CONTENTS

Plenary Lecture 1

RECENT PROGRESS AND OUTLOOK FOR ZINC- AND ZINC ALLOY-COATED STEEL SHEETS IN JAPAN ................................................................. 1
Hiroshi Kagechika
JFE Steel Corporation, Japan

Plenary Lecture 2

AN OVERVIEW OF NORTH AMERICAN ZINC-BASED SHEET STEEL COATINGS PRODUCTION: STATUS AND OPPORTUNITIES ................................................................. 6
Frank E. Goodwin1, Eduardo A. Silva2
1International Lead Zinc Research Organization, Inc., USA, 2United States Steel Corporation, USA

Plenary Lecture 3

CONTINUOUS GALVANIZING IN EUROPE: YESTERDAY – TODAY – TOMORROW .................................................................................. 14
Josef Faderl
voestalpine Stahl GmbH, Austria

A-1 New Coating Lines and Technologies

A-1-1 Keynote
RECENT PROGRESS IN THE PROCESS TECHNOLOGY OF CONTINUOUS GALVANIZING LINES .............................................................................. 23
C. Dulcy1, F. Galdon2
1Arcelor Research, France, 2ArcelorMittal Flat Carbon Europe, Downstream Technical Excellence, France

A-1-2 ENGINEERING FEATURES AND CAPABILITIES OF ARCELORMITTAL CLEVELAND HOT DIP GALVANIZING LINE (HDGL) ................................................................. 29
Stavros Fountoulakis1, Corbitt Lewis2
1ArcelorMittal USA R&D Center, USA, 2ArcelorMittal USA Cleveland Inc., USA

A-1-3 LATEST DEVELOPMENTS SERVING 55% AL-ZN COATING PROCESS INCORPORATED IN STEIN HEURTEY FURNACE FOR BLUESCOPE STEEL THAILAND BST NEW MCL2 LINE .............................................................................. 35
D. Delaunay1, A. Previtali1, D. Thompson2, W.Gleeson2
1Stein Heurtey, France, 2BlueScope Steel Pty. Ltd., Australia

A-1-4 THE RESEARCH OF HIGH FREQUENCY MAGNETIC FIELD LEVITATION FORCE AND ENCLOSED SLOT CHARACTER OF VERTICAL ZINC POT .............................................................................. 41
Hao Xiaodong, Zhang Qifu
Central Iron & Steel Research Institute, China
A-2 Technologies to Preserve the Global Environment

A-2-1 INNOVATIVE ENERGY SAVINGS IN CONTINUOUS ANNEALING FURNACE .......................... 46
Chris Winger¹, Roy Hardy²
¹GalvTech, The Techs Industries, USA, ²Spinworks LLC., USA

A-2-2 APPLIED WASTE MANAGEMENT TECHNOLOGY: IN–HOUSE RECOVERY OF METALLIC ZINC FROM CONTINUOUS GALVANIZING DROSSES ................................ 52
John Fryatt, Nathan Deem, Mark Bright
Pyrotek Incorporated, USA

A-2-3 CONTROL OF STRIP VIBRATIONS IN GAS JETS COOLING AREAS ............................. 57
Michel Renard¹, Jérôme Muller², Dirk Van de Vyver³, François Gurniki³, Karen Beaujard⁴
¹Drever International S.A., Belgium, ²Arcelor Mittal Dudelange S.A., Luxembourg,
³Arcelor Steel Belgium NV, Belgium, ⁴Arcelor Research SA, France

A-3 Process Technologies I - Improving Galvanizing Annealing Furnace -

A-3-1 HIGH EMISSIVITY COATING TECHNOLOGY IMPROVES ANNEALING FURNACE EFFICIENCY .............................................................. 69
Robert Scott¹, Stephen D. Cherico²
¹AK Steel, USA, ²Cetek, Ltd., USA

A-3-2 INDUCTION HEATER IN CONTINUOUS ANNEALING LINES ........................................ 76
Jean Lovens, Vincent Lhoist
INDUCTOTHERM S.A., Belgium, ARCELOR MITTAL, Belgium

A-3-3 GAS FLOWS AND EXCHANGES IN GALVANIZING ANNEALING FURNACE .......... 82
Hubert Saint-Raymond, Bertrand Orsal
Arcelor Research, France

A-4 Process Technologies II - Improving Galvanizing Bath Hardware I -

A-4-1 ON THE REACTION OF 316L STAINLESS STEEL WITH GALVANIZING BATHS .......... 88
K. Zhang¹, N.-Y. Tang¹, F.E. Goodwin²
¹Teck Cominco Metals Ltd., Canada, ²International Lead and Zinc Research Organization, Inc., USA

A-4-2 EFFECT OF ALUMINUM CONCENTRATION ON THE DISSOLUTION OF 316L STAINLESS STEEL IN MOLTEN ZINC ............................................. 94
Mark A. Bright¹, Ever Barbero²
¹Pyrotek Incorporated, USA, ²West Virginia University, USA

A-4-3 DROSS FORMATION MECHANISMS ON STAINLESS STEEL HARDWARE IN A ZINC–55%ALUMINUM BATH ......................................................... 100
Ashok Varadarajan¹, Bruce Kang¹, Mark Bright²
¹West Virginia University, USA, ²Pyrotek Incorporated, USA

A-4-4 OPERATING STRESS AND WEAR OF SINK-ROLL BEARINGS ...................................... 106
N.-Y Tang, K. Zhang
Teck Cominco Metals Ltd., Canada
A-5  Process Technologies III - Improving Galvanizing Bath Hardware II -

A-5-1  MECHANISMS OF DROSS BUILD-UP ON HOT-DIPPED HARDWARE ........................................ 111
Y. Hardy1, M. Dubois2, J.-J. Bertrandie3, H. Saint-Raymond3
1CRM, Belgique, 2R&D Arcelor - Liège, Belgique, 3Arcelor Research, France

