surcharge Combined Three-Dimensional Consolidation Of Soft Clayey Soils
A. H. A. Mahfouz, L. Han-long, G. Yufeng and L. Tongchun

Effect of pore fluid chemistry on strain-softening behavior of reconstituted plastic clay
A. Man, J. Graham and J. van Gulck,

Thermo-Hydro-Mechanical Instrumentation in a Long-Term Large-Scale Buffer Material Test: Mock-Up Experiment at CIEMAT
P. L. Martin, J. M. Barcala and M. Garcia-Gutiérrez

Dynamic compaction improvement in a MSW and in an inert waste landfills
T. Mateos

Influence of compaction in the hydraulic conductivity and in the mobility of heavy metals in a gneissic residual soil

Effect of salt solution on the permeability of the mixtures of soil and bentonite
M. Ohtsubo, M. A. Kumar, L. Li and T. Higashi
Compatibility of compacted lateritic soil with municipal solid waste leachate
K. J. Osinubi and C. M. D. Nwaiwu

Measurement of gas diffusion in soils

Biological clogging of geotextile filters
A. F. N. Remigio and A. M. Palmeiro

Mechanical properties and bearing capacity of incineration bottom ash from MSW
K. Sato and M. C. R. Davies

The Influence of water-miscible solvents on the permeability of clay
P. Sentenac, R. J. Lynch, M. D. Bolton and R. N. Taylor

Geotechnical properties of cohesive soil acidified by pyrite inclusion
H. Shigematsu, S. Higashi and M. Nozawa

Improving the properties of swelling soils by rice husk ash (RHA) additives
M. Soliman and M. Hussein

Metal retention capacity of a saprolitic silty soil derived from gneiss
M. M. Stuermer, M. E. G. Boscov, E. Oliveira and L. G. F. de Mello

Leaching column tests on arsenic-soil interactions
B. K. Tan, R. N. Yong and H. R. Thomas

Carbonate buffer system in a compacted clay
S. Teachavorasinskun and K. Sakulsrijirawat

Chapter 3 – Barrier design including nuclear waste disposal
Cost reduction of diaphragm wall excavation using air foam and case record
H. Akagi, Y. Kondo, T. Nakayama and H. Naoe

An experimental study of moisture movement due to thermal and thermo-hydraulic gradients in clays
P. J. Cleall, R. M. Singh, N. Y. Do and H. R. Thomas

Leachate containment in quarry landfills
J. W. Cowland, A. Bouazza and M. A. Sadlier

Use of randomly reinforced soils in barrier systems
G. J. Fowmes, N. Dixon and D. R. V. Jones

Coupled THMC analysis of a clay-based engineered barrier for nuclear waste disposal
L. do N. Guimarães, A. M. Fernández, A. Gens and M. Sanchez

New type of hydraulic cutoff walls in coastal landfill sites from H-jointed steel pipe sheet piles and H-H joint
S. Inazumi, M. Kimura, Y. Nishiyama, K. Yamamura, H. Tamura and M. Kamon

Hydraulic performance of soil-bentonite mixture barrier
M. Kamon, T. Katsumi, T. Inui, Y. Ogawa and S. Araki

Designing method of bentonite based buffer materials for HLW-disposal from the viewpoint of self-sealing
H. Komine
Evaluating the permeability of an organically modified bentonite to natural seawater
F. Mazzieri and E. Pasqualini

Application of the cement treated clay with adding tire-chips to sealing materials of
costal waste disposal site
Y. Mitarai, K. Yasuhara, Y. Kikuchi and A. K. Karmokar

Monitoring the rock barrier around a deep repository using scaled seismic studies
W. S. Pettitt, J. R. Haycox and R. P. Young

Influence of injection rate on injectability properties of a cement grout in a sand
Z. Saada, J. Canon and J. C. Dupla

On the inclusion of geochemical effects in coupled processes in soils
S. C. Seetharam, P. J. Cleall and H. R. Thomas

