# Table of Contents

Preface

**Chapter 1. Introduction**

1.1 System
1.2 Real Time System
1.3 Hardware/Software Co-Design
1.4 Interactive Graphical User Interface (IGUI)

**Chapter 2. BID Architecture**

2.1 Integration of Sensors and Vision
2.2 Computation and Decision Making
2.3 Human Movement Regeneration and Reconstruction
   2.3.1 Stand Still
   2.3.2 One Step Forward Movement
   2.3.3 One Step Sideways
   2.3.4 Kneeling
   2.3.5 Walking Few Steps Forward
2.4 Human Test Subject

**Chapter 3. Bio-Instrumentation**

3.1 Sensing Elements and their Measurements
   3.1.1 Force Sensing Resistors
   3.1.2 FlexiForce A201 Sensor
   3.1.3 Wireless Accelerometers and Base Station
   3.1.4 Wireless Inertial Measurement Unit and Base Station
3.2 Vision Elements and their Measurements
   3.2.1 Digital Video Camera
   3.2.2 Peak Motus based Vision System
   3.2.3 Motion Analysis Optical Camera System
### Chapter 4. Virtual Technologies (Instrumentation/Reality)

#### 4.1 Tools
- 4.1.1 Video Save to File
- 4.1.2 Call Function (Path)
- 4.1.3 Call Function (Array Path)
- 4.1.4 Firewire Acq
- 4.1.5 FSR Acq
- 4.1.6 FSR to Newton
- 4.1.7 Accel Set
- 4.1.8 Accel Grab
- 4.1.9 Accel to D
- 4.1.10 Accel to G

#### 4.2 Applications
- 4.2.1 Crop Video
- 4.2.2 Crop Multiple Video
- 4.2.3 Accel Ping Manual
- 4.2.4 Accel Ping Auto

#### 4.3 Examples
- 4.3.1 USB Video Save
- 4.3.2 Crop Video
- 4.3.3 Crop Multiple Video
- 4.3.4 Save Firewire IMAQ1394
- 4.3.5 Firewire Acq
- 4.3.6 FSR Acq
- 4.3.7 FSR Acq to Newton
- 4.3.8 Accel Single Acq
- 4.3.9 Accel Multiple Acq
- 4.3.10 Accel Acq to Newton

### Chapter 5. Transformations, Inverse Kinematics/Dynamics

#### 5.1 Translation
#### 5.2 Rotation
#### 5.3 Scaling

#### 5.4 Body Segments and their Reference Frames
- 5.4.1 Kinematics Functions and Generalized Coordinates

# Table of Contents

7.3.2 Data Logging using Wireless Sensors ................................. 172

7.4 Case Studies .................................................................................. 179
   7.4.1 Case Studies 1: Foot Movement Analysis System .................. 179
   7.4.2 Case Studies 2: Ultrasound sensors for aiming ...................... 187
   7.4.3 Case Study 3: Integrated Motion and Force Acquisition System for Tracking (IMFAST) ...................... 194
   7.4.4 Case Study 4: Interactive Accelerometer System for Lawn Bowling .................................................. 220

Chapter 8. Vision Integration for Movement Analysis ......................... 269

8.1 Markerless Video Tracking ........................................................... 269

8.2 Optical Tracking ............................................................................ 271
   8.2.1 Passive Marker System ......................................................... 272
   8.2.2 Active Marker System ......................................................... 273

8.3 Case Studies ................................................................................. 274
   8.3.1 Case Study 1: Badminton Tracking System (BaTS) ................. 274
   8.3.2 Case Study 2: Movement Cue Analysis in Karate .................. 293
   8.3.3 Case Study 3: Laser Aiming Monitoring System .................... 308
   8.3.4 Case Study 4: Intelligent Musculosoccer Simulator ............... 349

Chapter 9. Hybrid Technology ............................................................ 392

9.1 Hybrid Sensor Technology ........................................................... 392
   9.1.1 Accelerometer + Gyroscopes + Magnetometer ....................... 393
   9.1.2 Accelerometer + Gyroscopes ................................................. 393
   9.1.3 Accelerometer + Gyroscopes + Optical Sensor ..................... 394

9.2 Hybrid Visual Sensors Technology ................................................ 394

9.3 Case Studies ................................................................................. 395
   9.3.1 Case Study 1: System for Determining Within-Stroke Variations of Speed in Swimming (S.W.i.S.S.) ...................... 395
   9.3.2 Case Study 2: Gait Phase Detection System (GPDS) based on Kinetic and Kinematics Parameters .................. 418

Index ........................................................................................................ 437