A-5-2  DEVELOPMENT OF A NEW WELD OVERLAY FOR POT HARDWARE IN CONTINUOUS GALVANIZING LINES .......................................................... 117
Xingbo Liu1, Vinod K. Sikka3, Mark Bright1, Scott Sexton3, James W. Hales3
1West Virginia University, USA, 2Oak Ridge National Laboratory, USA, 3Metallics Systems, USA, 4Nucor Steel, USA, 5Specialty Welding & Machining, Inc., USA

A-5-3  REACTIVE WETTING OF AN NEW IRON-BASED SUPERALLOY AND 316L STAINLESS STEEL BY MOLTEN ZINC ALLOY ......................................................... 123
Jing Xu1, Xingbo Liu1, Mark A Bright2, James G Henrick3, Ever Barbero1
1West Virginia University, USA, 2Pyrotek Incorporated, USA, 3Oak Ridge National Laboratory, USA

A-5-4  TOP DROSS AND BATH BEHAVIOR FROM GALVANEALING TO GALVANIZING TRANSITION ............................................................ 129
Xue Bin Yu, Xin Yan Jin, Quan Cheng Zhang
Baoshan Iron & Steel Co., LTD., China

A-6  Process Technologies IV - Galvanizing Bath Management I -

A-6-1  THERMODYNAMIC ASPECTS OF DROSS GENERATION ........................................ 135
Jinichiro Nakano1, Gary R. Purdy2, Dmitri V. Malakhov2
1Carnegie Mellon University, USA, 2McMaster University, Canada

A-6-2  MINIMIZING DROSS GENERATION IN GALVANIZING ........................................ 141
N.-Y. Tang, Y.H. Liu
Teck Cominco Metals Ltd., Canada

A-6-3  MODELING AS A MANAGEMENT TOOL FOR OPERATING CONTINUOUS GALVANIZING BATHS ............................................................ 147
Frank Ajersch1, Florin Ilinca2, Jean-François Hétu3, Frank E. Goodwin3
1École Polytechnique de Montréal, Canada, 2National Research Council, Canada, 3International Lead Zinc Research Organization, USA

A-6-4  APPLICATION OF HEAT BALANCE IN CONTINUOUS GALVANISING ........................................ 153
Monojit Dutta, N. Rajesh
Tata Steel Ltd., India

A-7  Process Technologies V - Galvanizing Bath Management II -

A-7-1  CFD ANALYSIS OF VARIOUS BATH DESIGNS FOR THE NEW CORUS HOT-DIP GALVANISING LINE #3 IN IJMUIDEN .................................................. 159
Eelco van Vliet1, Roel Mallens1, Peter van Hasselt2
1Corus Research Development & Technology, The Netherlands, 2Corus Strip Products Ijmuiden, The Netherlands

A-7-2  ENHANCED STRIP SURFACE QUALITY FROM IMPROVED BATH SURFACE MANAGEMENT WITHIN THE SNOUT ........................................ 165
Craig H. Phillips, Neil Staples
Corus Research, Development and Technology, UK
A-7-3  VISCOSITY OF MOLTEN Zn-Al, Zn-Cu AND Zn-Al-Cu ALLOYS
Y.H. Liu
Teck Cominco Metals Ltd., Canada

A-7-4  DEVELOPMENT OF TOTAL NUMERICAL ANALYSIS METHOD CONSISTING OF GAS FLOW AND LIQUID FILM FLOW TO PREDICT THE COATING WEIGHT
Katsuya Akiyama, Tsuyoshi Oda
KOBE STEEL, LTD., Japan

A-8  Process Technologies VI

A-8-1  IMPROVED EFFICIENCY OF STRIP CLEANING PROCESSES
Craig H. Phillips, Iwan Davies
Corus Research, Development and Technology, UK

A-8-2  ONE SOLUTION OF STRIP CLEANING IN HIGH SPEED LINE
Akihiko Hotani, Kazuo Onishi
HOTANI Co., Ltd., Japan

A-8-3  CLIENT SPECIFIC, TAILOR MADE DESIGN OF IRIDIUM MIXED METAL OXIDE ANODE COATINGS FOR USE IN ELECTROGALVANISING LINES
Jacko Pijper
MAGNETO special anodes B.V., The Netherlands

A-8-4  RELATIONSHIP BETWEEN CRYSTALLOGRAPHIC STRUCTURE AND SURFACE REACTIVITY IN ELECTROGALVANIZED STEEL SHEET
S. Bruno1, M. Zapponi1, A. Lazzarino2, A. Grieco2, R. Dulbecco2, F. Actis2, J. Pedraza2
1Tenaris Siderca, Argentina, 2Ternium Siderar, Argentina

A-9  Electrogalvanized Steels

A-9-1  EFFECTS OF SMALL AMOUNTS OF VARIOUS INORGANIC ADDITIVES ON THE MORPHOLOGY AND APPEARANCE OF ZINC ELECTRODEPOSITED ON STEEL SHEETS
Hiroaki Nakano1, Satoshi Oue1, Hisaaki Fukushima1, Shigeo Kobayashi2
1Kyushu University, Japan, 2Kyushu Sangyo University, Japan

A-9-2  EFFECT OF CRYSTAL STRUCTURE ON THE LIGHTNESS OF ZINC ELECTRODEPOSITS
Masanari Kimoto1, Mitsuharu Yonemura1, Kazuya Ishii1, Hiroyuki Yasuda2,
Yukichi Umakoshi2
1Sumitomo Metal Ind. Ltd., Japan, 2Osaka University, Japan

