

Light Metals 2010

Proceedings of the technical sessions presented
by the TMS Aluminum Committee
at the TMS 2010 Annual Meeting & Exhibition,
Seattle, Washington, USA
February 14-18, 2010

Edited by
John A. Johnson

A Publication of
TMS

The Aluminum Industry - An External Perspective (Customers, Competitors and Stakeholders)

The Aluminum Industry - An External Perspective (Customers, Competitors and Stakeholders)

Challenges and Opportunitites Relative to Increased Usage of Aluminum within the Automotive Industry	3
<i>M. Verbrugge, P. Krajewski, A. Sachdev, J. Schroth, D. Sigler, and B. Carlson</i>	
Author Index	1085
Subject Index	1091

TABLE OF CONTENTS

Light Metals 2010

Preface.....	xxv
Editor's Biography	xxvii
Program Organizers	xxix
Aluminum Committees.....	xxxv

Alumina and Bauxite

Bayer Process Chemistry and Alumina Quality I

Development of Particle Breakdown and Alumina Strength during Calcination.....	17
<i>B. Raahauge, C. Jensen-Holm, and S. Wind</i>	
Effect of Environmental Light on the Raman Spectrum of Sodium Aluminate Liquors	25
<i>J. Yin, W. Li, Z. Yin, Z. Liu, and Z. Su</i>	
Effect of Na ₂ O on Alumina Leaching and Self-Disintegrating Property of Calcium Aluminate Slag.....	29
<i>S. Huilan, W. Bo, and B. Shiwen</i>	
Improvement of Product Quality in Circulating Fluidized Bed Calcination	33
<i>C. Klett, M. Missalla, and R. Bligh</i>	

Bayer Process Chemistry and Alumina Quality II

Segregation of Alumina – The Challenge for the Aluminium Industry	41
<i>A. Wolf, and P. Hilgraf</i>	
Unique High-Temperature Facility for Studying Organic Reactions in the Bayer Process	47
<i>A. Costine, J. Loh, R. McDonald, and G. Power</i>	
Technology Solutions to Increase Alumina Recovery from Aluminogothitic Bauxites.....	53
<i>A. Panov, A. Suss, and A. Fedyaev</i>	
New Polymers for Improved Flocculation of High DSP-Containing Muds.....	57
<i>M. Davis, Q. Dai, H. Chen, and M. Taylor</i>	
Some Aspects of Tricalcium Aluminate Hexahydrate Formation on the Bayer Process	63
<i>S. França, P. Braga, J. Moraes, A. Borges, and J. Lima</i>	

Process Improvements and Experiences - Red Side I

Study on Ore Dressing and Characterization of Different Granulometric Fractions that Compound Bauxite from Pará/Brazil.....	69
<i>F. Silva, R. Santos, J. Sampaio, F. Garrido, and M. Medeiros</i>	
Autoclave Desilication of Digested Bauxite Slurry in the Flashing Circuit.....	75
<i>A. Panov, A. Suss, I. Paromova, and A. Damaskin</i>	
The Effect of Anatase and Lime on the Transformation of Sodalite to Cancrinite in Bayer Digestion at 250° C.....	81
<i>B. Xu, P. Smith, C. Wingate, and L. DeSilva</i>	
Study on the Rheological Behavior of Crystallized and Crystallized - Amorphous Bauxites	87
<i>C. Barbato, S. França, and M. Nele</i>	

Process Improvements and Experiences - Red Side II

Effect of Digesting Conditions on Physical Properties of Diaspore Red Mud.....	95
<i>L. Bao, T. Zhang, Z. Dou, G. Lv, X. Wu, Y. Guo, P. Ni, and J. Ma</i>	
Extracting Alumina from Coal Flyash through Sodium Aluminate Solution in Soda-sintering and Acid-leaching Process.....	101
<i>J. Xue, L. Yan, and Y. Zhu</i>	
Improved Performance of Red Mud Settlers at Worsley Alumina.....	107
<i>D. Eckart, J. Kildea, P. Prinsloo, D. Nicholson, and E. Phillips</i>	
Redundancy of Security Filtration.....	113
<i>P. Weer</i>	
Tricalcium Aluminate Hexahydrate (TCA) Synthesis and Characterization	119
<i>M. Mohapatra, and S. Acharya</i>	
Effect of Carbide Slag on High Pressure Digestion Properties of Diaspore.....	125
<i>W. Bo, S. Huilan, and B. Shiwen</i>	

