
(ESEC/FSE 09)

Amsterdam, The Netherlands
24 – 28 August 2009

ISBN: 978-1-61567-506-7
Keynote Address
The Challenge of Pervasive Software to the Conventional Wisdom of Software Engineering (Page 1)
Mary Shaw (Carnegie Mellon University)

Session: Specification and Verification 1
Asserting and Checking Determinism for Multithreaded Programs (Page 3)
Jacob Burnim (University of California, Berkeley)
Koushik Sen (University of California, Berkeley)

Static Data Race Detection for Concurrent Programs with Asynchronous Calls (Page 13)
Vineet Kahlon (NEC Laboratories)
Nishant Sinha (NEC Laboratories)
Erik Kruus (NEC Laboratories)
Yun Zhang (Princeton University)

Symbolic Pruning of Concurrent Program Executions (Page 23)
Chao Wang (NEC Laboratories America)
Swarat Chaudhuri (The Pennsylvania State University)
Aarti Gupta (NEC Laboratories America)
Yu Yang (University of Utah)

Session: Analysis and Testing 1
DARWIN: An Approach for Debugging Evolving Programs (Page 33)
Dawei Qi (National University of Singapore)
Abhik Roychoudhury (National University of Singapore)
Zhenkai Liang (National University of Singapore)
Kapil Vaswani (Microsoft Research India)

Capturing Propagation of Infected Program States (Page 43)
Zhenyu Zhang (The University of Hong Kong)
W. K. Chan (City University of Hong Kong)
T. H. Tse (The University of Hong Kong)
Bo Jiang (The University of Hong Kong)
Ximming Wang (Hong Kong University of Science and Technology)

Saturation-based Testing of Concurrent Programs (Page 53)
Elena Sherman (University of Nebraska)
Matthew B. Dwyer (University of Nebraska)
Sebastian Elbaum (University of Nebraska)

Session: Challenge Paper
The Massification and Webification of Systems’ Modeling and Simulation with Virtual
Worlds (Page 63)
Cristina Videira Lopes (University of California, Irvine)

Session: Dependability
Backward-Compatible Constant-Time Exception-Protected Memory (Page 71)
Pradeep Varma (IBM India Research Laboratory)
Rudrapatna K. Shyamasundar (Tata Institute of Fundamental Research)
Harshit J. Shah (Tata Institute of Fundamental Research)

Automated Security Testing of Web Widget Interactions (Page 81)
Cor-Paul Bezemer (Delft University of Technology & Exact Software)
Ali Mesbah (Delft University of Technology)
Arie van Deursen (Delft University of Technology)

Session: Empirical Software Engineering
Cross-project Defect Prediction (Page 91)
Thomas Zimmermann (Microsoft Research)
Nachiappan Nagappan (Microsoft Research)
Harald Gall (University of Zurich)
Emanuel Giger (University of Zurich)
Brendan Murphy (Microsoft Research)

On the Relationship between Process Maturity and Geographic Distribution: An Empirical Analysis of Their Impact on Software Quality (Page 101)
Marcelo Cataldo (Bosch Corporate Research)
Sangeeth Nambiar (Robert Bosch Engineering and Business Solutions)

Improving Bug Triage with Bug Tossing Graphs (Page 111)
Gaew Jeong (Seoul National University)
Sunghun Kim (Hong Kong University of Science and Technology)
Thomas Zimmermann (Microsoft Research)

Fair and Balanced? Bias in Bug-Fix Datasets (Page 121)
Christian Bird (University of California, Davis)
Adrian Bachmann (University of Zurich)
Eirik Aune (University of California, Davis)
John Duffy (University of California, Davis)
Abraham Bernstein (University of Zurich)
Vladimir Filkov (University of California, Davis)
Premkumar Devanbu (University of California, Davis)

Session: Service-Oriented Systems
QoS-driven Runtime Adaptation of Service Oriented Architectures (Page 131)
Valeria Cardellini (Università di Roma)
Emiliano Casalicchio (Università di Roma)
Vincenzo Grassi (Università di Roma)
Francesco Lo Presti (Università di Roma)
Raffaela Mirandola (Politecnico di Milano)

Automatic Synthesis of Behavior Protocols for Composable Web-Services (Page 141)
Antonia Bertolino (Consiglio Nazionale delle Ricerche)
Paola Inverardi (Università dell’Aquila)
Patrizio Pelliccione (Università dell’Aquila)
Massimo Tivoli (Università dell’Aquila)