A-9-3  THE EFFECT OF Mg ADDITION TO THE PHOSPHATE FILM ON THE PROPERTIES OF PREPHOSPHATED ELECTROGALVANIZED STEEL SHEETS
Kiyokazu Ishizuka, Kimitaka Hayashi, Hidetoshi Shindo, Kazumi Nishimura
Nippon Steel Corporation, Japan

A-9-4  ZINC-CERAMIC COMPOSITE COATINGS BY ELECTRODEPOSITION
Xuli Xia, Igor Zhitomirsky, Joseph. R. McDermid
McMaster University, Canada
A-10 Surface and Structural Analysis IX

A-10-1 Keynote
PLASTIC DEFORMATION AND FRACTURE BEHAVIOR OF GALVANNEALED COATING UNDER COMPRESSION STRESS CIRCUMSTANCE
Takayuki Takasugi, Junich Machida
Osaka Prefecture University, Japan

A-10-2 FINITE ELEMENT ANALYSIS OF INTERFACIAL DEBONDING OF THE Fe-Zn INTERMETALLIC COATING LAYER ON STEEL SUBSTRATE
S. Iwamoto1, S. Ochiai1, H. Okuda1, T. Inoue2
1Kyoto University, Japan, 2National Institute for Materials Science, Japan

A-10-3 PREDICTION MODEL OF THE GALVANNEALING STATES USING GALVANNEAL PHASES RATIO BY X-RAY DIFFRACTION DURING GALVANNEAL PROCESS
Doo-Jin Paik, Kwang-Geun Chin, Moon-Hi Hong
POSCO, Korea

A-10-4 THE EFFECT OF 515 PHASE ON THE FRICTIONAL BEHAVIOR OF GALVANNEALED INTERSTITIAL FREE SHEET STEELS
Luis G. Garza1, Chester J. Van Tyne2
1AK Steel Corp., USA, 2Colorado School of Mines, USA

A-11 Joining and Forming

A-11-1 DIE TEMPERATURE EFFECTS ON STAMPING COATED ADVANCED HIGH STRENGTH STEEL
Hua-Chu Shih
United States Steel Corporation, USA

A-11-2 EFFECT OF WARM FORMING ON GA STEEL SHEET POWDERING
Toyomitsu Nakamura, Hiroshi Takebayashi, Masahiro Nakata, Tamotsu Toki
Sumitomo Metal Industries, Ltd., Japan

A-11-3 EFFECT OF PHOSPHATE AMOUNT AND δ1/5 PHASE RATIO ON FORMABILITY OF GA SHEETS FOR AUTOMOTIVE OUTER PANELS
Dong-Soo Han, Jung-hwan Ahn, Moon-Hi Hong, Hong-woo Lee
POSCO, Korea

A-11-4 INFLUENCE OF Sb ON THE RESISTANCE SPOT WELDING OF GALVANNEALED STEELS
Salvador Meza1, Luis Moya1, Martha P. Guerrero-Mata1, Rafael Colás1, Antonio Maní2
1Universidad Autónoma de Nuevo León, Mexico, 2Ternium-Hylsa, S.A. de C.V., Mexico

B-1 Surface and Structural Analysis I

B-1-1 COATING QUALITY IMPROVEMENT OF HOT ROLLED GALVANIZED PRODUCTS
Hubert Saint-Raymond1, D. Bettinger1, Ph. Osmont1, JC. Denquin2
1Arcelor Research, France, 2Arcelor Atlantique et Lorraine / Desvres, France

B-1-2 CHARACTERIZATION OF THE TINIEST DEFECTS FOR AUTOMOTIVE EXPOSED PANELS
Dong-Soo Han, Moon-Hi Hong
POSCO Kwangyang works, Korea
B-1-3 
A COMPARATIVE STUDY ON ZN COATABILITY OF HOT ROLLED COILS WITH COLD ROLLED COILS
A. Chattopadhyay\textsuperscript{1}, V. Subramanya Sarma\textsuperscript{2}, B.S. Murty\textsuperscript{2}, D.Bhattacharjee\textsuperscript{1}, M.Dutta\textsuperscript{1}
\textsuperscript{1}Tata Steel, India and IIT-Madras, India, \textsuperscript{2}Indian Institute of Technology Madras, India,
\textsuperscript{3}Tata Steel, India

B-2 Surface and Structural Analysis II

B-2-1 EFFECT OF GALVANIZING PARAMETERS ON THE MICROSTRUCTURE OF HOT-DIP GALVANIZED STEEL SHEET FOR AUTOMOBILE PANELS
H. B. Chen\textsuperscript{1}, K. C. Yang\textsuperscript{1}, C. K. Hsieh\textsuperscript{1}, K. M. Hsu\textsuperscript{1}, J. H. Tsai\textsuperscript{1}, C. S. Lin\textsuperscript{2}
\textsuperscript{1}China Steel Corporation, Taiwan, \textsuperscript{2}National Taiwan University, Taiwan

B-2-2 SURFACE CHEMISTRY AND REACTIVITY OF SKIN-PASSED HOT DIP GALVANIZED COATING
Jean-Michel Mataigne\textsuperscript{1}, Véronique Vache\textsuperscript{2}, Monique Repoux\textsuperscript{3}
\textsuperscript{1}ArcelorMittal, France, \textsuperscript{2}Novelis, Luxembourg, \textsuperscript{3}Ecole des Mines de Paris, CEMEF, France

B-2-3 EFFECT OF SURFACE ALUMINIUM ON FRICTION AND FRETTING WEAR BEHAVIOR OF GALVANIZED STEEL SHEETS
A. Chattopadhyay, N. Bandyopadhyay, T. Venugopalan, S. Chakrabarty
Tata Steel, India