Bauxite Characterization and Handling

Reduction Roasting and Fe-Al Separation of High Iron Content Gibbsite-type Bauxite Ores.....	133
<i>G. Li, N. Sun, J. Zeng, Z. Zhu, and T. Jiang</i>	

Study and Application of an Improved Sintering Process with Pre-drying of Raw Material Slurries	139
<i>H. Zhao, B. Lu, and H. Ma</i>	
The Black Bauxite.....	145
<i>Z. Shangguan, and J. Du</i>	
Bayer Process and Soda-Lime Sintering Process of Special Diasporic Bauxite with High Silica	149
<i>C. Wenzhong, T. Weiwei, and Z. Hong</i>	

Industry Trends and Issues

Benefit-Cost Analysis at an Alumina Refinery of Public Sector.....	157
<i>N. Pinero</i>	
Heat Transfer in the Bayer Process.....	161
<i>D. Thomas, and M. Evans</i>	
Sustainable Bauxite Mining - A Global Perspective	167
<i>C. Wagner</i>	
The Need for Energy Efficiency in Bayer Refining	173
<i>L. Henrickson</i>	
UC Rusal vs. Chalco, in Bauxite and Alumina.....	179
<i>G. Djukanovic</i>	
A Case for Replication of Alumina Plants.....	183
<i>A. Kjar</i>	

Alumina Precipitation

Study on the Precipitation Kinetics for Improving the Quality of Alumina with Regard to Fines and Attrition Properties	193
<i>N. Krishnaswamy, N. Kshatriya, S. Dasgupta, and R. Jagannathan</i>	
Wet Oxidation of Bayer Liquor Organics: Reaction Mechanisms	209
<i>J. Dong, J. Tardio, J. Loh, G. Power, C. Vernon, and S. Bhargava</i>	
The Roles of Adsorption in Hydrate Precipitation	215
<i>J. Loh, G. Brodie, and F. Naim</i>	
Influence of Decomposition Parameters on the Formation Rate of New Crystallizations Centers of Aluminium Hydroxide	221
<i>R. Smiljanic, D. Lazic, D. Smiljanic, and Z. Zivkovic</i>	

The Microstructure of Aluminum Hydroxide Powders	231
<i>Y. Haiyan, L. Wen-cheng, and B. Shiwen</i>	
Author Index	1085
Subject Index	1091

TABLE OF CONTENTS

Light Metals 2010

Preface.....	xxv
Editor's Biography	xxvii
Program Organizers	xxix
Aluminum Committees.....	xxxv

Aluminum Reduction Technology

Aluminium Smelter: Environment, Health and Safety

Modern Potline Gas Treatment Technology for High Amperage Pots - The Alcoa Fjardaal Experience	239
<i>A. Moras, N. Dando, B. Cloutier, P. Dumortier, and H. Vendette</i>	
Heat Recovery from the Exhaust Gas of Aluminum Reduction Cells.....	243
<i>M. Fleer, O. Lorentsen, W. Harvey, H. Palsson, and G. Saevarsdottir</i>	
Increased Energy Efficiency and Reduced HF Emissions with New Heat Exchanger	249
<i>A. Sorhuus, G. Wedde, K. Rye, and G. Nyland</i>	
Reduction Line-5 DC Electrical Hazard	255
<i>M. Shukralla</i>	
2008 Global Anode Effect Survey Results	259
<i>J. Marks, and C. Bayliss</i>	
The Applicability of Carbon Capture and Sequestration in Primary Aluminium Smelters	265
<i>S. Broek, and S. Save</i>	
Application of a Method for the Determination of Pfc Emissions During Aluminum Pot Startup.....	271
<i>J. Maltais, J. Ross, and A. Marcoux</i>	
Dissolution Behavior of Aluminum Dross in Aluminum Electrolyte	277
<i>W. Fu, Z. Wang, Y. Yang, and X. Hu</i>	