Incorporating probability of liner failure and restoration costs when evaluating landfill
liner designs and monitoring procedures
E. Skylakis, M. Pantazidou and C. Tsatsanifos

The effect of compaction on bulk permeability of stiff clay and mudrock field experience
from embankment dams
P. R. Vaughan, J. Standing and L. Zdravkovich

Deformation behaviour of compacted soil liners in a geocentrifuge
B. V. S. Viswanadham and S. S. Sengupta

Tensile strength of compacted clays as part of the crack prediction of Clay Liners in
Landfills
R. M. Zeh, K. J. Witt

Chapter 4 – Mine Sites, Tailing Dams, Sludge Ponds, and Underwater Geoenvironmental Issues
Investigations of layered cover systems acting as oxygen barriers to limit acid mine
drainage
M. Aubertin, J. Molson, B. Bussière, A.-M. Dagenais

Determination of slimes consolidation parameters from instrumented column
measurements
F. Bourgeois, G. Le Bras and A. Alexis

Environmental and geotechnical problems of Albania’s mine sites
L. Bozo, Y. Muceku and K. Cela

Geotechnical assessment of the Mejita tailing dam (Dom. Rep.) in karstic and seismic
context
D. Cazaux, J. G. Alameda, J. Garcia Tascón, R. O. De León, A. Carbó and O. López

Back analysis of Crown Hole development using numerical techniques
O. Davies, M. Rouainia and C. J. F. P. Jones

Treatment of sewage sludge using electrokinetic geosynthetics
S. Glendinning and J. Lamont-Black

Dewatering of tailings using electrokinetic geosynthetics (EKG)
S. Glendinning, J. Lamont-Black and A. Fourie

Water management simulation around tailings impoundments
A. G. Guézennec, S. Lachapelle, Y. Ménard, A. Burnol and F. Bourgeois
Slope stability analysis for plane failure model under the influence of a tension crack
Haswanto and A. Ghani Rafek

Modeling bioremediation of acid mine drainage using permeable reactive barriers
P. S. Hemsi, C. D. Shackelford and L. A. Figueroa

Ferrite formation using precipitates in the treatment of acid mine drainage for reducing its volume
T. Igarashi, T. Yoshida, K. Asakura, H. Miyamae, N. Iyatomi and K. Hashimoto

Basic requirements on the capping system of the uranium mine tailings
E. Kolarova and I. Vanicek

The water balance of the BF4 uranium waste pile, Poços de Caldas, Brazil, as a contribution for future remediation projects
A. L. Leite, J. R. T. Fagundes and C. E. F. de Mello

Geotechnical aspects of peat dams on bog land
G. P. McInerney, B. C. O'Kelly and P. M. Johnston

Discussion on theoretical and practical aspects of gas fluxes in mining waste deposits
R. M. G. Mendonga, M. C. Barbosa and L. S. Borma

Study on dewatering of high water content dredged material using geotextiles
A. E. Mathiukumaran and K. Llamparuthi

Effects of iron content due to the segregation pattern upon the strength parameters of iron ore wastes
L. F. M. Ribeiro, E. L. Pereira, L. H. A. Filho, E. S. Presotti and A. G. Santos

Stability and settlement characteristics of hydraulically placed mine tailings and power station fly ash
D. I. Stewart, C. A. Charles-Cruz and T. W. Cousens

Large-scale column testing of hypersaline tailings
D. J. Stolberg and D. J. Williams

The capping of sludge and other weak deposits
P. Thurlwell, C. Hall and O. Naciri

Capping/covering of sludge lagoons and stabilisation of soft alluvial soils using multi-layered geosynthetic/soil systems: Specific Case Histories
L. Tomlin, D. Alexiew, I. Amigot and G. Horgan

Erosional stability of tailings storage facilities in an arid climate
D. J. Williams and D. J. Stolberg

Alternative design and instrumentation of covers over potentially acid forming mine wastes
D. J. Williams, T. K. Rohde, D. J. Stolberg and G. Pope

