Computational Aesthetics 2009

Eurographics Workshop on Computational Aesthetics in Graphics, Visualization and Imaging

Victoria, British Columbia, Canada
May 28 – 30, 2009

Conference Chair
Neil Dodgson, University of Cambridge, UK

Local Organization Chair
Brian Wyvill, University of Victoria, Canada

Program Chairs, Technical Program
Oliver Deussen, University of Konstanz, Germany
Peter Hall, University of Bath, UK

Program Chairs, Arts Program
Steve Gibson, University of Victoria, Canada
Gerry Hushlak, University of Calgary, Canada
Jeffrey Shaw, University of New South Wales, Australia

Publicity Chair
Tobias Isenberg, University of Groningen, The Netherlands

Administration
Shawna Wyvill, Victoria, Canada

Proceedings Production Editor
Dieter Fellner (TU Darmstadt & Fraunhofer IGD, Germany)
Table of Contents

Table of Contents ................................................................. iii

TECHNICAL PROCEEDINGS

Using Curves

Magnetic Curves: Curvature-Controlled Aesthetic Curves Using Magnetic Fields ................. 1
*Ling Xu and David Mould*

A Painterly Rendering Based on Stroke Profile and Database ............................................. 9
*SangHyun Seo, JinWan Park, and KyungHyun Yoon*

Generalized Descriptions for the Procedural Modeling of Ancient East Asian Buildings .... 17
*Soon Tee Teoh*

Depicting the Natural World

Controlling Color Regions of Leaves with Painting Techniques for Landscape Arts .............. 25
*Yasuhiro Akagi, Mitsunori Kataama, and Katsuhiro Kitajima*

Automatic Views of Natural Scenes ........................................................................... 33
*Margarita Bratkova, William B. Thompson, and Peter Shirley*

Style Nodes and Repolygonization for Hierarchical Tree-Based Implicit Surface Modelling .... 41
*Pauline Jepp, Bruno Araujo, Joaquim Jorge, Brian Wyvill, and Mario Costa Sousa*

Aesthetic Analyses

Comparing the Readability of Graph Layouts using Eyetracking and Task-oriented Analysis ... 49
*Mathias Pohl, Markus Schmitt, and Stephan Diehl*

Image Statistics for Clustering Paintings According to their Visual Appearance ................. 57
*Marcel Spehr, Christian Wallraven, and Roland W. Fleming*
# Table of Contents

## Using and Modelling Cameras

CubeCam: A Screen-space Camera Manipulation Tool .................................................. 65  
*Nisha Sudarsanam, Cindy Grimm, and Karan Singh*

ARTrans: Attributed Rational Tensor Cameras ......................................................... 73  
*Chuan Li, Peter Hall, and Philip Willis*

Consistent Scene Illumination using a Chromatic Flash ........................................ 83  
*Min H. Kim and Jan Kautz*

## Image Manipulation

Movie Posters from Video by Example ................................................................. 91  
*Stephen Brooks*

Adding Lighting and Viewing Effects to Digital Images ........................................ 99  
*Cindy Grimm*

Contrast Brushes: Interactive Image Enhancement by Direct Manipulation ............. 107  
*Neil A. Dodgson, Mark Grundland, and Rahul Vohra*

## Automated Synthesis

Automated Landscape Painting in the Style of Bob Ross .................................... 115  
*Craig S. Kaplan, Alex Kalaidjian, and Stephen Mann*

Aesthetic Placement of Points Using Generalized Lloyd Relaxation ....................... 123  
*Oliver Deussen*

## Aesthetics

Distinctive Parameters of Expressive Motion ...................................................... 129  
*Lyn Bartram and Ai Nakatani*

Aesthetic Appraisal of Art - from Eye Movements to Computers .......................... 137  
*Christian Wallraven, Douglas W. Cunningham, Jaume Rigau, Miquel Feixas, and Mateu Sbert*

## ARTISTIC PROCEEDINGS

Art Catalogue ........................................................................................................... 145