Aluminium Smelter: Equipment

Improving Heat Dissipation and Cell Life of Aged Reduction Lines at Aluminium Bahrain (Alba)	285
<i>A. Ahmed, K. Raghavendra, and B. Welch</i>	
Update on the Evaluation of HF Emission Reduction Using Covered Anode Trays	291
<i>J. Gagne, R. Minville, N. Dando, G. Dufour, M. Gershenzon, P. Champoux, and A. Moras</i>	
Automated Anode Gauging	295
<i>S. Maqballi, C. Smith, J. Raman, M. Angirash, S. Abdullah, S. Thirunavukkarasu, R. Kulkarni, P. Marchand, S. David, and P. Boucher</i>	
Keeping the Pace of Continuous Improvement by Retrofitting Pot Tending Machines	301
<i>J. Barry, F. Roriguez, and J. Imery</i>	
New Concepts for Bulk Materials Plants for the Aluminium Producing Industry – From Raw Material Receiving to Electrolysis Cells	305
<i>S. Skirde</i>	
Alfeed, a New Alumina Feeding System to Aluminium Pots	311
<i>S. Ose, A. Sorhuus, O. Bjarno, and G. Wedde</i>	
Electrolysis Pot J Hooks New Design: Positive Impacts on Performance and Environment.....	315
<i>N. Dupas</i>	
Cleaning and Maintenance of Crucibles and Siphons/Tubes	319
<i>D. Prive, P. Côté, and R. Boulianne</i>	
Erosion of Ferrous Alloys by Liquid Aluminum.....	325
<i>M. Sidhu, and M. Kral</i>	

Hall-Héroult Cell: Technology

Development of the AP39: The New Flagship of AP Technology	333
<i>L. Fiot, D. Munoz, X. Berne, C. Ritter, and O. Martin</i>	
DX Pot Technology Powers Green Field Expansion.....	339
<i>A. Zarouni, M. Zelicourt, M. Jallaf, K. Alaswad, A. Kumar, A. Reyami, V. Kumar, D. Bakshi, J. Blasques, and I. Baggash</i>	
New Logistic Concepts for 400 and 500 kA Smelters.....	345
<i>M. Meijer</i>	

The Pot Technology Development in China.....	349
<i>Z. Jia, Y. Xiaodong, and S. Kangjian</i>	
The Newly Advancement of SY400 Pot.....	355
<i>S. Kangjian</i>	
Successful Commercial Operation of NEUI400 Potline	359
<i>X. Qi</i>	
Continues Advancement in Lanzhou Smelter.....	365
<i>S. Kangjian, and J. Chen</i>	
Baking Start-up and Operation Practices of 400kA Prebaked Anode Pots	369
<i>Y. Ban, X. Qi, D. Lv, J. Mao, Y. Mao, Z. Wang, Z. Shi, B. Gao, and X. Hu</i>	

Hall-Héroult Cell: Energy Conservation Through Cell Design and Process Improvements

Wettable Athodes: An Update	377
<i>R. Pawlek</i>	
Wettability of Liquid Aluminum on Carbon/Graphite/TiB ₂ Composite Cathode Materials	383
<i>J. Xue, and X. Chen</i>	
Study on the New Reduction Technology for Energy Saving.....	387
<i>F. Liu, and S. Gu</i>	
Effect of Atmosphere-Changing Sintering on the Corrosion Resistance of 17Ni/(10nio-NiFe ₂ O ₄) Cermet Inert Anode.....	391
<i>L. Kai, T. Zhong-liang, L. Jie, L. Yanqing, and Z. Hong-liang</i>	
Liquidus Temperatures of Cryolite Melts with Low Cryolite Ratio.....	395
<i>A. Apisarov, A. Dedyukhin, E. Nikolaeva, P. Tin'ghaev, O. Tkacheva, A. Redkin, and Y. Zaikov</i>	
Industrial Test of Low-voltage Energy-saving Aluminum Reduction Technology	399
<i>L. Jie, L. Xiao-jun, L. Yan-qing, X. Chang-chun, Z. Hong-liang, X. Jin, D. Feng-qi, L. Shi-wen, G. Qi-feng, and L. Yun-long</i>	
New Cathodes in Aluminum Reduction Cells.....	405
<i>F. Naixiang, T. Yingfu, P. Jianping, W. Yaowu, Q. Xiquan, and T. Ganfeng</i>	
Calculation of the Aluminum Flow Field at the Interface of Molten Aluminum and Electrolyte in the New Cathode Aluminum Cells.....	409
<i>J. Yanli, P. Jianping, F. Naixiang, W. Yaowu, and Q. Xiquan</i>	

