22nd ISCA International Conference on Parallel and Distributed Computing and Communication Systems 2009

(PDCCS-2009)

Louisville, Kentucky, USA
24-26 September 2009

ISBN: 978-1-61567-577-7
INTERNATIONAL SOCIETY FOR COMPUTERS 
AND THEIR APPLICATIONS 

22nd International Conference on 
Parallel and Distributed Computing 
and Communication Systems 
(PDCCS-2009) 

September 24-26, 2009 
Marriott Louisville Downtown 
Louisville, Kentucky USA 

TECHNICAL PAPER INDEX 

ALGORITHMS 

Heuristics for Distributed Systems Clustering and Mapping under Network Restrictions 
Noha S. Nabawi, Mohamed F. Ahmed (University of Connecticut, USA), Ahmed Atwan (Mansoura University, Egypt) and Reda A. Ammar (University of Connecticut, USA) ............................................. 1 

Hierarchical Clustering with CUDA/GPU 
Dar-Jen Chang, Mehmed Kantardzic and Ming Ouyang (University of Louisville, USA) .............................................. 7 

A Self-adaptive Weighted Sum Technique for the Joint Optimization of Performance and Power Consumption in Data Centers 
Samee Ullah Khan (North Dakota State University, USA) ............................................................................ 13 

Static Load Balancing for Cost Minimization in Distributed Computing Systems 
Satish Penmatsa (Southern Arkansas University, USA) and V. P. Mantena (Omnisoft, Inc., USA) .................. 19 

Minimizing Inter-Iteration Dependencies in Multi-Dimensional Loops 
Krishna Chaitanya Chakilam, Sukumar Reddy Anapalli and Timothy W. O’Neill (The University of Akron, USA) ........................................................................................................................................... 25 

A High Performance Gibbs Sampling Algorithm for Item Response Theory 
Kyriakos Patsias, Yanyan Sheng and Shahram Rahimi (Southern Illinois University, USA) ......................... 31 

A Disk Scheduling Algorithm Based on ANT Colony Optimization 
Hossein Rahmani, Sajjad Arshad and Mohsen Ebrahimi Moghaddam (Shahid Beheshti University, Iran) .................................................................................................................. 37

SOFTWARE

Programming Data and Task Parallelism with Chapel
Peiyi Tang (University of Arkansas at Little Rock, USA) .......................................................... 151

Dynamic Storage Cache Partitioning Using Feedback Control Theory
Rajat Garg, Christina Patrick and Mahmut Kandemir (Pennsylvania State University, USA) .......... 157

Measuring the Speedup of a Commercial Application on a Computer Grid
Timothy D. Hoehn and Robert Zeidman (SAFE Corporation, USA) ........................................... 165

Digital Object Abstraction Layer: A Middleware for Building Federated
Digital Libraries
George Pyrounakis (University of Athens, Greece), Mara Nikolaidou (Harokopio University of Athens,
Greece) and Michael Hatzopoulos (University of Athens, Greece) ............................................. 172

COMMUNICATIONS and NETWORKING

Tree-based Burst Aggregation in Optical Burst Switching Networks
Xiaojun Cao, Yichuan Wang, Yang Wang (Georgia State University, USA) and Chunsheng Xin
(Norfolk State University, USA) ........................................................................................................ 179

An Analytical Model for Multiple Sink Underwater Acoustic Sensor Network
Ziping Liu, Xuesong Zhang (Southeast Missouri State University, USA), and Bidyut Gupta, S. Shih
(Southern Illinois University Carbondale, USA) and Z. Q. Liu (SUNY Maritime College, USA) ........ 185

A Protocol for Realtime Communication for FPGA Clusters using Multigigabit
Transceivers
Richard D. Anderson and Yoginder S. Dandass (Mississippi State University, USA) ....................... 192

FAROES: Fairness And Reliability using Overlay Expenseless Set-out for Duty-cycle
Optimization in WSN
Silvia Bonomi, Yann Busnel, Roberto Baldoni (University of Rome, Italy) and Ravi Prakash
(University of Texas at Dallas, USA) ............................................................................................... 198

ARCHITECTURES and SYSTEMS

Power Aware Disk Allocation
Rajat Garg, Ramya Prabhakar and Mahmut Kandemir (Pennsylvania State University, USA) .......... 205

A New Reconfigurable Network Node Processor Architecture for Distributed
Implementation of Ephemeris State Processing
J. Robert Heath, Nien Y. Lim, Kenneth L. Calvert and James Griffioen (University of Kentucky, USA) .... 213

Optimal Micro-Threading Scheduling for Multi-Core Processors to Hide
Memory Latency
Mohamed F. Ahmed, Reda A. Ammar and Sanguthevar Rajasekaran (University of
Connecticut, USA) .......................................................................................................................... 221

Development and Validation of a Load Balancing and Control Mechanism for a
Reconfigurable Single-Chip Heterogenous and Hybrid Multiprocessor
Architecture Platform
J. Robert Heath, Sridhar Hegde and Kanchan Bhide (University of Kentucky, USA) ......................... 228
