2009 9th Annual International Symposium on Applications and the Internet

(SAINT 2009)

Bellevue, Washington, USA
20 – 24 July 2009
2009 Ninth Annual International Symposium on Applications and the Internet

SAINT 2009

Table of Contents

Message from the Program Chairs
Welcome from the Workshop Co-chairs
Message from the Program Chair of Student Session
Organizing Committee
Program Committee and Reviewers
2009 IEEE/IPSJ COMPSAC/SAINT Joint Concluding Plenary Panel
Joint Panel Description Emerging Pervasive Systems - Research Challenges and Proposed Solutions
Message from the Organizers of FIST 2009
Message from the Organizers of UNECAS 2009
Message from the Organizers of ITeS 2009
Message from the Organizers of MidArc 2009
Message from the Organizers of PASN 2009
Message from the Organizers of ConCom 2009

Wireless
TCP Throughput Estimation by Lightweight Variable Packet Size Probing
in CDMA2000 1x EV-DO Network ................................................................. 1
Takayuki Goto, Atsushi Tagami, Teruyuki Hasegawa, and Shigehiro Ano
Cross-Layer Based Anomaly Detection in Wireless Mesh Networks ........................................ 9
Xia Wang, Johnny S. Wong, Fred Stanley, and Samik Basu
Operation Prediction for Context-Aware User Interfaces of Mobile Phones ................................ 16
Daisuke Kamisaka, Shigeki Muramatsu, Hiroyuki Yokoyama, and Takeshi Iwamoto
Security

An Enhanced Location Privacy Framework with Mobility Using Host Identity Protocol .................................................................23
Keiji Maekawa and Yasuo Okabe
Evaluation of Online Resources in Assisting Phishing Detection .................................................................................................30
Kaigui Bian, Jung-Min "Jerry" Park, Michael S. Hsiao, France Bélanger, and Janine Hiller
Design and Implementation of a Certified Mail Exchange System Using Simultaneous Secret Exchange ........................................37
Keita Shimizu, Shuichi Miyazaki, and Yasuo Okabe

Applications

An Instruction Method for Displaying Trajectory of an Object in Remote Collaborative MR on the Basis of Changes in Relative Coordinates .................................................................43
Yuta Okajima, Shun Yamamoto, Yuichi Bannai, and Kenichi Okada
Aggregate Skyline: Analysis for Online Users .........................................................................................................................50
Shyam Antony, Ping Wu, Divyakant Agrawal, and Amr El Abbadi
Dynamic Load Balancing for Cluster-Based Publish/Subscribe System ..................................................................................57
Hojjat Jafarpour, Sharad Mehrotra, and Nalini Venkatasubramanian

Mining from Network

Using Call Patterns to Detect Unwanted Communication Callers ........................................................................................................64
Tetsuya Kusumoto, Eric Y. Chen, and Mitsutaka Itoh
Selling Practices in Online Fixed-Price Marketplaces .....................................................................................................................71
Adriano Pereira, Diego Duarte, Wagner Meira Jr., and Paulo Góes

Netwrok I

Design and Implementation of Flow-Level Simulator for a Network with Heterogeneous Flows .............................................................78
Takeaki Nishioka, Yusuke Sakamoto, Hiroyuki Ohsaki, and Makoto Imase
On Enhancing Event-to-Sink Data Delivery Throughput in Sensor Networks .................................................................85
Md. Abdur Razzaque, Choong Seon Hong, Cho Jin Woong, and Lee Jang Yeon
Compressing Packets Adaptively Inside Networks .....................................................................................................................92
Masayoshi Shimamura, Takeshi Ikenaga, and Masato Tsuru

Netwrok II

Device Integration in SODA Using the Device Description Language ...........................................................................................100
Chao Chen and Abdelsalam (Sumi) Helal
A Traffic Monitoring Method for High Speed Networks ...........................................................................................................107
Yusuke Shomura, Yoshinori Watanabe, and Naoya Ikeda
Path Selection Metrics for Performance-Improved Onion Routing ...............................................................................................114
Andriy Panchenko and Johannes Renner
Short Paper I

A Table-Driven Programming Paradigm for Context-Aware Application Development .........................................................................................121
  Zhang Junbin, Qi Yong, Hou Di, and Li Ming

Scent Presentation Technique of Pulse Ejection Synchronized with Breathing .................................................................................................125
  Kaori Ohtsu, Junta Sato, Yuichi Bannai, and Ken-ichi Okada

Domain Ontology Learning from Websites ........................................................................................................................................129
  Yu Zhao and Jianqiang Li

