2nd CRISIS IN COSMOLOGY CONFERENCE, CCC-2

Proceedings of a conference held at
Port Angeles, Washington, USA
7–11 September 2008

Edited by

Frank Potter
Sciencegems.com, Huntington Beach, California, USA
Contents

Preface ............................................................... ix

Participants ....................................................... xii

Conference Photograph ........................................ xiv

Part 1. Reality of Cosmic Expansion

Hydrogen Cloud Separation as Direct Evidence of the Dynamics of the Universe ........................................... 3
   L. Ashmore

Tolman Test from $z = 0.1$ to $z = 5.5$: Preliminary Results Challenge the Expanding Universe Model .................... 12
   E. J. Lerner

Time Dilation in Quasar Light Curves ................................ 24
   M. R. S. Hawkins

Part 2. Origin of Microwave Radiation

The Cosmic Microwave Background Radiation Does NOT Prove that the Hot Big Bang Theory Is Correct .................. 39
   B. R. Bligh

Re-evaluation of the Cosmic Microwave Background (CMB) ......................... 47
   R. Haynes

Part 3. Quasi-Stellar Objects

Physical Association and Periodicity in Quasar Families .................. 61
   C. Fulton and H. Arp

A Cluster of High Redshift Quasars with Apparent Diameter 2.3 Degrees ......................... 66
   H. Arp and C. Fulton

vi
Contents vii

Quasar Additional Intrinsic Redshift Mechanism?? .......................... 73
  C. F. Gallo

Part 4. Large-Scale Structure

Fourier Analysis of the Large Scale Spatial Distribution of Galaxies in the
  Universe ........................................... 77
  J. G. Hartnett
Survey of Evidence for Top-Down versus Bottom-Up Evolution of
  Structure on Various Scales ............................ 98
  H. A. Schmitz
A Review of Anomalous Redshift Data ................................. 109
  H. Ratcliffe
Does the Mandelbrot Set Offer Clues to the Cosmological
  Evolution of Form? ..................................... 116
  J. J. Dickau

Part 5. Methods for Selecting Alternative Cosmologies

The Changing Cosmology Narrative ...................................... 125
  T. E. Eastman
Cosmological Physics Ground Rules and How to Evaluate Cosmologies .. 128
  D. J. Dilworth
Cosmology without Finality ........................................... 135
  F. Mahootian

Part 6. General Alternative Cosmologies

Mathematical Theory of Cosmological Redshift in Static Lobachevskian
  Universe: Mistake of Edwin Hubble .............................. 145
  J. G. von Brzeski and V. von Brzeski
A Solution to the Cosmic Conundrum including Cosmological Constant
  and Dark Energy Problems .................................. 152
  A. Singh
Quasi-Steady State Cosmology ........................................ 164
  R. G. Vishwakarma
Plasma-Redshift Cosmology: A Review ................................. 169
  A. Brynjolfsson
Time as a Key to Cosmology: Theory of Time beyond the Standard Model
E. S. Poliakov

Nucleosynthesis in Plasma-Redshift Cosmology
A. Brynjolfsson

Part 7. Hubble Relationship Alternatives

The Conflict between Realism and the Scalar Potential in Electrodynamics
D. F. Roscoe

Coherent Spectroscopy of Supernova Remnant 1987A
J. Moret-Bailly

Does Cosmological Scale Expansion Explain the Universe?
C. J. Masreliez

Hubble's Cosmology: From a Finite Expanding Universe to a Static Endless Universe

Optical Forces as a Redshift Mechanism: The “Spectral Transfer Redshift”
L. Marmet

Part 8. Dark Matter and Dark Energy Alternatives

Conformal Gravity Challenges String Theory
P. D. Mannheim

A Thin-Disk Gravitational Model for Galactic Rotation
C. F. Gallo and J. Q. Feng

Does Dark Energy Signal a Wrong Physics?
R. G. Vishwakarma

Survey of Redshift Relationships for the Proposed Mechanisms at the 2nd Crisis in Cosmology Conference
L. Marmet
