Table of Contents

MSWiM 2009 Conference Organization .................................................................................. ix

Keynote Addresses

• Combining Simulations, Models and Testbeds: Possibilities and Pitfalls ......................... 1
  Ralf Steinmetz (Technische Universität Darmstadt)

• Resource Management in Broadband Wireless Access Networks ................................... 2
  Hossam Hassanein (Queen's University)

• NOTICE — An Architecture for Traffic Incident Detection ............................................ 3
  Stephan Olariu (Old Dominion University)

Session 1: Cognitive Radio Networks

• Modeling and Performance Evaluation of Transmission Control Protocol over Cognitive Radio Ad Hoc Networks .......................................................... 4
  Marco Di Felice (University of Bologna), Kaushik Roy Chowdhury (Northeastern University),
  Luciano Bononi (University of Bologna)

• ROSA: Distributed Joint Routing and Dynamic Spectrum Allocation in Cognitive Radio Ad Hoc Networks ................................................................. 13
  Lei Ding, Tommaso Melodia (State University of New York at Buffalo),
  Stella Batalama (State University of New York at Buffalo),
  Michael J. Medley (Air Force Research Laboratory)

Session 2: Fairness

• Contention in Multi-hop Wireless Networks: Model and Fairness Analysis .................. 21
  Vinay Kolar (RWTH Aachen University), Karthik Bharath (University of Connecticut),
  Nael B. Abu-Ghazaleh (State University of New York at Buffalo),
  Janne Riihijarvi (RWTH Aachen University)

• A Distributed Fair MAC Flow Allocation and Scheduling Framework for IEEE 802.11 Based Wireless Mesh Networks .................................................. 30
  Kin Wah Edward Lin, Brahim Bensaou (The Hong Kong University of Science and Technology)

• Gateway-Assisted Max-Min Rate Allocation for Wireless Mesh Networks .................... 38
  Kamran Jamshaid, Paul A. S. Ward (University of Waterloo)

• A Performance Evaluation Framework for Fair Solutions in Ad Hoc Networks ............ 46
  Manos Dramitinos (INRIA, LIP, RESO Team), Rémi Vannier Vannier (INRIA, LIP, RESO Team),
  Isabelle Guérin Lassous (Université Claude Bernard, INRIA, LIP, RESO Team)

Session 3: Capacity

• Analyzing Space/Capacity Tradeoffs of Cooperative Wireless Networks Using a Probabilistic Model of Interference ......................................................... 54
  Hermann S. Lichte, Stefan Valentini, Holger Karl (University of Paderborn),
  Imad Aad, Joerg Widmer (DoCoMo Euro-Labs)

• Delay-Throughput Performance in Mobile Ad-Hoc Networks with Heterogeneous Nodes 63
  Valentina Martina (Politecnico di Torino), Michele Garetto (Università di Torino),
  Emilio Leonardi (Politecnico di Torino)

• Capacity-Aware Routing in Heterogeneous Mesh Networks: An Analytical Approach .... 73
  Raffaele Bruno, Marco Conti, Antonio Pinizzotto (Italian National Research Council)
• Multicast Capacity for Multi-Hop Multi-Channel Multi-Radio Wireless Networks
  Shaojie Tang, Xiang-Yang Li (Illinois Institute of Technology), Cheng Wang (Tongji University),
  Ping Xu (Illinois Institute of Technology)

• On the Impact of Far-Away Interference on Evaluations
  of Wireless Multihop Networks
  Douglas M. Blough (Georgia Institute of Technology), Claudia Canali (University of Modena and Reggio Emilia),
  Giovanni Resta, Paolo Santi (IIT CNR)

Session 4: Privacy, Authentication, Security
• Improving Security Information Gathering with IEEE 802.21
  to Optimize Handover Performance
  Antonio Izquierdo, Nada T. Golmie (National Institute of Standards and Technology)

• Removal of Misbehaving Insiders in Anonymous VANETs
  Xuejun Zhuo, Jianguo Hao, Duo Liu, Yiqi Dai (Tsinghua University)

• On Providing Location Privacy for Mobile Sinks in Wireless Sensor Networks
  Edith C.-H. Ngai, Ioana Rodhe (Uppsala University)

Session 5: Simulation Tools
• Design and Evaluation of Host Identity Protocol (HIP)
  Simulation Framework for INET/OMNeT++
  László Bolok, Szabolcs Nováczki, László Tamás Zeke, Gábor Jeney
  (Budapest University of Technology and Economics)