Short Paper II

Verification of Accuracy Improvement for CoMPACT Monitor Due to Suboptimal Inter-probe Time ........................................................................133
  Kohei Watabe, Yudai Honma, and Masaki Aida

A Subscription Coverage Technique for XML Message Dissemination ..................................................................................................137
  Yang Cao, Chung-Horng Lung, and Shikharesh Majumdar

Dynamic Topology Reconfiguration Method for Service Overlay Networks Using Users' Community Information ..................................................141
  Tomoyasu Ogasa, Yousuke Takahashi, Hiroyuki Ohsaki, Takeshi Yagi,
  Junichir Murayama, and Makoto Imase

FIST 2009: The First Workshop on Trust and Security in the Future Internet Session 1 - Challenges on Future Internet Infrastructure

Understanding the Challenges in Securing Internet Routing ..........................................................................................................................145
  Ricardo Oliveira, Mohit Lad, and Lixia Zhang

A Novel SeND Based Source Address Validation Mechanism (SAVM-SeND) ..............................................................................................149
  Pingping Lin and Jun Bi

Managing Trusted Keys in Internet-Scale Systems ......................................................................................................................................153
  Eric Osterweil, Dan Massey, and Lixia Zhang

FIST 2009: The First Workshop on Trust and Security in the Future Internet Session 2 - Security Measurements and Analysis

Analyzing the Aftermath of the McColo Shutdown .....................................................................................................................................157
  Steve DiBenedetto, Dan Massey, Christos Papadopoulos, and Patrick J. Walsh

Anshin as Emotional Trust: A Comparison Study between U.S. and Japanese Non-computer-science Students ...........................................161
  Yuko Murayama, Yasuhiro Fujihara, Dai Nishioka, Carl Hauser, and Atushi Inoue
FIST 2009: The First Workshop on Trust and Security in the Future Internet Session 3 - Emerging Concepts and Technologies

Davis Social Links: Leveraging Social Networks for Future Internet Communication .......................................................... 165
  Lerone Banks, Prantik Bhattacharyya, Matthew Spear, and Shyhtsun Felix Wu
Owner-Centric Networking (OCN): Toward a Data Pollution-Free Internet ............................................................. 169
  Claude Castelluccia and Mohamed Ali Kaafar

UNECAS 2009: The Sixth Workshop for Ubiquitous Networking and Enablers to Context-Aware Services Session 1 - Key Technologies for Context-aware Ubiquitous Network Services

Proposal of an Initial Route Establishment Method in Wireless Mesh Networks .......................................................... 173
  Kazunori Ueda and Ken-ichi Baba
A Bloom Filter-Based User Search Method Based on Movement Records for P2P Network ............................................................. 177
  Toru Shiraki, Yuichi Teranishi, Susumu Takeuchi, Kaname Harumoto, and Shojiro Nishio
Method for Inferring High-Order and Dynamic User-Context .................................................................................. 181
  Nakatani Yuichi

UNECAS 2009: The Sixth Workshop for Ubiquitous Networking and Enablers to Context-Aware Services Session 2 - Ubiquitous Network Services based on New Concepts

CCDM: Central Controller-Based Device Management Architecture and Method to Split Management Scripts ............................................................. 185
  Akihiro Sugiyama, Hideya Ochiai, and Hiroshi Esaki
A Network Architecture to Easily Control Devices .................................................................................. 189
  Takahiro Hata, Michiharu Takemoto, Takashi Kambayashi, Kentaro Uchiyama, and Mitsuo Teramoto
Support System for Developing Web Service Composition Scenarios without Need for Web Application Skills ............................................................. 193
  Yasutoshi Miyagi, Yoji Yamato, Yusuke Nakano, and Miki Hirano

ITeS 2009: The Second Workshop on ITeS (IT enabled Services) Session 1 - Key Uses of ITeS in Business Practices

Financial Securitization with Digital Rights Management System ............................................................. 197
  Hirotugu Kinoshita, Tetsuya Morizumi, and Kazuhiro Suzuki
A System for Search, Access Restriction, and Agents In the Clouds .................................................................................. 201
  Tetsuya Morizumi, Kazuhiro Suzuki, and Hirotugu Kinoshita
Enterprise Architecture Create Business Value .................................................................................. 205
  Takaaki Kamogawa and Hitoshi Okada
## IT-Enabled Survey and Its Problems: Analyses of an Australian Internet Poll

Memiko Ootsuki, Tetsuro Kobayashi, and Noboru Sonehara

### ITeS 2009: The Second Workshop on ITeS (IT enabled Services) Session 2 - Application in Public Policy and Political Aspects of ITeS

Information Sharing System for Maintenance of Sewage Facilities

Takashi Okamoto

Business Models for IPTV Service; Integrated or Platform?

