Handbook of Research on Human Cognition and Assistive Technology: Design, Accessibility and Transdisciplinary Perspectives

Soonhwa Seok
Center for Research on Learning – eLearning Design Lab, University of Kansas, USA

Edward L. Meyen
Kansas University, USA

Boaventura DaCosta
Silers Research Group, USA
Table of Contents

Foreword .................................................................................................................. xx
Preface ...................................................................................................................... xxi
Acknowledgment ..................................................................................................... xxiii

Section 1
Human Cognition and Assistive Technology Design

Chapter 1
Human Cognition in the Design of Assistive Technology for Those with Learning Disabilities .... 1
Boaventura DaCosta, Solers Research Group, USA
Soonhwa Seok, Center for Research on Learning - eLearning Design Lab,
University of Kansas, USA

Chapter 2
Managing Cognitive Load in the Design of Assistive Technology for Those with Learning Disabilities ................................................................. 21
Boaventura DaCosta, Solers Research Group, USA
Soonhwa Seok, Center for Research on Learning - eLearning Design Lab,
University of Kansas, USA

Chapter 3
Multimedia Design of Assistive Technology for Those with Learning Disabilities .................. 43
Boaventura DaCosta, Solers Research Group, USA
Soonhwa Seok, Center for Research on Learning - eLearning Design Lab,
University of Kansas, USA

Chapter 4
Investigating Assistive Technologies using Computers to Simulate Basic Curriculum for Individuals with Cognitive Impairments ........................................... 61
Carolyn Kinsell, Solers Research Group, USA
Section 2
The Internet, Media, and Cognitive Loads

Chapter 5
Social Orthotics for Youth with ASD to Learn in a Collaborative 3D VLE

James Laffey, University of Missouri, USA
Janine Stichter, University of Missouri, USA
Matthew Schmidt, University of Missouri, USA

Chapter 6
Cognition Meets Assistive Technology: Insights from Load Theory of Selective Attention

Neha Khetrapal, University of Bielefeld, Germany

Chapter 7
Cognitive Load and Disorientation Issues in Hypermedia as Assistive Technology

Muhammet Demirbilek, Suleyman Demirel University, Turkey

Section 3
Software and Devices

Chapter 8
Multi-Sensory Environments and Augmentative Communication Tools

Cynthia L. Wagner, Lifeworks Services, USA
Jennifer Delisi, Lifeworks Services, USA

Chapter 9
Using Software to Deliver Language Intervention in Inclusionary Settings

Mary Sweig Wilson, Laureate Learning Systems, Inc., USA
Jeffrey Pascoe, Laureate Learning Systems, Inc., USA

Chapter 10
Switch Technologies

Cindy Nankee, UTLL (Universal Technology for Learning & Living), USA

Chapter 11
Point-and-Chat®: Instant Messaging for AAC Users

Benjamin Slotznick, Point-and-Read, Inc., USA

Chapter 12
Assistive Technology for Deaf and Hard of Hearing Students

Michael Fitzpatrick, New Mexico State University, USA
Raschelle Theoharis, Gallaudet University, USA
Chapter 13
A Longitudinal Case Study on the Use of Assistive Technology to Support Cognitive Processes across Formal and Informal Educational Settings ........................................ 192

Vivian Johnson, Hamline University, USA
Carol Price, Hamline University, USA

Section 4
Evaluation and Assessment

Chapter 14
Impact of Text-to-Speech Software on Access to Print: A Longitudinal Study ......................... 199

Joan B. Hodapp, Area Education Agency 267, USA
Cinda Rachow, Area Education Agency 13, USA

Chapter 15
Measure It, Monitor It: Tools for Monitoring Implementation of Text-to-Speech Software .......... 220

Joan B. Hodapp, Area Education Agency 267, USA
Cinda Rachow, Area Education Agency 13, USA

Chapter 16
Evaluating Systemic Assistive Technology Needs ................................................................. 239

Noel Estrada-Hernández, University of Iowa, USA
James R. Stachowiak, University of Iowa, USA

Chapter 17
Developing Electronic Portfolios .......................................................................................... 251

Mary Ann Lowe, Nova Southeastern University, USA

Chapter 18
Assistive Technology Solutions for Individuals with Learning Problems: Conducting Assessments Using the Functional Evaluation for Assistive Technology (FEAT) ................ 264

Brian Bryant, University of Texas, USA
Soonhwa Seok, Center for Research on Learning - eLearning Design Lab,
University of Kansas, USA
Diana Bryant, University of Texas, USA

Section 5
Teacher Education

Chapter 19
Improving Assistive Technology Training in Teacher Education Programs: The Iowa Model .... 286

James R. Stachowiak, University of Iowa, USA
Noel Estrada-Hernández, University of Iowa, USA
Chapter 20
Effects of Assistive Technologies Combined with Desktop Virtual Reality in Instructional Procedures (1) ................................................................. 299
  Gary Dotterer, Oklahoma State University, USA

Chapter 21
Effects of Assistive Technologies Combined with Desktop Virtual Reality in Instructional Procedures (2) ........................................................................ 306
  Gary Dotterer, Oklahoma State University, USA

Chapter 22
Response to Intervention: Assistive Technologies which can Help Teachers with Intervention Programming and Assessment ........................................................................ 313
  Michael W. Dunn, Washington State University Vancouver, USA

Chapter 23
Assistive Technology for Teacher Education: From Research to Curriculum ................................................................. 325
  Marcie M. Belfi, University of Texas, USA
  Kristen E. Jones, University of Texas, USA

Chapter 24
Supporting Early Childhood Outcomes through Assistive Technology .................................................................................. 339
  Diane Plunkett, University of Kansas, USA
  Rashida Banerjee, University of Northern Colorado, USA
  Eva Horn, University of Kansas, USA

Section 6
Past, Present, and Future

Chapter 25
Assistive Technology’s Past, Present and Future .................................................................................................................. 360
  Barbara J. Kouba, California State University, San Bernardino, USA
  Brian Newberry, California State University, San Bernardino, USA

Chapter 26
Digital Inequity: Understanding the Divide as it Relates to Culture and Disability ................................................................. 374
  Monica R. Brown, New Mexico State University, USA
  Michael Fitzpatrick, New Mexico State University, USA
Chapter 27
Cognition and Learning
Blessing Nina Okrigwe, Rivers State College of Education, Nigeria
