Healthcare and the Effect of Technology: Developments, Challenges and Advancements

Stefane M. Kabene
Ecole des Hautes Etudes en Santé Publique (EHESP), France
Table of Contents

Preface ........................................................................................................................................... xvi
Acknowledgment .......................................................................................................................... xx

Section 1
Introduction and Overview of Technology in Health Care

Chapter 1
Health in the Digital World: Transformational Trends .............................................................. 1
  Kendall Ho, University of British Columbia, Canada

Chapter 2
The Effectiveness of Health Informatics .................................................................................... 13
  Francesco Paolucci, The Australian National University, Australia
  Henry Ergas, Concept Economics, Australia
  Terry Hannan, Australian College of Health Informatics, Australia
  Jos Aarts, Erasmus University, The Netherlands

Chapter 3
Closing the Gap: E-Health and Optimization of Patient Care ............................................... 38
  Malina Jordanova, Solar-Terrestrial Influences Institute, Bulgaria

Chapter 4
Risks and Benefits of Technology in Health Care .................................................................. 60
  Stefane M. Kabene, Ecole des Hautes Etudes en Santé Publique (EHESP), France
  Melody Wolfe, University of Western Ontario, Canada
Section 2
The Use of Technology:
From the Individual to the Community

Chapter 5
The Computer-Assisted Patient Consultation: Promises and Challenges
Aviv Shachak, University of Toronto, Canada
Shmuel Reis, Technion- Israel Institute of Technology, Israel

Chapter 6
The Electronic Patient Record: A Practicing Physician’s Perspective
Nicholas G. Bircher, University of Pittsburgh, USA

Chapter 7
Extending Health Services to Rural Communities: Telepediatrics in Queensland
Anthony C Smith, University of Queensland, Australia
Sisira Edirippulige, University of Queensland, Australia

Chapter 8
Health Service Quality Information Comparison: A Preliminary Investigation
Yun Wan, University of Houston, USA
Susan Evans-Mueller, HCA Shared Services Group, USA

Section 3
Who will put it in Place?

Chapter 9
Systems Engineering and Health Informatics: Context, Content, and Implementation
Kalyan Sunder Pasupathy, University of Missouri, USA

Chapter 10
Healthcare among the People: Teams of Leaders Concept (ToL) and the World of Technology-Oriented Global Healthcare
Dag von Lubitz, MedSMART Inc, USA
Section 4
Challenges:
Privacy and Data Record Linkage

Chapter 11
Will Privacy Concerns Derail the Electronic Health Record? Balancing the Risks and Benefits

Candace J. Gibson, The University of Western Ontario, Canada
Kelly J. Abrams, Canadian Health Information Management Association, Canada

Chapter 12
New Technology and Implications for Healthcare and Public Health: The Case of Probabilistic Record Linkage

Gulzar H. Shah, National Association of County and City Health Officials, USA
Kaveepan Lertwachara, California Polytechnic State University, USA
Anteneh Ayanso, Brock University, Canada

Section 5
Challenges: Ethics

Chapter 13
Biobanking: Justice, Social Consensus, and the Marginalized

Robert J. Barnet, Georgetown University, USA

Chapter 14
Functional Neuroimaging, Free Will, and Privacy

Nada Gligorov, Mount Sinai School of Medicine, USA
Stephen C. Krieger, Mount Sinai School of Medicine, USA

Section 6
Future Uses of Technology

Chapter 15
Integrating Supports for Ubiquitous Eldercare

Dario Bottazzi, Guglielmo Marconi Labs, Italy
Rebecca Montanari, University of Bologna, Italy
Tarik Taleb, NEC Research Laboratories, Germany
