Textiles for cold weather apparel

Edited by
J. Williams

The Textile Institute

CRC Press
Boca Raton Boston New York Washington, DC

WOODHEAD PUBLISHING LIMITED
Oxford Cambridge New Delhi
Part I  Material and design issues in cold weather clothing

1  Comfort and thermoregulatory requirements in cold weather clothing  3
   R. Rossi, Empa Materials Science and Technology, Switzerland

   1.1  Introduction  3
   1.2  Human thermoregulation in the cold  4
   1.3  Clothing and comfort  6
   1.4  Thermal and tactile comfort in the cold  7
   1.5  New trends in thermoregulatory textiles for cold protection  14
   1.6  References  15

2  Thermal insulation properties of textiles and clothing  19
   G. Song, University of Alberta, Canada

   2.1  Introduction  19
   2.2  Thermal comfort  20
   2.3  Heat transfer in fabrics  21
   2.4  Moisture transport in fabrics  23
   2.5  Fibre properties and thermal insulation  24
   2.6  Yarn/fabric structure and thermal insulation  25
   2.7  Predicting heat and moisture transfer in fabrics  27
   2.8  Conclusions  30
   2.9  References  30
3 Assessing fabrics for cold weather apparel: the case of wool 33
R. M. LAING, University of Otago, New Zealand

3.1 Introduction 33
3.2 Developments and demonstration of efficacy of wool apparel 35
3.3 Summary and future trends 48
3.4 Sources of further information and advice 51
3.5 References 52

4 Coating and laminating fabrics for cold weather apparel 56
R. LOMAX, Baxenden, a Chemtura Company, UK

4.1 Introduction 56
4.2 Historical aspects and evolution of the modern industry 57
4.3 Breathable membranes 61
4.4 Manufacture and properties of coated and laminated fabrics 67
4.5 Testing of coated and laminated fabrics 72
4.6 Environmental issues 76
4.7 Current applications 78
4.8 Future trends 80
4.9 Sources of further information and advice 81
4.10 References 82

5 The use of smart materials in cold weather apparel 84
J. Hu and MURUGESH BABU K., Hong Kong Polytechnic University, Hong Kong

5.1 Introduction 84
5.2 Design requirements for cold weather clothing 85
5.3 Types of smart fibres and fabrics 89
5.4 The use of shape-memory materials 92
5.5 The use of phase-change materials 101
5.6 Future trends 107
5.7 References and further reading 109

6 Biomimetics and the design of outdoor clothing 113
V. KAPSALI, University of the Arts London, UK

6.1 Introduction 113
6.2 Inspiration from nature 114
6.3 Biological paradigms for outdoor clothing 118
6.4 Future trends 128
6.5 Sources of further information and advice 128
6.6 References 129
7 Designing for ventilation in cold weather apparel 131
N. GHADDAR and K. GHALI, American University of Beirut, Lebanon

7.1 Introduction: importance and function of ventilation in cold weather apparel 131
7.2 Water vapour transport through cold weather textiles at low temperatures 133
7.3 Layering cold weather clothing 135
7.4 Mechanism of ventilation in cold weather 136
7.5 Factors affecting ventilation 142
7.6 Recommendations and advice on clothing design for ventilation 147
7.7 Future trends 149
7.8 References 149
7.9 Nomenclature 151

8 Factors affecting the design of cold weather performance clothing 152
J. BOUGOURD, University of the Arts London, UK and J. McCANN, University of Wales, Newport, UK

8.1 Introduction 152
8.2 Traditional design development processes 153
8.3 Stages in the process 155
8.4 Case studies: motorcycling and climbing 184
8.5 Future trends 190
8.6 Acknowledgements 191
8.7 Sources of further information and advice 191
8.8 References 191

Part II Evaluation and care of cold weather clothing

9 Standards and legislation governing cold weather clothing 199
H. MAKINEN, Finnish Institute of Occupational Health, Finland

9.1 Introduction 199
9.2 Development of legislation and standards 200
9.3 Directives on personal protective equipment 201
9.4 European standards for cold protective clothing 203
9.5 Cold protective clothing standards outside Europe 212
9.6 Future trends 212
9.7 Sources of further information and advice 213
9.8 References 214
10 Laboratory assessment of cold weather clothing 217
G. Havenith, Loughborough University, UK

10.1 Introduction 217
10.2 Clothing properties relevant in cold 219
10.3 Material/fabric testing 220
10.4 Garment and ensemble testing: physical apparatus 223
10.5 Garment and ensemble testing: human subjects 229
10.6 Special applications 233
10.7 Future trends 239
10.8 References 240

11 Evaluation of cold weather clothing using manikins 244
E. A. McCulloch, Kansas State University, USA

11.1 Introduction 244
11.2 Manikin tests vs. fabric tests 244
11.3 Thermal manikins 245
11.4 Measuring the thermal resistance of cold weather clothing systems 246
11.5 Measuring the evaporative resistance of cold weather clothing systems 249
11.6 Moving manikins 251
11.7 Using manikins under transient conditions 251
11.8 Temperature ratings 253
11.9 Conclusions 253
11.10 References 254

12 Human wear trials for cold weather protective clothing systems 256
I. Holmér, Lund University, Sweden

12.1 Introduction 256
12.2 Types of human wear trials 257
12.3 Discussion 270
12.4 Sources of further information and advice 271
12.5 References 272

13 Care and maintenance of cold weather protective clothing 274
N. Kerr, J. C. Batcheller and E. M. Crown, The University of Alberta, Canada

13.1 Introduction 274
13.2 Home (domestic) laundering procedures 276
13.3 Professional textile care 281
