Using AI to Motivate Greater Participation in Computer Science

Papers from the AAAI Spring Symposium

*Mehran Sahami, Chair*

Technical Report SS-08-08

AAAI Press
Menlo Park, California
Contents

Long Papers

Robotics and AI as a Motivator for the Attraction and Retention of Computer Science Undergraduates in Canada / 2
John Anderson and Jacky Baltes

A New Start: Innovative Introductory AI-Centered Courses at Cornell / 8
Eric Breck, David Easley, K-Y Daisy Fan, Jon Kleinberg, Lillian Lee, Jennifer Wosford, and Ramin Zabih

200 Students Can't Be Wrong! GamesCrafters, a Computational Game Theory Undergraduate Research and Development Group / 14
Yanpei Chen, Patricia C. Fong, Jerry Hong, Deepa Mahajan, Cynthia Okita, David Eitan Poll, Alan Roytman, Ofer Sadgait, and Daniel D. Garcia

Artificial Intelligence for Non-Majors at Multiple Levels / 20
Andrea Pohoreckyj Danyluk

Leveraging AI's Breadth in CS 1 / 26
Zachary Dodds

Experiences with Artificial Intelligence as an Undergraduate Creative Capstone Course / 32
V. Scott Gordon

Robot Diaries: Broadening Participation in the Computer Science Pipeline through Social Technical Exploration / 38
Emily Hamner, Tom Lauwers, Debra Bernstein, Iliah Nourbakhsh, Carl DiSalvo

There's Something about AI Exercises / 44
Wayne Iba

Robotics as a Component of a General Education Course / 50
Susan P. Imberman and Sarah Zeitkowitz

Engaging Computing Students with AI and Robotics / 55
Deepak Kumar, Doug Blank, Tucker Balch, Keith O'Hara, Mark Guzdial, and Stewart Tansley

Wiimote Interfaces for Lifelong Robot Learning / 61
Micah Lapping-Carr, Odest Chadwicke Jenkins, Daniel H. Grollman, Jonas N. Schwefteger, and Theodora R. Hinkle

Throw Down an AI Challenge / 67
Todd W. Neller, Ingrid Russell, and Zdravko Markov

Synergizing AI and OOSE: Enhancing Interest in Computer Science through Game-Playing and Puzzle-Solving / 74
T. M. Rao and Sandeep Mitra
Using Artificial Intelligence to Help Bridge Students from High School to College / 80
Elizabeth Sklar, Simon Parsons, Sheila Tejada, Susan Lowes, M Q Azhar,
Samir Chopra, Richard Jansen, and Ira Rudowsky

Using Science Fiction in Teaching Artificial Intelligence / 86
Milind Tambe, Anne Balsamo, and Emma Bowring

AI, AIBO and ART: Inspiring Interaction with Computer Science / 92
Sheila Tejada

Short Papers

AI and Developing Socially-Engaged Computational Thinkers / 98
Douglas H. Fisher

Restructuring the Introductory Computer Science Course with
Topics from AI / 100
Timothy Huang

Iterative Design of a Robot-Centered Curriculum for
Introduction to Computer Science / 102
Tom Lauwers and Illah Nourbakhsh

Can Computers Think? An Introduction to Computer Science,
Programming, and Artificial Intelligence / 104
Kristina Striegnitz and Valerie Barr

Improving CS Student Retention with Intelligent Agents / 106
Fang Tang, Robert W. Kerbs, and Gilbert S. Young

SpellBots: Using Autonomous Robotics to Inspire Women to
Participate in Computer Science / 108
Andrew B. Williams and Whitney O'Banner

The ARTSI Alliance: Recruiting Underrepresented Students to
Computer Science and Robotics to Improve Society / 110
Andrew B. Williams, David S. Touretzky, LaVonne Manning, Jessie J. Walker,
Chutima Boonthum, Jeffrey Forbes, and Jeyfus T. Doswell