Hall-Héroult Cell: Processes Modeling and Aluminium Smelter Modeling

Mathematical Modeling of Aluminum Reduction Cell Potshell Deformation.....	417
<i>M. Dupuis</i>	
The Use of CFD Simulations to Optimise Ventilation of Potrooms	423
<i>A. Maarschalkerwaard</i>	
Safe and Efficient Traffic Flow for Aluminum Smelters	427
<i>L. Tikasz, C. Read, R. Baxter, R. Pires, and R. McCulloch</i>	
Development and Application of an ANSYS® based Thermo-Electro-Mechanical Anode Stub Hole Design Tool.....	433
<i>M. Dupuis</i>	
Design of a Bypass Joint for the Aluminum Reduction Cells	439
<i>Y. Sarkis</i>	
3D Freeze Shape Study of the Aluminum Electrolysis Cells Using Finite Element Method.....	447
<i>C. Xifeng, Z. Hong-liang, Z. Zhong, L. Jie, L. Yanqing, X. Yujie, Z. Hehui, and L. Xiaojun</i>	

Hall-Héroult Cell: Processes Modeling and Measurements

CFD Modelling of Effect of ACD and Anode Size on Alumina Mixing in Aluminium Reduction Cells.....	455
<i>Y. Feng, M. Cooksey, and P. Schwarz</i>	
Terminating Anode Effects by Lowering and Raising the Anodes - A Closer Look at the Mechanism.....	461
<i>J. Thonstad, and H. Vogt</i>	
Bath Temperature Inference through Soft Sensors using Neural Networks.....	467
<i>F. Soares, R. Limao, and M. Castro</i>	
The Determination of Pot Current Distribution by Measuring Magnetic Fields	473
<i>N. Urata, and J. Evans</i>	
Busbar Circuit Design and Installation for Boosting Already Boosted Pots	479
<i>D. Champagne, D. Ziegler, A. Schneider, and D. Richard</i>	
Study of Surface Oscillation of Liquid Aluminum in 168kA Aluminum Reduction Cells with a New Type of Cathode Design.....	485
<i>W. Ziqian, F. Naixiang, P. Jianping, W. Yaowu, and Q. Xiquan</i>	

Modelling and Optimization of Busbar Configuration in Aluminum Electrolysis Cell with Genetic Algorithm	489
<i>M. Li</i>	

Hall-Héroult Cell: Process Control

Continuous Improvement in Aluminium Reduction Cell Process Performance with the ALPSYS® Control System.....	495
<i>S. Fardeau, B. Sulmont, P. Vellemans, and C. Ritter</i>	
A Nonlinear Model Based (NMPC) Control Strategy for the Aluminium Electrolysis Process	501
<i>S. Kolas, and S. Wasbø</i>	
CVG-venalum Potline Control and Supervisory Integrated System VEN-PCISIS	507
<i>J. Ramones, F. Ramirez, M. Colmenares, J. Larez, and J. Gonzalez</i>	
Efficient Thermal Balance Strategy Developed by CVG Venalum	513
<i>M. Colmenares, A. Ruiz, and J. Imery</i>	
Usage of Fuzzy Logic as a Strategy for the Aluminium Fluoride Addition in Electrolytic Cells	517
<i>F. Soares</i>	
Development and Application of a Multivariate Process Parameters Intelligence Control Technology for Aluminum Reduction Cells.....	523
<i>Y. Xiaobing, and T. Qinghong</i>	

Hall-Héroult Cell: Raw Materials and Process Control

Rapid, Non-Destructive Analysis of % Gibbsite in Smelting Grade Alumina.....	531
<i>K. Dando, and N. Dando</i>	
Aluminum Fluoride – A Users Guide.....	535
<i>S. Lindsay</i>	
Alumina Dissolution Rate as Impacted by Ore Pre-treatments	541
<i>X. Wang, J. Sorensen, N. Dando, and W. Xu</i>	
Processing of Anode Cover Material.....	547
<i>I. Eick, B. Rausch, J. Chmelar, and U. Kohaupt</i>	
Statistical Investigation and Modeling of Bath Level in Hall-Héroult Cells.....	553
<i>J. Tessier, and P. Doiron</i>	