Underground mining influences on an environment
E. V. Stanis

Chapter 5 – Sustainability, Regulation and Risk Management

Regulation and behavior of silty clay liners in Argentina
G. M. Aiassa, M. E. Zeballos and R. E. Terzariol

Recent developments in ground contamination – basic thoughts on regulations
K. Akai and M. Tanaka

The evaluation of soil and groundwater remediation at an industrial site using risk analysis
R. C. M. Nobre, M. M. M. Nobre and L. C. Bonaparte

</table>
Variations in lead (Pb) content in soils downslope and upslope of Victoria Falls municipal waste dump in Zimbabwe
M. Masocha and D. S. Tevera

The challenge to adapt soil properties
G. van Meurs, W. van der Zon, J. Lambert, D. van Ree, V. Whiffin and W. Molendijk

Correlation between 1, 2 and 3-D LNAPL migration patterns at equilibrium in unsaturated and saturated sand
M. H. A. Mohamed and R. S. Sharma

Evaluation of the heavy metal contamination of urban soils
C. N. Mulligan and Y.-T. Huang

Diffusion and retardation of benzene and toluene vapours inside a low moisture layer of the unsaturated zone
P. C. Nerantzis and M. R. Dyer

Sodium diffusion in compacted lateritic soil
K. J. Osinubi and C. M. O. Nwaiku

Retention curves in a soil contaminated by LNAPL
C. Rabozzi, L. Ribotta and G. Gremigni

The contamination profile on soil of the Marambaia MSW Landfill, Brazil
E. Ritter, M. F. Mota, J. C. Campos and M. A. Ventura

Physical and numerical modelling of groundwater and surface-water interactions with a conservative tracer
T. Sparks, D. Kountcheva, B. Bockelmann and R. Falconer

Nitrogen distribution in vadose zone under some Bulgarian soils
D. Stoicheva, M. Kerecheva and D. Stoichev

Time integration for numerical solution of advection-diffusion contaminant transport
G. Tang and A. N. Alshawabkeh

Parametric study of hydraulic barrier for contaminant transport under transient conditions
M. Vaníček

Chapter 7 – Waste Reuse and Waste Management

Management of waste sludge in trench cutting and re-mixing deep wall method
M. Aoi, J. Fukunaga, H. Yoshizaki, F. Kinoshita, M. Kamon and K. Tateyama

Field and laboratory evaluation of artificial soil as an evapotranspirative barrier
R. Bobba, W. J. Likos, J. J. Bowders and R. D. Hammer

Using disused rails for slope stabilisation
D. Castro and L. Lopez

Geoenvironmental and mechanical properties of a fly ash
J.-C. Chai, S. Hayashi and K. Onitsuka

Stabilization of sewage sludge by a combined chemical and mechanical method
J. Chu, T. T. Lim and M. H. Goi

Geotechnical properties of marble dust and its reuse in slurry-pond embankment
M. Datta, J. T. Shahu and S. Mondal

Reuse of refractory bauxite ore waste as aggregate in asphalt concrete paving mixtures
Geotechnical properties of mining wastes and mixture of ash and slag for civil engineering
P. Filipowicz and M. Borys

Mechanical and leaching properties of the air-cement treated soil using incineration residue from MSW
T. Fujikawa, K. Sato and S. Yamada

Seismic response of landfills
B. Gatmiri and S. Navidi

Use of steel slag and limestone quarry dust for remediation of acidity arising from runoff from colliery spoil pilot study
G. S. Ghataora, N. Ghazireh and B. Burns

Experimental investigation of compressibility of cohesive soil mixed with waste tire chips
M. Ghazavi and A. Barmaki

Determination of shear strength parameters of tire chips and grains
M. Ghazavi, M. Torbati and M. Kazem

Alternative materials used as embankment fill in sustainable engineering and landscaping applications
R. Griffiths, M. Lamb and J. Lewis

Select engineering properties of crushed glass-dredged material (CG-DM) blends
D. G. Grubb, M. Carnivale, J. Wartman and P. M. Gallagher

