# OPTIMIZATION AND OPTIMAL CONTROL

## Theory and Applications

Edited By

ALTANNAR CHINCHULUUN

Centre for Process and Systems Engineering,  
Imperial College London,  
South Kensington Campus,  
London SW7 2AZ, UK

PANOS M. PARDALOS

Department of Industrial and Systems Engineering,  
University of Florida,  
Gainesville, FL 32611, USA

RENTSEN ENKHBAT

School of Economic Studies,  
National University of Mongolia,  
Ulaanbaatar, Mongolia

IDER TSEVEENDORJ

Computer Science Department,  
Université de Versailles-Saint Quentin en Yvelines,  
Versailles, France

# Contents

<b>Sensibility Function as Convolution of System of Optimization Problems</b> <i>Anatoly Antipin</i> .....	1
<b>Post-optimal Analysis of Linear Semi-infinite Programs</b> <i>Miguel A. Goberna</i> .....	23
<b>On Equilibrium Problems</b> <i>Gábor Kassay</i> .....	55
<b>Scalarly Compactness, <math>(S)_+</math>-Type Conditions, Variational Inequalities, and Complementarity Problems in Banach Spaces</b> <i>George Isac</i> .....	85
<b>Quasi-equilibrium Inclusion Problems of the Blum–Oettli-Type and Related Problems</b> <i>Nguyen Xuan Tan and Lai-Jiu Lin</i> .....	105
<b>General Quadratic Programming and Its Applications in Response Surface Analysis</b> <i>Rentsen Enkhbat and Yadam Bazarsad</i> .....	121
<b>Canonical Dual Solutions for Fixed Cost Quadratic Programs</b> <i>David Yang Gao, Ning Ruan, and Hanif D. Sherali</i> .....	139
<b>Algorithms of Quasidifferentiable Optimization for the Separation of Point Sets</b> <i>Bernd Luderer and Denny Wagner</i> .....	157
<b>A Hybrid Evolutionary Algorithm for Global Optimization</b> <i>Mend-Amar Majig, Abdel-Rahman Hedar, and Masao Fukushima</i> .....	169

<b>Gap Functions for Vector Equilibrium Problems via Conjugate Duality</b> <i>Lkhamsuren Altangerel and Gert Wanka</i> .....	185
<b>Polynomially Solvable Cases of Binary Quadratic Programs</b> <i>Duan Li, Xiaoling Sun, Shenshen Gu, Jianjun Gao, and Chunli Liu</i> . . .	199
<b>Generalized Solutions of Multi-valued Monotone Quasi-variational Inequalities</b> <i>Baasansuren Jadamba, Akhtar A. Khan, Fabio Raciti, and Behzad Djafari Rouhani</i> .....	227
<b>Optimal Feedback Control for Stochastic Impulsive Linear Systems Subject to Poisson Processes</b> <i>Zhi Guo Feng and Kok Lay Teo</i> .....	241
<b>Analysis of Differential Inclusions: Feedback Control Method</b> <i>Vyacheslav Maksimov</i> .....	259
<b>A Game Theoretic Algorithm to Solve Riccati and Hamilton–Jacobi–Bellman–Isaacs (HJBI) Equations in <math>H_\infty</math> Control</b> <i>Brian D. O. Anderson, Yantao Feng, and Weitian Chen</i> .....	277
<b>Online Adaptive Optimal Control Based on Reinforcement Learning</b> <i>Draguna Vrabie and Frank Lewis</i> .....	309
<b>Perturbation Methods in Optimal Control Problems</b> <i>Alexander S. Buldaev</i> .....	325
<b>Stochastic Optimal Control with Applications in Financial Engineering</b> <i>Hans P. Geering, Florian Herzog, and Gabriel Dondi</i> .....	375
<b>A Nonlinear Optimal Control Approach to Process Scheduling</b> <i>Fabio D. Fagundes, João Lauro D. Facó, and Adilson E. Xavier</i> .....	409
<b>Hadamard’s Matrices, Grothendieck’s Constant, and Root Two</b> <i>Dominique Fortin</i> .....	423
<b>On the Pasture Territories Covering Maximal Grass</b> <i>Haltar Damba, Vladimir M. Tikhomirov, and Konstantin Y. Osipenko</i> .....	449
<b>On Solvability of the Rate Control Problem in Wired-cum-Wireless Networks</b> <i>Won-Joo Hwang, Le Cong Loi, and Rentsen Enkhbat</i> .....	463

**Integer Programming of Biclustering Based  
on Graph Models**  
*Neng Fan, Altannar Chinchuluun, and Panos M. Pardalos* ..... 479

**A Random Arrival Time Best-Choice Problem with Uniform  
Prior on the Number of Arrivals**  
*Mitsushi Tamaki and Qi Wang* ..... 499