In Situ Raman Experimental Study of Ionic Species in Cryolite Melts of Various Composition.....	559
<i>S. Vassiliev, V. Laurinavichute, Z. Kuz'minova, G. Tsirlina, E. Antipov, A. Gusev, and D. Simakov</i>	
In Situ Cell Control.....	563
<i>M. Schneller</i>	
Determination of Cryolite Ratio of Aluminum Electrolytes.....	569
<i>B. Gao, D. Li, Z. Shi, Z. Wang, and B. Ren</i>	
Author Index	1085
Subject Index	1091

Aluminum Rolling

Session I

Grain Interactions and Dislocation Density Evolution during Channel Die Compression of Aluminum.....	579
<i>A. Alankar, I. Mastorakos, and D. Field</i>	
Impact of Solute State and Precipitations on the Properties of 8xxx Alloys after Cold Rolling and Recrystallization.....	585
<i>G. Laptyeva, C. Schäfer, K. Karhausen, V. Mohles, and G. Gottstein</i>	
Expert5i - Intelligent Software Solution for Yield Optimization along the Production Line of Aluminium Flat Rolled Products.....	591
<i>S. Hillebrand, and U. Knaak</i>	
Possibilities of Laser Measurement for Aluminum Processing	597
<i>P. Sonntag</i>	
Author Index	1085
Subject Index	1091

Cast Shop for Aluminum Production

Grain Refinement, Alloying, Solidification and Shape Casting

On the Mechanism of Grain Refinement by Ultrasonic Melt Treatment in the Presence of Transition Metals	607
<i>D. Eskin, T. Atamanenko, L. Zhang, and L. Katgerman</i>	
Impurities in Al-5Ti-1B (wt.%) Grain Refiner Rod	613
<i>B. McKay, G. Nunner, G. Geier, and P. Schumacher</i>	
Effects of Cooling Rate on Microstructure in En-Ac43000 Gravity Castings and Related T6 Mechanical Properties	619
<i>I. Todaro, R. Squatrito, A. Morri, and L. Tomesani</i>	
Evaluation of Transient Heat Transfer Coefficient Evolution in EN43000 Gravity Castings towards Steel Chills with Different Interface Conditions.....	625
<i>R. Squatrito, I. Todaro, and L. Tomesani</i>	

Furnace Technology and Melt Handling

Influence of Heating Technology on Melt Quality in Ladles for Road Transportation of Liquid Aluminum Casting Alloys during Holding	633
<i>B. Prillhofer, and J. Knaack</i>	
Crucible Transfer by Siphoning: A Review of the Benefits and the Latest Technology	639
<i>J. Locatelli, and G. Liu</i>	
Energy Efficiency in Casthouse Furnaces	651
<i>R. Voyer, and F. Caron</i>	
Establishing Operational Parameters of AL-EMS using Numerical Simulations to Promote Energy Efficiency during Final Heating in Aluminum Furnaces.....	657
<i>R. Stal, U. Sand, and O. Hjortstam</i>	

Retrofitting Aluminum Melting Furnaces	663
<i>T. Schmidt</i>	
Implementation of a Global Casthouse Furnace Energy Efficiency Program at Rio Tinto Alcan.....	669
<i>M. Roy, V. Goutiere, and C. Dupuis</i>	
Degreasing of Aluminium Turnings and Implications for Solid-State Recycling.....	675
<i>J. Cui, A. Kvithyld, and H. Roven</i>	
Heating and Melting of Single Al Ingots in an Aluminium Melting Furnace	679
<i>J. Furu, A. Buchholz, T. Bergström, and K. Marthinsen</i>	
Optimised Re-melting by the Use of Low-temperature Oxyfuel at Hydro Aluminium's Primary Aluminium Casthouse, Övre Årdal, Norway.....	685
<i>H. Gripenberg, K. Torvanger, and J. Lodin</i>	