• Good News for Parallel Wireless Network Simulations
  Patrick Peschlow, Andreas Voss, Peter Martini (University of Bonn)

• LiLaS: A Link Layer Simulator in Matlab/Octave
  Svante R. Signell, Jinliang Huang (KTH - Royal Institute of Technology)

Session 6: Game-Theory
• Wireless Multihoming Modeled as a Multi-WLAN Game
  Jerzy Konorski (Gdansk University of Technology)

• Socially Conscious Channel Selection in 802.11 WLANs
  for Coexistence in a Non-cooperative Environment
  Joo Ghee Lim, Chun Tung Chou, Sanjay Jha (University of New South Wales)

Session 7: Prediction
• Real-time Trajectory Estimation in Mobile Ad Hoc Networks
  Sae Fujii, Takashi Nomura, Takuaki Umedu, Hirozumi Yamaguchi, Teruo Higashino (Osaka University)

• A Hierarchical Prediction Model for Two Nodes-based IP Mobile Networks
  Samir Bellahsene, Leila Kloul, Dominique Barth (Université de Versailles)

• A DBN Approach for Network Availability Prediction
  Upendra Rathnayake (The University of New South Wales), Maximilian Ott (NICTA),
  Aruna Seneviratne (The University of New South Wales)

• Connection Availability and Transient Survivability Analysis
  in Wireless Ad-hoc Networks
  Georgios Kalogridis (Toshiba Research Europe Limited), Ruijie Lin (University of Bristol)

Session 8: MAC
• The MAC Unreliability Problem in IEEE 802.15.4 Wireless Sensor Networks
  Giuseppe Anastasi (University of Pisa), Marco Conti (National Research Council),
  Mario Di Francesco (University of Pisa)

• Medium Access Control for Underwater Acoustic Sensor Networks with MIMO Links
  Li-Chung Kuo, Tommaso Melodia (State University of New York at Buffalo)
• How do Wireless Chains Behave? The Impact of MAC Interactions ........................................... 212
  Saquib Razak (Carnegie Mellon University), Vinay Kolar (RWTH Aachen University),
  Nael B. Abu-Ghazaleh (State University of New York), Khaled A. Harras (Carnegie Mellon University)

• The Optimization of Framed Aloha Based RFID Algorithms .................................................... 221
  Lei Zhu, Tak-Shing Peter Yum (The Chinese University of Hong Kong)

• Traffic Scheduling for Frame Length Minimization in OFDMA Based Systems ............................ 229
  Maurizio A. Bonuccelli, Donatella Ermini (University of Pisa)

Session 9: Dissemination, Multicast, Routing

• When Mobile Services Go Local .................................................................................................... 235
  Diego Borsetti, Marco Fiore, Claudio Casetti, Carla Fabiana Chiasserini (Politecnico di Torino)

• A Reliable and Data Aggregation Aware Routing Protocol for Wireless Sensor Networks ............ 245
  Leandro A. Villas (Federal University of Minas Gerais), Azzeddine Boukerche (University of Ottawa),
  Regina B. Araujo (Federal University of São Carlos),
  Antonio A. F. Loureiro (Federal University of Minas Gerais)

• Energy Efficient Opportunistic Routing in Wireless Networks .................................................... 253
  Xufei Mao, Xiang-Yang Li (Illinois Institute of Technology), Wen-Zhan Song (Washington State University),
  Ping Xu (Illinois Institute of Technology), Kousha Moaveni-Nejad (Illinois Institute of Technology)

• Improving an Over-the-Air Programming Protocol for Wireless Sensor Networks Based on Small World Concepts .............................................................. 261
  Guilherme Maia, Daniel L. Guidoni (Federal University of Minas Gerais),
  Andre L. L. Aquino (Federal University of Ouro Preto), Antonio A. F. Loureiro (Federal University of Minas Gerais)

• Performance Evaluation of Multi-Path Routing in Reservation-Based Wireless Networks ......... 268
  Mattias Nissler, Reinhard Gotzhein (University of Kaiserslautern)

• Designing an Asynchronous Group Communication Middleware for Wireless Users ................ 274
  Xuwen Yu (University of Notre Dame), Surendar Chandra

Session 10: DTNs

• RENA: Region-based Routing in Intermittently Connected Mobile Network ................................ 280
  Hao Wen, Jia Liu, Chuanlin Lin, Fengyuan Ren (Tsinghua University), Pan Li (Mississippi State University),
  Yuguang Fang (University of Florida)

• HUBCODE: Message Forwarding Using Hub-based Network Coding in Delay Tolerant Networks 288
  Shabbir Ahmed, Salil S. Kanhere (The University of New South Wales)