B-3 Surface and Structural Analysis III

B-3-1 REACTIONS OF THE STEEL SUBSTRATES IN A MOLTEN ZINC BATH TO FORM AN INHIBITION LAYER AT THE INTERFACE AND PRECIPITATION OF THE DROSS PARTICLES DURING GALVANNEALING PROCESS
Doo-Jin Paik, Myung-Soo Kim, Chang-Woon Jee, Young-Sool Jin, Jae-Won Noh
POSCO, Korea

B-3-2 SHORT TERM FORMATION OF THE INHIBITION LAYER DURING CONTINUOUS HOT-DIP GALVANIZING
Lihua Chen, Richard Fourmentin, Joseph McDermid
McMaster University, Canada

B-3-3 THE ALLOYING ELEMENTS TOOL BOX USEFUL FOR HOT-DIP GALVANIZING
Jacques Foct, Marie-Noelle Avettrand-Fenoel
Laboratoire de Métallurgie Physique et Génie des Matériaux, U.M.R. C.N.R.S., France

B-3-4 KEY MECHANISMS IN GALVANIZATION OF STEEL SHEETS
Jean-Michel Mataigne
Arcelor-Mittal, France

B-3-5 THE EFFECT OF PHOSPHORUS IN INTERSTITIAL-FREE STEEL ON GALVANNEALING BEHAVIOR
Shintaro Yamanaka, Kenichiro Matsumura
NIPPON STEEL CORPORATION, Japan

B-4 Automotive Applications I - Advanced High Strength Steels -

B-4-1 Keynote
RECENT PROGRESS IN COATED HIGH TENSILE STRENGTH STEEL FOR AUTOMOTIVE USE
Akihiro Miyasaka
Nippon Steel Corporation, Japan
B-4-2 DEVELOPMENT OF HOT ROLLED, HOT-DIP GALVANISED HIGH STRENGTH STEEL GRADES ON THE LABORATORY SCALE

Michael Pohl, Markus Krieger, Thomas Koll, Thorsten Maiwald
Salzgitter Mannesmann Forschung GmbH, Germany

B-4-3 DEVELOPMENT OF Si BEARING HIGH STRENGTH GALVANNEALED STEEL SHEETS WITH SUPERIOR FORMABILITY

Satoshi Hironaka, Kazuaki Hosomi, Hiroshi Tanaka, Takashi Matsumoto
Nisshin Steel Co., Ltd., Japan

B-4-4 DEVELOPMENT OF 590MPa GRADE LOW Si CONCENTRATION TRIP GA SHEET STEELS

M. B. Moon, W. B. Kim, S. J. Park, S. M. Na, S. Namkoong, C. S. Oh
HYUNDAI HYSOCo, Korea, Korea Institute of Machinery & Materials, Korea

B-4-5 DEVELOPMENT OF ADVANCED HIGH STRENGTH STEELS WITH 1180MPa IN TENSILE STRENGTH

Jong-Sang Kim, Kwang-Geun Chin
POSCO Technical Research Labs, Korea

B-5 Automotive Applications II - Advanced High Strength Steels -

B-5-1 Keynote
EXPECTATION FOR STEEL SHEET IN VIEW OF FUTURE AUTOMOTIVE APPLICATION

Manabu Fujine
Toyota Motor Corporation, Japan

B-5-2 MICROSTRUCTURE AND PROPERTIES OF RAPIDLY HEAT TREATED AND GALVANIZED DUAL PHASE STEEL

Richard Fourmentin, Anne Mertens, Joseph McDermid
McMaster University, Canada

B-5-3 EFFECTS OF NIOBium IN GALVANIZED ADVANCED HIGH STRENGTH STEELS FOR AUTOMOTIVE APPLICATIONS

Hardy Mohrbacher
CBMM Technology, Germany

B-5-4 DEVELOPMENT OF ULTRA-HIGH STRENGTH GALVANNEALED STEEL SHEETS WITH TENSILE STRENGTH OF 980 MPA

Ken-ichiro Matsumura, Nobuhiro Fujita, Toshiaki Nonaka, Toshimasa Tomokiyo, Hirokazu Taniguchi
NIPPON STEEL CORPORATION, Japan

B-6 Surface and Structural Analysis IV

B-6-1 Keynote
RECENT DEVELOPMENT OF HIGH STRENGTH STEELS WITH ZINC OR ZINC ALLOY COATING IN EUROPE

B. Schuhmacher, T. Heller, M. Steinhorst, W. Warnecke
ThyssenKrupp Steel AG, Germany, DOC Dortmunder Oberflächenzentrum GmbH, Germany

B-6-2 CHARACTERIZATION OF SELECTIVE OXIDATION OF ALLOYING ELEMENTS IN AN ADVANCED HIGH STRENGTH STEEL FROM THEORETICAL AND EXPERIMENTAL VIEWPOINTS

C. Ramadeva Shastry, John A. Rotole, Thomas W. Kaiser
Arcelor Mittal Steel USA Research and Development, USA
B-6-3 SELECTIVE OXIDATION OF FERRITIC STEELS

Marie-Laurence Giorgi1, Jean-Bernard Guillot1, Amélie Ollivier1, Frank Goodwin2
1École Centrale Paris, France, 2International Lead Zinc Research Organization (ILZRO), USA

B-6-4 SURFACE ANALYSIS OF THE SELECTIVE OXIDATION DURING AUSTENITIC ANNEALING OF CMNISI HIGH STRENGTH STEEL

T. Van De Putte1, D. Loison3, S. Claessens2, Z. Zermout2, J. Penning1
1Gent University, Belgium, 2Arcelor Research Industry Gent – OCAS NV – ARCELOR, Belgium, 3Arcelor Research SA, France

