Ulrich Ultes-Nitsche
Daniel Moldt and
Juan C. Augusto (Eds.)

Modelling, Simulation,
Verification and Validation of
Enterprise Information Systems

Proceedings of the
6th International Workshop on
Modelling, Simulation, Verification
and Validation of Enterprise Information Systems
MSVVEIS 2008

In conjunction with ICEIS 2008
Barcelona, Spain, June, 2008

INSTICC PRESS
Portugal
Table of Contents

Foreword .............................................................................................................................. iii

Workshop Chairs ............................................................................................................... vi

Invited Speakers .............................................................................................................. vi

Program Committee ....................................................................................................... vi

Invited Speakers

Approaches to an All-encompassing Formal Semantics for the UML ................................ 3
Maria Victoria Cengarle

Verification, Validation, Qualification, Certification and Enterprise Modelling: Requirements, Statements and Opportunities ......................................................... 5
Vincent Chapurlat

Full Papers

Formal Specification of Matchmakers, Front-agents, and Brokers in Agent Environments using FSP .......................................................... 9
Amelia Bădică and Costin Bădică

Formal Goal-based Modeling of Organizations ............................................................ 19
Viara Popova and Alexei Sharpanskykh
A Petri Net based Approach to Modelling Resource Constrained Interorganizational Workflows

Oana Prisecaru

Weakly Continuation Closed Homomorphisms on Automata

Thierry Nicola and Ulrich Ultes-Nitsche

Checking Inherently Fair Linear-Time Properties in a Non-Naive Way

Thierry Nicola, Frank Niesner and Ulrich Ultes-Nitsche

A Model Transformation Framework for Model Driven Engineering

Hongming Liu, Xiaoping Jia, Lizhang Qin and Adam Steele

An Executable Semantics of Object-oriented Models for Simulation and Theorem Proving

Kenro Yatake and Takuya Katayama

Modelling Multi-Agent Systems with Organizations in Mind

Matthias Wester-Ebbinghaus and Daniel Moldt

Software Model Checking for Internet Protocols with Java PathFinder

Jesús Martínez and Cristóbal Jiménez

Comparing Methodologies for Service-Orientation using the Generic System Development Process

Linda Tei tou

Modeling with Service Dependency Diagrams

Lawrence Cabac, Ragna Dö rken and Daniel Moldt

An Aspect for Design by Contract in Java

Sérgio Agostinho, Pedro Guerreiro and Hugo Taborda
A Case Study in Integrated Quality Assurance for Performance Management Systems
Liam Peyton, Bo Zhan and Bernard Stepień

Posters

Modeling Multi-agent Logistic Process System using Hybrid Automata
Ammar Mohammed and Ulrich Furbach

Active Database System Realized by a Petri Net Approach
Lorena Chavarria-Báez and Xiaow Li

An Approach to Simulate Enterprise Resource Planning Systems
André Bögelsack, Holger Jeble, Holger Wittges, Jörg Schmidl and Helmut Krcmar

The Linear Conditional Probability Matrix Generator for IT Governance Performance Prediction
Mårten Simonsson, Robert Lagerström and Pontus Johnson

Integrating Formal Approaches and Simulation to Improve Reliability and Correctness of Web Services
George ELEFTHERAKIS and Ognen Paunovski

Leila Jemni Ben Ayed and Fatma Siala

Author Index
