MATRIX METHODS: Theory, Algorithms and Applications

Dedicated to the Memory of Gene Golub

Editors
Vadim Olshevsky
University of Connecticut, USA
Eugene Tyrtyshnikov
Russian Academy of Sciences, Russia
Contents

Preface ................................................................. vii

Algebra and Matrices

Operators Preserving Primitivity for Matrix Pairs ................. 2
  L. B. Beasley (Utah State University), A. E. Guterman (Moscow State University)

Decompositions of Quaternions and Their Matrix Equivalents ....... 20
  D. Janovská (Institute of Chemical Technology), G. Opfer (University of Hamburg)

Sensitivity Analysis of Hamiltonian and Reversible Systems Prone to Dissipation-Induced Instabilities ...................... 31
  O. N. Kirillov (Moscow State University)

Block Triangular Miniversal Deformations of Matrices and Matrix Pencils 69
  L. Klimenko (Information and Computing Centre of Ministry of Labour and Social Policy of Ukraine), V. V. Sergeichuk (Kiev Institute of Mathematics)

Determining the Schein Rank of Boolean Matrices .................. 85
  E. E. Marenich (Murmansk State Pedagogic University)

Lattices of Matrix Rows and Matrix Columns. Lattices of Invariant Column Eigenvectors ........................................... 104
  V. Marenich (Murmansk State Pedagogic University)

Matrix Algebras and Their Length ................................ 116
  O. V. Markova (Moscow State University)

On a New Class of Singular Nonsymmetric Matrices with Nonnegative Integer Spectra ............................................ 140
  T. Nahtman (University of Tartu), D. von Rosen (Swedish University of Agricultural Sciences)

Reduction of a Set of Matrices over a Principal Ideal Domain to the Smith Normal Forms by Means of the Same One-Sided Transformations 166
  V. M. Prokip (Pidstryhach Institute for Applied Problems of Mechanics and Mathematics)
Matrices and Algorithms

Nonsymmetric Algebraic Riccati Equations Associated with an M-Matrix: Recent Advances and Algorithms .......................... 176
D. A. Bini (University of Pisa), B. Iannazzo (University of Insubria), B. Meini (University of Pisa), F. Poloni (Scuola Normale Superiore of Pisa)

A Generalized Conjugate Direction Method for Nonsymmetric Large Ill-Conditioned Linear Systems ........................................ 210
E. R. Boudinov (FORTIS Bank, Brussels), A. I. Manevich (Dnepropetrovsk National University)

There Exist Normal Hankel (\phi, \psi)-Circulants of Any Order n .......... 222
V. N. Chugunov (INM RAS), Kh. D. Ikramov (Moscow State University)

On the Treatment of Boundary Artifacts in Image Restoration by Reflection and/or Anti-Reflection ................................. 227
M. Donatelli (University of Insubria), S. Serra-Capizzano (University of Insubria)

Zeros of Determinants of \lambda-Matrices .................................. 238
W. Gander (ETH, Zurich)

How to Find a Good Submatrix ............................................. 247
S. A. Goreinov (INM RAS), I. V. Oseledets (INM RAS), D. V. Savostyanov (INM RAS), E. E. Tyrtyshnikov (INM RAS), N. L. Zamarashkin (INM RAS)

Conjugate and Semi-Conjugate Direction Methods with Preconditioning Projectors ......................................................... 257
V. P. Il'in (Novosibirsk Institute of Comp. Math. and Math. Geophysics)

Some Relationships between Optimal Preconditioner and Superoptimal Preconditioner .................................................... 266
J.-B. Chen (Shanghai Maritime University), X.-Q. Jin (University of Macau), Y.-M. Wei (Fudan University), Zh.-L. Xu (Shanghai Maritime University)

Scaling, Preconditioning, and Superlinear Convergence in GMRES-Type Iterations ......................................................... 273
I. Kaporin (Computing Center of Russian Academy of Sciences)
Toeplitz and Toeplitz-Block-Toeplitz Matrices and Their Correlation
with Syzygies of Polynomials .............................................. 296
H. Khalil (Institute Camille Jordan), B. Mourrain (INRIA),
M. Schatzman (Institute Camille Jordan)