B-7 Surface and Structural Analysis V

B-7-1 CHARACTERIZATION BY ELECTRON DIFFRACTION OF OXIDE PARTICLES FORMED DURING ANNEALING

A.Ollivier1, M.-L. Giorgi1, M. Zaidi1, J.-P. Mazellier1, P. Haghi-Ashtiani1, M. Clavel3, J.-B. Guillot1
1École Centrale Paris, France, 2Structures et Matériaux, France

B-7-2 HOT DIP GALVANIZING OF HIGH STRENGTH STEEL: REDUCTION KINETICS AFTER PREOXIDATION

Gerhard Angeli, Alexander Jarosik, Andreas Muhr, Hermann Burger,
Thomas Haunschmied, Johann Angeli
voestalpine Stahl GmbH, Austria

B-7-3 EFFECT OF INTERNAL OXIDATION OF GALVANNEALING PROPERTIES AND ANTI-POWDERING PROPERTIES OF SI,MN,P BEARING HIGH-TENSILE GALVANIZED SHEET STEEL

Yoshitsugu Suzuki1, Yoshiharu Sugimoto1, Sakae Fujita2
1JFE Steel Co., Japan

B-7-4 THE INFLUENCE OF Sb ON THE SURFACE QUALITY OF GALVANIZED SHEET STEELS

Il-Ryoung Sohn, Sun-Ho Jeon, Hee-Jae Kang, Kwang-Geun Chin
POSCO, Korea

B-8 Surface and Structural Analysis VI

B-8-1 FUNDAMENTAL INVESTIGATION OF THE EFFECT OF OXIDES ON THE REACTION KINETICS DURING HOT DIP GALVANIZING

Sascha Frenznick, Dimitar Borissov, Michael Rohwerder
Max-Planck-Institut für Eisenforschung, Germany

B-8-2 REACTIVE WETTING KINETICS DURING THE GALVANIZING OF HIGH-MN STEELS

Richard Meguerian, Joseph McDermid
McMaster University, Canada

B-8-3 ZINC WETTING ON HIGH STRENGTH STEELS

Louis Bordignon1, Xavier Vanden Eynde1, Bruno Gay2
1CRM, Belgium, 2Umicore, Belgium

B-8-4 HOT-DIP GALVANIZING SIMULATION OF MODEL ALLOYS AND INDUSTRIAL STEEL GRADES: CORRELATION BETWEEN SURFACE CHEMISTRY AND WETTABILITY

Srinivasan Swaminathan1, Thomas Koll2, Michael Pohl1, Michael Spiegel1
1High Temperature Reactions Group, Max-Planck-Institut für Eisenforschung GmbH, Germany, 2Salzgitter Mannesmann Forschung GmbH, Germany
B-9 Surface and Structural Analysis VII

B-9-1 INFLUENCE OF THIN OXIDE FILMS ON HOT-DIP GALVANIZING AND GALVANNEALING BEHAVIORS OF STEEL SHEETS................................................................. 466
Takashi Kawano, Hisato Noro, Kaoru Sato, Yoshitsugu Suzuki, Michitaka Sakurai,
Yoichi Tobiyama
JFE Steel Corporation, Japan

B-9-2 GALVANIZING TRIP STEEL USING THE DIRECT REDUCTION PROCESS........... 472
N. Gao1, Y.H. Liu1, N.-Y. Tang1, J.S. Kim2, R.B. Park2
1Teck Cominco Metals Ltd., Canada, 2POSCO Technical Research Laboratories, Korea

B-9-3 EFFECTS OF DEW POINTS AND NIOBIDIUM ON GALVANIZABILITY OF 780MPA GRADE GALVANIZED DUAL-PHASE STEELS......................................... 478
K.C. Yang1, L.W. Chang2
1China Steel Corporation, Taiwan, 2National Sun Yat-sen University, Taiwan

B-10 Surface and Structural Analysis VIII

B-10-1 INITIAL STAGE Fe-Zn REACTION DURING HOT DIP GALVANIZING OF Si-ADDED STEEL ................................................................................................. 482
Etsuo Hamada, Masayasu Nagoshi, Kaoru Sato, Michitaka Sakurai
JFE Steel Corporation, Japan

B-10-2 TEM ANALYSIS OF THE IRON-ZINC INTERFACE OF GALVANIZED TRIP STEEL................................................................................................. 487
Erika Bellhouse, Joseph McDermid
McMaster University, Canada

B-10-3 FACTORS AFFECTING GALVANEALING BEHAVIOR OF Si-CONTAINING STEEL SHEETS.................................................................................. 493
Takeshi Yasui, Makoto Nakazawa, Akihiro Miyasaka
Nippon Steel Corp., Japan

B-10-4 INFLUENCE OF SUBSTRATE TEXTURE ON THE FORMATION AND GROWTH OF ξ PHASE IN THE GALVANNEALED COATINGS ON A FEW INDUSTRIALLY PRODUCED INTERSTITIAL FREE HIGH STRENGTH STEELS................................. 499
TATA STEEL, India

B-11 Automotive Applications III - Advanced Steels -

B-11-1 PROPERTIES OF NEWLY DEVELOPED GALVANNEALED STEEL SHEET WITH MODIFIED SURFACE............................................................................. 504
Naoto Yoshimi, Hiroyuki Masuoka, Shoichiro Taira, Toru Imokawa, Masayasu Nagoshi,
Yuji Yamasaki, Yoshiharu Sugimoto, Sakae Fujita
JFE Steel Corporation, Japan

B-11-2 CORUS' NEW HOT DIP ZnAlMg COATED STEEL FOR AUTOMOBILE APPLICATIONS...................................................................................... 510
R. Bleeker, F. Hannour, C. Goos, T.F.J. Maalman, S.M. Smith, M.J. Vlot, J.W. Vrenken
Corus Research Development & Technology, The Netherlands
B-11-3 METALLURGY OF NEWLY-DEVELOPED AUTOMOTIVE STEEL SHEETS IN POSCO