Direct Chill and Conveyor Casting

Microsegregation of Direct Chill Ingot of Super High Strength Aluminum Alloy Cast from Heavily Electromagnetically Stirred Melt	693
<i>T. Umeda, P. Thirathipviwat, M. Suparadist, and H. Nagaumi</i>	
Utilizing Safety Pit Coating Repair Kits to Prevent Production Stoppages	697
<i>A. Lowery, and J. Roberts</i>	
Effect of Application of Out-Of-Phase Electromagnetic Field on Horizontal Direct Chill Casting of 7075 Aluminum Alloy.....	703
<i>Q. Zhu, Z. Zhao, X. Wang, and J. Cui</i>	
Next Generation of Almex Direct Chill Tooling Systems.....	709
<i>S. Hamer</i>	
Thermal Assessment of the Casting Operation at IMASA Shop.....	715
<i>C. Méndez, C. Sánchez, G. Plascencia, M. Rubio, and D. Jaramillo</i>	

Cast House Productivity and Strip Casting

Means of Improving Casthouse Productivity	723
<i>P. Whiteley</i>	
Estimating the Production Capabilities of Casthouse Equipment Configuration Options	729
<i>P. Baker</i>	

Electrochemical Characterization of Trc 7072aa for Heat Exchangers.....	735
<i>A. Dursun, B. Corlu, C. Inel, M. Dundar, R. Erdogan, and M. Ürgen</i>	
Influence of the Cooling Water Temperature on Productivity and Product Quality in Twin Roll Casting with Copper Shells.....	741
<i>M. Badowski, E. Garate, and D. Armendariz</i>	
The Use of Copper Shells by Twin Roll Strip Casters	747
<i>A. Clemente, J. Tsiros, A. Arvanitis, D. Spathis, and H. Wobker</i>	
A TEM Study of the Microstructures of 3003 and 3003-Zr Alloys Produced by Twin Roll Casting	753
<i>B. Corlu, O. Duygulu, S. Ucuncuoglu, G. Oktay, A. Dursun, and M. Dundar</i>	
Casthouse Design for the Production of Air-Cooled, Low-Profile Aluminium Sows	759
<i>T. Plikas, T. Cesta, L. Gunnewiek, M. Trovant, R. Santiago, and J. Vanasse</i>	
The Measurement of Heat Flow within a DC Casting Mould	765
<i>A. Prasad, J. Taylor, and I. Bainbridge</i>	
<u>Melt Oxidation, Inclusions and Hydrogen</u>	
Formation of the Solid Layer on the Top of Molten Aluminum	773
<i>L. Damoah, and L. Zhang</i>	
Removal of Solid Inclusions from Molten Aluminium through Ceramic Foam Filtration	779
<i>A. Engelbrecht</i>	
Strategies to Reduce Inclusion Input during Liquid Metal Transportation and Melt Distribution while DC Casting of Al Alloys.....	785
<i>B. Prillhofer, H. Böttcher, and H. Antrekowitsch</i>	
A New Multi Stage System of Filtration Employing a Cyclone	791
<i>J. Courtenay, and F. Reusch</i>	
Hazards Associated with the Use of Bone Ash in Contact with Molten Aluminum.....	797
<i>D. Doure</i>	
In-Situ Measurement of Dissolved Hydrogen during Low Pressure Die Casting of Aluminium	801
<i>M. Hills, M. Henson, C. Thompson, B. Geddes, C. Schwandt, R. Kumar, and D. Fray</i>	
Author Index	1085
Subject Index	1091