Application of molten slag from municipal waste as liquefied stabilized soil
Y. Hayashi, T. Taguchi and A. Suzuki

Scrap tire chips as a geomaterial to improve seismic performance of structures
H. Hazarika, T. Sugano, E. Kohama and Y. Suzuki

Issues of dissipated mercury wastes
J. Jaremski

Slag bound mixtures with recycled aggregates for flexible pavements
H. A. Khalid, Z. L. Soo, I. S. Nquot and I. Artamendi

Engineering property evaluation of cement treated soil with tire chips using X-ray CT scanner
Y. Kikuchi, T. Nagatome, Y. Mitari and J. Otani

The development of new applications for sandstone quarry sand in South Wales
M. Lamb and M. Reid

Aging effect on MSW mechanical behaviour
S. L. Machado, M. F. Carvalho, J. C. F. Nascimento and K. A. Dourado

Study of the MSW time differed compressibility in the Metropolitan centre landfill
S. L. Machado, M. F. Carvalho, K. A. Dourado, M. B. Rocha and J. C. F. Nascimento

Sabkha soils mixed with oil lake residues – reuse of a waste material
T. A. Mahdi, F. Al-Otaibi and H. R. Thomas

Fibre reinforced waste based artificial soil for grass covered areas subjected to occasional vehicular traffic
T. A. Mahdi, R. W. Francis, H. R. Thomas and R. Poon

Surface disposal of paste tailings
V. Martin, M. Aubertin and J. McMullen

Sulfate induced heaving in chromite ore processing residue
D. H. Moon, D. Dermatas, M. Chrysochoou, A. M. Sanchez, M. Wazne and D. G. Grubb
Application of artificial granular material made from construction sludge to sand compaction piles
Y. Nabeshima, T. Matsui, H. Sugiura and K. Ochi

Proposed geophysical method for investigating the seabed for a landfill project in Okayama, Japan
M. Nishigaki, M. Komatsu, M. Inoue, K. Kankam-Yeboah, S. Mattersteig and J. A. Akudago

Mechanical properties of cohesive soils mixed with carbide possessing with water absorption property
K. Omine, H. Ochiai, N. Yasufuku and T. Kobayashi

Recycled and alternative materials in drainage systems of waste disposal areas
E. M. Palmeira, A. R. L. Silva and H. Paranhos

Preliminary static and seismic slope stability analyses for a Portuguese municipal solid waste landfill
F. Pardo de Santayana and A. J. Roque

Behaviour of coal ash as structural fill material
G. Ramasamy and S. S. Pusadkar

Possibility of using the drinking water sludge as geotechnical material
A. J. Roque and M. Carvalho

Elution reduction of hazardous substances by solidification of coal ash
A. Sato, S. Nishimoto and T. Suzuki

Application to liquefied soil stabilization material of industry wastes

Landfill site selection using GIS

Evaluation method for consistency and its application for estimating strength properties of coal fly ash
D. Suetsugu and Y. Miyata

Heat and mechanical properties of waste glass aggregate as a base course material for taking measures of heat island
H. Suzuki, Y. Itasaka and K. Makino

The strength characteristics of muddy soils mixed with granulated coal fly ash

Utilization of irrigation dam muddy soil to embankment and replanting material
M. Yamanaka, S. Hosegawa and N. Tomida

Technical and environmental viability study of the use of coal ashes as covering material for mining rejects
M. O. Ubaldo, M. C. Barbosa and L. S. Borma

Chapter 8 – Other

Modelling the behaviour of freezing and thawing soil slopes
P. J. Cleall, H. R. Thomas and M. C. Glendinning

Alluvia substratum influence on the main stream (thalweg) orientation and on the regulation structures stability based on the Middle Vistula River reaches
T. Falkowski

Kinematic and block theory applications to rock slope analysis of the Fraser’s Hill, Pahang, Malaysia
Haswanto and A. Ghani Rafek

Index