Moon-Hi Hong, Jae-Hyung Ahn, Hyun-Sik Jeong, Woo-Jin Noh, Jin-Hee Chung, Deok-Gu Kang, Jeong-Bong Yoon, Seong-IL Kim, Ohjoon Kwon, Sung-Hwan Lim, Noi-Ha Cho

1POSCO, Korea, 2POSCO Technical Research Lab., Korea, 3Kangwon National University, Korea

B-11-4 PRACTICAL PROPERTIES OF NEWLY-DEVELOPED AUTOMOTIVE STEEL SHEETS IN POSCO

Moon-Hi Hong, Jae-Hyung Ahn, Deok-Gu Kang, Jeong-Bong Yoon, Ohjoon Kwon, Tae-Hyun Nam, Noi-Ha Cho

1POSCO, Korea, 2POSCO Technical Research Lab., Korea, 3Kangwon National University, Korea

B-12 Automotive Applications IV - Fuel Tank Materials -

B-12-1 DEVELOPMENT OF HIGHLY CORROSION-RESISTANT Sn-Zn COATING STEEL FOR AUTOMOTIVE FUEL TANKS

Yasuto Goto, Shinichi Yamaguchi, Masao Kurosaki, Toshinori Mizuguchi, Yusho Oyama, Teruaki Izaki

Nippon Steel Corporation, Japan

B-12-2 THE DEVELOPMENT OF PRE-PAINTED STEEL SHEET FOR FUEL TANK OF VERSATILE ENGINE

Kohei Ueda, Hiroshi Kanai, Kengo Yoshida, Shiro Kamiyama, Shizuo Kimura

1Nippon Steel Corporation, Japan, 2Honda Engineering Co., Ltd., Japan

B-12-3 DEVELOPMENT OF ONE-SIDE CHROMATED GALVANNEALED STEEL FOR FUEL TANKS IN TWO-WHEELERS

Shantanu Chakrabarti, T. Venugopalan, Arun K. Singh, Kinshuk Roy, N. Rajesh

TATA STEEL, India

C-1 Zinc Alloy Coated Steels

C-1-1 SOLIDIFICATION STRUCTURE FORMATION OF Zn-Al ALLOY IN HOT DIP GALVANIZED PROCESS

Hideyuki Yasuda, Tomoya Nagira, Hiroshi Harada, Takashi Sawai, Hidetoshi Sindo, Kazumi Nishimura

1Osaka University, Japan, 2Nippon Steel Corporation, Japan

C-1-2 Ti-INDUCED GRAIN REFINEMENT OF 5 wt. % Al-Zn COATINGS

Etienne J. Petit, Bruno Gay

1LETAM (UMR 7078 CNRS-Université de Metz), France, 2Umicore Research, Belgium

C-1-3 EFFECT OF ANNEALING PROCEDURE ON PHASE FORMATION IN ZINC MAGNESIUM ALLOY COATINGS ON STEEL SHEETS

Bert Scheffel, Olaf Zywitzki, Christoph Metzner

Fraunhofer Institute Electron Beam and Plasma Technology (FEP), Germany

C-1-4 INFLUENCE OF Si CONTENT IN HOT DIP BATH ON STRUCTURE AND FORMABILITY OF 55%Al-Zn COATINGS

Toshihiko Ooi, Yoshiharu Sugimoto, Sakae Fujita

JFE Steel Corporation, Japan
C-2 Construction Applications I

C-2-1 Keynote
RECENT PROGRESS OF ZINC AND ZINC-ALLOY COATED STEEL SHEETS FOR CONSTRUCTION APPLICATIONS ................................................................. 568
Takeshi Shimizu
Nisshin Steel Co., Ltd., Japan

C-2-2 HOT DIP ZnAlMg COATINGS: MICROSTRUCTURE AND FORMING PROPERTIES ................................................................. 574
Margot Vlot, Marga Zuijderwijk, Matthijs Toose, Louisa Elliott, Rob Bleeker,
Theo Maalman
Corus Research Development and Technology, The Netherlands

C-2-3 INFLUENCE OF MG ADDITIONS ON ZN-5%AL HOT DIPPING ......................................................... 580
L. Suarez1, P. Camba1, F. Leysen1, C. Masquelier2, D. Waricher1, Y. Houbart2
1Ghent University, Belgium, 2Innovative Coating Application, Belgium

C-2-4 CORROSION RESISTANCE OF ZN-11%AL-3%Mg-0.2%Si COATED STEEL SHEET AFTER SHELTERED OUTDOOR EXPOSURE TEST IN MIYAKOJIMA .... 586
Yoshio Kimata, Akira Takahashi, Kenichi Asai
Nippon Steel Corporation, Japan

C-2-5 CORROSION PROPERTIES OF MODEL ZINC-MAGNESIUM ALLOYS ......................................................... 592
Tomas Prosek1, Andrej Nazarov1, Ulf Bexell2, Dominique Thierry1, Jan Serak1
1Institut de la Corrosion / French Corrosion Institute, France, 2Dalarna University, Sweden, 3Institute of Chemical Technology, Czech Republic

C-3 Construction Applications II

C-3-1 Keynote
APPROACH TO THE DECREASE OF ENVIRONMENT-LOADING MATERIALS IN HOUSING INDUSTRY ................................................................. 598
Yoshihiro Tsujimoto, Norihito Ikeda
Sekisui House, Ltd., Japan

C-3-2 ANTI DIRT PICKUP COATINGS BASED ON BLOCKED CARBOXYLIC ACID/EPoxy CURING SYSTEM WITH HYDROPHILIC SURFACE ......................................................... 601
Hiroki Mizutani, Toshio Yamamoto, Futoshi Nakanishi
BASF Coatings Japan Ltd., Japan