Electrode Technology for Aluminum Production

Cathodes - Materials and Operation

Carburation Phenomenons At The Cathode Block/Metal Interface	811
<i>M. Lebeuf, M. Coulombe, P. Chartrand, B. Allard, and G. Soucy</i>	
Erosion Measurements of High Density Cathode Block Samples Through Laboratory Electrolysis with Rotation.....	817
<i>Y. Sato, P. Lavoie, and P. Patel</i>	
Thermo-Mechanical Characterisation of Graphitic and Graphitized Carbon Cathode Materials Used in Aluminium Electrolysis Cells.....	823
<i>D. Picard, W. Bouzemmi, B. Allard, H. Alamdari, and M. Fafard</i>	
Electrical Resistance of Graphitic and Graphitized Cathode Materials at Elevated Temperatures.....	829
<i>J. Xue, J. Zhu, and Y. Song</i>	
Development of High Density Graphitized Cathode Blocks for Aluminium Electrolysis Cells	835
<i>S. Larsen, X. Liao, H. Gran, S. Madshus, and J. Johansen</i>	
Sodium Diffusion in Cathode Lining in Aluminium Electrolysis Cells.....	841
<i>Z. Wang, J. Rutlin, and T. Grande</i>	
Characterization of Sodium Expansion of Industrial Graphitic and Graphitized Cathodes	849
<i>J. Xue, L. Wu, Q. Liu, Q. Niu, W. Wang, X. Hou, J. Zhu, and H. He</i>	
Corrosion Resistance of Cathode to NaF-KF-ALF ₃ -Based Electrolyte.....	855
<i>H. Yan, W. Li, S. Qiu, and J. Li</i>	
Development Status of Processing Technology for Spent Potlining in China	859
<i>X. Chen</i>	

Non-Carbon Materials in Cathodes

Lower Aluminium Production Cost through Refractory Material Selection.....	865
<i>O. Siljan, S. Slagnes, A. Sekkingstad, E. Furu, S. Aaram, and A. Solheim</i>	
Chemical Degradation Map for Sodium Attack in Refractory Linings.....	871
<i>K. Tschöpe, T. Grande, and J. Rutlin</i>	
Reactions in the Bottom Lining of Aluminium Reduction Cells.....	877
<i>A. Solheim, C. Schøning, and E. Skybakmoen</i>	
Sidewall Materials for the Hall-Heroult Process	883
<i>R. Mukhlis, M. Rhamdhani, and G. Brooks</i>	
Excellent Cryolite Resistance and High Thermal Conductivity SiC Sidewall Material for High-amperage Aluminium Reduction Cells.....	889
<i>Z. Huang</i>	
Structure Design and Deformation Measurements of C/TiB ₂ Function Gradient Materials for Aluminum Reduction Cathode.....	895
<i>J. Xue, B. Li, and J. Zhu</i>	
Electrolysis Expansion Performance of TiB ₂ -C Composite Cathode in [K ₃ AlF ₆ /Na ₃ AlF ₆]-AlF ₃ -Al ₂ O ₃ Melts.....	901
<i>F. Zhao, L. Xiao-jun, L. Jie, L. Yan-qing, and T. Zhong-liang</i>	

Traditional and Inert Anode Materials

Higher Softening Point Pitch as Anode Binder Pitch.....	909
<i>R. Wombles, S. McKinney, T. Golubic, and K. Sickels</i>	
Study of Resistivity – Real Density Correlation in CPC Calcination Control	913
<i>O. Mascarenhas, A. Mathur, and J. Botelho</i>	
The Comparison between Vertical Shaft Furnace and Rotary Kiln for Petroleum Coke Calcination.....	917
<i>Y. Sun, H. Xu, Y. Wang, Y. Cui, and C. Liu</i>	
Prebaked Anode from Coal - Utilization of Coal Extract as a Coke Feedstock.....	923
<i>M. Hamaguchi, N. Okuyama, N. Komatsu, J. Koide, and K. Kano</i>	
Charcoal in Anodes for Aluminium Production.....	929
<i>B. Monsen, A. Ratvik, and L. Lossius</i>	

Ball-milled Materials as Inert Anodes for Aluminum Production in KF-AlF ₃ Low-temperature Electrolyte.....	935
<i>S. Helle, B. Brodu, B. Davis, D. Guay, and L. Roue</i>	
Corrosion Behaviors of NiFe ₂ O ₄ -NiO-Co ₃ O ₄ Inert Anodes Materials in Na ₃ AlF ₆ -Al ₂ O ₃ Melts.....	939
<i>J. Xue, T. Zeng, and J. Zhu</i>	
Effect of Sintering Parameters on Properties of 18NiO-17(Cu-Ni)-65NiFe ₂ O ₄ Composite Ceramic Anode.....	945
<i>J. Ma, Y. Chun, B. Li, Z. Xiao, and M. Fei</i>	
Research on Preparation and Properties of 18NiO-NiFe ₂ O ₄ Composite Ceramic Inert Anodes.....	949
<i>J. Ma, Y. Chun, B. Li, Z. Xiao, and M. Fei</i>	
Effect of Adding Ni-Fe on Properties of Inert Anodes of NiFe ₂ O ₄ Based Cermet.....	953
<i>Z. Hua, G. Yao, L. Wang, Z. Zhang, and L. Liang</i>	

