## Table of Contents

**Bricks and Stones**  
**Analytical Approach – Application Techniques**

* M. Roos, F. König, S. Stadtmüller, B. Weyershausen  
  Invited Lecture: Evolution of Silicone Based Water Repellents for Modern Building Protection  
  3

* H. De Clercq  
  Function of Silane Type on its Reactivity for Surface and In-Depth Applications to Different Substrates  
  17

* V. Cnudde, B. Masschaele, J. Vlassenbroeck, M. Dierick, Y. De Witte, E. Lehmann, L. Van Hoorebeke, P. JS. Jacobs  
  X-rays and Neutrons used for the Visualisation of Oligomeric Siloxanes  
  31

* H. De Clercq, S. De Zanche  
  TEOS and Silicon Based Water Repellents: Influence of Application Order and Timing  
  43

**Bricks and Stones**  
**Moisture Transport**

* E. Wendler, A.E. Charola  
  Invited Lecture: Water and its Interaction with Porous Inorganic Building Materials  
  57

* S. Behre, K. Littmann  
  Measurement of Humidity in Sandstones Treated with Water Repellent Agents  
  75

* B. Lubelli, R.P.J. van Hees, T.G. van de Weert  
  The Drying Behaviour of Building Materials Treated with Anti-graffiti  
  85
Bricks and Stones

Durability

H. Derluyn, A.S. Poupeleer, D. Van Gemert, J. Carmeliet
Salt Crystallization in Hydrophobic Porous Materials 97

H. De Clercq
Performance of Limestone Contaminated with Binary Mixtures of Sodium Sulphate and Treated with a Water Repellent 107

A.E. Charola, J. Delgado Rodrigues, M. Vale Anjos
An Unsatisfactory Case of Water Repellents Applied to Control Biocolonization 117

C. Moreau, L. Leroux, V. Vergès-Belmin, G. Fronteau, V. Barbin
Which Factors Influence Most the Durability of Water Repellent Treatments: Stone Properties, Climate or Atmospheric Pollution? 129

Bricks and Stones

Standardisation

Y. Vanhellemont, H. De Clercq, M. Van Bos

E. Wendler, E. von Plehwe-Leisen

K. Malaga, T. Bengtsson
The Nordic Method: Performance Tests for Protective Sacrificial Coatings on Mineral Surfaces 169

Y. Vanhellemont, H. De Clercq, A. Pien
Proposal for a Test Procedure for Injection Products against Rising Damp 181

V. Fassina
Update on the Activities of the Technical Committee 346 - Conservation of Cultural Property – After a Three Year Period 191
Concrete

Chemical - Microstructure

H. Herb, A. Gerdes
TOF/MS for Characterization of Silicone Based Water Repellents 197

D.S. Oehmichen, A. Gerdes, A. Wefer-Roehl
Reactive Transport of Silanes in Cement Based Materials 205

J. Glowacky, S. Heißler, M. Boese, H. Leiste, T. Koker, W. Faubel, A. Gerdes, H.S. Müller
Investigation of Siloxane Film Formation on Functionalized Germanium Crystals by Atomic Force Microscopy and FTIR-ATR Spectroscopy 219

J. Suessmuth, A. Gerdes
Computational Chemistry to Investigate the Chemical Behaviour of Silanes and CSH - Gel 233

V. Spaeth, M.P. Delplancke-Ogletree, J.P. Lecomte
Hydration Process and Microstructure Development of Integral Water Repellent Cement Based Materials 245

F.L. Maranhão, V.M. John, K. Loh, R.G. Pileggi
The Influence of Silicone based Water Repellents as Admixtures on the Rheological Properties of Cement Slurry 255

Concrete

Moisture Transport – Chloride Contamination

A. Johansson, M. Janz, J. Trägårdh, J. Silfwerbrand
Sorption Isotherms of Water Repellent Treated Concrete 261

P. Zhang, F.H. Wittmann, B. Villmann, T. Zhao, V. Slowik
Moisture Diffusion in and Capillary Suction of Integral Water Repellent Cement based Materials 273

F.H. Wittmann, P. Guo, T. Zhao
Influence of Cracks on the Efficiency of Surface Impregnation of Concrete 287
J. Dai, Y. Akira, E. Kato, H. Yokota
Investigation of Chloride Ingress in Cracked Concrete Treated with Water Repellent Agents 299

T. Zhao, G. Zhu, F.H. Wittmann, W. Li
On Surface Impregnation of Chloride Contaminated Cement based Materials 311

Concrete
Durability

A. Johansson, M. Janz, J. Trägårdh, J. Silfwerbrand
Long-term Measurements on Chloride Ingress in Water Repellent Treated Concrete in a Road Tunnel Environment 327

T. Büttner, M. Raupach
Durability of Hydrophobic Treatments on Concrete – Results from Laboratory Tests 329

J. Silfwerbrand
Impregnation of Concrete Bridge Elements Exposed to Severe Environment – Is It Cost Effective? 341

Concrete
Case Studies

L. Schueremans, D. Van Gemert, M. Friedel, S. Giessler-Blank
Durability of Water Repellents in a Marine Environment 357

T. Gebhart
Protection of Existing Highway Bridges by Means of Water Repellent Treatment – A Pilot Project 369

A. Johansson, B. Nyman, J. Silfwerbrand
Decreasing Humidity in Concrete Facades after Water Repellent Treatments 379

Author Index 387