C-3-3 DEVELOPMENT OF A NEW ACCELERATED CORROSION TEST FOR COIL COATED MATERIALS USED IN THE BUILDING SECTOR ......................................................... 607
Dominique Thierry1, Per -Erik Augustsson2, Martin Jourdier2
1French Corrosion Institute, France, 2SSAB Tumplät AB, Sweden, 3Arcelor Research Liege, Belgium

C-4 Corrosion Mechanisms, Monitoring and Life Prediction I

C-4-1 CALCULATION OF RELATIVE HUMIDITY IN EQUILIBRIUM WITH WATER FILMS CONTAINING STRONG ELECTROLYTE BY THERMODYNAMIC DATA .. 613
Tadashi Shinohara1, Akira Tahara1, Yuji Hosoya1, Wataru Oshikawa2, Shin-ichi Motoda3
1National Institute for Materials Science, Japan, 2University of the Ryukyus, Japan, 3Tokyo University of Marine Science and Technology, Japan
C-4-2 INHERENT DELAMINATION PROTECTION BY NOVEL ZINC ALLOYS
Michael Rohwerder, Andrey Lyapin, Florin Turcu
Max-Planck-Institut für Eisenforschung, Germany

C-4-3 NUMERICAL ANALYSIS OF EDGE CORROSION OF GALVANIZED STEEL SHEETS
Nobuhiko Okada, Masamitsu Matsumoto, Masanari Kimoto, Takeo Kudo
Sumitomo Metal Industries, Ltd., Japan

C-4-4 MORPHOLOGY OF CORROSION PRODUCTS FROM EDGECORROSION OF RESIDUAL COATED STEEL SHEETS
Akira Tahara, Tadashi Shinohara
Corrosion group, National Institute for Materials Science, Japan

C-5 Corrosion Mechanisms, Monitoring and Life Prediction II

C-5-1 CUT EDGE CORROSION MECHANISM OF COATED STEELS EXPOSED TO CYCLIC CONDITIONS OF WET AND DRY
Atsushi Nishikata, Toyofumi Tsuda, Tooru Tsuru
Tokyo Institute of Technology, Japan

C-5-2 ANALYSIS OF EDGE CORROSION OF ZINC-PLATED STEEL IN HUMID ATMOSPHERIC CORROSION USING MULTIPLE ELECTRODE SYSTEM
Kazuhisa Azumi, Kei Iokibe
Hokkaido University, Japan

C-5-3 CORROSION PRODUCTS ON CUT EDGE SURFACE OF ZINC-COATED STEELS IN HUMIDIFIED AIR IN THE PRESENCE OF NaCl PRECIPITATE BY RAMAN SPECTROSCOPY
Toshiaki Ohtsuka, Yasuhisa Abe
Hokkaido University, Japan

C-5-4 THE EFFECT OF LOW LEVEL MAGNESIUM ADDITIONS ON THE MICROSTRUCTURE AND CORROSION RESISTANCE OF ZINC ALUMINUM ALLOY GALVANIZED STEELS
Jonathan Elvins¹, John A. Spittle², David A. Worsley²
¹Corus Colors, UK, ²University of Wales, UK

C-5-5 CORROSION RESISTANCE OF PRE-PAINTED Zn-6%Ai-3%Mg ALLOY COATED STEEL SHEET
Satoshi Yamamoto, Fumiki Kumon, Toshie Taomoto, Hiroshi Entani
NISSHIN STEEL Co., LTD., Japan

C-6 Corrosion Mechanisms, Monitoring and Life Prediction III

C-6-1 EFFECT OF AI CONTENT ON STRUCTURE OF CORROSION PRODUCT FILMS IN THE EARLY STAGES ON HOT-DIP Zn-AI COATINGS
Katsuhiko Nishihara¹, Masamitsu Matsumoto¹, Masanari Kimoto¹, Takeo Kudo¹,², Hitoshi Uchida², Yuichi Haruyama², Kazuhiro Kanda², Shinji Matsui²
¹Sumitomo Metal Industries LTD., Japan, ²University of Hyogo, Japan

C-6-2 IMPROVING OF PROTECTION OF ZINC-ALUMINUM ALLOY COATED STEELS AGAINST CORROSION BY ANODIZING
Masatoshi Sakairi¹, Yoshiyuki Uchida²
¹Hokkaido University, Japan, ²Nagoya Aerospace Systems, Mitsubishi Heavy Industries, LTD., Japan.
| C-6-3 | EVALUATION OF CORROSION RESISTANCE BY NEW ACCELERATED CORROSION TEST FOR ZINC-COATED STEEL SHEETS USED IN ELECTRICAL APPLIANCES | Hiroshi Kajiyama, Sakae Fujita  
JFE Steel Corporation, Japan |
|---|---|---|
| C-6-4 | ANALYTICAL COMPARISON BETWEEN NATURAL AND ARTIFICIAL WEATHERING OF ORGANIC COATED GALVANISED STEEL. | F. Deflorian, S. Rossi, M. Fedel  
University of Trento, Italy |
| C-6-5 | ENSURING ACCURACY IN TOTAL LIFE PREDICTION FOR HOT-DIP COATED STEEL IN MARINE ENVIRONMENTS | Qiyang Liu, David Willis, Udo Bucher  
BlueScope Steel Limited, Australia |