Yousin Park, Yunju Chen, and Masashi Ueda

Evaluation of the Competition Policy to Encourage MVNO System in Japan

Yuki Shoji

A Study on How Technological Innovation Affected the 2008 U.S. Presidential Election: Young Voters’ Participation and Obama’s Victory

Shoko Kiyohara

## MidArc 2009: The Third Workshop on Middleware Architecture in the Internet Session 1 - Sign-On & Federation

Towards a Global AAA Framework for Internet

Sébastien Decugis

An Infocard-Based Proposal for Unified Single Sign on

Enrique de la Hoz, Antonio García, Iván Marsá-Maestre, Miguel Ángel López-Carmona, and Bernardo Alarcos

Proposal of Delegation Using Electronic Certificates on Single Sign-On System with SAML-Protocol

Takaaki Komura, Yasuhiro Nagai, Shoichi Hashimoto, Makiko Aoyagi, and Kenji Takahashi

Leveraging PKI in SAML 2.0 Federation for Enhanced Discovery Service

Toshiyuki Kataoka, Takeshi Nishimura, Masaki Shimaoka, Kazutsuna Yamaji, Motonori Nakamura, Noboru Sonehara, and Yasuo Okabe

## MidArc 2009: The Third Workshop on Middleware Architecture in the Internet Session 2 - Security & Performance

Mitsuo Okada, Yasuo Okabe, and Tetsutarō Uehara

Analysis of a Security Incident of Open Source Middleware - Case Analysis of 2008 Debian Incident of OpenSSL

Takeshi Nishimura and Hiroyuki Sato

On Maximizing IP-SAN Throughput over TCP Connections with Automatic Parallelism Tuning for Long-Fat Networks

Takamichi Nishijima, Fumito Inoue, Hiroyuki Ohsaki, Yoshihiro Nomoto, and Makoto Imase
PASN 2009: The Third International Workshop on Practical Applications
of Sensor Networking Session 1 - Data Analysis and Practical
Applications on Large Scale Sensor Networks

A Fault Detection System for Large Scale Sensor Networks Considering
Reliability of Sensor Data ................................................................. 255
Masato Yamanouchi, Satoshi Matsuura, and Hideki Sunahara

RainWatch Project: Location-Aware Realtime Detection and Notification
of Rain on Internet-Based Sensor Network ...................................... 259
Kaveevivitchai Sathita, Hideya Ochiai, and Hiroshi Esaki

Measurement Analysis of the Live E! Sensor Network: Spatial-Temporal
Correlations and Data Aggregation ............................................... 263
Eyes Ben Hamida, Hideya Ochiai, Hiroshi Esaki, Pierre Borgnat, Patrice Abry,
and Eric Fleury

ConCom 2009: The First International Workshop on Concurrent
Communication Session 1 - Communication Architectures
and Security

DCN@MPLS: A Network Architectural Model for Dynamic Circuit Networking
at Multiple Protocol Label Switching .............................................. 267
Javed I. Khan and Omar Y. Tahboub

Study on Multi-path Transmission Model Based on P2P Overlay Networks
for Streaming Data ................................................................. 271
Guochao Jing, Takeshi Tsuchiya, Hiroaki Sawano, Takeshi Kugimoto,
Katsuhiro Sebayashi, Osamu Akashi, Mitsuru Maruyama, and Keiichi Koyanagi

PCSP: A Probable Concurrent Secure and Portable Peer-to-Peer Protocol ........ 275
Graciela Perera and Robert Gilliland

Student Session

Reliable Streaming Transmission Using PR-SCTP .......................... 278
Tomotaka Maeda, Masahiro Kozuka, and Yasuo Okabe

Analysis of UDP Traffic Usage on Internet Backbone Links .............. 280
Min Zhang, Maurizio Dusi, Wolfgang John, and Changjia Chen

Streaming Media Caching on Advanced Relay Nodes ..................... 282
Yusuke Sugio, Hiroyuki Koga, Masayoshi Shimamura, and Takeshi Ikenaga

Multi-base Station Placement for Reprogramming Wireless Sensor Networks ...... 284
Aoi Hashizume, Hiroshi Mineno, and Tadanori Mizuno

Congestion Propagation in Multihop Wireless Networks ................... 286
Yoichi Yamasaki, Hiroyuki Koga, Yutaka Fukuda, Masayoshi Shimamura,
and Yuji Oie

A Proposal of P2P-Based Resource Discovery Mechanism for the Grid .......... 288
Kei Kokubo, Kohei Ichikawa, Yoshimasa Ishi, and Susumu Date