Anode Green Mill

Use of Eddy Current Separator in Butts Processing.....	959
<i>J. Chmelar, and H. Linga</i>	
From Technology Development to Successful Start-Up and Operations of Sohar : The Potential of the Bi-Eirich Mixing Line.....	963
<i>F. Morales, M. Gendre, N. Backhouse, B. Hohl, D. Stephenson, and M. Balushi</i>	
New Design of Process Area Based on Math Modelling and Simulation for Buss Kneader Principle in the Application of Green Anode Paste Preparation.....	969
<i>H. Siegenthaler, and J. Stampfli</i>	
Aluchemie Back to Benchmark.....	975
<i>P. Claudel, and E. Smits</i>	
Successful Start up of the Combined Rhodax® and IMC® Processes at the Sohar Smelter.....	981
<i>A. Pinoncely, J. Bigot, and C. Bouche</i>	
Amelios™, A Performance Analysis Tool for Green Anode Plant.....	987
<i>C. Bouche, O. Ganouni, and A. Molin</i>	
Anode Paste Plants: Innovative Solution for Optimum Emission Performances.....	993
<i>H. Vendette</i>	

Anode Baking/Anode Properties

On the Logistics of Rebuilding an Anode Baking Furnace while Maintaining Operation.....	999
<i>R. Coulombe, D. Machado, J. Ferguson, and D. Carle</i>	
Specific Energy Consumption in Anode Bake Furnaces.....	1005
<i>F. Keller, P. Sulger, M. Meier, D. Severo, and V. Gusberti</i>	
Desulphurisation Control during Anode Baking, its Impact on Anode Performance and Operational Costs-Alba's Experience.....	1011
<i>H. Abbas, K. Khaji, and D. Sulaiman</i>	
Systemic Analysis of Flue Wall Bricks Used in Anode Baking Furnaces.....	1015
<i>B. Teider, P. Tiba, F. Figueiredo, J. Gallo, and V. Pandolfelli</i>	
Development of a New Improved Dry Alumina Scrubber for Emission Control from Anode Bake Furnaces.....	1021
<i>P. Vasconcelos, and A. Mesquita</i>	
Baked Anode Density Improvement through Optimization of Green Anode Dry Aggregate Composition.....	1027
<i>K. Khaji, and H. Abbas</i>	
Characterization of Surface Topography on Carboxy Reactivity Residue.....	1031
<i>S. Rørvik, L. Lossius, H. Linga, and A. Ratvik</i>	

Preheating and Operational Aspects

Loss in Cathode Life Resulting from the Shutdown and Restart of Potlines at Aluminum Smelters.....	1039
<i>A. Tabereaux</i>	
Evaluation of Mothballing and Subsequent Restarting of Søderberg Cells.....	1045
<i>V. Buzunov, V. Borisov, Y. Masyutin, D. Bolshakov, and A. Pinayev</i>	
Investigation of the Impact of Pre-Heating, Start-Up and Early Operation on Potlife.....	1051
<i>J. Tessier, C. Duchesne, G. Tarcy, C. Gauthier, and G. Dufour</i>	
Analysis of the Coke Bed Preheating Method for Aluminium Cells.....	1057
<i>M. Ali</i>	
The Combined Flame and Aluminum Preheating Method.....	1063
<i>T. Yingfu, F. Naixiang, P. Jianping, W. Yaoyu, and L. Jian</i>	
Cell Preheat on Full Line Current at Dubal.....	1067
<i>A. AlZarouni, M. AlJallaf, A. Kumar, K. Alaswad, and J. Blasques</i>	

Optimization of the Anode-Stub Contact: Material Properties of Cast Iron	1073
<i>B. Oye, E. Haugland, J. Hop, A. Nordmark, and M. Onsoien</i>	
Voltage Drop at the Stub-anode Connection as Related to the Carbon Equivalent of the Cast Iron Collar	1079
<i>A. Nofal, M. Waly, A. Ahmed, M. Agour, A. Kandil, S. Mohamed, and M. Mourad</i>