### C-7 Corrosion Mechanisms, Monitoring and Life Prediction IV

| C-7-1 | Keynote  
CORROSION PERFORMANCE OF ZINC-COATED STEELS -- MECHANISM, LIFE PREDICTION AND CORROSIVITY MAPPING | X.G. Zhang  
Teck Cominco Metals Ltd., Canada |
|---|---|---|
| C-7-2 | A NEW INDEX TO EVALUATE PERFORATION CORROSION RESISTANCE OF COATED STEEL SHEETS FOR AUTOMOTIVE PANELS IN ACTUAL USE ENVIRONMENTS | Daisuke Mizuno, Katsuya Hoshino, Sakae Fujita  
JFE Steel Corporation, Japan |
| C-7-3 | EVALUATION OF AUTOMOBILE CORROSION ENVIRONMENTS BY ACM TYPE CORROSION SENSOR | Sachiko Suzuki, Daisuke Mizuno, Sakae Fujita  
JFE Steel Corporation, Japan |
| C-7-4 | APPLICATION OF VISUAL OBSERVATION TECHNIQUES TO GALVANIC CORROSION OF FE-ZN COUPLES | Eiji Tada, Hiroyuki Kaneko  
Akita University, Japan |
| C-7-5 | LOCALIZED CORROSION OF GALVANIZED STEEL IN SEAWATER | Jun'ichi Sakai¹, Yoichi Makimizu¹²  
¹Waseda University, Japan, ²JFE Steel Corporation, Japan |

### C-8 Appliance Applications

| C-8-1 | Keynote  
TRENDS OF ELECTRIC HOME APPLIANCES AND EXPECTATIONS OF SURFACE-COATED STEEL SHEETS | Yoshifumi Moriya  
Matsushita Electric Industrial Co., Ltd. Matsushita Home Appliances Company, Japan |
|---|---|---|
| C-8-2 | DEVELOPMENT OF HEAT RELEASING STEEL SHEET | Yasuo Hirano¹, Takeshi Watase¹, Hideaki Kuwabara², Kazuo Takahashi², Masahiko Mitsuda²  
¹Kobe Steel, Ltd., Japan, ²Technical Development Group, Japan |
C-8-3 THE INFLUENCE OF THE SURFACE CHARACTERISTICS ON ANTI FINGERPRINT PROPERTY
Hidehiro Yamaguchi, Tatsuya Suzuki, Kensuke Mizuno
NIHON PARKERIZING CO., LTD., Japan

C-8-4 DEVELOPMENT OF ANTISTATIC PRE-COATED STEEL SHEET
Hiroyasu Furukawa, Hiroshi Kanai, Kenji Inada
Nippon Steel Corporation, Japan

C-8-5 EFFECT OF CURING METHODS ON SLIDING PROPERTIES OF THIN ORGANIC COMPOSITE COATED STEEL SHEETS
Takeshi Matsuda, Takahiro Kubota
JFE Steel Corporation, Japan

C-9 Conversion Coating I
C-9-1 Keynote
RECENT PROGRESS IN HEXAVALENT CHROMIUM FREE COATED STEEL SHEETS
Masamitsu Matsumoto
Sumitomo Metal Industries, Ltd., Japan

C-9-2 MICROSTRUCTURE OF CHROMATE-FREE COATINGS AND THEIR CORROSION RESISTANCE
Hisato Noro, Kazuhisa Okai, Akira Matsuzaki, Naoto Yoshimi
JFE Steel Corporation, Japan

C-9-3 THREE YEARS OF INDUSTRIAL PRODUCTION WITH CR(VI)-FREE PASSIVATION TREATMENTS
J. De Strycker, F. Hörzenberger, C. Xhoffer, S. Siau
Arcelor Mittal Industry research Gent, OCAS NV, Belgium

C-10 Conversion Coating II
C-10-1 CORROSION PROTECTION MECHANISM OF NOVEL ORGANIC CHROMATE-FREE COIL COATING SYSTEMS
Michael Dombusch, Markus Hickl, Kristof Wapner, Lothar Jandel
BASF Coatings AG, Germany

C-10-2 CHROME-FREE TREATMENTS (INORGANIC AND ORGANIC TREATMENTS) FOR HOT-DIP ZN-6MASS%AL-3MASS%Mg ALLOY COATED STEEL SHEET
Koichiro Ueda, Masanori Matsuno, Shinya Furukawa, Hirofumi Taketsu
Nissin Steel Co., Ltd., Japan

C-10-3 PROPERTIES OF NEW CHROMATE-FREE ELECTROGALVANIZED STEEL SHEETS WITH NONRESINOUS COATINGS
Taihei Kaneto, Ikuo Kikuchi, Atsushi Morishita, Shinichi Yamaguchi, Yoichiro Mori, Ikuo Yamaoka, Hidetoshi Shindo
Nippon Steel Corporation, Japan

C-11 Conversion Coating III
C-11-1 THE DEVELOPMENT OF A CHROMIUM-FREE SEALING FOR ZINC-PHOSPHATED ELECTRO-GALVANIZED STEEL SHEETS
Katsuyuki Kawakami, Junichi Uchida, Kensuke Mizuno, Ryosuke Sako
NIHON PARKERIZING CO., LTD., Japan
C-11-2  PAINTABILITY OF TRADITIONAL AND Cr(VI)-FREE CONVERSION LAYERS ON GALVANISED STEELS

Szilvia Köszegi, Éva Dénes
DUNAFERR Co. Ltd., Hungary

C-11-3  TEMPORARY CORROSION PROTECTION OF GALVANIZED STEEL – A NEW, FLUORIDE-FREE, AND HEAVY METAL-FREE TECHNOLOGY

Walter Bertkau¹, Manfred Essig¹, Alexander Göthlich¹, Mirjam Herrlich-Loos¹,
Helmut Witteler¹, Grace X. Showalter², Kiyonari Matsuoka³
¹BASF AG, Germany, ²BASF Corporation, USA, ³BASF Japan Ltd., Japan

C-11-4  ENVIRONMENTALLY-FRIENDLY POST TREATMENT OF VARIOUS METALLIC COATED STEELS

Jong Min Kim, Yongsug Chung
Dongbu Steel, Korea
