Precision Surface Finishing and Deburring Technology

Selected papers from the 9th International Symposium on Precision Surface Finishing and Deburring Technology (ICSD2007)
5 - 7 November, 2007
Suzhou, China

Edited by
Hang Gao
Zhuji Jin
Yannian Rui

Preface vii

Network Database System for Metal Cutting Burr

Manufacturing of Coated Production Tooling
V.P. Smolentsev, A.V. Levin and A.V. Gribentchikov .................. 13

Flows Field Simulation of Two-Phase Swirling Flows Finishing
S.Q. Yang, W.H. Li and S.C. Yang .................................... 17

Influential Factor and Control Technology of Burr in End Milling

Effective Deburring of the Burr at Intersecting Hole by Permanent Magnet Inductor
S.R. Jo, S.L. Ko and Y.M. Baron ..................................... 29

Formation and Control of Two Side Direction Burr
G.C. Wang, C.G. Shen, H.J. Pei, Y.M. Zhu, Q.F. Li and H.J. Qu ........... 39

White Layer and Surface Roughness in High Speed Milling of P20 Steel
J.Z. Pang, M.J. Wang and C.Z. Duan ................................ 45

Research on Technology and Application of Pulse Electrochemical Finishing

Study on the Ultrasonic Machining of Hydroxyapatite/SiC_w Composite Bioceramics Material
Z.W. Niu, Q.Z. Zhao and X.T. Wei ................................... 61

Precision Grinding and Slicing of Glass-Like-Carbon

Finite Element Modeling of Burr Formation in Metal Cutting with a Backup Material
W.J. Deng, W. Xia, L.S. Lu and Y. Tang ................................ 71

Application of Taguchi Method for Optimization of Finishing Conditions in SUS440 Stainless Steel Substrate
C.R. Zhu, J.L. Yuan, B.H. Lv and Z.Z. Zhou ............................ 77

The Standardization for the Edge Quality of the Precise Machining Products
Y. Kato, K. Ohmri, E. Hatano and K. Takazawa.......................... 83

Surface Quality of Finishing Cut by WEDM in Gas
T. Wang, X.F. Zhang, X.F. Zhao and M. Kunieda ....................... 91

Experimental Study on Surface Finishing Performances in Quick-Point Grinding
S.C. Xiu, C.H. Li and G.Q. Cai ...................................... 97

Study on the Cutting Parameter Optimization of Medical Titanium Alloy Based on Tools Durability
Q.L. Du, X.H. Chen and K.H. Zhang ................................ 103

Optimizing Electrochemical Buffing Control Parameters for Surface Finishing of Ultrahigh Purity Components
H.P. Tsui, B.H. Yan, K.L. Wu and W.C. Wu ............................ 109
Processing Flow of Optical Fabrication for Correcting Lenses
Y. Zhang and Z.J. Feng .................................................. 117

Studies on Disfigurement-Free Technology of Drilling Carbon Fiber Reinforced Plastics
Y.Q. Wang, Y.J. Bao and H. Gao ........................................ 125

Study on the Characteristics of Simply Mixed the Magnetic Abrasives Particles
Y. Chen, Q.H. Song, X. Wang and N. Ma ............................... 133

EDM with USM Combination Process of Sintered NdFeB Permanent Magnet
L. Li, D. Wang, Z.W. Niu and Z.Y. Li ................................ 139

A New Method of Reducing Shock between Press Head and Press Disk in High Speed Lapping
J.D. Yang, C.L. Tian, H.Y. Yang, Z.Q. Hao and Z.H. Zhu ............................. 145

Study on Building and Simulation of the Polishing Path of Mold Based on MasterCAM
J.F. Ding, G.Y. Mei, K.H. Zhang and F.J. Yu ............................ 149

Study on Effect of Composite Particles in Polishing Process and Its Mechanism
X.F. Xu, B.X. Ma, F. Chen and W. Peng ................................ 155

Study on Contact Pressure between Grain and Workpiece during Floating Polishing
X.C. Xu, Z.J. Yuan and B. Lin ........................................... 161

Computer Emulation to the Tool Head of the Ultrasonic Vibration Machine for Honing
X.J. Zhu, Y.X. Gao and Z.M. Lu ......................................... 165

Precision Grinding of High Chromium Steels Using Metal Bonded CBN Wheel

Experimental Study on Cryogenic Polishing Single Silicon Wafer with Nano-Sized Cerium Dioxide Powders

Study on Polishing Rock Minerals of Natural Stone
J.Y. Shen and X.P. Xu .................................................. 183

Investigation into LST and its Novel Application in Mould
Y. Wang, Z.Y. Xu, Y.H. Fu and L. Cai ................................ 189

A Study on Erosion Mechanisms of Quartz Crystals Polished by Micro Abrasive Waterjet
Q.L. Li, C.Z. Huang, J. Wang, H.T. Zhu and C.L. Che ...................... 195

Study on Removal and Embedding Mechanism of CdZnTe Using Loose Abrasive
Y. Li, H. Gao and R.K. Kang ........................................... 201