Data Flow Testing of Service Choreography (Page 151)
Lijun Mei (The University of Hong Kong)
W. K. Chan (City University of Hong Kong)
T. H. Tse (The University of Hong Kong)

Whitening SOA Testing (Page 161)
Cesare Bartolini (ISTI - CNR)
Antonia Bertolino (ISTI - CNR)
Sebastian Elbaum (University of Nebraska)
Eda Marchetti (ISTI - CNR)
Keynote Address
IQ Routes and HD Traffic — Technology Insights About TomTom's Time-Dynamic Navigation Concept (Page 171)
Ralf-Peter Schafer (TomTom)

Session: Software Quality & Performance
Refactoring for Reentrancy (Page 173)
Jan Wloka (Rutgers University)
Manu Sridharan (IBM T.J. Watson Research Center)
Frank Tip (IBM T.J. Watson Research Center)

Monitoring Probabilistic Properties (Page 183)
Lars Grunske (Swinburne University of Technology)
Pengcheng Zhang (Southeast University, China)

MSeqGen: Object-Oriented Unit-Test Generation via Mining Source Code (Page 193)
Suresh Thummalapenta (North Carolina State University)
Tao Xie (North Carolina State University)
Nikolai Tillmann (Microsoft Research)
Jonathan de Halleux (Microsoft Research)
Wolfram Schulte (Microsoft Research)

Session: Tools & Environment
API Hyperlinking via Structural Overlap (Page 203)
Fan Long (Tsinghua University)
Xi Wang (Massachusetts Institute of Technology)
Yang Cai (Massachusetts Institute of Technology)

Learning from Examples to Improve Code Completion Systems (Page 213)
Marcel Bruch (Darmstadt University of Technology)
Martin Monperrus (Darmstadt University of Technology)
Mira Mezini (Darmstadt University of Technology)

Improving Slice Accuracy by Compression of Data and Control Flow Paths (Page 223)
Aharon Abadi (IBM Haifa Research Laboratory)
Ran Ettinger (IBM Haifa Research Laboratory)
Yishai A. Feldman (IBM Haifa Research Laboratory)

Session: Challenge Paper
Insights from Expert Software Design Practice (Page 233)
Marian Petre (The Open University)

Session: Component-Based Software Engineering
Fitting the Pieces Together: A Machine-Checked Model of Safe Composition (Page 243)
Benjamin Delaware (University of Texas at Austin)
William R. Cook (University of Texas at Austin)
Don Batory (University of Texas at Austin)

Ensuring Interoperable Service-oriented Systems through Engineered Self-Healing (Page 253)
Giovanni Denaro (University of Milano-Bicocca)
Mauro PazzF (University of Milano-Bicocca and University of Lugano)
Davide Tosi (University of Milano-Bicocca)

ACM SIGSOFT's Impact Paper Award
Debugging Debugging (Page 263)
Andreas Zeller (Saarland University)

Short Papers
Facilitating Software Refactoring with Appropriate Resolution Order of Bad Smells (Page 265)
Hui Liu (Beijing Institute of Technology and Ministry of Education)
Limei Yang (Beijing Institute of Technology)
Zhendong Niu (Beijing Institute of Technology)
Zhiyi Ma (Peking University)
Weizhong Shao (Peking University)

Software Change Dynamics: Evidence from 35 Java Projects (Page 269)
Markus M. Geipel (ETH Zurich)
Frank Schweitzer (ETH Zurich)

Practical Framework Constraints (Page 273)
Francois Bronsard (Siemens Corporate Research)

Evaluating Recovery Aware Components for Grid Reliability (Page 277)
Iman I. Yusuf (RMIT University)
Heinz W. Schmidt (RMIT University)
Ian D. Peake (RMIT University)

Towards Accurate Probabilistic Models Using State Refinement (Page 281)
Paulo H. Maia (Imperial College London)
Jeff Kramer (Imperial College London)
Sebastian Uchitel (University of Buenos Aires & Imperial College London)
Nabor C. Mendonta (Universidade de Fortaleza)

Tool Demonstrations

Verification and Performance Evaluation of AADL Models (Page 285)
Marco Bozzone (Fondazione Bruno Kessler)
Alessandro Cimatti (Fondazione Bruno Kessler)
Marco Roveri (Fondazione Bruno Kessler)
Joost-Pieter Katoen (RWTH Aachen University)
Viet Yen Nguyen (RWTH Aachen University)
Thomas Noll (RWTH Aachen University)