Concepts of Data-Sparse Tensor-Product Approximation in Many-Particle
Modelling ................................................................. 313
H.-J. Flad (TU Berlin), W. Hackbusch (Max-Planck-Institute,
Leipzig), B. N. Khoromskij (Max-Planck-Institute, Leipzig),
R. Schneider (TU Berlin)

Separation of Variables in Nonlinear Fermi Equation ...................... 348
Yu. I. Kuznetsov (Novosibirsk Institute of Comp. Math. and
Math. Geophysics)

Faster Multipoint Polynomial Evaluation via Structured Matrices ......... 354
B. Murphy (Lehman College), R. E. Rosholt (Lehman College)

Testing Pivoting Policies in Gaussian Elimination .......................... 357
B. Murphy (Lehman College), G. Qian (The City University of
New York), R. E. Rosholt (Lehman College), A.-L. Zheng (The
City University of New York), S. Ngnosse (The City University
of New York), I. Taj-Eddin (The City University of New York)

Newton's Iteration for Matrix Inversion, Advances and Extensions ...... 364
V. Y. Pan (Lehman College)

Truncated Decompositions and Filtering Methods with Reflective/Anti-
Reflective Boundary Conditions: A Comparison .......................... 382
C. Tablino Possio (University of Milano Bicocca)

Discrete-Time Stability of a Class of Hermitian Polynomial Matrices
with Positive Semidefinite Coefficients ................................... 409
H. K. Wimmer (University of Würzburg)

Matrices and Applications

Splitting Algorithm for Solving Mixed Variational Inequalities with
Inversely Strongly Monotone Operators .................................. 416
I. Badriev (Kazan State University), O. Zadvornov (Kazan State
University)

Multilevel Algorithm for Graph Partitioning .............................. 433
N. S. Bochkarev (Neurok), O. V. Diyankov (Neurok),
V. Y. Pravilnikov (Neurok)
2D-Extension of Singular Spectrum Analysis: Algorithm and Elements of Theory 449
N. E. Golyandina (St. Petersburg State University),
K. D. Usevich (St. Petersburg State University)

Application of Radon Transform for Fast Solution of Boundary Value Problems for Elliptic PDE in Domains With Complicated Geometry 474
A. I. Grebennikov (Autonomous University of Puebla)

Application of a Multigrid Method to Solving Diffusion-Type Equations 482
M. E. Ladonkina (Institute for Math. Modelling RAS),
O. Yu. Milukova (Institute for Math. Modelling RAS),
V. F. Tishkin (Institute for Math. Modelling RAS)

Monotone Matrices and Finite Volume Schemes for Diffusion Problems Preserving Non-Negativity of Solution 500
I. V. Kapyrin (Institute of Numerical Math. RAS)

Sparse Approximation of FEM Matrix for Sheet Current Integro-Differential Equation 510
M. Khapaev (Moscow State University), M. Yu. Kupriyanov (Nuclear Physics Institute)

The Method of Magnetic Field Computation in Presence of an Ideal Conductive Multiconnected Surface by using the Integro-Differential Equation of the First Kind 523
T. Kochubey (Southern Scientific Centre RAS), V. I. Astakhov (Southern Scientific Centre RAS)

Spectral Model Order Reduction Preserving Passivity for Large Multiport RCLM Networks 533
Yu. M. Nechepurenko (Institute of Numerical Math. RAS),
A. S. Potyagalo (Cadence), I. A. Karaseva (Moscow Institute of Physics and Technology)

New Smoothers in Multigrid Methods for Strongly Nonsymmetric Linear Systems 539
G. V. Muratova (Southern Federal University), E. M. Andreeva (Southern Federal University)

Operator Equations for Eddy Currents on Singular Carriers 546
J. Naumenko (Southern Scientific Centre RAS)
Matrix Approach to Modelling of Polarized Radiation Transfer in Heterogeneous Systems .................................................. 557
  T. A. Sushkevich (Keldysh Institute for Applied Mathematics),
  S. A. Strelkov (Keldysh Institute for Applied Mathematics),
  S. V. Maksakova (Keldysh Institute for Applied Mathematics)

The Method of Regularization of Tikhonov Based on Augmented Systems  579
  A. I. Zhdanov (Samara State Aerospace University),
  T. G. Parchaikina (Samara State Aerospace University)

Author Index ............................................................... 587
