# **Modern Blast Furnace Ironmaking**

**an introduction**

---

With contributions from  
**Renard Chaigneau  
Tim Vander  
Jennifer Wise**

Second Edition, 2009

# Contents

Preface		v
Contents		vii
List of Symbols and Abbreviations		xi
Chapter I	Introduction of the Blast Furnace Process	1
1.1	What is driving the furnace?	4
1.2	The equipment	6
1.3	Book overview	10
Chapter II	The Blast Furnace: Contents and Gas Flow	11
2.1	The generation of gas and gas flow through the burden	11
2.2	Furnace efficiency	15
2.3	An example of gas flow and contents of a blast furnace	16
Chapter III	The Ore Burden: Sinter, Pellets, Lump Ore	19
3.1	Introduction	19
3.2	Iron ore	20
3.3	Quality demands for the blast furnace burden	22
3.4	Sinter	26
3.5	Pellets	30
3.6	Lump ore	34
3.7	Interaction of burden components	35
Chapter IV	Coke	37
4.1	Introduction: function of coke in the blast furnace	37
4.2	Coal blends for coke making	38
4.3	Coke quality concept	39
4.4	Coke size distribution	43
4.5	Mechanical strength of coke	44
4.6	Overview of international quality parameters	46
Chapter V	Injection of Coal, Oil and Gas	47
5.1	Coal injection: equipment	48
5.2	Coal specification for PCI	49
5.3	Coal injection in the tuyeres	51
5.4	Process control with pulverised coal injection	52
5.5	Circumferential symmetry of injection	56
5.6	Gas and oil injectants	57

Chapter VI	Burden Calculation and Mass Balances	59
6.1	Introduction	59
6.2	Burden calculation: starting points	59
6.3	An example of a burden calculation	60
6.4	Process calculations: a simplified mass balance	61
Chapter VII	The Process: Burden Descent and Gas Flow Control	67
7.1	Burden descent: where is voidage created?	67
7.2	Burden descent: system of vertical forces	69
7.3	Gas flow in the blast furnace	71
7.4	Fluidisation and channelling	78
7.5	Burden distribution	78
7.6	Coke layer	84
7.7	Ore layer thickness	85
7.8	Erratic burden descent and gas flow	88
7.9	Blast furnace instrumentation	90
7.10	Blast furnace daily operational control	90
Chapter VIII	Blast Furnace Productivity and Efficiency	93
8.1	The raceway	93
8.2	Carbon and iron oxides	96
8.3	Temperature profile	104
8.4	What happens with the gas in the burden?	104
8.5	Oxygen and productivity	106
8.6	Use of metallic iron	107
8.7	How iron ore melts	107
8.8	Circumferential symmetry and direct reduction	112
Chapter IX	Hot Metal and Slag	115
9.1	Hot metal and the steel plant	115
9.2	Hot metal composition	116
9.3	Silicon reduction	117
9.4	Hot metal sulphur	118
9.5	Slag	118
9.6	Hot metal and slag interactions: special situations	122
Chapter X	Casthouse Operation	125
10.1	Objectives	125
10.2	Liquid iron and slag in the hearth	125
10.3	Removal of liquids through the taphole	127
10.4	Typical casting regimes	128
10.5	Taphole drill and clay gun	130
10.6	Hearth liquid level	131
10.7	Delayed casting	132
10.8	No slag casting	134
10.9	One-side casting	135
10.10	Not dry casts	137

10.11	Defining a dry hearth	139
10.12	Oxygen lancing	139
10.13	Cast data recording	140
Chapter XI	Special Situations	141
11.1	Fines in ore burden	141
11.2	Moisture input	143
11.3	Recirculating elements	144
11.4	Charging rate variability	145
11.5	Stops and start-ups	145
11.6	Blow-down	147
11.7	Blow-in from new	148
Glossary		151
Annex I	Further Reading	153
Annex II	References	154
Annex III	Rules of Thumb	156
Annex IV	Coke Quality Tests	157
Index		161
