Joseph Barjis and
Ulrich Ultes-Nitsche (Eds.)

Modelling, Simulation,
Verification and Validation
of Enterprise Information
Systems

Proceedings of the
5th International Workshop on Modelling,
Simulation, Verification and Validation
of Enterprise Information Systems
MSVVEIS-2007

In conjunction with ICEIS 2007
Funchal, Madeira, Portugal, June 2007

INSTICC PRESS
Portugal
Table of Contents

Foreword ......................................................................................................................... iii
Workshop Chairs ........................................................................................................ vi
Invited Speakers .......................................................................................................... vi
Program Committee .................................................................................................. vi

Invited Speakers

The Pervasive Role of Modeling and Simulation in a Globalized Business Economy ................................................. 3
Srini Ramaswamy

Process-centric Modelling for Enterprise Information Systems ................................................................. 5
M. Moban Narasipuram

Network Enterprise Systems Safety and the Market Pressure – The Paradigm ...................................................... 7
Pedro Branco

Oral Papers

Resource Workflow Nets: a Petri Net Formalism for Workflow Modelling ......................................................... 11
Oana Otilia Prisecaru

Business Process Modeling Using an Interactive Framework for Immersive Research, Support and Training (I-FIRST) .... 21
Wade M. Poole and S. Ramaswamy
An Innovative Method for Business Process Modeling

Joseph Barjis

Validating Reasoning Heuristics Using Next-Generation Theorem-Provers

Paul S. Steyn and John A. van der Poll

Consistency of Loosely Coupled Inter-organizational Workflows with Multilevel Security Features

Nirmal Gamia and Boleslav Mikolajczak

UML-driven Information Systems and their Formal Integration Validation and Distribution

Nasreddine Aoumeur and Gunter Saake

An Interpretation of Behavioral Consistency of UML-RT Diagrams in Terms of CSP+T

Manuel I. Capel Tuñón, Kawtar Benghazzi Akhlaki, Juan A. Holgado Terriza and Luis E. Mendoza Morales

Checking Properties of Business Process Models with Logic Programming

Volker Gruhn and Ralf Laue

Checking Complex Compositions of Web Services Against Policy Constraints

Andrew Dingwall-Smith and Anthony Finkelstein

Extending CADP for Analyzing C Code

M. Mar Gallardo, P. Merino and D. Sanan

Process-oriented Organization Modeling and Analysis

Viara Popova and Alexei Sharhanskykh

Transformation of BPMN Models for Behaviour Analysis

Ivo Raedts, Marija Petković, Yaroslav S. Usenko, Jan Martijn van der Werf, Jan Friso Groote and Lou Somers
Formal Semantics for Property-Property Relations in SEAM Visual Language: Towards Simulation and Analysis of Visual Specifications ......................................................... 138
Irina Rychkova and Alain Wegmann

Posters

Bridging the Gap between XPDL and Situation Calculus: A Hybrid Approach for Business Process Verification ......................... 151
Bing Li and Junichi Iijima

Support of Project Planning in Chemical Engineering via Modeling and Simulation ................................................................. 157
Bernhard Kausch, Morten Grandt and Christopher M. Schlick

A Specification and Validation Approach for Business Process Integration based on Web Services and Agents ....................... 163
Djamel Benmerzoug, Mahmoud Boufaida and Fabrice Kordon

Using Ethnographic Techniques to Describe Requirements Engineering Processes in Geographic Information Systems Workgroups ......................................................... 169
Luis Fernando Medina Cardona

A Healthcare Center Simulation using Arena ............................................. 175
Joseph Barjis and Matt Hall

Author Index ........................................................................ 181