Reo2MC: A Tool Chain for Performance Analysis of Coordination Models (Page 287)
Farhad Arbab (CWI)
Sun Meng (CWI)
Young-Joo Moon (CWI)
Marta Kwiatkowska (University of Oxford)
Hongyang Qu (University of Oxford)

Smart Views for Analyzing Problem Reports: Tool Demo (Page 289)
Patrick Knab (University of Zurich)
Harald Gall (University of Zurich)
Martin Pinzger (Delft University of Technology)

SCA: A Semantic Conflict Analyzer for Parallel Changes (Page 291)
Danhua Shao (The University of Texas at Austin)
Sarfraz Khurshid (The University of Texas at Austin)
Dewayne E. Perry (The University of Texas at Austin)

Test Case Comparison and Clustering using Program Profiles and Static Execution (Page 293)
Vipindeep Vangala (Microsoft Corporation)
Jacck Czerwonka (Microsoft Corporation)
Phani Talluri (Microsoft Corporation)

ReCrashJ: A Tool for Capturing and Reproducing Program Crashes in Deployed Applications (Page 295)
Shay Artzi (IBM T. J. Watson Research Center)
Sung-han Kim (University of Hong Kong)
Michael D. Ernst (University of Washington)

Javalanche: Efficient Mutation Testing for Java (Page 297)
David Schuler (Saarland University)
Andreas Zeller (Saarland University)

ConcernMorph: Metrics-based Detection of Crosscutting Patterns (Page 299)
Eduardo Figueiredo (Lancaster University)
Jon Whittle (Lancaster University)
Alessandro Garcia (PUC-Rio)

SrlJan: A Graphical Toolkit for Sensor Network Macroprogramming (Page 301)
Session: Outstanding Research Paper Award
Software Architecture: Many Faces, Many Places, Yet a Central Discipline (Page 303)
Richard N. Taylor (University of California, Irvine)

Session: Specification and Verification 2
Synthesizing Partial Component-Level Behavior Models from System Specifications (Page 305)
Ivo Krka (University of Southern California)
Yuriy Brun (University of Southern California)
George Edwards (University of Southern California)
Nenad Medvidovic (University of Southern California)
Supporting Automatic Model Inconsistency Fixing (Page 315)
Yingfei Xiong (University of Tokyo)
Zhenjiang Hu (National Institute of Informatics)
Haiyan Zhao (Peking University)
Hui Song (Peking University)
Masato Takeichi (University of Tokyo)
Hong Me (Peking University)
Behavioral Automata Composition for Automatic Topology Independent Verification of Parameterized Systems (Page 325)
Youssef Hanna (Iowa State University)
Samik Basu (Iowa State University)
Hridesh Rajan (Iowa State University)

Session: Analysis and Testing 2
Probabilistic Environments in the Quantitative Analysis of (Non-Probabilistic) Behaviour Models (Page 335)
Esteban Pavese (Universidad de Buenos Aires)
Víctor Braberman (Universidad de Buenos Aires)
Sebastian Uchitel (Universidad de Buenos Aires & Imperial College London)
Automatic Steering of Behavioral Model Inference (Page 345)
David Lo (Singapore Management University)
Leonardo Mariani (University of Milano Bicocca)
Mauro PezzF (University of Milano Bicocca)
Sireum/Topi LDP: A Lightweight Semi-Decision Procedure for Optimizing Symbolic Execution-based Analyses (Page 355)
Jason Belt (Kansas State University)
Robby (Kansas State University)
Xianghua Deng (Pennsylvania State University - Harrisburg)

Challenge Paper
Engineering Search Computing Applications: Vision and Challenges (Page 365)
Marco Brambilla (Politecnico di Milano)
Stefano Ceri (Politecnico di Milano)

Session: Mining Software Repositories
DebugAdvisor: A Recommender System for Debugging (Page 373)
B. Ashok (Microsoft Research India)
Joseph Joy (Microsoft Research India)
Hongkang Liang (Microsoft, Redmond)
Sriram K. Rajamani (Microsoft Research India)
Gopal Srinivasa (Microsoft Research India)
Vipindeep Vangala (Microsoft India Development Center)
Graph-based Mining of Multiple Object Usage Patterns (Page 383)
Tung Thanh Nguyen (Iowa State University)
Hoan Anh Nguyen (Iowa State University)
Nam H. Pham (Iowa State University)
Jafar M. Al-Kofahi (Iowa State University)
Tien N. Nguyen (Iowa State University)
