# Contents

## Soil Behavior

### One-Dimensional Consolidation of Saturated Clays under Time-Dependent Loadings Considering Non-Darcy Flow
Zhongyu Liu, Liyun Sun, and Jinchao Yue

### Applications of Adaptive Time Stepping in Analysis of Biot Consolidation
Andrew J. Abbo, Daichao C. Sheng, and Scott W. Sloan

### A Calculation Method of Secondary Compression Index for Natural Sedimentary Clays Using Void Index
Lingling Zeng and Songyu Liu

### Compressibility Behavior of Soft Clay Sediments
Mahdia Hattab, Tammam Hammad, and Jean-Marie Fleureau

### Strain Softening and Instability of Loose Sand in Plane-Strain Compression Tests
Dariusz Wanatowski and Jian Chu

### A Case Study of Undrained Shear Strength Evaluation from In Situ Tests in Soft Louisiana Soils
Lei Wei, Rohit Pant, and Mehmet Tumay

### Critical State Parameters of Kentucky Clay
Melanie R. Anderkin and L. Sebastian Bryson

### Comparison in Mechanical Behavior between Undisturbed and Reconstituted Shanghai Soft Clay
Bo Chen, De’an Sun, and Ke Zhou

### Correlation between Different Physical and Engineering Properties of Tropical Peat Soils from Sarawak

### Comparison of Laboratory and Field Moduli of Compacted Geo-Materials
Deren Yuan, Manuel Celaya, and Soheil Nazarian

### Characterization of Compacted Loess by Electrical Resistivity Method
Fusheng Zha, Songyu Liu, Yanjun Du, Kerui Cui, and Long Xu

### The Ultimate Uplift Capacity of Multi-Plate Anchors in Undrained Clay
Richard Merifield and Colin Smith

## Constitutive Modeling

### Vertical Stress under Point Load on Cross-Anisotropic Elastic Half-Space with Reduced Parameter Material Model
Amit Prashant, Abhishek Srivastava, and Gyan Vikash
Investigating the Microstructure of Compacted Crushed Callovo-Oxfordian Argillite ................................................................. 186

Analytical Solution and Numerical Simulation of Shear Bands along Different Stress Paths in Three-Dimensional Stress State .................................................. 192
Wenzhan Zhen, De'an Sun, and Yaoyao Chen

Comparative Modeling of Shear Localization in Granular Bodies with FEM and DEM ............................................................. 198
Lukasz Widulinski, Jan Kozicki, and Jacek Tejchman

A Micro-Mechanical Simulation of Sand Liquefaction Behavior by DEM .......................................................... 204
Danda Shi, Jian Zhou, Jianfeng Xue, and Jiao Zhang

Study on the Deformation of Loose Sand under Cyclic Loading by DEM Simulation .......................................................... 212
Minyun Hu, Catherine O'Sullivan, Richard R. Jardine, and Mingjing Jiang

Three-Dimensional DEM Modeling of Triaxial Compression of Sands ........................................................ 220
Ye Lu and David Frost

3D Modeling of Piping Mechanism Using Distinct Element Method .......................................................... 227
Jian Zhou and Kai-min Zhou

A Coupled Micro-Macro Method for Pile Penetration Analysis .......................................................... 234
Weifeng Jin and Jian Zhou

Model Test and PFCnd Numerical Analysis on Soil Arching Effects Surrounding Passive Laterally Loaded Piles .......................................................... 240
J. Jiang, B. Qi, J. Zhou, and Q. Y. Zeng

Method to Evaluate the Shear Strength of Granular Material with Large Particles .......................................................... 247
Hu Wei, Etienne Frossard, Pierre-Yves Hicher, and Christophe Dano

Experiments on a Calcareous Rockfill Using a Large Triaxial Cell .......................................................... 255
Hu Wei, Christophe Dano, and Pierre-Yves Hicher

Investigation of Mechanical Response Induced in Dynamic Compaction of Sandy Soils with PFCnd .......................................................... 261
Mincai Jia and Jian Zhou

Local Deformation of Compacted Soil in Triaxial Compression Tests Using PIV Analysis .......................................................... 269
Y. Nakade, Y. Nakata, M. Hyoudo, and H. Qiao

The SEM Analysis of Rock-Soil Mini-Structure after Saturation .......................................................... 275
Zhen Liu, Hecheng Liang, and Jie Zhang