Session 11: WSNs, Self-Deployment in WSNs

• Distributed Virtual-Movement Scheme for Improving Energy Efficiency in Wireless Sensor Networks .............................................................. 297
  Carmelo Costanzo, Valeria Loscri, Enrico Natalizio (University of Calabria)

• P&P Protocol: Local Coordination of Mobile Sensors for Self-Deployment ................................ 305
  Novella Bartolini, A. Massini, S. Silvestri (University of Rome, Sapienza)

• Generalized Analysis of a Distributed Energy Efficient Algorithm for Change Detection .... 315
  Taposh Banerjee, Vinod Sharma (Indian Institute of Science)

• Hybrid Multiobjective Approach for Designing Wireless Sensor Networks ............................. 321
  Flávio V. C. Martins (UFMG), Eduardo G. Carrano (CEFET-MG), Elizabeth F. Wanner (UFOP),
  Ricardo H. C. Takahashi, Geraldo R. Mateus (UFMG)

• PROGRESSIVE: A Topology Discovery and Scheduling Protocol for Wireless Sensor Networks .... 325
  Abdulaziz Barnawi, Roshdry Hafez (Carleton University)
Session 12: WLANs and WMNs

- Efficient Channel Assignment Algorithms for Infrastructure WLANs Under Dense Deployment ................................................................. 329
  Suparerk Manitpornsut (University of Sydney), Björn Landfeldt (University of Sydney & NICTA), Azzedine Boukerche (University of Ottawa)

- TCP Performance Optimization in Multi-Cell Wireless Local Area Networks ................................................................. 338
  Ka-Lok Hung, Brahim Bensaou (The Hong Kong University of Science and Technology)

- Performance Evaluation of a Fast MAC Handoff Scheme using Dynamic Adjustment of Scanning Parameters ................................................................. 346
  Richard W. Pazzi, Zhenxia Zhang, Azzedine Boukerche (University of Ottawa)

- On Power and Energy Trends of IEEE 802.11n PHY ................................................................. 353
  Balaji V. Iyer, Thomas M. Conte (Georgia Institute of Technology)

Session 13: MIMO, PHY

- A Space-Time Batch-service Queueing Model for Multi-user MIMO Communication Systems ................................................................. 357
  Boris Bellalta, Miquel Oliver (Universitat Pompeu Fabra)

- Directional Neighbor Discovery in 60 GHz Indoor Wireless Networks ................................................................. 365
  Jianxia Ning, Tae-Suk Kim, Srikanth V. Krishnamurthy (University of California, Riverside), Carlos Cordeiro (Intel Corporation)

- Performance Evaluation and Parameterization of the IEEE 802.16 Contention-Based CDMA Bandwidth Request Mechanism for the OFDMA Physical Layer ................................................................. 374
  Dirk Staelke, Rastin Pries (University of Würzburg), Alexey Vinel (Russian Academy of Sciences), Andreas Mäder (NEC Network Laboratories Europe)

- An Enhanced Mechanism for Efficient Assignment of Multiple MBMS Sessions Towards LTE ................................................................. 384
  Antonios Alexiou, Christos Bouras, Vassileios Kokkinos (University of Patras)

- On the Possibility of Applying Polarization Diversity to MIMO Techniques in Tunnels ................................................................. 392
  Jose Molina Garcia Pardo (Technical University of Cartagena), Martine Lionard, Eric Simon, Pierre Degauque (University of Lille)

Session 14: Dynamic Localization

- Using A-Priori Information to Improve the Accuracy of Indoor Dynamic Localization ................................................................. 396
  Begümhan Turgut, Richard P. Martin (Rutgers University)

- Cognitive Personal Positioning Based on Activity Map and Adaptive Particle Filter ................................................................. 405
  Hui Fang, Wen-Jing Hsu (Nanyang Technological University), Larry Rudolph (VMware Inc.)

- The Role of Colinearity of Sensors in Target Localization Using Distance Measurements ................................................................. 413
  Vaishali P. Sadaphal (Tata Research Development Design Center), Bijendra N. Jain (Indian Institute of Technology Delhi)

- On the Performance of Target Tracking Algorithms using Actual Localization Systems for Wireless Sensor Networks ................................................................. 418
  Efren L. Souza (Federal University of Amazonas), Eduardo F. Nakamura (FUCAP), Horacio A. B. F. de Oliveira (Federal University of Amazonas)

Author Index ............................................................................................................................................................................. 425