Study on Macro/Micro Complex Feed Mechanism in Dry-ECD Assisted Truing and Dressing of Diamond Wheel
Y. Wang, S.M. Wang, H. Zhou and D.J. Hu ............................. 211

Theory and Experiment Study on the Grinding Force

Research on Stock Removal Uniformity for Double Sided Polishing Process

Study on the Behavior of the Cast-Iron Bonded Grinding Wheel to Machining Properties of Hard and Brittle Materials
S.L. Ma, W. Li, C.R. Zhu, J. Zhang and H.C. Ye ................................. 229
Effects of the Wear Characteristics of Brazed Diamond Grits on Grinding Forces
Y.J. Zhan, Y. Li, H. Huang and X.P. Xu ................................................................. 233

Experimental Research on Grindability of Aluminum Alloy
S.X. Yuan, H. Ding and W.S. Wang ................................................................. 239

Synthetically Modeling of Thermal Error and Grinding Force Induced Error on a
Precision NC Cylindrical Grinding Machine
H. Wu, J.G. Yang and X.S. Wang ................................................................. 243

Formation and Simulation of Cutting-Direction Burr in Orthogonal Cutting
H.J. Qu, G.C. Wang, H.J. Pei, Q.F. Li and Y.M. Zhu ........................................... 249

A Method for Grinding Mode Identification in Grinding of Silicon Wafers

Precision Grinding of SUS304 Using Metal Bonded CBN Wheel
Y. Hasuda, Y. Suzuki, Y. Tadokoro, S. Kinebuchi, T. Ohashi and T. Furusawa .................................................. 261

Fuzzy Control in Profile Envelope Process of Form Cutter for Involute Gear and its
Movement Control
J. Kang and L.N. Guan ................................................................. 265

Study on the Magnetic Saturation Flux Density Measurement of Fluid Magnetic
Abrasives
H.W. Sun and S.C. Yang ................................................................. 273

Innovation of Widening Grinding and Avoiding Dressing Grinding by Using
Planet-Abrasivetool
B. Yao and F.P. Mao ................................................................. 279

Online Wheel Wear Evaluation in Grinding WC-Co Ceramic Coating
Y.H. Zhang, Q. Wu and D.J. Hu ................................................................. 283

Ultraviolet-Curing Resin: A Novel Bond for Abrasive Tools
F.Q. Liu, C.Y. Yao, T. Gao and W. Peng ................................................ 289

The High-Efficient Low-Cost Wheel-Grinding Technology for CVD Diamond Films
Z.J. Jin, X.W. Ma and Z.W. Yuan ................................................................. 295

Prediction of Surface Roughness Using Regression and ANN Models in High-Speed
Finish Milling Operation
Y.Z. Pan, X. Ai, J. Zhao and G.Y. Li ................................................................. 303

Application of ICA Method to Thermal Error Modeling of Gear Hobbing Machine
Q.J. Guo, J.G. Yang and X.S. Wang ................................................................. 309

Conditions of Precision Measurement for Error Separation by Multi-Probe Method
L. Zhang, Y. Zhang and L. Ba ................................................................. 315

Repair of Parts by Coating
V.P. Smolentsev, A.V. Levin, A.V. Bondar and E.V. Smolentsev .................................................. 321

Surface Microscopic Characteristics Analysis on Electrochemical Mechanical
Finishing of Stainless Steel in NaNO3 Electrolyte
Z.Y. Li, Z.W. Niu and H. Ji ................................................................. 325

Study on Hardness Depth Variation of Different Grinding Zone in
Grind-Hardening
L. Zhang, P.Q. Ge, J.H. Zhang and Q. Zhang ................................................ 333

Power Spectral Density Analysis Finished Surface by Abrasive Jet with Grinding
Wheel as Restraint
C.H. Li, S.C. Xiu, Y.L. Hou and G.Q. Cai ................................................ 337
Precision Surface Finishing and Deburring Technology

Edge Quality and Evaluation of Workpiece in Precision Machining

Surface Damage Analysis of KDP Crystal Grinding
D.J. Wu, X.S. Cao, H. Gao and R.K. Kang ................................................................. 349

Optimization of Bulkhead Processing Sequence for Multi-Frame Monolithic Components by FEM
Z.T. Tang, Z.Q. Liu and X. Ai .................................................................................. 355

Prediction of Surface Quality and Parameter in Bearing Convex Raceway Finishing
B. Tao, X.Y. Wang, H.Z. Zhen and W.J. Xu .............................................................. 361

Mechanism Influence on Fatigue Characters of Aerial Engine Blade by Laser Shock Processing
X.D. Ren, Y.K. Zhang, Y.H. Li, W. Cheng and M. Zhuang ........................................ 371

Investigation on the Machining of Thick Diamond Films by EDM Together with Mechanical Polishing

The Valley between the Engineering and Technology
K. Takazawa ........................................................................................................... 383

Author Index ........................................................................................................... 387

Keyword Index ....................................................................................................... 389
